The **Elks Mutual Benefit Association** was established on December 29, 1878, as a co-operative relief association, and is composed only of second degree members of the Benevolent and Protective Order of Elks. The founders, recognizing the uncertainty of human life, and the natural desire manifested by the members of the order to provide for those they leave behind by death, felt it due to organize an association to provide and maintain a fund for the benefit of the families of deceased brothers or such persons as they might name. The purpose of the society is to provide for the payment to the legal representatives of deceased members such sums as the by-laws prescribe.

The **Chicago Lodge, B.P.O.E.,** has lost by death Devout Elders

The annual benefits of the B.P.O.E. are important amusement events. Usually a very strong cast of leading stars and combinations is presented in a prominent theater and the proceeds appropriated to charitable purposes.

The dedication of the Elks' Rest in Austin and Greenwood Cemetery was a very important event. It occurred on August 13, 1882, attended with imposing ceremonies, brief and interesting, conducted by B. R. Hall, with an address by Simon J. Quinlin. The monument of solid granite from the Hallows quarries, Maine, 8 x 4 1/2 feet at the base and 5 feet 8 inches high, is surmounted by a bronze elk, one of two manufactured for exhibition at the Centennial Exposition. On one end of the base of the monument is inscribed "Friendship and Charity"; on the other is "Justice and Brotherly Love." On one side of the base, "The faults of our brothers we will write upon the sands," is inscribed; and on the reverse, "Chicago Lodge, No. 4, B.P.O.E., Elks' Rest."

The **CHICAGO THEATRICAL MECHANICS ASSOCIATION**, as the name indicates, is composed of members of the theatrical profession who are employed about the theaters and with travelling companies in a mechanical capacity. It was organized by members of the legislature of Illinois on May 3, 1884. The incorporators were John Bairstow, John E. Williams and Frank F. Goss. The first officers were, on April 22, 1884—

John Bairstow, president; Jay E. Tripp, vice-president; Frank F. Goss, recording secretary; Alfred W. Palmer, financial secretary; John Faust, treasurer; and Thomas Bent, John E. Williams, J. Howard Rogers, Joseph Maddox, Benjamin F. Lee, A. H. Bond, and William F. Cross, directors.

The **CHICAGO NEWS-LETTER** was first issued in 1880, by Davison Dalziel, and its advent was at a time when Chicago was unrepresented in the particular line of journalism which the News-Letter espoused to fill. It was devoted exclusively to the theatrical profession, and was an eight-page of fifty columns each, published once a week. In 1883, the paper was enlarged to twelve pages, and publication was commenced simultaneously in New York and Chicago. It is devoted exclusively to the theatrical profession, and is the highest authority on all matters pertaining to the stage. In circulation the News-Letter has rapidly increased year by year until it is now the leading paper in its line in the city of Chicago. Mr. Dalziel is editor-in-chief, and is ably assisted by a large corps of experienced writers.

The **DALZIEL NATIONAL PRINTING COMPANY** is the successor to the National Printing Company, formerly known as the New Dalziel Building, corner of Dearborn and Quincy streets, where they occupy over one-half of an elegant structure, 100 x 52 feet in area, and six stories and basement in height. In its special line this is the representative concern of America, and of the proprietors are endeavoring in every way to make a reputation that shall be National. The newly-occupied premises have been built especially for the purposes of the printing company, and are completely fitted with every modern apparatus necessary to the prosecution of the business in hand. A specialty is made of show-printing, and the general appreciation of the work turned out from the house is evidenced by the extended and influential patronage of the company.

Davison Dalziel was born in the City of London, England, in 1853. During his youth he was granted the privileges of a superior education, and on attaining manhood entered journalism, with which he has been identified all his life. In 1876, while on a visit to the Sydney, Australia, Morning Herald, he established a journal called the Echo. He continued to control its destinies for about two years, when he sold out and came to America, locating in the San Francisco Daily News, which was identified with it up to 1880, when he withdrew and came to Chicago. This city was then without an exclusive amusement journal. Under the name of Mr. Dalziel, everything was in its own day. All this being the case, Mr. Dalziel, seeing the opportunity, stepped into the field and commenced the publication of the News-Letter. A year later he devised the Dalziel Railway Advertising scheme, now known all over the West, and at present has under his control about thirty thousand miles of railroad track for advertising purposes. He is also the president and principal stockholder in the Dalziel National Printing Company, one of the leading theatrical printing establishments in America. Mr. Dalziel is a member of the Order of Elks, Chicago Club, Washington Park Club, and the Manhattan Club of New York.

Stephen G. Pitkin, senior member of the Pitkin & Vaughan Company, theatrical printers, was born in Boston, Mass., July 25, 1835. His father, Wesley Pitkin, removed to the West in 1835, and located permanently in Chicago in 1844, bringing his family, Stephen included; and here he conducted the business of contractor and builder until a few years prior to his death, from which date April 11, 1880, at the age of seventy-three years. His paternal grandfather, Stephen Pitkin, was born in Hartford, Conn., in 1772; in 1796 he married and located at Marshfield, Vt., where he spent the remainder of his days. He was a man of business, industry and sterling integrity, enjoying the confidence of the people, having represented his district twenty-eight years in the Legislature, and was a member of the Supreme Bench at the time of his death in 1834. He left a family of seven sons and three daughters, of which the eldest daughter, now residing in Iowa, only remaining, the others having all passed away within the last few years, exhibiting a remarkable degree of longevity. Stephen G. Pitkin commenced his career as a
**ATHLETIC AMUSEMENTS.**

In the numberless diversions which come under this category, Chicago has borne a leading part. So many and so frequent have been the occurrences of this nature that it is impracticable to present them, even in tabular form. Hence the single item of Base-Ball has been selected as a specimen of, and then the sketches of sundry clubs are given as representative movers in, the athletic sports.

### NATIONAL BASE-BALL ASSOCIATION

- **On March 17, 1871, in New York City,** an authorized delegation from leading base-ball clubs determined on a professional "National game," and formulated sundry features, the chief of which was a separate schedule, by virtue of which was represented, by its "White Stockings." During the existence of this Association, the Chicago Club (alias "White Stockings") ceased to be represented during the years 1872 and 1873—the great fire of 1871, by its steelyard bullets compelling attention to matters other than pastimes.

During the existence of the Association, the competing clubs were as follows: Chicago, 1871, 1874-75; Athletic, of Philadelphia, 1871-75; Boston, 1871-75; Mutual, of New York City, 1871-75; Olympic, of Washington, D.C., 1871-72; Haymakers, of Troy, N.Y., (styled "Troy") in 1872, 1871-72; Cleveland (alias Forest City), 1871-72; Kekionga, of Fort Wayne, Ind., 1871; Rockford (Ill.), 1871; Baltimore, 1872-74; Atlantic, 1872-75; McCracken's Eckford, 1872; National, of Washington, D.C., 1872; Philadelphia, 1873; Hartford, 1873; Resolute, of Elizabeth, N.J., 1873; Maryland, of Baltimore, 1873; Hartford, 1874-75; St. Louis, New Haven, Red Stockings, Centennial, and Western entered in 1875.

### NATIONAL BASE-BALL LEAGUE

- **In 1875,** the National Association Clubs numbered thirteen, of which only four were members at the time of its organization in 1871. Circumstances produced demoralization and ended in the extinction of the Association. On February 2, 1876, the National Base-Ball League was organized, also in New York City. The clubs represented at the convention were the Chicago, Boston, Athletic and Mutual clubs; the Hartford, St. Louis, Louisville and Cincinnati clubs made the complement of contestants in the first League season.

When A. Hurlbert, of this city, was the prime promoter, and was styled the "father of the League," he was its first and the only president until his death, April 10, 1882. Mr. Hurlbert is buried in Graceland Cemetery. "In addition to the monument erected by his family, the National League have appropriately marked his last resting-place by a granite monument bearing the name of every League club, and typical of the National game which he loved and served so well."

One of the marked peculiarities of the National League was in its limitation of membership and in the fact that eight clubs was fixed and continued as the maximum number. A "contract was a contract" with its managers and members; and when a player had signed with a League club, he was held to that exact contract or quickly expelled from League association and recognition.

The League clubs have been as follows: 1876-86, Chicago and Boston; 1876, 1883-86, New York and Philadelphia; 1876-77, 1884-86, St. Louis; 1876-85, St. Louis-86, Cincinnati; 1876-77, Hartford, St. Louis; 1878-85, Providence; 1878, Indianapolis and Milwaukee; 1879, Buffalo; 1879-84, Cleveland; 1879-82, Troy City; 1879-80, Providence; 1879-82, Detroit.

### CHICAGO BASE-BALL CLUB

- The club's principal players, inclusive of the season of 1885, have been: Addy, Robert, 1878; Anson, Adrian C., 1876-85. Barnes, Roscoe C., 1876-77; Beard, O. P., 1885; Bradley, George W., 1877; Brown, Joseph E., 1884; Burns, Thomas E., 1880-85. Cassidy, John P., 1858; Clarkson, John G., 1882-83; Corcoran, J., 1880-84; Cuthbert, Ed., 1874. Dalrymple, A., 1879-85; Devlin, James, 1874-75; Duffy, Charles, 1871.

Chicago has a naturally reasonable pride in her base-ball club. In the thirteen years she has had a representation in the chiefest and most reputable of base-ball organizations, the home club has at least, proved itself the peer of the best of its competitors (Boston), and won the "pennant" over that superior club by wider odds in games won and lost, as will appear from the appended table:

Little more can be said in the limited space at command, and the notes of the history of the "Chicagos" must be almost entirely restricted to an exhaustive and complete schedule of its games on the "home grounds."

These "home grounds" were located as follows: Until 1877, near corner of State and Twenty-third streets. On November 6, 1877, the Club was granted, by the City Council (vote, ayes 26, nays 5) a lease of a portion of the Lake Front lying between Washington and Randolph streets, which was the occupied as a base-ball park until the close of the season of 1884. In 1885, new grounds were procured near the corner of Congress and Loomis streets, and at this date such is the locale of the Club.
WASHINGTON PARK CLUB.—During the winter of 1882–83, a number of Chicago’s wealthy citizens were actively involved in finding better located and more extensive grounds for a racing course than those then existing at the extreme edge of the western corporate limits, latterly styled the Chicago Driving Park, but originally known as the Chicago Jockey and Trotting Club Park. Among the hard-workers in the project were several of the ex-officers and whilom stockholders who had withdrawn from the West Side association. The prime idea of the proposed club was to make the South Side park a course for race-horses only, and that trotting and pacing matches, which, according to turfmen, require a hard track, should be continued on the West Side. On February 10, 1883, Washington Park Club was formally organized. The purposes of this association are:

Promote good fellowship among its members, by providing a club-house and pleasure-grounds for their entertainment, where at all times they may meet for social intercourse; and, further, to encourage, by providing the proper facilities, raising, improving, breeding, training, and exhibiting horses, at meetings to be held at stated times in each year.
ATHLETIC AMUSEMENTS.

The present number of stockholders is one hundred and seventy-four.

Washington Park is situated on the most westerly extreme of the South Park system, extending from Cottage Grove Avenue, on the east, to South Park Avenue, on the west, and from Sixty-first Street, on the north, to Sixty-third Street, on the south. It is about six and one-half miles south of the Court House, and is convenient of access by way of four of the principal railway lines, by street-cars, or by private conveyances along finely improved boulevards and streets. The inclosed grounds are a trifle over eighty acres in area.

The land has a gentle, natural slope from the east and north, thus giving the main and practice tracks easy up and down grades, which turifiers consider as more acceptable and faster than dead-level runs. Both within and outside the main tracks, a superior system of landscape-gardening has been liberally indulged in, and a rolling surface and miniature lakes augment the truly park-like appearance of the property, without detracting from its intended uses or conflicting with the designed purposes. An unsurpassed main course, a convenient and desirable practice track, a three-quarters "dash" arrangement, a steeple-chase route, a capacious grand-stand, commodious stabling, a beautiful and roomy club-house, and the scope and completeness of usual and added features, combined, make Washington Park the peer of any similar institution in this country. As to the club membership, it would be difficult to find another so large an association of reputable and courteous gentlemen.

JOHN E. BREWSTER, secretary of the Washington Park Club, was born at Ashland, Mass., on August 27, 1833, the son of Richard Rush and Louisa (Price) Brewster. The Brewsters are an old New Hampshire family, and their descendants have been prominent in the commercial and financial history of that Common-wealth. During Mr. Brewster's boyhood, he alternated his attendance at the public schools, by learning the trade of a carpenter during the summer months, and at the age of seventeen launched out as a contractor on his own account. At the age of twenty-one, he went to New York City and took a position as a salesman in a jewelry manufacturing concern. He so continued until 1866, when, after a brief vacation, he engaged in business on his own account. He established a straw-goods manufactury, and so successful was his venture that, twenty years later, he is now ranked among the largest in the country, employing at one time from six hundred to eight hundred hands. In January, 1880, he disposed of his valuable interest in New York, and came to Chicago to form business relations with the well-known firm of A. S. Gage & Co. In company with A. S. Gage, Mr. Brewster formed the Brewster Straw Works, to operate in conjunction with, and manu-

WASHINGTON DRIVING PARK.
York, ever since its organization, and that is the only club he has been at all interested in until becoming identified with Chicago's well-known organization. He was married on December 11, 1862, to Jane, daughter of Rev. J. A. Clark, of New York City.

The CHICAGO HORSEMAN NewSPAPER COMPANY was in
orporated in November, 1882, with a paid-up capital of $50,000. The incorporators were H. V. Bemis, Charles H. Curtis, J. M. Davis, E. B. Abercombie, and M. W. D. Hillibrand. They had been at the head of the company are H. V. Bemis, president and treasurer; Charles H. Curtis, vice-president, and J. M. Davis, secretary. The company own and publish the Chicago Horseman, a weekly paper devoted exclusively to turf matters. It is a quarto of thirty-two pages, printed on fine colored paper, beautifully illustrated, and has a circulation, principally in the West, of seven thousand copies.

It is a part of its kind in the United States, and has at one time with a most enthusiastic reception from horsemen in all parts of the country. It was originally founded by E. L. Stowe, in 1880, and four years after, passing through several hands, it was bought by H. V. Bemis and thrown into a stock company. Mr. Bemis is its editor-in-chief, while E. B. Abercombie, who became connected with it when it was first started, is its associate editor. J. M. Davis is its business manager.

J. M. Davis, secretary of the Chicago Horseman Newspaper Company, and business manager of the Chicago Horsemance, was born at Hamilton, Canada, on July 11, 1850. He was educated at Alton and Belleville, Canada, and came to Chicago in the spring of 1872. He was first employed as clerk in the Commercial Exchange Bank; but his taste and talent lying in another direction, he began to deal in horses in 1873. In company with his brother, George W. Davis, he opened a livery and stable establishment on South Paulina Street, where they made a specialty of roadsters, fine carriage horses and trotters, until the year 1874. During this period they were selected from Canada some of the finest horses in the city and did a thriving business. In 1880, when E. L. Stowe started the Chicago Horseman, Mr. Davis became its business manager, but resigned at the end of six months to take charge of the Chicago Park Club House when that property fell into the hands of Mr. Bevis & McAvoy. After they sold out in 1883, he went back to the paper and took charge of its advertising department. When the company was incorporated in 1884, he was one of its commissioners and was elected secretary. He is also a most successful financier and the paper has been a pronounced success under his management. Mr. Davis is extremely well versed in all horse matters and has furnished reports for the press on such subjects ever since 1867, both in Canada and the United States. He is expert also in all newspaper advertising and in general matters pertaining to the press. He is a member of the Chicago Press Club.

"Nick" Norton was probably christened Nicholas Norton, but familiarity has bred a contempt for any longer name than "Nick." Everybody knows him as William Emmett's conserva

Newspaper Company. He was born at Heidelberg, near Prussia, on January 20, 1854, and came to America in 1852, settling at Detroit, Mich. In the free schools of Michigan, he finished a common-school education which he compulsory began when five years old, in Germany. In 1876, he was an appren
tice on the Detroit Tribune, with C. H. McConnell. After four years he graduated from a finished printer to a supernumerary at the Metro
politan Times. He filled all positions in this theater from property man to scene-shifter, and from By-man to door-tender, at the same time doing all the bill-posting. Mr. Phelps furnishing the money—$75 to pay for bill-boards, the receipts were divided. They sold out to Mr. Walker for a sum equal to the capital invested, and it was then that Mr. Norton made his first bow to the public, on August 12, 1863, as a juggler. He made a great hit at the Metropolitan, afterward known as the Comique, but now (1866) a livery stable. He travelled through the circuit of the Michigan Fairs, in Saginaw, Grand Rapids and Chicago, appearing here at Belles' Concert Hall, corner of Kinzie and Wabash, in the Uhlig Stock. From here he went to Toledo, opening there on February 22, 1864. It was in Toledo in April, 1864, that J. H. Haverly first ventured into the show business, and there Nick Norton was the first stage manager, the following being the first stage manager at Mont
celli's Athenaeum, Cleveland, going afterward to Carr's Melodieu
n, Buffalo. There, in 1864, Mr. Norton first met William Emmett. The two became partners in the management of the House at which he made his first professional appearance—now known as the Theatre Royal—in and at which he remained till 1857. During the winter of that year, he traveled south as manager of Cooke's English Circus. On the return he came to Chicago, and took the stage management of Hamlin's Coliseum, now the Grand. On September 3, 1878, he was chosen stage manager of the Academy of Music for William Emmett. He remained there until May, 1881, when he went to Brooklyn, N. Y., opening the Standard on October 17, for Hyde & Behman. On December 12, 1882, he was appointed man
ager of the Grand Opera House, Brooklyn, N. Y., where he re
mained till the close of the season, on May 31, 1883. He then managed Sam Levey's for Weeks' News, and was engaged to J. H. Have
ry, after which Mr. Norton returned to Chicago and opened the Lyric Theatre, on February 21, 1883, as manager for William Emmett. Here he remained till April, 1885, when he was elected secretary of the Chicago Driving Park.

ADDITION DOUTHY, one of the well-known horsemen of Chicago, was born at West Avon, Livingston Co., N. Y., on November 30, 1851, his parents being William L. and Ellen C. (Haverly) Douthy. He grew up in a well-to-do family, and received some schooling which was of rather a desultory character. When twelve years of age, he went to Monroe County, N. Y., where he was engaged on a farm for three years, and like other boys in the same walk of life attended winter school. In 1872, he went to Toronto, Canada, and was employed as a stage-driver, for seven years, working on the various routes centering in Toronto. In those days, railroads were scarce in Canada, and the stage-driver was an important factor in the transmission of mails and passengers. In 1874, Mr. Douthy came to Chicago and went to work for Levi North's circus as driver of the band-wagon. Shortly after, he took entire charge of the stock, and controlled that department for three years. He then left the company and spent his time between Chicago and St. Louis until the War of the Rebellion. At that time he entered the Fourth Division, 15th Army Corps, as master of the horse of Sherman on the famous "March to the Sea." He handled horses, in various portions of the country, after the close of the War until 1867, when he came to Chicago to locate permanently. He married Catherine Sheald on July 9, 1867, Mr. Douthy, in addition to handling trotting horses, is the proprietor of a large livery stable, where many of his equine charges are housed.

THE FARRAGUT BOAT CLB is the oldest club of that characteristic in the city, and was organized on March 10, 1872, at the residence of Henry P. Smith, No. 1180 Indiana Avenue, with a limited membership of ten. The following were elected officers: Henry P. Smith, president; Alfred S. Porter, vice-president; William M. Harper, secretary; Julius Steele, treasurer. At that time the club owned one barge, the "Farragut," and used the timber-house of the Illinois Central Railroad Company, at the foot of Thirtieth Street, as a boat-house. In October, 1872, the following officers were elected: Frank Billings, president; William N. Perry, vice-president; Alfred S. Porter, secretary; Julius Steele, treasurer. The constitutional scope of membership was also enlarged.

In the spring of 1873, the Club's first boat-house was erected, at the foot of Twenty-first Street, at a cost of about $350, which was destroyed by a storm during the spring of 1874. At the time of the demolition of this boat-house, there was an inclination among some of the members to discontinue the existence of the Club; but with an augmented membership, a new interest was manifested, and a new club-house was erected at the foot of Thirteenth Street, costing about $450. On July 1, 1875, the Club was incorporated under the State law. The boat-house was removed, in the spring of 1876, to Riverside, on the Calumet River, and continued for training purposes, a new structure being erected on the old site, at a cost of $1,150. In November, 1877, the latter edifice was torn down by a severe storm, and but three boats saved from the wreck — the "Farragut," "Richard C. Oliphant," and "Her
mia," and these in a badly damaged condition. During February, 1878, the erection of a club-house at the foot of Twenty-fifth Street was commenced, and completed in the summer of 1879, at a cost of $4,500; the members, at that time, owned individual boats valued at about $2,000. In April, 1884, a severe storm again wrecked the boat-house, also destroyed the fleet, then numbering some thirty bottoms. A temporary struc-
ATHLETIC AMUSEMENTS.

Henry Smith, in honor of whom the subject of this sketch was named, was a pioneer in the history of the Chicago & Northwestern Railway, and Orson Smith, Sr., a well-known resident in the early days of Chicago, were both uncles of Henry P. Smith. The latter was born on the farm near the city of his birth, with the exception of a few years in his boyhood. His education was attained at the public schools; he afterward attended the University of Chicago. On entering business, he first engaged in the wholesale dry goods business and after two years, and has since then been connected with the wholesale paper trade. For several years he was identified with the Rock River Paper Company, and in 1870 accepted a position in a house now known as Barrett & Kimball, wholesale dealers in building paper, etc., serving that firm as cashier and confidential clerk. Mr. Smith, during his youth, was an inveterate attendant upon all the sports where physical development and strength might be aided. In the days of Kornedy’s gymnasium, he was a constant attendant, and also upon the successor to that institution, the Chicago Athenæum Gymnasium. In the early spring of 1872, he was the moving spirit in the organization of the Farragut Boat Club, which has since grown from the possession of a single boat to an institution second to none in the whole country. The organization of the club was effected at Mr. Smith’s house, and he was chosen with the election to the first presidency of the association.

In 1875, he served the club as captain for a year. Captain Smith participated in the first race in which the Farragut men pulled, in an exhibition between the Farragut and the Chicago Yacht Club, in which the former won the race. At the Grand Haven and Spring Lake Regatta, in 1874, he pulled in the winning four-oar barge race; and in 1875, rowed stroke oar in a double-scull race, the same, at Grand Haven. In the fall of 1876, he was entered in the regatta at Riverdale, as crewman of the Farragut boat Club, which was rowed to the victory in a race of nine starters. In 1876, he also rowed at Toledo, when the Farragut four took second prize to the Forest City crew in a field of seven, and after several years, were entered at the same year at Peoria with four crews in the race. In 1878 and 1879, he pulled a winning oar in the six-oar barge races at South Chicago, and Dixon, Ill. For several years he has been upon one or more of the committees, and was upon the election and committee on membership. From its foundation, Mr. Smith has always taken an active interest in the workings of the Farragut Club. It is natural that a man in whose career has been the instigator of an enterprise that has developed into hard-luck proportions and famous reputation.

LYMAN B. GLOVER, editor of the Saturday Evening Herald, and president of the Farragut Club, was born at Ann Arbor, Mich., on February 10, 1846. His parents removed to Jackson ville, Ill., when he was about two years old, and it was in that city that Mr. Glover was reared and received his early education. After attending a private school during his boyhood, he went to college, at Crawfordsville, Ind., and took the thorough classical course, graduating, with honors, in 1867, at the age of twenty-one. Returning to Jacksonville, he took the position of editor of the Daily Journal, and continued said position for about one year, when he purchased a half-interest in that newspaper, his partner, Horace Chapin, being the present sole owner. Upon this change, Mr. Glover assumed the editorship of the Jacksonville News, a weekly paper of the Daily Journal, Mr. Chapin being the postmaster of Jacksonville, and his time being wholly occupied in the duties of his office. Mr. Glover continued in full charge of the Journal until April, 1871, and then, owing to rapidly failing health, induced by the hard labor devolving upon him, sold out his interest, and withdrew from active newspaper work. During his career at Jacksonville, he conducted one of the brightest papers in the State and won a splendid reputation as a journalist. He then came to Chicago, and, after a brief vacation, assumed the position of general manager of the Northwestern Department of the American Associated Press, an office of importance and many duties, and continued as press manager for about two years. In the fall of 1875, having recovered his health, he decided to again embark upon the journalistic field, and, in company with Mr. John M. Harbold, conducted the Saturday Evening Herald, the first issue occurring on September 27, 1875. Since its advent, this paper has been under the editorial management of Mr. Glover, and he has conducted that department with such marked ability as to augment his considerable reputation as a newspaper writer. Prior to coming to Chicago, in fact from early boyhood, Mr. Glover was always an admirer of everything in the way of aquatic sports, and shortly after taking up his residence in the city, he became a member of the Farragut Boat Club, with which organization he has since been heartily interested and actively identified. Perhaps there is no one in the West that has felt as much interest in, or had so much to do with settling the position of Mr. Glover. His great love for the amusement, as well as his professional business, keeps him constantly interested in these matters. In October, 1876, he was elected vice-president of the
HISTORY OF CHICAGO.

Farragut Boat Club, and served one year; he then became president; and so highly regarded is he by the members of the Club that he has been re-elected for the fourth consecutive term. During the long period which he has served as president, the Farragut Club has made improvements to the value of $35,000. From the time when he was president of an association that owned a little house on the lake, moreover, to the day when the Club occupies the finest club-house devoted to aquatic purposes in the world, he has been "hand and glove" in promoting every interest for the benefit of the "Farragut boys. Mr. Glover is a member of the Mississippi Valley Racing Association; was sec-
tary and treasurer for four years and president for two years, and was tendered the presidency for the two successive terms, but de-
ed owing to his business interests requiring so much attention.

In 1853, he was elected to the Interstate Regatta held at New Orleans, and referee of the Mississippi Valley Regatta, at Moline, Ill. He was also tendered a position on the executive board of the National Association of Amateur Oarsmen, of which he is an honorary member, but declined that honor. He is one of the prominent members of the Chicago Press Club, and belongs to divers other organizations of a similar character. Mr. Glover was married in October, 1876, to Miss Louise Thompson, of Chicago. They have two children—Mildred and Livingston.

Lewis W. Pitcher, of the well-known concern firm of L. W. Pitcher & Co., is the active, unremunerated, president of the Farragut Boat Club; and, although he has not participated in any of its events, he has ever manifested a hearty interest in the doings of the Club. In 1858, he became identified with the organization, and for some time there has been corresponding, from the Farragut men participated that he has not attended and shown his interest in their work. In October, 1883, he was elected vice-

President, and at the end of his first term he was re-elected, and is now in a position of prominence in the present.
was born at Natchez, Miss., on February 15, 1847. Although born in a southern city, Mr. Staples is of northern descent, his parents hailing from the New England States. The family continued their residence in the South until Frank was five years of age. His early years were spent in Chicago, where he was received as a student and has since made his home. He received his education in public schools, but shortly prior to completing his studies he became imbued with patriotic zeal, ran away from home, and enlisted in Miss Sarah C. Hall, of Chicago, on May 6, 1865.

Henry C. Van Schaack, captain of the Farragut Boat Club, was born at Charleston, S. C., on December 14, 1866. Before the War of the Rebellion had fairly commenced, his family removed to New York City, where they continued their residence until the close of the war. In 1886, they came to Chicago, and it was here that Mr. Van Schaack was reared and educated. His preliminary studies were attained at the school of the late Professor H. H. Babcock, of this city; after which he entered the Chicago University, taking the full literary course, and graduating, with honors, in the class of 1881. He then commenced his legal studies at the Union College of Law, from which he graduated, and was admitted to the Bar in 1883. He is now engaged actively in the practice of law, and although young in years has already made rapid advancement in his profession, and the future for the young barrister is full of promise. Mr. Van Schaack is among the few who can maintain a connection with a club in any department of its work. He became an active member of the Farragut Boat Club, and at the Mississippi Valley Amateur Rowing Association regatta, held in St. Louis, in 1884, he pulled in the junior-four-oar race, which was carried to the most excitement of the competitors, in which the Farragut crew won the first place, beating the St. Paul crew by two seconds. In October, 1884, Mr. Van Schaack was elected captain of the club, and it is doubtless due to his splendid efforts at that time that he is indicated by the Farragut Club as the "champion four" of the world. The Farragut Club scored such a signal victory in the season of 1885; Captain Van Schaack gave his personal attention to the selection and training of the "champion four" of that season, and his efforts were rewarded by his crew winning eight consecutive races, competing against the best oarsmen of the West. He has been a member of the Athenaeum Gymnast in that of the past six years, and has kept up a constant physical training that has been of great benefit to him. He is also a member of the Calumet Club and the Psi-Upsilon College Fraternity.

Charles S. Downs, commander of the Farragut Boat Club, has been one of the most active members of the club, as shown by the organization. He was born in Chicago, on December 23, 1852. His father, A. Sidney Downs, came to this city in 1842, and for the greater part of his life was secretary and treasurer of the Chicago Railroad. Mr. Downs, at an early age, passed through the high-schools, and closed his school-days in 1870, to enter into the employ of Field, Leiter & Co. He has been engaged with that well-known firm for over fifteen years, is one of the directors, and a member of the firm. About the time he entered into business life his health was very poor. The Farragut Boat Club (which was organized a short time later) afforded him the opportunity for exercise, and the hope of benefiting his physical condition, Mr. Downs joined the organization and became an active member. The step taken was of vast benefit to his health, and his record as a winner in the regattas of the Farragut Club is proof that he became a skilled oarsman, having been more times in winning crews than any other member of the Club. In October, 1873, he was elected captain of the Farragut crew, and pulled stroke oar in the six-oar barge which won the race at Riverdale, III. In April, 1874, he was elected lieutenant-commander, and was stroke in the winning four-oar race at Geneva Lake, and bow in the winning four-oar race at Riverdale. In 1875, he was the winning pair in a double-scull race, and winner in a single-scull match, at Geneva Lake; and was bow in the four-oar shell race, when the Farraguts won second place at Toledo. In October, 1876, he distanced the South Chicago single-scrulls at Toledo, and in 1877, they won second place at Devil's Lake. In the same year, at Riverdale, they won handsomely in a two-mile race. At Devil's Lake, he took third place in a field of fifteen boats, and, at the intercollegiate regatta, in 1877, he took first prize as junior single, and was the Farragut's best man of that season. In 1878, at South Chicago, he was the winning oarsman in the four-oar single-scull and double-shell which won at the same time and place. In 1879, he was made commander of the fleet, and has continued to hold the important position up to the present time. He handled the bow in a four-oar shell which won the race at the Mississippi Valley Regatta, at Kokuk, in 1879. In the following season, he participated in four important races, pulling bow oar, and his crew won three of the four. In 1885 (the banner year of the Farragut Club), he was captain of the winning crew which captured the prize for six-oar barges at the Mississippi Valley Regatta, at Moline; and at the same place, with Joseph Adams, took second place to the "champion pair" of the West. Commander Downs for the past dozen years has been one of the best and firmest men of the club, his interest in rowing has been partial to aquatic sports. He is considered one of the best captains in western amateur circles, and has won considerable prizes on an oar. He is now president of the Chicago Bicycle Club, Chicago Bicycle Track Association, a member and captain of the Riverdale Rowing and Athletic Club.

Henry Cyrus Avery, senior member of the firm of Avery & Hillbrant, commissioner of camping, was born in Washington, D.C., on July 18, 1859. He was reared in his native town, and, during his youth, attended its public schools, and then entered Hudson Academy, a preparatory institution, from which he graduated in 1877. His attention was next turned to the military life, with admission to the West Point Military Academy, became the nominee for appointment from Colorado County, but declined the honor, preferring a commercial life to that of the military. In 1875, he came to Chicago and entered the employment of N. J. Milne & Son, Co., the well-known grain commission firm. He remained with them but one year, and then accepted a more remunerative position with the house of Lyon, Lester & Co., remaining with them continuously for five years. For a short time thereafter he was with Robert Warren & Co., and then connected himself with J. H. Milne & Co. After being one year in their employ, he went to the house of O. Kenyon & Co. with this house he remained until January, 1884. He then established himself in business with W. D. Hillbrant, under the name and style of Avery & Hillbrant. For the past ten years, Mr. Avery has been on the Board of Trade, and in that field of business he has been highly successful. His firm, though a new one, is already strongly established, and its future is promising. Mr. Avery is the result of the consistent methods on which they operate. Mr. Avery has always manifested great interest in athletic matters, and has done his share toward promoting the welfare of Chicago's athletic clubs. For several years he has been a member of the Ogel Club, and was one time captain of that organization. In 1880, he became identified with the Farragut Boat Club, since which time he has been an active, enthusiastic worker, participating in several of their victories. At the local regatta on the Calumet River, in July, 1884, he was of the winning four-oar shell crew that captured the first prize. In 1885, the "banner year" of the Farragut Club, Mr. Avery was commander of the "champion four" which won all of their consecutive races, and won them all. The latter achievement was the greatest in the history of the Club, and Mr. Avery is credited with the honor of being one of the winning crew, their contestants, being the only three clubs in the world that could run the best crews. In October, 1885, he was elected ensign of the Farragut Boat Club and still holds the position. During the palmy days of the First National Exposition, when its reputation was reaching its highest point, Mr. Avery was lieutenant, holding the position for one and a half years, and being an active member of the militia for six years. He is a member and officer of the Mississippi Valley Boat Club, Chicago Athletic Association, Chicago Bicycle Club, League of American Wheelmen, St. Bernard Commandery drill-corps, and Concordia Menemsee. He belongs to Williams B. Warren Lodge, No. 209, A.F. & A.M.; Chicago Commandery No. 59, R.A.M.; and St. Bernard Commandery, No. 35, K.T.

William Vernon Booth is the well-known firm of A. Booth
HISTORY OF CHICAGO.

& Sons, is a son of Alfred and Isabella (Hews) Booth, and was born in Chicago, December 22, 1856. He attended the public schools of his youth, and, after finishing his elementary studies, entered the University of London, Canada. He took a thorough course of study in that institution, graduating therefrom in 1873. Three years later he entered his father's house as a partner, and on January 1, 1876, he made him and his wife, Alfred E., were admitted into the business as partners, under the name and style of A. Booth & Sons. This concern has a chain of business houses extending across the United States from the Pacific Coast to the Atlantic sea-board, and are the largest dealers in oysters and packers of hermetically-sealed canned goods in the world, besides doing an immense business in other marine products. Nicknamed "the introduction in the firm, Mr. Booth has had general charge of the entire business interests of the house, and successfully carrying on the work requires the highest ability and the greatest energy in order to carry the business to a successful issue. That Mr. Booth possesses these characteristics is amply evidenced by the continuous prosperity and high-standing of his firm. Mr. Booth has always taken a hearty and active interest in such athletic amusement as boxing, rowing, swimming, rowing, etc., and has already gained considerable notoriety as a champion amateur all-around athlete. For many years he has figured prominently in the history of the Farragut Boat Club. In 1879, he was of the winning crew in the six-oar gig race won by the Farragut Club at Dixon, Ill.; in 1880, he stroked the six-oared barquentine on the Menomonee, and of the winning crew at Cassopolis, Mich.; in 1881, stroke of the winning junior double race at Diamond Lake, and bow for the free-for-all double race at Detroit in 1882. Mr. Booth has taken a singular and different rowing regattas, besides being a winner with the crews above mentioned. In 1883-84, he was ensign of the Farragut Club. He has been a member of numerous committees of the Club, particularly prominent in the dramatic entertainments given by the organization during the winter seasons, he having taken the role in several standard dramas, comedies and operas, and distinguishing himself as an actor of first-class ability. Not only has he won prominence as an amateur oarsman, but possesses handsome testimonials of victories in various athletic performances. In 1872, at Dexter Park, in this city, he ran one hundred yards and one-half second time, making one half-seconds times for amateurs on record. For the performance, he was awarded a handsome gold medal. In 1873, he was winner of the Quebec Championship and gold medal, at the amateur sparring exhibitions at London, Canada, and is now the owner of several handsome medals, all being trophies won by him in various sparring, swimming, rowing and other athletic matches. Perhaps the most distinguished victory he has ever achieved was that won by him at Washington Park, Chicago, on September 5, 1882, the gentleman's riding race, one of the leading events of the meeting, was contested by four of the best gentlemen riders in the city, viz.: Mr. W. H. Booth; Mr. Gifford Berrett; Mr. Gifford, on Idee Pat; Mr. Dickey, on Secret; and Mr. Booth riding Warrington, a son of Dancy. The race was for one mile, and the entries of horses and riders made the contest one of the greatest interest, the superiority of the former being considered essential to success, as the horses were evenly matched. In the presence of an immense audience, the race was begun, and Mr. Booth and Mr. Gifford both finished the mile in 1:49.4, the judges declaring the race a dead heat. At the close of the regular programme of the day, the leading riders again met, the contest having then become one of the most exciting in the history of the Washington Park races; but in the second trial, the skill of Mr. Booth won the race for him, Warrington finishing the mile in 1:46.4, the best time ever made at weight on record, by professional or gentleman rider. The event caused a stir in racing circles, and the achievement was mentioned in the leading journals of Europe. The prize awarded the Club to Mr. Booth was a mammoth silver cup, made by Tiffany of New York, and costing $1,000. Mr. Booth takes great pride in his various athletic achievements, but his attention to those matters is only bestowed upon the more pleasant and social recreation that give him and not for the purpose of pecuniary gain. He is still an active member of the Farragut Club, and of the Calumet, Union and Western clubs. On November 4, 1885, Mr. Booth was married to Miss Helen Lester, daughter of John T. Lester, and one of the leading young ladies in the social circles of Chicago.

Frank E. Johnson, manager of the stock and bond department, 90 W. Jackson Blvd., was born in Oxford County, Maine, on January 1, 1859. His family removed from their home during his infancy, and he was reared and educated in Chicago and its vicinity. After his education was attained at the public schools and from private instructors, and after continuing a thorough course of study he entered actively into business life in Chicago. For one year he was assistant purchasing agent of the Chicago, Burlington & Quincy R.R., and then he entered the firm of John T. Lester & Co., taking charge of their entire Wall-street interests. Although a young man, Mr. Johnson rapidly developed his abilities as a financier, and is perhaps one of the best-posted stock and bond brokers in America. The house with which he is identified has the largest stock and bond business in the West. It is to Mr. John- son's credit to say that he has handled the interests of his department with greatest ability. During 1885-86, he was financial editor and money writer on the Inter Ocean, and being a short-hand expert, was especially qualified for reportorial work. In 1895, Mr. Johnson became identified with the Farragut Boat Club, and in 1895 held the office of ensign. Although he has not participated in any of the racing events in the Club's history, he, nevertheless, conveys a great interest in the Club, in the organization, and is among its present prominent and active members. Mr. Johnson is a member of the Calumet, Chicago, Union Lea¬ton, Washington Park, and Press clubs, and of the Illinois Society of the Sons of Maine (of which he is secretary), and of the Lotus Club, of New York. He was secretary of the Chicago Press Club in 1885, and is a member of the various stock and grain exchanges of this city and New York.

CHICAGO YACHT CLUB.—The first yacht club in Chicago was organized at a meeting held at the Sherman House early in July, 1879. Among the dozest promoters of the enterprise, the chief were James Benn¬ett, Joseph Ruff, James Stabler, William Olcott, James Wilson, Robert Murray and James Coburn. The organization grew out of the desire of the members, who were all lovers of yachting, to jointly own a good boat. The "Naïad" was accordingly built, and manned by the club, followed by the "Clara," built by Mr. Wilson, the "Lucy," owned by Mr. Smith, and the "Volante." At the time of the fire of 1871, the club had four boats, and was a prosperous association. Their house and fleet being then entirely destroyed, the interest in yachting matters was not revived until the spring of 1874, when the present Club was formed. A number of new members, with their yachts, were entered from time to time, until, in the spring of 1879, incorporation was deemed advisable, and a charter was duly procured.

Since that time the Club has achieved a flattering success in all events, social and aquatic, in which it has participated. The fleet now consists of twenty-five vessels, including the "Idler" and the "Wasp," the latter said to be the largest sloop in fresh water. The first named vessel, owned by Commodore A. J. Fisher, was a participant in the great international race for the Queen's Cup, in 1873, and made, on June 8, 1876, at New York, the fastest time until then recorded. She is still believed by her many admirers to be the fastest yacht in the world.

The Club possesses a number of the handsomest and fastest sailing vessels in the country, which are the individual property of the members. The Club has several of our wealthiest and most prominent citizens. Reg¬attas are held annually. The Club makes an annual cruise, the members being accompanied, in most instan¬ces, by their families to some point on the lakes. The Club has always been most liberal in its efforts and donations toward the promotion of yachting, the prizes offered in its name, in the international regatta held here in 1885, being the largest contributed. The club pennant is a red-and-white stripe, with a red field, displaying, in white, the letters "C. V. C." The Club's business in its principal event in the winter season is an annual dinner and ball, given usually at the Calumet Club House. The present membership is about one hundred.

The officers are elected annually, those at the present time being:

Commodore, A. J. Fisher; Vice-Commodore, R. F. Pettibone; Rear-Commodore, E. W. Syer; Secretary, Harry Duval; Treasurer, E. A. C. Brainerd; Measurer, F. W. H. Bonter; Time-keeper, Joseph Ruff.

CHICAGO BICYCLE CLUB.—This, the representative club of the wheelmen of the city, was organized in Oc¬tober, 1879. The charter members were Fred. H.
Browne, John M. Fairfield, Alexander W. McClure, M. J. Stevens, George D. Hoffman, Edwin F. Browne, Dr. G. L. Henderson and B. B. Ayers. The first officers elected were A. W. McClure, president; F. H. Browne, captain; George D. Hoffman, secretary and treasurer.

The objects of the association were stated, by its constitution, to be:

“The enjoyment of the bicycle and tricycle by its members, to which end the club meets, excursions, tours, etc., shall be arranged and carried out; the advancement of privileges and protection to all those who, members of the club especially, and the encouragement in the public mind of a favorable interest in cycling.”

The club from its inception took an acknowledged lead in cycling affairs, and has not only maintained this position, but, owing to superior house facilities, has absorbed several other local associations of wheelmen. It is the oldest club in the League of American Wheelmen, and is the pioneer club of the West, which, in connection with its association and individual records, probably renders it the best-known bicycle club in the country.

It is also well-known for its racing records. One of its members has held the club championship of America for the past three years, to which honor he has added, during the current year, the five-mile championship of the Northwest and the State championship. Several other members of the club have won National fair accomplishments, for five and one-half miles.

The club has headquarters at 189 Michigan Avenue. The membership has increased, from the original nine, to eighty-five. The total membership since the organization of the club has been one hundred and forty-five. The average age of the members is twenty-two years. Due attention is paid to the social feature, a reception taking place monthly at the club-rooms. During the racing season (May to November), the club makes a weekly run. It uses the Exposition Building for practice and exercise during the winter.

The officers present (elected January, 1886) are:

President, T. S. Miller; Vice-President, J. P. Maynard; Captain, N. H. Van Sicklen; Secretary and Treasurer, W. G. Thoron; Librarian, D. D. Wright; Lieutenants, W. G. E. Pierce, L. W. Conkling and A. G. Bennett.

Thomas Spencer Miller, president of the Chicago Bicycle Club, was born at Wanekan, Ill., on April 25, 1859. His father, S. F. Miller, was one of the civil engineers connected with the construction of the principal lines of the Chicago, Milwaukee & St. Paul Railway, and who, in 1867, took a professorship at Amherst College. At Amherst, T. S. Miller received his preliminary education, after which he entered the Worcester (Mass.) Institute of Technology, took the full scientific course, and graduated in 1879, with the degree of mechanical engineer. He then located at Batavia, Ill., remaining one year; from thence he came to Chicago, and in the spring of 1881, took a position with the Link Belt Machinery Company, where he is now engineer-salesman. Mr. Miller commenced "wheeling" while a resident of Worcester, Mass., and in fall of 1878, upon making his home in this city, became a member of the Bicycle Club of Chicago. In 1883, he was elected captain, and in 1884 was honored with the office of president, holding the same until the latter part of 1885. At the election in January, 1886, he was re-elected to the presidency. Mr. Miller was a winner in a fifty-mile contest at Louisville in 1884, and did his twentieth mile in 2:02, which was then six seconds faster than the best time on record. His run was not placed on record, however, as he was his making a flying start instead of standing. The accomplishment was notable, and served to place Mr. Miller in the list of fast ones on the wheel. He has not participated in any of the races of recent years, but has officiated as starter in nearly all the Chicago events, in which capacity he has served with the utmost satisfaction to all the contestants. Mr. Miller wrote a manual of club drills, entitled "Bicycle Tactics," which is now in its second edition. Mr. Miller was married on January 1, 1885, to Mabel C. Huggins, of Woburn, Mass.

Llewellyn W. Conkling, lieutenant for the West Division of the Chicago Bicycle Club, was one of the first young men to bestride the wheel in Chicago. He was born at Coldwater, Mich., on July 26, 1862, and resided there until he was seven years old. His parents then removed to St. Paul, Minn., and he entered the State Normal School at Mankato, from which he graduated with honors in 1882. His family afterward removed to Chicago, where his education was completed at the Allen Academy. He took a position in the house of Henry W. King & Co., in 1879, as salesman, and there remained from 1879 to 1881. He commenced riding in 1882, and has ever since been identified with cycling in Chicago. He has always taken a prominent and active interest in wheeling matters, and has held, at various times, nearly every office in the Chicago Bicycle Club. Mr. Conkling enjoys the distinction of being the first rider of a sixty-inch wheel west of Boston, and being the first racing man of any note hailing from Chicago. He began his career by appearing at the Central Park track in June, 1881, where he was an easy winner. He next represented the Chicago Bicycle Club in the great fifty-mile team race at Louisville, in February, 1882, where, through lack of opportunity for training, he met with defeat. In 1882, he won both the long and short-distance championships of the Chicago Bicycle Club, and in 1883, the short-distance championships and the half-mile open heats at Burlington, Iowa, besides running a close second to the late Colonel Stone at Peoria. In 1884, Mr. Conkling won the one-mile dash at Marengo in the best time for this distance ever made in the West; but at the championship race at Chicago he was forced to the second place. On October 15, at Rockford, owing to a badly sprained knee, he had to yield the Illinois championship to Mr. Hammond of Milwaukee. His best performances were on August 12, 1883, when he lowered the American five-mile record, and on September 11, of the same year, when he lowered the quarter-mile record. His feats were secured by A. Spalding & Bros. to manage their bicycling department, and he still retains that position. He is vice-president of the Chicago Bicycle Track Association, Illinois chief conval of the Cyclist's Touring Club, and member of the Illinois Division League of American Wheelmen. Mr. Conkling has permanently retired from racing, but has the remembrance of nearly sixty races and a collection of forty-eight first prizes to remind him of many a hotly contested mile.

CHICAGO CURLING CLUB.—This association was organized by a number of Scotchmen, in Chicago, about twenty-five years ago, prominent among whom were George Wilson, James Hutton, William Forrest, Dr. McAllister and William Faulkner. Yearly matches were played with other clubs, many of whom came from Canada, on the most suitable ponds in and about Chicago, until, as a consequence of the gradual growth in interest and membership, the property at York Street and Oak Park Avenue, of which the club purchased in 1883, and a large and substantial rink building erected at a cost of upwards of $15,000, is owned and managed by a joint-stock company, called the Chicago Curling and Skating Association, composed of members of the club; and in addition to its own use the public is allowed the privilege of the skating surface. For a number of years the club used the lakes at Lincoln Park, and many matches have been played there. This club has won a number of matches from clubs belonging to the National Curling Association, of which it is a member.

The total membership is now about eighty. The present officers of the club are: President, Alexander White; Vice-President, Robert Duncan; Secretary, James Duncan; Treasurer, William M. Dale.

CHICAGO CRICKET CLUB.—The Chicago Cricket Club was organized May 15, 1876, and is undoubtedly the strongest in the West. The original promoters were principally Canadians, chief among whom was Dr. Ogden; the most active man in organization was the president of the club down to this writing. The other members of the original eleven were J. G. Orchard, Dr. M. D. Ogden, C. J. Fraser, J. G. Darling, William McGill, George W. Kemp, V. M. Moore, R. J. Street, George Cass and J. L. Ramsey. The grounds of the Chicago Base-ball Club were used for practice and matches, up to 1879, when, through the courtesy of the Lincoln Park Commissioners, a portion of the south
lawn was assigned, and there the club has played since. The membership and playing strength of the club has steadily increased, and since 1880, it has held acknowledged first place in the Western Cricket Association. In 1882, it had the membership of one hundred and fifty. During the season of 1885, thirteen matches were played, of which only three were lost, two of these being to the Young Americans, of Philadelphia, considered the strongest cricket club in the country, which visited Chicago in July of that year.

**DUNTON'S SPIRIT OF THE TURF**, a weekly paper exclusively devoted to the interests of horsemanship, published its first number in October, 1876, at No. 164 Washington Street, where it has always remained. It is conceded to publish correct records of all horses, both as to pedigree and time, and is a journal every worthy patronage of horsemanship. It was founded by Frank H. Dunton, and ably assisted by his wife, Mrs. E. M. Dunton, the style of the firm being Frank H. & E. M. Dunton. This was the first weekly journal in the United States whose management had the courage to entirely devote its columns to the horse, and it has been a leader that has lifted the business of breeding and the trotting horse to a respectable position. It has not only been the desire, but it has become the constant thought of its managers, to elevate their business morally, and in this they have succeeded admirably. The paper is not only a leader and is beyond any question a fortunate success, but a talk with the founders revealed the fact that it was only obtained by arduous labors, while we are disposed to believe there were added ability and good management. The paper circulates throughout the United States, Great Britain, and even in its news is gathered from all over the world, America furnishing the greatest amount, as it is the most interested nation in the development of the trotting horse on the globe. It is a credit to our city, therefore, that in our midst was founded the only weekly journal exclusively devoted to the horse, and one that has been so true a champion of his rights, together with the fact that the articles therein are not only interesting, but in a single instance objectionable from a moral standpoint. We cannot refer to the able "Greystone Papers," written by Rev. H. Stone Richardson, embraced in the first volume, which were permitted by the book to 300, of the true and his title, "The Place." For the papers from Mr. Dunton, a horse valued at $2,000.

**Frank H. Dunton**, founder of the spirit of the Turf, is a son of John and Mary (Cummings) Dunton, and was born at Phillipston, Worcester Co., Mass., on December 1, 1829. He was educated in the old school-house of his native village. At the age of twelve he entered the business, and he was, like many boys, thrown upon his own resources, and was not only able to support himself, but he was enabled to save money. He went to work with Mr. Dunton in 1848, when he came West and was appointed clerk of the City Hotel in Milwaukee, Wis. He was afterward clerk of the old Hawkins House in Chicago. He remained with the hotel in Milwaukee and in that year went to Kenosha, where he was clerk in the Durkee House, afterward in the Kellner House. In 1854, he went to Kenosha, Wis., and was engaged as a clerk in a hotel for a while. He then went to Chicago, and he has continued in the same business up to the present time. He is a member of the Democratic Club; he has been heartily interested in the growth and improvement of the Chicago Bicycle Club, and the organization of the Dearborn Cycling Club was brought about mainly through his efforts. Upon the organization of the Littleton Bicycle League of American Wheelmen in 1882, Mr. Blake was elected chief consul, and he has since retained the position, receiving in 1889 a vote of thanks from the wheelmen of the city. This position gives him jurisdiction over all amateur bicycle affairs and events in this State. He became a member of the Chicago Bicycle Club in 1880, and was its first secretary and business manager. He is a member of the Chicago Bicycle Club in 1887, and was its first secretary and business manager. He is a member of the Chicago Bicycle Club in 1887, and was its first secretary and business manager. ATHLETIC AMUSEMENTS.

management the foundation of the present extensive business was laid, which he conducted until 1857, when he put the establish-
ment in charge of his sons, Charles and Benjamin Brunswick. The
factory is situated at Nos. 235-240 Randolph Street, and
consists of a large seven-story building, 100 x 180 feet in size, pro-
vided with all the latest improved machinery for rapid and perfect
work, run by an engine of 150 horse-power. Brunswick & Co.
are the sole manufacturers of the celebrated Triumph and New
Progress billiard and pool tables, one hundred operatives being
required to meet the demands made upon the factory. All their
tables are supplied with the world-renowned Triumph cushions, and
sales are made throughout the United States, and some in Canada and Mexico. From six to eight hundred tables are turned
out per annum, which are worth from $250 to $350 each, the
yearly sales aggregating $200,000. The second floor at No. 175
East Randolph Street is occupied as a salesroom, where designs
manufactured only by them are displayed; and persons desiring
anything in this line can be supplied by this firm, as they import
and make a specialty of all kinds of billiard material. The
founder of this enterprise, Joseph Brunswick, has resided in Chi-
cago for a quarter of a century; Charles and Benjamin Brunswick
were born at Cincinnati, Ohio, in the years 1855 and 1856, respect-
ively, and have lived in this city since 1870. This house compares
favorably with any other in the country; their improvements have
gained a wide celebrity; and the members of the firm are well
and favorably known for business and general integrity, and have hon-
orably earned the respect and confidence of this community.

Joseph Brunswick was born at Bremgarten, canton of
Aargau, Switzerland, on March 14, 1825. He was the eldest
of seven brothers, and was engaged with his father, a merchant, until
1851, when he immigrated to Cincinnati, Ohio, and there went into
the manufacturing of billiard-tables in connection with J. M.
Brunswick, another brother. Joseph, came to Chicago in 1857, to take charge of the branch house which had been here established in 1851. In August, 1851, the partnership spoken of was dis-
solved, but the brothers continued in the business under their
individual names. Joseph Brunswick's factory and his extensive
billiard hall (the latter located in the Exchange Building, corner of
Clark and Washington streets) were both destroyed in the great fire
of 1871. He re-opened his factory at the corner of State and
Randolph streets and his billiard hall at Nos. 131-133 Twenty-
second Street. In 1857, he retired from business, turning his en-
tire affairs over to his sons, Charles and Benjamin, who originated
the name of Brunswick & Co. Mr. Brunswick was married in
1855, to Miss Rose Aiken, a French lady, who had resided for
some time in this country. They have seven children.—Julia,
Charles, Benjamin, Caroline, Flora, Louis and David.

Charles P. Miller, manager of the Brunswick-Balke-Collender
Company, was born at Cincinnati, Ohio, on December 20,
1832. His father, Charles Miller, with whom the son was asso-
ciated in business up to 1871, was a wine importer in Cincinnati
until 1867. In that year he came to Chicago and established, at
No. 165 Washington Street, the western branch of the Julius Kalle
billiard company of Cincinnati. In connection with this branch
office, he opened the Mammoth Standard Billiard Hall, in the old
Stetway Music Hall, at the corner of Clark and Washington
streets, where the new Chicago Opera House now stands. One
week before the fire of 1871. Charles Miller died. The day after
the fire Charles P. Miller went to Cincinnati, where for one year he
was salesman with Lange Bros., jewelers. In 1872 he returned to
Chicago, and opened a small stationery and book store at No. 331
Division Street. In 1873, taking with him his mother and sister, he
visited Europe to see his great uncle, Johann Von Geissel, the arch-
bishop and cardinal of Cologne. In January, 1874, he engaged
with the J. M. Brunswick & Balke Company as general clerk. In
1875, he was promoted to the position of bookkeeper, and in 1876
to that of cashier, and in 1880 to the position of manager. He is
now interested in the billiard business. In 1873, Mr. Miller, who
belongs to numerous societies and orders, organized the Arion
Quartette as follows: John McMulty, first tenor and president; C.
F. Miller, second tenor, secretary, treasurer and business manager;
M. K. Williams, baritone; Joel Silvers, basso; Joseph Silvers, mus-
tical director. Mr. Miller, on August 15, 1883, married Esther
Haslett, of Chicago. Mr. Miller is also a proprietor, with
Charles J. E. Parker, of the Superior Billiard Hall, opened on May
29, 1884, at Nos. 210-12 North Clark Street.

Captain A. H. Bogardus, champion wing-shot of the world,
was born in Albany County, N. Y., on September 17, 1833. He
removed to Cossackie on the Hudson, afterward to near Peters-
burg, Ill., and thence to Elkhart, Logan Co., Ill., where he now
resides. He became a hunter from necessity, and is a sportsman
from choice. He is a man of giant strength, stands six feet high,
weighs two hundred and twenty pounds, and possesses a powerful
constitution. He began to shoot pigeons in 1868, and won the
championship of America as a wing-shot at Fleetwood Park, N. Y.,
on May 23, 1871. He now holds the following named badges,
medals and cups: The old Rhode Island Badge for American cham-
ppron, won at Fleetwood Park, N. Y., on May 23, 1871; the
"Loeflard Medal" for pigeon-shooting championship for five
traps, won at Stamford, Conn., on October 4, 1874; the "Cham-
pionship Medal of the World," won at Welsh Harp, Hendon, Eng-
land, on August 7, 1875; "Championship Glass Ball Medal," won
at Deerfoot Park, N. Y., in the fall of 1877; Silver gold-tined vase,
worth $500, for championship of England, won on June 20, 1878,
at London Gun Club Grounds; Silver goblet, valued at $250, won at
Hurlingham Gun Club Grounds, England, at the only public match
ever shot on these grounds, on July 25, 1878; a Maltese cross badge
of gold, won in the Coventry Match, England. This he prizes
above all others. Captain Bogardus has shot an incredible number
of matches, and made the "best on record" so often, that we can
not enumerate them here. At Dexter Park, Chicago, he killed five
hundred pigeons in eight hours and forty-eight minutes; killed one
hundred birds in one hundred consecutive shots, at Dexter Park;
killed fifty-three out of fifty-four birds, at Jerseyville in four min-
utes and forty-five seconds; at Bradford, Penn., he broke nine hun-
dred and ninety glass balls out of one thousand; and at Lincoln,
Ill., three hundred in succession. In New York City, loading his
own gun, and changing barrels every one hundred shots, he broke
one thousand glass balls in one hour, one minute and fifty-four
seconds. In New York he accomplished the greatest feat of his
life, as far as endurance, rapid shooting and accuracy were con-
cerned, breaking five thousand five hundred glass balls out of five
thousand eight hundred and fifty-four shots. In seven hours, nine-
teen minutes and two seconds, loading his own gun and changing
barrels about every fifty shots. Captain Bogardus has had thirteen
children, seven boys and six girls; of whom three daughters and
four sons are living, the others having died in infancy. Two of his
daughters are married, and he is the grandfather of three children.
Four of his sons are also professional and exhibition shooters,—
Eugene, Edward, Peter and Adam Henry, Jr. The boys all inherit
constitutions of iron, clear and strong minds, and wonderful ten-
dacity and nerve. The captain taught them to shoot, and they have
been apt and successful scholars.
At the time of the great fire of 1871, Chicago had assumed prominence as a publishing center, especially in producing the works of home authors. The fire was a serious blow to this interest, and although the loss of plates, books and manuscripts of this class was a comparatively light one, the general loss to publishers was so large that for a time they were discouraged from the experiment of putting out new works that did not have an Eastern impress, or of reproducing Chicago books the sale of which had not been sufficiently far advanced at the time of the fire to decide their possible success. Nearly every publisher in the city, including the principal bookstores, were burned out, and the Western News Company, S. C. Griggs & Co., W. B. Keen & Co., and others engaged in the book and paper trade, were slow in resuming a satisfactory routine for supplying dealers and customers. When the publishers were re-established, the jobbing trade was the first to revive. The first book passing through the hands of Chicago booksellers after the fire, and sent to the press for review, came from S. C. Griggs & Co., at No. 667 Wabash Avenue. It was called, "Seed-Time and Harvest," and was followed by "Hester Kirton," both Eastern Sunday-school books. This was exactly nineteen days after the conflagration. By November 25, such publications as the Spectator, Phenix, and Chicago Magazine, operated respectively by the Goodsells, M. A. Fuller, and Mrs. M. L. Rayne, had been revived, and the most exhaustive book on the fire, entitled "Chicago and the Great Conflagration," by Elias Colbert and Everett Chamberlin, was published. Fire literature was the rule for many months, and the Lake-side Montly, the principal literary periodical of the West, revived in December, and in its January issue contained articles on the general calamity from the most eminent Chicago authors, among whom were Elias Colbert, Egbert Phelps, Colonel John W. Foster, Charles Randolph, James B. Rummon, W. W. Walker, Robert Colyer, L. D. Ingersoll, Dr. E. O. Haven, George P. Upton, Andrew Shuman, Frank Gilbert, Franc B. Wilkie, W. A. Crofut, Rev. W. A. Bartlett and Professor D. H. Wheeler. "Our Calamity" published by Alfred L. Sewell of the Little Corporal, to which Horace Greeley was a contributor, and a book on the fire by Rev. E. J. Goodspeed also attracted considerable attention at the time. Arthur W. Penny & Co., of Chicago were among the first to publish a book here, and issued several valuable medical works, while A. S. Barnes & Co. published a number of educational works, and, on March 23, 1872, "Lessons in Language," by Hiram Hadley, the plates of which had been destroyed and re-set, was issued in this city. Later in the year, architectural literature was advanced by the publications of H. W. S. Cleveland, the University Publishing Company began business, and The Record, a literary venture of much merit, sent out its initial number, followed soon after by Manford's Magazine, the Ladies' Own, the Gem of the West, the Excelsior Magazine, the Weekly Magazine, the Inland Monthly, and numerous similar publications, contributed to, almost exclusively, by home talent. In legal lore and religious publications the supply soon became profuse. H. R. Thompson & Co. publishing several valuable law books, and Rev. W. W. Everts issuing a book called "The Hand of God"; the American Tract Society producing several similar books, and Jansen, McClurg & Co. publishing "Baptism versus Regeneration." Among other notable publications of the year were "Buffalo Land," by E. Hannaford & Co.; the Norwegian-Danish Grammar Reader, by S. C. Griggs & Co.; a medical series by A. S. Barnes & Co.; The Political Struggle of 1872, by Edward Everett Chamberlin; The Fixed Stars, by Elias Colbert; a large amount of Sabbath-school literature by Adams, Blackmar & Lyon; and the Chicago Illustrated Journal, by Knight & Leonard. On November 25, 1872, Jansen, McClurg & Co. returned to central quarters in Booksellers' Row, on State Street; W. B. Keen & Co. followed them on December 14; and the original center of the book business was regained, and the literary interests of the city began to revive and develop materially.

Since that time Chicago has become a great publishing center, and home talent has been encouraged and recognized. A partial list of notable authors who are, or were, residents of Chicago, or made this city their publishing point, includes

Of the publishing industry itself some interesting comparative figures may be given, showing the condi-
tion of the trade in this city at the time of the fire and in 1880:

FAIRBANKS & PALMER.—The business now conducted by the firm of Fairbanks & Palmer was established in 1873, by L. T. Palmer, at the corner of Lake and Clark streets. At that time Mr. Palmer was the Western representative for a large Eastern publishing house, but three years later he issued his first works, published on his own account. These were a primer, need given need, and in the latter attention was paid to what was called “American Revivals,” by Rev. Charles L. Thompson, D.D.; “Great Strikes,” by Hon. J. A. Dacus; and “Gospel Awakening,” from the pen of L. T. Palmer. In 1878, he moved his place of business to No. 46 Madison Street, and at the same time formed the partnership which still exists with Mr. Fairbanks, under the firm name of Fairbanks & Palmer. Since that date, they have ranked among the leading publishing firms in the West, and have issued a great number of standard works, both trade and subscription. Among the volumes lately issued from their press this may be mentioned the following: “American Orators and Oratory”; “Gaskell’s Compendium of Forms,” a book so well known that no further mention of it is necessary here; “The World; Historical and Actual,” by Frank Gilbert, A. M., of Chicago, a well-known writer on the editorial staff of the Inter Ocean. They have also published works from the pens of such writers as Edward Raul, Rev. T. DeWitt Talmage, Rev. Robert Jamieson, D.D., of Glasgow, Scotland, and many others of scarcely less note.

John Fairbanks is an old publisher, and was for many years connected with the American Tract Society as its Western manager. A position he filled until 1873, when he formed his present connection with Mr. Palmer in the book-publishing business. Mr. Fairbanks is a native of Massachusetts, born in 1843. In 1869, he came West, prior to which, since the age of sixteen, he was in the book business in Boston.

L. T. Palmer was born at Stafford, Conn., in 1844, but at an early day his parents removed to Newark, N. J., where he was subsequently educated. In 1865, he entered the publishing house connected with the firm of E. B. Treat & Co., of New York, remaining there until 1873, in which year he came West and located in Chicago, founded the business he still conducts.

Charles Sumner Woodard, son of Willard and Levina (Ellery) Woodard, was born in Hopkinton, Mass., in 1853, and at the age of three years came to Chicago with his parents. He received his education at the public schools of the city, and in the high school department of the Cook County Normal School. After leaving school he entered the publishing house of George Sherwood & Co., his father being a member of the house, and remained in its employ until May 1, 1855, when he was received into the firm as junior partner. He was married in Chicago, in 1850, to Miss Emma Preston, daughter of William Preston, of Beverly, Ill.

Thomas E. Hill, whose name is closely identified with the book-publishing interests of Chicago, is now at the head of the Hill Standard Book Company. Mr. Hill was born at Sandgate, Vt., on February 20, 1832, the son of David and Elizabeth Edie Hill. His education was not neglected and assumed an academic character, in which he advanced to a degree that he early left home and entered the profession of an instructor, and at the age of nineteen he became a teacher in the public schools. A year later he established private evening schools, and for fifteen years followed his profession in New England and the Western States. In 1857, he went to Aurora, Ill., where he founded the Aurora Herald, which, in circulation and financial achievement, became under his management a marked success. For twelve years he resided in Aurora, during which time he influential aided in establishing several important enterprises, and was for a time mayor of the city. Mr. Hill's wide reputation, however, rests principally upon his labors as the author of "Hill's Manual of Social and Historical Forms," a large work the first of its kind, that, at this writing, has reached the sale of about 300,000 copies. Among his more recent publications is "Hill's Album of Biography and Portraiture," equally as large and expensive as his "Manual," and having a comparatively large sale with a brilliant proportion of patrons, with leisure to spare, have come to Mr. Hill, in later years, he has interested himself largely in the work of the humane organizations, availing himself of the superior advantages afforded him as the secretary of the American Humane Association. He resides at present in Chicago, but spends much of his time at his summer retreat at Prospect Park, twenty-two miles west of the city, which, embracing an area of one hundred and fifty acres, is embellished with artificial lakes and charming groves of ornamental trees.

The Altroth Publishing and Mailing House, now one of the largest establishments of its kind, not only in Chicago, but in the whole West, was founded, in 1873, by Thomas Altroth, who was the founder and proprietor. The place of business was first on Jackson Street, near La Salle, where it was conducted in a modest way compared with its present extensive proportions. In 1881, in order to secure better facilities for its rapidly increasing trade, Mr. Altroth moved his place of business to Nos. 135 to 140 Lake Street, and in 1884 to his present location, Nos. 36 to 62 Wabash Avenue. Here he occupies an entire floor of the building on the southeast corner of Wabash Avenue and Randolph Street, employing sixty-five hands, and running, in the printing department, seven large presses. But the distinguishing feature of Mr. Altroth's business is his mailing department. A publisher for whom he does work, after handing in the "copy," pays for the mailing of it in his house. Then to a large extent it is printed, folded, and mailed to subscribers in any part of the country. He has, too, the largest mailing lists of any house in the West, and often in a single order delivers thousands and tens of thousands of circulars for business men here, who thus desire to reach their patrons throughout the Western States and Territories.

Thomas Althorp, who has founded and built up this business to its present important position, is an old resident of Chicago, and has been for nearly twenty years prominently identified in Chicago business circles. He was born at Holton, Columbia Co., N. Y., on February 15. Mr. Althorp is a native of Philadelphia, mostly in Philadelphia, and is a druggist by profession, being a regular graduate. In 1867, he came to Chicago, which has since been his home, as the resident partner of the Cleveland Wood and Match Company at Cleveland, O. In 1880, he was again South on South Water Street and Michigan Avenue, near the site of the old Adams House. In the great fire of 1871, he was burned out, sustaining heavy losses, but three years after he undertook his business in a new building. He is the son of Adams Street and Michigan Avenue, and on the spot where now stands the Pullman Building. Here he remained for two years, when he retired from business, to indulge the long cherished desire for travel in foreign countries. He accordingly went to Europe in the autumn of 1875, and spent two years abroad. In 1877 he returned home, and shortly afterwards established the business in the history of which has been briefly given, and which he still conducts. Mr. Althorp married, in 1853, Miss Emma Young, daughter of Samuel Young of Philadelphia. They have one son.

Stanley Fulton.

S. X. Stern, senior member of the firm of Max Stero & Co., printers in all languages, stationers and publishers, was born in Halle, Wurttemberg, Germany, on August 6, 1846. His education was received at the gymnasium at his native city. He afterwards entered the house of a publishing printer in Halle, where he served an apprenticeship of four years. On the day he received his certificate as journeyman, his father sent him with four children to this country to be educated; this she did, giving her younger children a better education than fell to the lot of the masses, by keeping a small store. He worked afterward as compositor in Bonn, Dusseldorf and Mainz. He afterward died in Halle in 1875, at the age of 46. Mr. Stern reached this city, working for three years as a compositor on the Staats Zeitung and one year as foreman of their office. In 1879, he formed a partnership with John K. Scully, at the corner of Clark and South Water streets, which partnership existed six months, after which time he bought Mr. Scully's
interest. He was burned out in the fire of October 9, 1871; but resuscitated his business at No. 14 West Randolph Street in a par- parlor, where he practiced law. At that time he was 42 years old, and was worth $20,000. In 1872, he moved to Washington Street. In this place he remained for nearly two years, when he moved to the present quarters, Nos. 83 and 85 Fifth Avenue. This office was given in 1876, and at that time he formed a partnership with L. D. O Москв, as he did with James S. Ream, and a son of Mr. Behrle, at the age of two years, moved to Greenville, N.C., where he was born. The only education he had for a start in life was what he obtained in the common schools of that period, up to the time he was twelve years of age, when he was obliged to give up his school and make his own way in the world. He entered the office of the Hudson (N. Y.) Daily Star to learn the trade of a printer. During his apprenticeship Mr. Shaver became a close observer, very accurate and rapid as a compositor. On leaving Hudson he went to New York City and obtained a position on the night force of the Morning Star. He worked steadily for one year, and the arduous night labor had its effect. At the end of the year his health had greatly declined and he became the charge of consumption. He went out of the printing office into the employ of William Strong. In 1854, Leroy N. Shear, the founder of the Union News Company of New York, offered Mr. Shaver a position as foreman of the press of the Union News, a paper that was in the hands of the Union News Company of Chicago, Rock Island & Pacific, and Chicago & North-Western Railroads, employing the first year a force of twenty-six men. The business was located for years at No. 10 Sherwood Street, opposite the present site of the Board of Trade, but upon the rapid ascent of values in that vicinity, the office was removed to No. 200 Dearborn Street, where it is now located. The business was the first in the West, and in its infancy it struggled to maintain itself. The greatest obstacle in the way was the war breaking out and during the first year of the War, Mr. Shaver grew discouraged at the prospects, and asked to be released from his position, but the War Department and the Army, Mr. Shaver encouraged his protégé, and finally induced him to stay and carry on the business. Their operations then extended over less than four hundred miles of road, and during the transition of silver to paper currency there was a terrific rush to secure the paper currency to the paper bills. This was a great obstacle to Mr. Shaver. His agents sometimes would bring in little pasteboard tickets, which read "good for five cents," and were payable only at the country stores of the interior towns. The Chicago newspapers were eventually forced to take these in lieu of cash for their bills, so scarce was the legal-tender currency of the period. But with the War over the business revived. In 1864, it extended over perhaps twenty-five hundred miles of road. Mr. Shaver then desired to retire, having been a veteran in the railroad news trade, and disposed of the entire franchise and business to Mr. Shaver. The company was then sold to the North Western Railway Company of Chicago, and the old newspaper was not continued. The company of Chicago may be obtained from the following newspapers. In 1876, they had control of two railroad lines and operated on a territory of twenty miles. In 1883, they have sixteen offices outside of Chicago, in the principal cities of Chicago, North, West and South, and their three hundred or more employes travel over lines of from sixty to four thousand miles in length. The office located in the great city of the West, is the Chicago News, of Mexico. To Mr. Shaver is solely due this marvelous development of the railroad news trade. He has been identified with the greatest growth of the railroad news trade. He has been identified with the greatest growth of the railroad news trade. He has been identified with the greatest growth of the railroad news trade. He has been identified with the greatest growth of the railroad news trade. He has been identified with the greatest growth of the railroad news trade.
town Academy and the Connecticut Normal Institute, graduating from the latter in 1858. He then began teaching, but his health failing he engaged in the business of surveying and map-drafting, and pursued the same in various parts of the country. In 1860-67, he published in maps of Warren County, Ohio. In 1868, he invented a combination atlas, a union of town, county, state, national and world maps in one volume, and easily changed to suit any locality. In 1869, he moved to Chicago. He continued in the atlas business until 1877, and became at one time the most successful publisher of local maps and atlases in the country. Associated with him a portion of the time were J. S. Higgins and J. H. Beers. They gained a wide reputation for the excellence of their publications. In 1878, he visited China and Japan, and travelled extensively in the latter country. On his return, he, in company with J. A. Spooner, opened a Japanese curio store in Chicago; but their views were divergent, and though the business was congenial it was conducted at a loss and ended in litigation. Mr. Warner has also been engaged in the manufacture of barbed wire fence, under a license from the Washburn & Moen Manufacturing Company. He has been associated in the publishing business with J. H. Beers. His judgment in business matters is readily formed and generally correct, and he has been uniformly successful in every enterprise managed by himself. Mr. Warner has been a steadfast and cordial supporter of the principles of the democratic party, and cast his first vote in 1860 for the Breckinridge ticket. He felt desirous in the spring of 1876 that, during the campaign of that year, the democratic party should have a reliable organ in Chicago. He accordingly purchased the Chicago Daily Courier, changed it from the support of greenbackism to the advocacy of specie payments and the nomination of Hon. S. J. Tilden for president. He remained out of the campaign according to the object he had purchased it. Mr. Warner is a member of the Chicago Stock Exchange, the Citizens' Association and the Iroquois Club. He became a Knight Templar in the Masonic fraternity in 1868. In 1880, he married Miss Kansas J., youngest daughter of Cyrenius Beers of this city. They have two sons.—Charles Cyrenius and Raymond Beers.

The history of the advance in the various branches of the arts indissolubly associated with literature in this city, has been already outlined in the preceding volumes of this work. Of the enterprise which has characterized the press of Chicago, as well as of the vicissitudes through which it has passed, mention will be made presently. The day has passed when the imprint of a Western publishing house inevitably condemned any work in the estimation of Eastern reviews. More than one firm might be named in this city whose reputation for discriminating criticism and cautious judgment has become thoroughly well established among the trade. It does not, however, fall within the purview of the present article to do more than sketch the bare outline of the growth of the publishing business between 1871 and 1885, and in that connection very briefly review the progress made in the various mechanical arts with, from their nature, inseparably connected with it. Perhaps the city's steady growth in this direction may be most tersely shown by a succinct statement of the number of firms and individuals engaged in publishing and its cognate trades during the period indicated, which is furnished by the following table:

<table>

</table>

By way of comment on the foregoing table, it must be remarked that in its preparation a certain amount of duplication has been unavoidable. Many firms carry on several distinct branches of business—book-binding, engraving, lithographing, publishing and electrotyping. Without doubt, some of such establishments have been reckoned under more than one category in the table, which professes to be only a reasonably correct approximation. The table given below (which relates to 1880 alone), has been compiled from the U. S. census report, and the foregoing explanation is necessary in view of an apparent contradiction. The inconsistency between the two statements may be accounted for, in part, by the reasons above suggested. In addition, it must not be forgotten that the furnishing of details to the census officials was wholly voluntary on the part of manufacturers and dealers, and that the official returns were consequently necessarily incomplete. As regards the discrepancy in the respective numbers of publishers, it should be considered that the figures given in the foregoing table include not only the entire city press, as well as some ambitious job printing houses who covet the distinction attached to the name of "publishers," but also all local agencies of Eastern publishing houses, who are, of course, omitted from the statistics relating to Chicago, given in the census report. The reader who bears these facts in mind will perceive that the contradiction between the two tables is apparent rather than real. The following statement, showing the number of establishments in Chicago, with other details, respecting the capital invested, number of employees, value of product, etc., when compared with the tables given in the second volume of this work, which relate to the years 1860 and 1870, will be found of interest:

The Sween & Stuart Stationery Company was established in March, 1873, by J. C. Sween, but in July following, Mr. Stuart, an old friend of Mr. Sween, who was in the same line of business in Clinton, Iowa, succeeded to the business and was given a partnership in this city. The firm continued, with minor changes, until July, 1883, when it became incorporated, with J. C. Sween as president, E. C. Stuart as vice-president, H. E. Thayer as secretary, and Dwight Jackson as treasurer. In February, 1885, Mr. Sween retired, Mr. Stuart succeeding him as president, the other officers remaining the same. This house has had a rapid growth, from its commencement, and in twelve years has taken rank with the foremost houses of its kind in this city. It does a large business in printing, lithographing and blank-book manufacturing, and in all its various departments is replete with the best machinery and the finest workmen.
At the age of nine years his parents removed to Buffalo, where he attended the schools and obtained a thorough education. Upon leaving his books, in 1857, he went to Kankakee, Ill., and entered H. F. Tower's book store, where he remained two years as clerk. At the expiration of that time he came to this city and joined Messrs. Jones, Perlman, and went into business with that house eight years, when he began business for himself at Clinton, Iowa, where he continued several years. He returned to Chicago in 1873, and resumed business on Madison Street, near the bridge, in connection with J. C. Skenes, under the firm name of Sken & Stuart. After a few months' stay at that point, they removed their establishment to No. 77 Madison Street, where he has since been. In February, 1878, Sken retired from the firm, and in the July following the business was further extended by the formation of a stock company. Mr. Stuart is one of the most energetic and well-posted book and stationery men in the West, and he considers H. F. Tower's his first-class business man. He was married on April 29, 1870, to Miss Laura Hayden, of Kankakee; they have four children,—Bertha M., Frank H., David W., and Julia Imogen.

Cameron, Amberg & Co., printers, stationers and blank-book manufacturers, established their business on May 1, 1850, at No. 111 Madison Street, and their enterprise successfully established when the fire of October 9, 1871, swept away their possessions. Their losses were large, but on the next day they resumed business at Nos. 12-14 West Randolph Street, continuing it there until 1873, when they moved to No. 84 Lake Street, remaining there until 1879, when they moved out five years ago to their present commodious quarters at Nos. 71-73 Lake Street. This house from its institution had a large business, which has greatly increased with each succeeding year. At its inception the furniture of the shop was of the most simple character; it now has a room and a half on the second floor; one floor below a large and commodious bindery room; and at the upper floor its stationery store, office, printing and bindery rooms on one floor; now its various departments occupy five floors and a basement, having an area of seven thousand square feet. Besides their business in Chicago, they established a house in New York City, in 1874, at No 60 Duane Street, where they make a specialty of the Amberg letter files, of which William A. Amberg of this city was the first and largest manufacturer. Their establishment is under the management of W. H. Nauty. In 1875, they established in London, England, another house similar to the one in New York, at No. 27 Little Britain, under the management of John M. McGovern. This is no corner store and a remodeled building. The management of William A. Amberg.

William A. Amberg, member of the firm of Cameron, Amberg & Co., and treasurer and director of the Chicago & Wisconsin Granite and Quarrying Company, was born at Allsstadt, near Passau, Bavaria, Germany, on July 6, 1827. At the age of four years of age he came to America with his parents, who located at Mineral Point, Wis., where he received a common school education. In 1846, he entered business life as a dry goods clerk, from which he later transferred to the composing rooms of the Christian Advocate, in Chicago, and in 1863 became bookkeeper for Culver, Page & Honge. In 1870, he became a member of the firm of Cameron, Amberg & Co. In 1868, Mr. Amberg invented the patent letter file and the system of filing which bears his name, and is now in common use all over the world. He has also obtained about thirty patents in this line and over six hundred copyrights on indexes and forms connected with his business. Recently he has invested a pavemt for streets, which incidentally grew out of his connection with the granite company, and bids fair to be a desirable and popular pavement. In 1869, Mr. Amberg was married to Sarah Agnes Ward, daughter of James Ward, an old resident of Chicago, and has four children now living. Mr. Amberg was one of the founders of the Union Catholic Library Association which originated in 1868, and was president of the same for three terms.

C. F. Blakely is the senior member of the firm of the Blakely-Marsch Printing Company. He was born at Danville, Conn., on July 8, 1854, where he lived until about ten years old, when he moved to Montpelier, Vt., and spent the next five years of his life. He then moved to Minneapolis, Minn., and continued his education and business career in that city until he was 27 years of age, when he entered the wholesale printing business in Chicago, and soon became well known as a first-class business man. He was married on April 29, 1870, to Miss Laura Hayden, of Kankakee; they have four children,—Bertha M., Frank H., David W., and Julia Imogen. He formed a partnership with a few men to start a new town on the line of railroad pushing westward, and they, Mr. Oliver, Mr. Amberg, Mr. C. F. Blakely and Mr. Ward, went to their site and put Mr. Oliver in charge of organizing and developing the town. David Blakely and Mr. Oliver were warm friends, and had known each other for many years in the East. Mr. Oliver went back to Kansas, Mr. Blakely, went back to Chicago, and went into business with Mr. C. F. Blakely, with whom he remained for about four years, when he sold out, moved to Rochester, Minn., and established the Rochester Post. Soon after the fire, Blakely retired from the business, and the summer before, the subject of our sketch went into the printing office of Mr. Blakely, was made his adopted son and his name was changed by Act of the Legislature. They published the Rochester Post seven years, and at the end of three years Mr. Blakely made his half owner of the paper and of the job office. Soon after D. Blakely was elected Secretary of State of Minnesota, and C. F. Blakely left to conduct the business. In the fall of 1865, they sold their interests in Rochester, moved to this city and bought an interest in the Chicago Post, with which C. F. Blakely remained for nearly three years, when he disposed of his interest and took charge of the composing room of The Advance, a new religious paper of the Congregational Church. The fire of 1871 destroyed his business. After the fire he took a tenement house on Green Street, near Randolph, where he set the first type for the first paper. The Advance re-opened, and two years later. The firm is continued, and the Advance is in its best condition and has a large subscription room on the third floor, and the basement being used for press work, all being under the direction of Mr. Blakely, except the editorial offices. At this time Mr. Blakely added two cylinder presses to his office. In this building Mr. Blakely re- mained two years, when he moved to Nos. 153-55 Fifth Avenue, when Mr. Brown formed a partnership with Mr. Blakely, taking a half interest in the concern, increasing the financial strength of the firm of Blakely & Brown to $10,000. Mr. Brown, however, remained unabated in the above named place from 1874 to 1878, when the business had so increased that they found it necessary to seek new quarters, and moved to Nos. 155-57 Dearborn Street, where they have the largest and most up-to-date printing establishment in the country. Mr. Brown is also the editor of the Advance. At this time Hon. C. W. Marsh, of Yancare, Ill., was added to the firm, when the institution was placed upon a basis of $30,000 capital. Here their business remained largely increased. They have added many cylinder presses of the most improved pattern, and have largely increased the paraphernalia that belongs to a first-class printing-office, until they have the largest paper, book and job office in the West. They print some thirty periodicals, known throughout the country. Among the concerns which they publish is the American Miller, Western Druggist, Sewing Machine Advocate, Horseshoer and Hardware Journal, Elevator and Grain Trade Journal, American Field, American Sports, Rambler, Dry Goods Reporter, News Boy's Assistant, Indestructible, The Photographic Eye, The Chicago Horsemans, The Theatrical and Sporting Journal, Western Rural, Western Fireman, Investigator, Philosophical Library, the Empire of Information, by John McGovern, now one of the editors of the "Current" staff; "American Orators," by C. M. White, a work of 1,000 pages, published by the American Orators' Company, which are copyrighted and which arecopyrighted and which are considered the finest in the world. Mr. Blakely's mother died soon after at Worcester, Mass., at the age of forty years. He is naturally of a mechanical turn of mind, and when a boy he had constructed a miniature locomotive, which he exhibited at a State fair at Montpelier, Vt. In the same year this fair he became acquainted with W. Oliver, a hardware merchant, who became his friend and patron. Mr. Oliver became attracted toward him by observing the toy machine and he offered to educate and start him in life if he would live with him, which proposition of his father was readily obtained. Soon after Mr. Oliver moved to Hastings, Minn., remaining there but a short time. He
settled at Pittsburgh, where the family lived for four years, his father being a Lutheran minister. In 1854, the family moved to Indiana, where his father became a convert to the Method-  

erian faith, which he has since preached. Up to fourteen years of age, Mr. Tuerk had attended the schools of Canada, except the last year, when he attended a German school. At fourteen he served an apprenticeship at the mercantile business for three years.  

At twenty he had the management of a store for one year, when he went to Boston and attended a Latin school, and in 1871 came to Chicago. He and his brother, Fred W. Tuerk, in connection with his father, W. P. Tuerk, established the first vegetable-ivory button factory in Illinois at Kankakee, from which have sprung several button factories throughout the State. The ivory comes from Venezuela, South America; their first shipment consisted of fifty-two tons. He was clerked for an insurance office in this city until 1873, when he was largely instrumental in establishing a publication called the Field and Stream, now known as the American Field, which has grown under the management of the present owner, Dr. Rowe, to be the largest and most successful paper of its kind in America.  

Mr. Tuerk was half owner of the above paper for six months, when he sold out to other parties, and Hon. C. W. Marsh purchased the interest of said paper and sunk $30,000 in its establishment.  

Mr. Tuerk returned to the insurance business, but a few months after Mr. Marsh bought an interest in the printing firm of Blakely & Brown, the firm name becoming Blakely, Brown & Marshal; and placed Mr. Tuerk in the firm to look after his interests. In September, 1881, the latter bought the Brown interest, and since the incorporation of the company has been its secretary. He was married on March 8, 1875, to Letta Reulot in this city. They have two children,—Emil Ferdinand and Irma Louisa.  

WILLIAM PIGOTT was born at Le Roy, N. Y., on August 4, 1829, the son of Henry and Sarah (German) Pigott. He attended the common schools at Buffalo until 1837, when his parents removed to Galt, Canada, where he also attended school, and where his father was engaged in the lumbering business. In 1848, William came to this city and for some time was engaged in the real-estate business, after which he worked as a compositor on the Times, having learned the printing trade at Galt and Buffalo. He returned to the Times for about a year, and then entered the publishing business, issuing the Saturday Evening Review and other newspapers. He afterward made the tour of the principal Southern States and engaged in various enterprises, but Chicago was the lodestone to one of his active temperament that eventually drew him North again. He established the Morning Post, with Andre Matson and James Washington Shepherd, and remained until its sale to the Republican Company. He then inaugurated the Evening Post, and used that paper to effect an election of the Soldier's Ticket, wherein he was successful. He then became largely interested in the Mechanics' Type Foundery, and was elected president and remained in that position until 1876, when he removed to LaGrange, Mich., to manage the woolen mills at that town, in which enterprise he is at present engaged. Mr. Pigott has been an indefatigable worker, and when he found the same tract in young men it was always a pleasure for him to encourage them by material aid, and there are not a few of our leading printers of to-day that owe their start and early success to "Bill" Pigott, as he was familiarly called by his old friends. At one time he had accumulated some $200,000 in this city, but the fire of 1871 reduced his possessions to a minimum, and he had to pull up his sleeves and commence the struggle again. He maintained, however, during his whole career an enviable record for probity in his commercial, public, and private life. He was married to Miss Elizabeth Stewart, daughter of Robert Stewart of this city, in 1866. They have the following children: Robert Stewart, Charles Stephen, Arthur Edward, William Francis, Louis Beaudreau and Elizabeth Stewart. Today Mr. Pigott has the same ringing laugh and quick, elastic step he had twenty-seven years ago when the writer first knew him.  

GREME LISLE SMITH is a son of Samuel Lisle Smith, and was born in Chicago, on March 26, 1841. His father was perhaps the best printer in the West during the years from 1840, to the time of his death, in 1854, he was conceded to be the most brilliant and powerful orator that ever graced the rostrum in the whole western country, and Horace Greeley and Henry Cowell contributed much to the development of Mr. Smith's oratorical gifts. Being the grandchild of those they had ever heard. (Vol. I., pp. 132-33.) The son, Greme, was reared and educated in this city, his education being attained at the public schools. The early death of his father no doubt hampered his educational advancement in life. He was obliged to begin his business life at an early age, owing to the financial difficulties of his family necessitating his contribution to their support. In 1879, he took a position with the Illinois Central Railroad, and had charge of the out-freight department. At the end of seven years, he had, by his energy and economy, secured sufficient capital to purchase the new grain and flour commission firm of Pettit, Smith & Co. This firm was located at the corner of State and South Water streets, and, up to the time of the great fire of 1871, was the second largest flour commission house in the city. Their establishment kept away their entire business for some time, but the firm was reduced to almost nothing financially, which forced their retirement from the trade. Mr. Smith, having always resided in Chicago, numbers among his large acquaintance a very many strong and staunch friends. In 1874, he was appointed assistant superintendam of the stamp department in the post-office, and retained that office through the administrations of Postmasters Eastman and McArthur. He then resigned, to take charge of the financial management of the large printing house of J. L. Regan & Co. He continued there for some time but the arduous duties of the position caused his health to rapidly decline, and he was forced to give up the work. Later he was identified with R. K. Donnelley & Sons, and at present is with the H. C. Tiffany Printing Company, holding an important and responsible position with that well known house. Mr. Smith holds a membership in Wabansia Lodge, No. 160, A. F. & A. M.; Washington Chapter, No. 43, R. A. M.; Apollo Commandery, No. 1, K. T.; and Oriental Sovereign Consistory, S. P. R. S., 32°. He was married to Miss Mary Hanley, of Wisconsin. They have one daughter, to whom the family name of Lisle has been given.  

J. W. SWEET, junior member of the printing firm of Seymour & Sweet, was born at Kenosh, Wis., in 1862. He was educated principally in the public schools of this city and is an undergradu-  

te in the second year in the high school course of Chicago. Desiring to take a collegiate course, he spent two years at Fair-  

bault, Minn., in the college presided over by Bishop Whipple. In February, 1881, he was taken sick while at school, and he returned home and never resumed his collegiate studies. In the autumn of 1881, he took a clerical position in a lumber broker's office where he remained for a few months, going thence as a clerk to Sweet, Dempster & Co's store, where he remained for one year and a half, after which, in 1884, he formed a partnership with Mr. Seymour. They are doing a prosperous and successful business.  

HORACE O'DONOGHUE, a law-case printer, commenced his career as a typesetter in J. yons, Iowa, and there, serving the usual apprenticeship, finished his training, and was obliged to go to St. Louis, passing through the grades pertaining to learning the business. He came to Chicago and took a law course at Union College, graduating in 1870, but was not admitted to the Bar until 1877. During the seven years intervening
between his graduation and his admission to practice, he served on the Republican and Inter Ocean. At the expiration of his engage-
manship he opened a small press and began to publish pamphlets and other papers he depicted his own ideas. In the fall of 1874, he started his present business in a small room in Bryan Block, with trepidation and fearlessness as to its out-
come. Of course he was one of the largest printers in his line in the West. He is now about thirty-five years of age, and is the son of P. and Margaret M. (Williams) O'Donoghue. He was married, on April 18, 1875, to Sarah Ella Smith, daughter of Robert W. Smith, a lawyer and cotton dealer, and Mr. O'Donoghue is the owner of the Marble. Both his parents live in Dubuque, his father being the oldest locomotive engineer on the Chicago, Milwaukee & St. Paul Railroad. His father is of French descent and was born in Missouri; his mother was an English lady. Mr. Marble is the oldest of a family of nine children, of whom five are living. He learned the art of printing of 11am & Carver, who were proprietors of The Dubuque Herald, commencing with them in 1867, and was with them for thirteen years, the last six years having charge of the office. At the expiration of this service he came to Chicago, and worked for John B. Jeffery, Knight & Leonard and C. W. Magill. With the latter he remained two years as foreman. In August, 1883, he associated himself with Joseph W. Taylor for sixteen months, when Mr. Marble purchased the interest of his partner, continuing alone. His business is increasing rapidly, nearly doubling every month. Mr. Marble is deservedly respected and is fast gaining friends and fortune. He was married, on August 11, 1875, to Laura S. Oliver, and they have four children: Charles, B. F., Edward J., Lura M. and Florence.
LITERATURE.
691
The first eight years of his life at his birthplace with his parents, where he taught school with the family to America, locating in Chicago. In a few months after their arrival, the father died. Three months in this city were spent in the Kinzie and Ogden public schools, and this constituted the whole schooling of his life. When a mere lad, he was employed for five years in the Jones, Perdew & Klees, receiving no stipulated compensation for the first twelve months, $3.50 a week for the following year, next $4.50, then $6 and finally $8 a week. At the expiration of his apprenticeship his salary was raised to $18 a week. He remained with the old firm for many years, going thence to the employ of Smeal, Rebanks & Co., where he received $20 a week. There he remained a year, but dissatisfied with his salary and wishing to try some other line of book-binding as practiced in other cities, he spent two and a half years in New York City, working in his trade. He then returned to Chicago and formed a partnership, establishing the house of D. & W. McDonald, 111 Madison Street, and in a few months removing to Nos. 158-60 Clark Street; then selling out to Mr. McDonald, he formed a partnership with N. F. Olson in 1879.

N. F. Olson, the junior member of the firm of Peter John-son & Co., blank-book manufacturers, was born in the province of Scania, Sweden, on April 3, 1835. Leaving his home at the age of 20, Mr. Olson emigrated to Canada, via New York and Chicago, in the spring of 1865. He learned the book-binder's trade in the establishment of J. M. W. Jones, and subsequently worked at his trade for Smeal & Rebanks, Cameron, Amberg & Co., and J. W. McDonald. In October, 1879, he formed his present partnership.

Mr. Olson's education was limited to a common-school education in his native home and a short term in this city. But he is studious, devoting his leisure time to study under private tutors. He is thorough in his business, and is said to be a valuable figure in the firm with which he is identified. Has had a successful career from the beginning, which has been marked by constant growth.

J. JEFFERSON is a general publisher and printer. He was born near Lake Simcoe, Canada, on July 31, 1839, and spent thirteen years of his life on his father's farm, going to school in winter, and aiding his father in summer. In 1852, he went to Lewiston, Maine, and learned the art of printing, and seven years, being bound to H. A. Newcomb by articles of indenture. After the expiration of his term of service, he went to Detroit, Michigan, where he started a job-office and became a partner in Jefferson and Jeffries streets, where he remained one year. During this year Mr. Newcomb had come to Chicago, and wrote to Mr. Jef-ferson at Detroit to come here as he had secured a good position on the Chicago Daily Democrat, which was published by John Wentworth. About this time the Press and the Tribune were merged into the Tribune, when he went to work in the job-office of the above paper. Mr. Rand was its superintendent and Mr. McLain its foreman. In a few months after this, Mr. Jefferson, with his old partner, Mr. W. Sheahan, André Matteconn, Frank Eastman and Owen Smart, started the Morning News. Mr. Jefferson held "eases" on the "News," until it was merged into the Republican, when he entered into partnership with Mr. Martin S. H. A. Jones. He had opened a printing office at No. 41 LaSalle Street, with whom he remained until the office changed hands, when he formed a partnership with Thomas J. Wroe which continued until the close of 1858. In 1860 he left business after marriage under the firm name of Jefferson & Wroe, at the corner of Jefferson and Randolph streets, and at the expiration of a year, returned to No. 41 LaSalle. Here he remained till May, 1852, when he removed to No. 170 Madison where he is doing a large and successful business. In 1875, he bought out the interest of his partner, Mr. Wroe, and since then has been alone. He started in business in a limited way with one Gordon press. He has five days paper and two cylinders, and last year did a business of about $35,000. He is now largely interested in panoramas, and has for years made a specialty of hotel work, and expects in a few months to devote his time to that line of work. He was married in 1861 to Mary J. Dennis, of Chicago, whose parents are living in this city. They have three sons and one daughter,—Benjamin, William T., May E., and Ralph. Mr. Jefferson is the founder of the Donnell Company, which was formed on January 3, 1852, and is the son of Hugh and Laura (Fitcher) Donnell. Both parents are natives of Massachusetts, and are now living in Cincinnati. His father came West in 1820, and has three counties named in his honor, in a western part of Ohio. Mr. Donnell is an active, energetic business man, thoroughly devoted to his profession. He was married to Miss Eva C. Landon, of South Carolina, on June 20, 1845. His parents were Charles and Joanna Blomgren, and they emigrated to this country in 1853, settling in this city. After attending school for a short time, Mr. Blomgren learned the trade of printer with his father, with whom he worked for five years. He was engaged with other firms until about 1864, when he became an apprentice to the electrotype. He now is in charge of the company's electrotyping department. In 1874, when Marder, Luce & Co. opened their branch house in San Francisco, Mr. Blomgren was intrusted with the work of going to that city and opening their mechanical departments into operation. After finish-
when he engaged in business, becoming one of the firm of Blomgren Bros. & Co. In 1883 he bought out the interest of his third partner, who died that year. Mr. Blomgren is one of the best letterpress printers in the West, and has done much toward making the reputation for his house in the way of fine and accurate work. He was married to Miss Emma T. LeBlanc of Sweden, on December 31, 1876. They have two children.—Edna and Natalia B. Since 1881, Mr. Blomgren has been a resident of Lake View, and is a member of the Citizens’ League of that village. He also belongs to Wrightwood Council, Royal Arcanum, of Lake View.

W. B. Orcutt, general manager of the Orcutt Lithographic Company, was born at Hamilton, Canada, on September 13, 1857. His parents moved to this city when he was two years old. He and the family have since lived. His father was the proprietor of the City Hotel before the fire, and is now the proprietor of the hotel of the same name on the corner of State and Eighteenth streets. His mother died in 1859, two years after their arrival in this city. The primary and grammar school education of Mr. Orcutt was received in this city, after which he attended Lake Forest Academy. After the great fire of 1871, he was in the lithographic business with Shober & Carriqueville, as their general agent, and in this capacity served the firm for ten years, during which period the firm became one of the largest establishments of its kind in the Northwest. On February 1, 1885, Mr. Orcutt, M. H. Schnader, Paul Heitman and M. C. Cooney, both of the latter being practical lithographers, and for many years in the employ of Shober & Co., organized the Lithographic Lithograph Company and opened at Nos. 160-62 Clark Street, where their business has grown far beyond their expectation. They will soon move into enlarged quarters at Nos. 341-45 Wabash Avenue, where they will have room for the execution of their art on a larger scale than heretofore. The Company is a guarantee of success.

Hughes & Johnson.—This firm comprises Thomas Hughes and Peter C. Johnson, both of whom are well-known lithographers and gentlemen of long experience in the business. For a number of years they were connected with a well-known lithographic house in this city. About 1880, when they went into business for themselves, they started with two small hand-presses, a small stock of stones and seven hands, and from their commencement in business they have steadily progressed until they command an excellent trade. Mr. Hughes is located in a room at Nos. 146 Clark Street, but within a year and a half these quarters became too small, and they were obliged to remove to a more commodious building. They went to Nos. 148-50 Clark Street, where they remained until May 1, 1885, when, to obtain still larger quarters, they removed to No. 235 Kinzie Street, where they occupy a very large double floor, well lighted and splendidly adapted to their requirements. Here they have five large power presses, of the latest American pattern, besides eight hand-presses, in the Litho and Letter department, and seven employés whose force has been increased to an average of sixty artisans, and during the business part of the year they work selections for many of their principal clients to keep up the demands of their trade. They make a specialty of fine color lithography, and the work turned out by them far excels that of many of the old houses of the East. The photo-gravure portraits in this volume were made by Messrs. Hughes & Johnson.

Thomas Hughes, senior member of the firm of Hughes & Johnson, was born at Northampton, England, on March 20, 1848. He passed his boyhood and the greater part of his youth in his native town, where he attended school and learned the art of lithography. He worked ten or eleven years at his trade in Northampton, and became a thorough master of the business. In 1879, he came to America, and upon arriving in Chicago, he easily found employment in one of the largest establishments in the city. His skill as an artisan became so recognized that he was promoted to a high position, which he retained until the establishment of the present concern, as foreman by himself and P. C. Johnson in 1850. The growth of his business has been remarkable, and the firm to-day has a magnitude trade, netting the proprietors a handsome revenue and an honor.

Peter C. Johnson was born in Denmark, on November 17, 1844, and he resided until he was sixteen years of age. He received his early instruction and learned the trade of printer at his native town—Flavers—intil and in 1860, he came to America and engaged in business. He was married to Miss Emma Peters, and they have four children,—Thomas Jr., Annie, George and Blanche. Mr. Hughes was at one time a member of the Order of Odd Fellows, but the deplorable effect in business has long since deterred him from paying much attention to social society obligations.

which Benjamin Franklin belonged. In 1835, she married Francis M. Mitchell, brother of Maria Mitchell, the astronomer, and came to Chicago, with her husband, in 1859. Her familiarity with European literature place her at once in the society of the city at that period, one of these being the well remembered North Side "French Club," in which she was actively associated with Mrs. Kate N. Doggett. Later, Mrs. Mitchell was one of the founders of "The Fortnightly," a religious and literary society, and by her request the Mrs. Doggett, then president, delivered the opening essay for that body, the subject being "Culture for Women." Subsequently Mrs. Mitchell was president of "The Fortnightly" for several years, and made important contributions of essays to the "Talk on the Imagination," "The Troubadour and His Sons," "That same old Psalm of Life," "Dante's Divine Comedy" and the "New Hymns." She assisted in the founding of a Woman's Congress from its organization, and is now its vice-president for the State of Illinois. At the second meeting of that association, held in Chicago in October, 1874, in a foreable address, she drew the attention of that body to the condition and needs of "Outcast Women." Her greatest philanthropic interest has been in this work, and she was for many years secretary of the Ering Women's Refuge of Chicago. She is a member of the Swedishborgian Church. Dr. Clifford Mitchell, professor of chemistry in the Chicago Homoeopathic College, is her only son.

Buel H. Bartlett, No. 901 West Madison Street, was born in Arlington, Bennington Co., Vt., on September 13, 1805, the son of Ephraim and Nancy (Hoag) Bartlett. His father was tied amongst the first settlers in New Hampshire, and his great-grandfather, Josiah Bartlett, was one of the signers of the Declaration of Independence. Mr. Bartlett was raised on a farm, and educated in the common schools, at the academy and the state school, in various places in the State of New York. He was superintendent of the female department of the Union School, Geneva, N. Y., for a number of years. After some time he engaged in the live business, which he carried on for three or four years, and in the meantime was tax collector, and held prominent positions in the Presbyterian Church of that place. In 1859, Mr. Bartlett came to Chicago, and taught school at Summit, near the city, for two years. In 1864, he went to Beloit, Wis., and engaged in horticultural pursuits for some time, and subsequently went to Norwood Park, Ill., and resided there with his family until 1879, when the death of his son (after whom he was named) brought him back to Chicago. Mr. Bartlett is now married, in Fleming, near Auburn, N. Y., in 1826, to Miss Sarah Jane Loemis, a native of that place, and has a family of three sons and three daughters, of whom two daughters and one son now survive. He belongs to the Masonic Order at Geneva, N. Y. Mr. Bartlett now resides with his daughter, Mrs. F. A. Cleaveland, at No. 901 West Madison Street, who keeps an extensive circulating library. Mr. Bartlett is a gentleman of fine literary taste, fond of reading and is now comfortably spending the remaining days of his life with his affectionate and industrious daughter. Mrs. Cleaveland has two sons living,—Fred. B., financial secretary of the Citizens' League, and Frank L., with James W. Goodwin, of St. Louis, Missouri, a relative of the poet of that name. Alonzo was the second son of the family. Early developing an enterprising disposition, and the home prospect offering small inducement, he purchased his time to one and twenty for the sum of $200, promptly paying it to the last dollar. With his entire wardrobe and stock of worldly goods tied up, literally, in the traditional bandsana handkerchief, with $9 in his pocket, with no education, at fifteen he bravely took himself into his own keeping, determined to win success. Shutting out all vanities and vices, common then as now to boys and young men, he early discharged his debt to his father, and entered Godd's academy in his native town. Having, after a second year, secured a liberal education, he was able to fit for college in an unusually short time. He however decided not to enter college, and on leaving the academy he commenced the study of law in the office of Wm. P. Fessenden, of Bethel, and in the spring of 1839 was admitted to the Bar at Portland in 1835. Becoming deeply interested in the anti-slavery cause, he accepted an appointment as lecturer for the American Anti-slavery Society, and in 1835 he left his law practice and travelled extensively through the New England States, lecturing and attending conventions in many of the principal cities and towns. At that time he formed an intimate acquaintance with Wendell Phillips. With the advice of Theodore Parker and Dr. John Foster, Parker Pillsbury, Samuel J. May and all the principal workers in the anti-slavery enterprise, in 1853, he removed to Illinois, and was for a time the lawyer of LaSalle, and with the active leadership of the Anti-Slavery party, at that time a rash act, especially for a stranger and a young man. That year he assisted in forming the first republican organization in Illinois, in his own county of LaSalle. In 1855, he was fiercely mobbed in his own town of Earlville, for harboring a fugitive slave whose claimant had personal friends in the immediate neighborhood. His house was always a sanctuary to the fleeing slave and a most welcome and hospitable home for all who are earnestly laboring for their deliverance. The lamented Owen Lovejoy, brother of Elijah Parish Lovejoy, the first anti-slavery martyr, was his personal and intimate friend, and has been a member of the American Anti-Slavery Society as well as liberal and progressive school. He was an early disciple of Theodore Parker, when his preaching was as odious to the churches as were the doctrines of the abolitionists to the political and religious repugnance of the society with which he was connected and under whose administration, he was abandoned, it giving powerful and unanswerable reasons for his course. He was the author of the famous "platform of 1856," which was in favor of the greenback principles which the party leaders shamefully repudiated in 1874. The plank referred to, is a most important item in the financial history of that most eventful period, and well worth copying by all. It is as follows: "We desire all forms of repudiation as a national crime; and the national honor requires the payment of the public indebtedness in the utmost good faith to all creditors at home and abroad, not only according to the letter but the spirit of the laws under which it was contracted. The bonds were mostly, both by the law and the terms thereof at that time, payable in greenbacks or legal-tender treasury notes. He aided in inaugurating what is known as the greenback party, and in 1855, he canvassed his native State in its interest, and bore an important part in electing Governor Plaisted on that platform against the great landed railroad and moneyed monopolies. He labors with pen and tongue, in private and public, for all the public and political utility and fervor rarely equaled, never exceeded. In him all the industrial classes, men and women, have an unadulterated, unshaken and unerring friend. In 1858, he was nominated by the anti-monopoly party for Congress, but the election was ratified by the prohibition party, and a large number of influential democrats endeavored to have the democratic convention also ratify his nomination. His professional practice, extending through many States and Territories, has been very lucrative, his habits have ever been most temperate, never in his life tasting tobacco or intoxicating drinks, rarely tea or coffee, hearty and sprightly at fifty-seven years of age. Side by side with Lucretia Mott, Elizabeth Cady Stanton, Lucretia Mott, Elizabeth Cady Stanton, Mrs. Trumbull, Mrs. Trumbull, and Mrs. Kay, Mrs. Kay, have always been a firm believer in the equal civil, political, educational and industrial rights of women with men, and that we are yet only a half republic. In 1855, Mr. Grover married the A. F. Norton, also a native of Maine. They have four living children, all sons. The eldest is in business in Chicago; the second, an artist of rare ability; the others are yet in childhood. Senator Lafayette Grover, of Oregon, and Maj. Gen. U. S. Grover, of Georgetown, District of Columbia, are of the same Grover connection, and grew up in the same town of Bethel. Besides his large professional business, Mr. Grover performs a vast amount of writing, lecturing on temperance and anti-slavery, and having, as a contributor to the "Weekly Magazine" and other papers. Many of his articles evince a power of description and discrimination, of ringing invective too, as well as logic and argument when occasion demands, so well improved all the time, that the public has been widely copied.

TYPographical UNIONS.

The Chicago Typographical Union, No. 16, at the time of the great fire, had been in operation nearly twenty years, having been organized in June, 1852, and had a total membership of five hundred. The officers for 1871, were John M. Farquhar, president; H. G. Boughman, vice-president; E. M. Kerrott, recording secretary; William A. Hutchinson, corresponding and financial secretary; and Morgan B. Mills, treasurer. By the conflagration a large number of the members were made homeless and thrown out of employment, and
with characteristic generosity the printers of other cities sent large contributions for the relief of such. Within six days after the fire nearly $4,000 reached the officers of the Union, an additional $5,000 being sent later. Of this amount $6,500 were distributed by the relief committee of the organization, that amount being given to printers, their wives and children, apprentices and press-feeders, including many who were not members of the Union, 1,868 persons being benefited by the fund. Of the amount donated, $1,000 was returned to the subscribers, the members of New York Unions, and $100 was voted to replace the society furniture destroyed by the fire. At the request of the employers of the city, the Union suspended that portion of the scale of prices requiring extra pay for overtime for a period of ninety days. Until the city was re-built, the printing offices were confined in very small quarters, and were compelled to run night and day forces, the action of the Union enabling them to do so at reasonable expense, and the heavy demands and the embarrassments of the times were thus successfully met.

In June, 1872, employers acceded to the prices paid during the flush times of the War, 50 and 55 cents a thousand ems for day and night composition, although the scale by the week remained unchanged. In 1876, the price of composition was reduced for night work from 47 to 42 cents, and for day composition from 42 to 38 cents a thousand ems, week work being $18, a cut of $3. In May, 1880, an attempt was made to advance the weekly scale to $21, but the movement proved the most disastrous in the history of the Union, a majority of the best offices in the city resisting the demand successfully. In July of the same year, the Union returned to the old price of $18. In 1885, the price for night composition was 40 cents, and for day composition 37 cents.

The prosperity and importance of the Union is best shown by a comparison of the membership list and receipts of 1885 with those of 1871. In the latter year there were 500 members, and the receipts amounted to less than $2,500, while in 1885 there were 1,128 members, of whom thirteen were females, and the receipts were $6,075.60, with cash on hand amounting to $2,700. The Union has been represented at the national conventions of the craft, and from its relief benefits, it has purchased large burial lots at Rosehill and Calvary cemeteries. In February, 1882, the secretary-treasurer was required to devote his entire time to the interests of the Union; an office was secured, which is open daily, the nucleus of a library formed, and a reading-room and employment agency established. In October, 1885, this office was connected with city and suburban offices by telephone. The presidents of the organization from 1871 have been as follows:

1872, Morgan B. Mills; 1873, R. D. Campbell; 1874-75, P. H. McLogan; 1876, H. S. Fiskard; 1877, M. J. Carroll; 1878, Edward Irwin; 1879, George W. Morris; 1880, Joseph Lang; 1881, M. M. Mendenhall; 1882, William L. Lund; 1883-84, M. J. Carroll. The officers elected in 1885, were A. H. McLauglin, president; Peter Price, vice-president; J. R. Jessup, recording secretary, and Samuel Kastall, secretary-treasurer (office created in 1885, which he has filled continuously since that date).

The German Typographical Union, No. 9, was organized in 1872, and incorporated in 1879. The original founders consisted of twenty-eight German printers, and the society was formed on the same basis as those in other cities. At the first regular meeting, the following officers were elected, the list including some of those who took the initiatory steps in establishing the organization: Conrad Conzett, president; Nicholas Kilt, vice-

president; Sigismund Strauss, secretary; Robert Schmid, corresponding secretary; August Herzberg, treasurer. In 1879 the membership of the society had increased to forty-five, and in 1885 there were eighty active members. Under the constitution adopted when the Union became an incorporation, a benefit clause was made a permanent feature of its operations, $6 a year being now awarded to sick or unemployed members, and $200 paid to the family or heirs of deceased members. The annual income and expenses of the Union have varied according to membership and other circumstances, but the Union is in a healthy financial condition. Two reductions in wages have occurred during the life of the society, in 1873, and 1876, and one increase in 1881. The Union has participated in two strikes, the first in 1876, when a reduction of wages was made by the Staats Zeltung. The society then lost its cause, but in 1881, during the strike for better wages on the Freie Presse, rates were advanced, and the Union scored a signal victory in insisting on the employment of union men. The Union has been represented at conventions of German-American printers in 1874, at Cincinnati; in 1876, at St. Louis; in 1877, at Chicago, and in 1885, at New York. The officers elected for 1885 were

H. Pudewa, president; R. Schwencke, vice-president; John Schilling, secretary; A. Herzberg, corresponding secretary; William Urban, financial secretary; P. Simon, treasurer; and Charles Fuchs and August Henn, trustees.

The Scandinavian Typographical Union was organized in 1883, after many unsuccessful attempts to consolidate the labor interests of Scandinavian-American printers in this city. On April 15, of that year, Emil Ljunggren called a meeting of Scandinavian printers at the Hotel Dannevirke, to discuss the question of forming a union. Steps were then taken which terminated in the organization of the society ten days later, the original founders being

Semi-annual meetings in January and July were arranged for, and at the third regular meeting the membership was forty-nine. The presidents for 1884, were A. Morck and Ernest Younggren, and for the first half of 1885, C. O. Williamson. On May 1, 1884, the sick fund was established, and twenty-eight members of the association subscribed for its benefits. This branch of the society was re-organized on August 23, 1885, with Charles J. Sward as secretary and treasurer, and twelve members, $105 being paid out for sick relief during the first six months of 1885. On September 1, another fund was established, whereby unemployed members were to receive $3 a week. The officers elected for the last part of 1885 were

A. Morck, president; J. F. Ellefsen, vice-president; Alexander Sward, recording secretary; O. Lund, financial secretary; J. Dahl, treasurer; Emil Lindberg, sergeant-at-arms; C. O. Williamson and H. Hessethoff, trustees.

The association at that time had forty-nine members.

Pressmen's Union.

The Pressmen's Union of Chicago was organized on October 17, 1874, at a meeting of representative members of the craft held at Burke's Hotel.
The charter members were—J. Buckie, Jr., John McMilla, S. McNamara, Charles Frink, O. C. Fordham, J. Bichl, A. B. Auer, F. Marouly, and M. Curtis, and the total membership at the end of the year included twenty persons. The officers elected in 1874 were

John Buckie, president; O. C. Fordham, vice-president; Charles Frink, recording secretary; G. Barus, financial secretary; A. B. Auer, treasurer.

The presidents and vice-presidents since then have been

1872, Garrett Burus, president; J. L. Regan, vice-president.
1876, Stephen McNamara, president; Charles Frink, vice-president.
1877, John McMilla, president; Henry Woodruff, vice-president.
1879, A. B. Auer, president; John McMilla, vice-president.
1878, J. L. Regan, president; Conrad Kabler, vice-president.
1880, John McMilla, president; James Hardy, vice-president.
1881, James Hardy, president; John Bryant, vice-president.
1882, John McMilla, president; R. F. Sullivan, vice-president.
1883, M. Knowles, president; M. Curtis, vice-president.
1884, George McNamara, president; R. Tinerotte, vice-president.

The officers elected in 1885 were as follows:

R. F. Sullivan, president; M. Knowles, vice-president; Lee M. Kiley, financial secretary; John Leander, recording secretary; M. Curtis, treasurer.

The Union has had a most successful career, and as a benevolent and business organization has been of great benefit to its members. It has upheld the standard of wages established when it was first organized, and by a wise and conservative policy has avoided any trouble with employers. On the death of a member, the Union appropriates $100 for burial expenses. The Chicago Union was represented by delegates at the National Pressmen’s Convention, at St. Louis, in 1885. It has at present eighty-two members.

THE PRESS.

Of the splendid fire-proof building which the Tribune Company had built in 1868, all that was left on October 9, 1871, were the walls and the vault. The latter contained a safe, a linen coat and a box of matches, and these were intact. With this property, backed by unconquerable energy, the proprietors resumed business at No. 15 South Canal Street. It was a three-story brick building, but by no means an inviting one. The ground floor had been used for general storage, and was filled with old lumber of various sorts, old barrels, fragments of machinery and boxes lying scattered about in confusion. The second floor was filled with egg boxes, neither pleasant to look at nor handle, and the third floor contained the accumulated refuse of years. A few hours of labor made the place habitable, and here were gathered, on the morning of the 10th, owners, editors, reporters and printers ready to bring the Tribune into being again. During the day material enough was collected, and that night, by the light of the tallow candles, the printers set up the narrative of the fire. The next day a regular folio appeared; and day after day improvements were made, until, on the first day of November, it came out with its old heading, and in a new typographical dress, looking precisely like the Tribune of a few months before.

Meantime, a more elegant and commodious structure commenced to arise on the site of the old. One year from the date of its sudden removal, the Tribune force, except those engaged in the counting-room, were back in their old quarters, and on the night of October 9, 1872, the same press which had stopped working on the night of October 10, 1871, once more resumed operations.

The new building is of Lake Superior red sandstone, five stories high, exclusive of the basement, and, with the exception of the second and third floors, is used entirely for the purposes of the paper. It cost $250,000, and is very complete in its appointments.

The paper was then, as it had been since about 1865, under the editorial control of Horace White. Joseph Medill had a large interest in the company, but not sufficient to control it, the principal, then Mr. Cowles, sympathizing with Mr. White. From 1866 until the time of the fire, many differences arose between Mr. Medill and Mr. White, and there was a struggle between them for the mastery, and Mr. White became the victor. Mr. Medill had been a high tariff man, while Mr. White was in favor of a low tariff, and as soon as the latter obtained control he impressed that policy on the paper. After the fire, Mr. Medill was elected mayor of the city, and, from that time until the retirement of Mr. White, gave but little personal attention to the Tribune.

Mr. White, long restive under the dictations of party, undertook to make the Tribune thoroughly independent. In doing this he advanced the rank of the journal as a newspaper, and made it attractive, brilliant and popular. It made hosts of new friends, but lost many old ones.

In the presidential campaign of 1872, for the first time in its history, the Tribune did not support the republican candidates. It supported Greeley. White had been one of the triumvirate—Whitelaw Reid and Murat Halstead the other two—who had promoted the liberal-republican movement, and brought about Greeley’s nomination. During the canvass, the Tribune contained the most brilliant political writing it had ever printed. The editorial staff was exceedingly able. Mr. White himself was editor-in-chief, and James W. Sheahan and James B. Runion were his principal editorial assistants.

The fall elections disclosed the fact that Mr. Greeley would not be elected, and on October 10, 1872, the editorial page of the Tribune contained the following announcement:

"We announced some time since that the Chicago Tribune would hereafter be independent of parties and politicians, and would be the organ of nobody except its own conductors and of the people who give it its support. That policy we shall still pursue."

In November, 1874, Mr. Medill became possessed of a controlling interest in the paper, Mr. White retiring, and the paper was quickly brought back into the republican line.

Mr. Medill found an admirable editorial corps ready to his hand, and he made few changes. He appointed his brother, Samuel J. Medill, managing editor, and Frederick H. Hall became the city editor. Alfred Cowles remained in charge as business manager, a position he assumed in 1855, and still holds. From that time forward, the Tribune was not long in recovering its old following. It had always had the largest share of advertising patronage, and this it
held and increased; and soon Saturday and Sunday supplements were added to its regular issues.

Mr. Medill has had complete control of the editorial page, except perhaps on the question of low tariff. On that point its policy has remained as directed by Horace White, except during the presidential campaign of 1884. On silver and currency, the Tribune has opposed "greenbackism" and "free money," and its powerful influence did much to modify those financial principles

---

in the republican party. It advocated the remonetization and coinage of the standard silver dollar, and has always maintained that without that coinage a return to specie payment would have been impossible. It has always opposed the formation of a temperance party and the policy of prohibition, but has been in favor of high license.

In 1876, it earnestly and successfully opposed the nomination of Mr. Blaine by the Republican Convention at Cincinnati. In 1880, it opposed the nomination of General Grant for a third term, and was influential in bringing about his defeat in the Convention. In 1884, it opposed the nomination of Mr. Arthur and advocated the cause of Mr. Blaine, and in the campaign that followed was an ardent supporter of his election.

Samuel J. Medill, who became managing editor in 1874, died in February, 1893. He was succeeded by Robert W. Patterson, who has shown remarkable alertness and enterprise in news-gathering and in making an interesting paper. George P. Upton, Welker Given, and Stanley Waterloo are the principal editorial writers; Elias Colbert is commercial editor, Clinton B. Evans financial editor, Harry M. Scovel news editor, Fred H. Hall city editor, and John E. Wilkie assistant city editor, and there is a large staff of reporters and special writers.

Samuel John Medill was born on November 19, 1841, on his father's farm in Stark County, Ohio. He lived on the farm and attended the country school until April, 1850, when he went to learn the printing business in the office of his brother, Joseph Medill, who was publishing the County Republican at Coshocton, Ohio. In May, 1852, he went to Cleveland and entered the office of the Daily Forest City. He remained in Cleveland until May, 1856, when he went to Canton and resided with his mother, attending the high school and working at odd jobs. In the spring of 1859, he came to Chicago, and entered the office of the Northwestern Prairie Farmer. In 1860, he went into the Tribune job office, remaining there for some time. He then accepted the position of stationer on the Illinois Central Railroad. When the War broke out, he tried to enlist in the Board of Trade Battery, but was rejected on account of his youth. On the first of September, 1862, he enlisted in the 13th Illinois Cavalry under Colonel Farnsworth. He saw service at Antietam, South Mountain, and in Northern Virginia, but was discharged on account of sickness in November, 1862. He returned to Chicago and passed the next two years in perfecting his education, spending one year at Beloit College.

In the fall of 1864, he became a reporter on the Tribune. Commencing at the lowest round, he worked up until he became the sporting reporter, and was considered one of the best in the West. In the summer of 1866, he was offered the place of assistant city editor of the Republican, soon after becoming city editor, which place he held until November, 1867. In January, 1868, Mr. White offered him the place of city editor on the Tribune. That position he held until November, 1873, when Mr. White promoted him to the position of Washington correspondent, which he held until June, 1874, when he returned to Chicago and was sent as special travelling correspondent throughout the West. In the fall of that year, when Joseph Medill assumed control of the Tribune, he made him his managing editor, a position which he held until the day of his death. In January, 1882, he was elected president of the Chicago Press Club. On January 14, 1886, he was married to Miss Nellie M. Carson, daughter of John B. Carson, of Quincy, Ill. They had one child, who died in infancy. Mr. Medill died of consumption, at Quincy, on February 20, 1883. He performed honestly and well the important duties which were intrusted to him, and earned not only the trust and confidence of his employers, but also the affection and prompt obedience of those who worked under and with him.

Alfred Cowles, secretary and treasurer of the Tribune Company, was born at Mantua, Portage Co., Ohio, on May 13, 1832. He was reared in the vicinity of his birthplace, and attended the common schools, afterward attending a preparatory institution with a view of taking a higher course of study. But instead of this he went to Cleveland, Ohio, where he remained for nineteen years of age, and secured a position as clerk in the office of the Cleveland Leader. This paper was established in 1856 by Horace, Joseph Medill, with others, and it was while with that firm that Mr. Cowles first met the gentleman with whom he has been closely identified for the past thirty-five years. Mr. Cowles remained in Cleveland until 1854, when, in company with Mr. Medill, he came to this city, and purchased an interest in the business and became financial manager of The Chicago Tribune. In this capacity Mr. Cowles has been identified with that Journal continuously, and from its early struggles up to its present great prosperity his hand has guided its financial management. Mr. Cowles was married in 1860, to Miss Sarah F. Hutchinson, daughter of Hon. Mosely Hutchinson, of Cuyahoga, N. Y. Her death occurred in 1884. There are three children now living—Sarah E., Alfred, Jr., and William H.

John E. Wilkie is the son of Frane B. Wilkie, and was born at Elgin, Ill., on April 27, 1860. He received a high school education in Chicago. In 1877, he went abroad, and during a year's residence in London did his first newspaper work. Returning to Chicago, he became a reporter on the Chicago Times. While doing the "police work" for this paper, he became interested in the police patrol system, then in its experimental stage, designed in its early stages, and in the whole combination, and in many ways aided in perfecting the service now so widely known. In 1881, Mr. Storey sent him to London as an attaché of the European Bureau of the Times, which was established late that year. Coming back to Chicago, Mr. Wilkie accepted a position on the Tribune, and, after serving in the local and commercial departments, was made assistant city editor on January 1, 1884.

The Chicago Times.

The first person connected with the paper to make
his way on Monday, October 9, to where the Times office had been, was Franc B. Wilkie. The fire was still raging near the river and north of it. Smoking ruins were all around. Mr. Wilkie sought the residence of Mr. Storey, which was south of the burned district. There he found him in company with a few friends, seated on the front steps, gazing gloomily to the north where hung a vast body of smoke like a great pall over the doomed city. He seemed crushed by the great calamity. His old courage had deserted him, and in response to a query about getting out the paper he said, "No, I shall not attempt to resuscitate the Times. It is utterly destroyed, and so is Chicago. The damage to both is too great to be repaired. I am an old man, and I cannot come over again. I can secure from these ruins about $50,000, and on this I can live comfortably the remainder of my life. If I venture that in starting the Times again, I risk all I have, and would probably lose it."

Mr. Storey was at this time fifty-two years of age, but he looked much older. For ten years he had worked night and day to build up a great newspaper, and in a single night the great destroyer had swept it away. The blow told upon him and for a time subdued him. At last after much urging he gave permission that one number should be attempted. There was in the barn of his residence type that had once been used, but which had been laid aside. There was a single cylinder press belonging to a firm on the West Side which had escaped the fire, and the use of this was secured. Printers were hunted up, an office opened at No. 195 West Randolph Street, the staff were gotten together, and advertisements began to pour in. Then came offers of assistance from friends in Michigan and other points. On all sides courage and hope predominated. It was not until the 18th of October that the Times appeared, but when it did, it proved a great success. It was an eight-column folio, and was the beginning of a new era of prosperity that even Mr. Storey had never dreamed of attaining.

A temporary place of publication was erected at No. 42 West Adams Street, and to this place the Times was removed. New presses and new type were purchased, and in December, following, the Times resumed its old quarto form.

In re-building the Times, Mr. Storey was admirably seconded by his business manager, Austin I. Patterson, and by his staff, most of whom had been associated with him for years and fully understood his methods and aims. Mr. Wilkie, Mr. Matteson, Everett Chamberlin, A. C. Botkin, Mr. Hnacher, and a large number of reporters were the working force, and year after year was strengthened by Charles R. Dennett, Haydn Smith, Mrs. Sullivan, Charles Atwood, Horatio Seymour, Frank McClenathan, and others.

A site for a new building, on the corner of Fifth Avenue and Washington Street, was purchased. A new fireproof building was finished in March, 1873, but scarcely was it occupied before it was found necessary to add to its facilities, and the more hundred and three adjoining feet were purchased and built upon, the whole building being carried up to five stories. The establishment is one of the most perfect of its kind in the country.

At this period the paper changed from a party organ to a position of independence, this attitude contributing greatly to its success. In the gathering of news, Mr. Storey redoubled the energy of former years, and spared no expense. He had news agents all over the world, and in 1877 established a news bureau in London, to cover the operations of the Russo-Turkish war. In 1886, he established and had in full operation a bureau of old world news in London, with sub-agencies in the principal capitals of Europe, but this was only continued for about a year. Both of these London bureaus were placed under the management of Mr. Wilkie.

In 1872, the Times advocated the nomination of Judge Davis by the democrats, and when that party nominated in the candidacy of Mr. Greeley and supported him, it utterly refused to countenance that alliance, and opposed Greeley with great power. In 1876, it came out with some bitter and trenchant editorials opposing the nomination of Tilden by the Democratic Convention of St. Louis, but when that statesman was nominated, wheeled into line in his support. In 1886, it sustained Hancock, and in 1884 supported Cleveland. The Times has favored a low tariff, and has opposed the standard silver dollar and silver coinage.

In 1875, the increasing demands on his time caused by the immense growth of the paper, induced Mr. Storey to appoint a managing editor. Charles R. Dennett was selected for the place and, with the exception of a few months, held it till the fall of 1885.

Charles R. Dennett is a native of New England, and was born about the year 1833. When not more than twelve years of age, he set type in the office of the Boston Advertiser. He became a reporter and drifted westward, working on the Cincinnati Commercial and the Cincinnati Enquirer. When J. B. McCullagh came to Chicago to take charge of the Republican, Mr. Dennett accompanied him, and became managing editor of that paper. After the first was for a time on the Evening Post. In 1871 he became the Times as telegraph editor, and in 1873 became the managing editor. He has great capacity for work, and a genuine instinct for news. What the paper has been as a whole, since Mr. Storey ceased its active management and control, from about 1878, Mr. Dennett has made it.

In 1876, Mr. Storey founded an afternoon paper, but it proved only an expense, and after a short time he discontinued it. About the same time he undertook to raise the price of the Times to six cents, but this was soon abandoned.

Mr. Storey now began to fail rapidly in health. The tremendous strain upon him before the fire, and the arduous labors for the three or four years succeeding it, were now telling upon his constitution. In March, 1878, he went to Hot Springs, but returned without benefit, and in June of the same year he sailed for Europe. While travelling in Switzerland he suffered a paralytic stroke, and was taken to Paris and placed under the care of Dr. Brown-Sequard. That physician gave no hope of recovery, but advised that he should be immediately taken home. He survived the sea voyage, and reached Chicago somewhat improved in health, but it is needless to follow his gradual physical and mental decline. In August, 1884, he was legally adjudged to be of unsound mind, and Austin I. Patterson was appointed conservator of his estate. On the 27th of October, following, he died.

Mr. Storey was first married in Michigan to Miss Maria Isham, from whom he was divorced some years after he removed to Chicago, after having made ample provision for her support. A short time previous to the fire he married Mrs. Harriet丁 Dodge, who died early in January, 1873. In 1874, he married Mrs. Eureka C. Pearson, who still survives him.

Mr. Storey's influence on Western journalism can hardly be estimated. When he purchased the Times, Chicago papers were but little superior to the country press about them, and were largely made up of scissors from New York periodicals. Mr. Storey entered upon a course of expenditure for news that startled the community; he was the pioneer in almost every important feature in the journalism of his day. At the time of his death the great paper he founded was valued at $1,000,000.
HORACE A. HURLBUT was born in Morristown, St. Lawrence Co., N. Y., on February 23, 1831, and is a son of Horace and Eliza (Jackson) Hurlbut. He was quite prominent for twenty-four years as a pioneer of that county; he held various important offices under the General Government, being a staunch democrat, and his son Horace has steadily followed in his footsteps in his political affiliations. Horace A. attended the preparatory school of St. Lawrence County, and afterward became a pupil at the Ogdensburg Academy. Leaving that institution at the age of sixteen, he worked on a farm for two years, and was then employed in a drug store for a similar period. In the spring of 1850, he came to Chicago, becoming an employee in the house of J. H. Reed & Co., wholesale druggists, then located at the corner of Lake and LaSalle streets. In the spring of 1851 he entered the house of a porter, but his services proved so valuable that he was made a partner three years later, and sustained that relation until 1857, when he bought Mr. Reed's interest, and the firm became Hurlbut & Edsall, which at that time was the largest in the West in the drug business. This firm continued under that style until the death of Mr. Edsall in 1871. In the fire of 1871, the entire business of the firm was swept out of existence, but it was speedily re-established, and, in 1875, the firm name became H. A. Hurlbut & Co., and so continued until 1882. In that year Mr. Hurlbut sold out his interest, and opened a real estate office, having for some years previously been doing business of that nature by dealing in real property and making investments and loans for eastern capitalists. At that time there was great prejudice against Chicago investments, but, in consequence of Mr. Hurlbut's confidence in the future of the city, several millions of money were invested with him for that city, and by him in some of the largest business blocks in the city. This and similar efforts had caused him to be recognized as one of the merchants most closely identified with the growth and enlargement of the trade of the city during that struggle for the extension of business for the most trying years from 1850 to 1875, when Chicago took the front rank as the leading city of the West. Mr. Hurlbut was married, in 1855, to Miss Emma Edsall of Washington, St. Lawrence City, N. Y.; they have two sons, Josiah R. and Horace E. On December 4, 1881, Mr. Hurlbut was appointed receiver, by Judge M. F. Tuley, of the W. F. Storey estate, which comprises the Chicago Times, giving a bond of $50,000 for the faithful performance of his duties, and this responsible position Mr. Hurlbut now holds.

FRED. J. HURLBUT, a brother of Horace A., came to Chicago in 1847, and became connected with the firm of Dyer & Chapin. As a terminating partner he ran the 7th Illinois Volunteer Infantry, and was ultimately promoted to the rank of colonel. During his service he participated with General Sherman in the March to the Sea, and, in fact, performed his whole duty in a thoroughly soldierly manner. He was accidentally drowned in the Chicago River in April, 1865, and his demise was generally mourned by those who knew him, on account of his many estimable qualities.

HAYDEN KALLOUG SMITH was born at Grafton, Wis., on February 8, 1831. His education was mainly received in Wisconsin, supplemented by two years of the regular course at Yale College. His first connection with newspaper work was as local and city editor for the Star, in Madison, in the winter of 1857-58. A year later he became a teacher in the preparatory department of Carroll College, at Waukesha, Wis., remaining there until some time in 1860, and taking the degree of A.B. at the University of Wisconsin in 1859. In the fall of 1859, he was married at Waukesha, to Miss Fannie A. Proctor, and, in October following, removed to Denmark, Tenn., to take charge of a female college at that place. Mr. Smith returned in January, 1861, to Wisconsin, and during that year and a part of 1862, with his father, the late John V. Smith, edited the Wisconsin Argus, published at Madison. During the War he was variously employed, writing much for the press from the Army in Tennessee and Georgia. On January 1, 1866, he became editor-in-chief of the Milwaukee Sentinel, and continued his connection with that journal until the spring of 1871. In June of the latter year, he became an editorial writer for the Chicago Two Times, in which capacity he still continues. For several years past, Mr. Smith has also given considerable attention to educational work. From 1879 to 1882, he was lecturer on political economy in the University of Chicago, receiving from that institution the honorary degree of L.L.D. in 1880.

THE INTER OCEAN.

The Inter Ocean was founded by J. Young Scammon in the spring of 1872. Mr. Scammon was one of the early stockholders of the Republican, and sympathized with the aims and policy of that paper. As a three cent paper under the management of J. B. McCullagh, it seemed to be reaching a prosperous condition when the fire came and swept it away. This was the finishing blow to its checkered career. Its assets after the fire were an insurance policy of no value, and an associated press franchise of considerable value. The latter was for sale, and Mr. Scammon purchased it, intending to start an entirely new paper. To keep alive the press franchise, he published the Republican for a short time until arrangements for the new paper could be perfected, and on March 25, 1872, the first number of the Inter Ocean appeared. It was a ten-column blanket folio, and had for its motto "Republican in everything, independent in nothing." E. W. Halford was editor-in-chief, and in May, 1872, William Penn Nixon became business manager. A few months later Gilbert A. Pierce headed the editorial staff. Although uncompromisingly republican and giving hearty support to Grant in the presidential campaign of 1872, the success of the paper was not yet assured. After the close of the campaign its ownership was re-organized in the form of a stock company, under the name of the Inter Ocean Company, Mr. Nixon retaining the business management.

In March, 1873, Frank W. Palmer purchased an interest in the company and became editor-in-chief. During his management a great impetus was given to the circulation of the Weekly, and this has continued to be a remarkable feature of the paper, reaching a number unprecedented in the history of Northwestern newspapers.

Notwithstanding this, the paper continued to be an expense to its owners, and in the fall of 1875 became so much embarrassed that a change of ownership and a re-organization again became necessary. A new company was formed, called the Inter Ocean Publishing Company, and the paper was purchased by the new corporation.

From the new company, Dr. Oliver W. Nixon became the president, and William Penn Nixon the controlling manager of the entire institution. Mr. Palmer a few months later retired from the editorial management, and Mr. Pierce became editorial manager, under Mr. Nixon. Since this last re-organization the paper has reached assured success. Its political principles are in full accord with the most progressive and radical theories of the republican party. Supporting General Grant in the last campaign, and the otherCandidate], it swept away the papers that opposed him. Of the new company, Dr. Oliver W. Nixon became the president, and William Penn Nixon the controlling manager of the entire institution. Mr. Palmer a few months later retired from the editorial management, and Mr. Pierce became editorial manager, under Mr. Nixon. Since this last re-organization the paper has reached assured success. Its political principles are in full accord with the most progressive and radical theories of the republican party. Supporting General Grant in the last campaign, it swept away the papers that opposed him.

In its early days, under the editorial management of Mr. Palmer and through the influence of Mr. Scammon, it strongly advocated the "greenback theory," as it was called, favoring the retirement of the national bank currency, and the additional issue of greenbacks to the extent of the amount of bonds held by the banks, and so retiring those bonds. Its attitude was such that it was classed among the advocates of "fiat money." Under the management of Mr. Nixon, the Inter Ocean gradually edged away from the wildest features of greenbackism, and welcomed the return of specie payments. It favored the remonetization of silver, and the silver coinage bill, and continued in favor of the coinage of silver. It advocated a protective tariff.

The Inter Ocean has several strong special features. W. B. Sullivan, law reporter, was the first of the newspaper reporters to give a complete history of daily work in the courts. Under the title of the Curiosity
THE PRESS.

William H. Bushey, managing editor of the Inter-Ocean, was born in Vienna, Clark Co., Ohio, on February 24, 1839. His father was one of the early settlers of Ohio, emigrating from Virginia. He received the ordinary common school education of the time, and then spent a few years in teaching. When the War broke out he enlisted as a private in the 1st Union Kentucky Volunteers, and served three years and three months, reaching the grade of orderly-sergeant of his company. During his Army life, he corresponded with one or two Ohio newspapers, his letters attracting so much attention that when he left the service he was invited to become associate editor of the Ohio State Journal, published at Columbus, then one of the most influential papers in the State. In 1879 he was elected secretary of the Ohio State Journal, and in 1883 he was succeeded by William H. Bushey, then one of the most influential papers in the State. In 1883, he was elected manager of the Inter-Ocean, and continued in that office until 1884, when he was succeeded by William H. Bushey.

Gilbert A. Pierce continued as managing editor until 1881, when he was succeeded by William E. Curtis, who had been the Washington correspondent. Mr. Curtis returned to the Washington bureau in 1884, and was succeeded by William H. Bushey.

Until 1884, the Inter Ocean published no Sunday edition, but since then it issues a paper every day. It prints a supplement of four pages on Wednesday and Saturday, and on Sunday it published a sheet containing at least sixteen pages. The weekly circulation approaches nearly one hundred and twenty-five thousand, and its postage bills for 1884 amounted to $25,000.

Oliver W. Nixon, president of the Inter-Ocean Publishing Company, and one of the editors of the paper, is an older brother of William Penn Nixon, who was born in North Carolina, on October 25, 1825. When he was still a child his father removed to Indiana. He was educated at Farmers' College, Ohio, and in 1853 graduated from Jefferson Medical School, Philadelphia, receiving the degree of Doctor of Medicine. He practiced his profession in Philadelphia a short time, and then removed to Cincinnati and practiced there for a great number of years. When the Civil War broke out, he entered the army as surgeon of the 99th Ohio Volunteers, with which he served in the battle of Sedgwick, Missouri, and then became medical director on the staff of General Pope. After the battle of Gettysburg, the evacuation of Chancellorsville, he resigned, and went back to his profession in Cincinnati, becoming also medical examiner at Camp Chase near that city. In 1864, he was elected treasurer of Hamilton County on the Republican ticket, and served two years. His successor in the office, having died shortly after his election, Dr. Nixon was chosen to fill the vacancy, which he did for the remainder of the term. After his second term as treasurer, in association with William Banister, he founded the Cincinnati and Pennsylvania Railroad. Two years later the company purchased the Cincinnati Evening Times. In 1875, he sold out his interest in the Cincinnati paper and came to Chicago, where he organized the Inter-Ocean Publishing Company for the purpose of purchasing the Inter Ocean. Dr. Nixon purchased the mortgages and other indebtedness of the paper, and in due time the concern was a successor to the newspaper, of which Dr. Nixon has since continued president. He is the literary editor, writing also the nonpareil paragraphs on the editorial page. He was married in 1854, at Mount Carmel, Ohio, to Miss Lena E. Duffield, and has one son, Charles E., now the musical and art critic of the Inter Ocean.

William Penn Nixon was born near Richmond, Ind., in 1832. His grandfather was a Quaker and resident of North Carolina, who at an early period emancipated all his slaves, but continued to care for and support them to the close of his life. His father, also a Quaker and native of North Carolina, continued the care of the same slaves until he emigrated to Indiana about 1830. William received a liberal education, graduating at Farmers' College (now Belmont) near Cincinnati, in 1853, and afterward entered the law department of the University of Pennsylvania at Philadelphia, where he graduated in 1859. Returning to Cincinnati he entered upon the practice of law, in which he continued until the beginning of 1868. During this period he was elected three times to the Ohio Legislature, serving during the sessions of 1863, 1866 and 1867. In 1865, he became one of the founded of the Cincinnati Chronicle, and with that paper and its successor, the Times-Chronicle, he remained until he came to Chicago in the spring of 1872, to take the business management of the Inter Ocean. Through all the vicissitudes that Mr. Nixon has had for his success, and it is owing to him that it has reached its dimensions, for several years the closest financiers and management were asked to keep the paper going. It was closely watched, not only the personal supervision of a vast amount of detail. After the formation of a new company in 1875, Mr. Nixon assumed the entire management of the paper, as also business, directing its policy, dictating its editorial tone, and always alert to make it of interest to a wide class of readers. Mr. Nixon was married in Cincinnati, in 1861, to Miss Mary Stites, daughter of Hezekiah Stites, of that city. She died in 1862. In 1863 he married Miss Maud Duffield, daughter of Charles Duffield. By the latter union he has three children.

Frank W. Palmer was born on October 11, 1827, at Manchester, Dearborn Co., Ind. In the following year his father removed with his family to Chautauqua County, N. Y., and there his early life was passed. At the age of fourteen he was apprenticed to the printer's trade, entering the office of the Jamestown Journal. After serving three years he went to New York City and worked for three or four years as a journeyman compositor. He then returned to Jamestown, and soon after became a joint editor and owner of the Jamestown Journal with F. P. Bailey. Taking an active part in politics, he was elected to the State Legislature in 1853, and re-elected in 1854. In 1855, he returned to Dulanage, Iowa, and became the editor and part owner of the Dulanage Times. In 1860, he was elected to Congress and again elected in 1870, from Des Moines (where he had purchased the Register), serving from March 4, 1869, to March 3, 1873. In Congress he was a member of the Committee on Pacific Railways and of the Select
Committee on Postal Telegraph lines. He had disposed of his interest in the Register in 1866, though he had continued as editor-in-chief. Before the close of his second term in Congress, he was invited to become editor of the Chicago Inter Ocean, and he removed to the city in the spring of 1875. At the time Palmer did much to develop and improve the Inter Ocean, and it was instrumental in increasing its circulation, particularly that of the weekly, which became very popular in the Northwest, especially in Iowa, where Mr. Palmer was so well known.

Elwyn A. Barron is a native of Tennessee, and was born on March 6, 1855, his childhood home being at Nashville, a consider- able part of his youth, however, being spent in the Pacific States. During a portion of his boyhood education was carried on under a private tutor, and was afterward continued in one of the collegiate institutions of his native State. In 1872, he removed to Kansas, where he attended the University for two years, and then went to Chicago in 1875, where he studied law for a year. His first regular newspaper work was on the News in 1876, which he left to become city editor of the Post, a position which he held when that paper was sold. Shortly after this, Mr. Barron went upon the local staff of the Inter Ocean and soon became dramatic editor, in which position he has since remained. Since 1880, he has been associate editor of that paper, in addition to his duties in the dramatic department.

On Oct. 9, 1884, he was married to Miss Hannah Lee Bird, of Atchison, Kan. Mr. Barron has for some time performed a good deal of outside literary work, among other things being the joint author of several books which have been favorably received by the public.

Joseph R. Dunlop was born on July 24, 1857, in Jamaica, West Indies, his father being a chaplain in the British army. When he was of eleven years, his family removed to Canada, where he attended the Grammar School and then received instruction in Upper Canada College. At the age of eighteen, he commenced newspaper work on the Toronto Globe, quitting that position after two months, to come to Chicago, hoping to find a wider sphere for his endeavors. Here he connected himself with the printing establishment of J. W. Jones, where he soon became expert in the art of the practical printer, and, later, served as foreman in that large establishment. In 1874, he became a reporter on the Chicago Times, and in the year following joined the local staff as a regular reporter. After about two years, Mr. Dunlop returned to his former occupation in the Jones printing establishment, where he remained until September, 1876, when he again went upon the repartorial force of the Times. When that journal entered upon its famous exposure of the Custom House frauds in connection with the erection of the Government Building in Chicago, Mr. Dunlop was selected for the difficult task of disbud- ing the hidden facts connected with that transaction. For several months in 1875-76, he devoted his energies to the work, which was so thoroughly performed that, as a result, every person connected with the affair was indicted by the grand jury. In 1851, Mr. Dunlop did similar work on the investigations of the alleged "Gold Hound ring" in the Board of County Commissioners, in connection with which the Cook County Court of Illinois was the court which tried and convicted the principal offenders involved.

The facts developed and furnished work, and were of a highly sensa- tional character. In the spring of 1852, Mr. Dunlop made the tour to Mexico, writing up that territory for the Times. Returning in July of that year, he became city editor of the Times, remaining in that position until November, 1853, when he took the same position on the Inter Ocean, and which he still occupies. Mr. Dunlop is one of the charter members of the Chicago Press Club, and was its president during 1885.

Thomas C. MacMillan was born on October 4, 1850, at Stornach, Scotland. In 1857, he came with his parents to this country, settling in Chicago, where he attended the public schools for a time, leaving to serve an apprenticeship as a machinist. Poor health compelled the abandonment of this work in a short time, and he returned to school, graduating in due course from the Chicago High School and entering the Chicago University, remaining, how- ever, but a short time. In January, 1873, Mr. MacMillan became a reporter on the Inter Ocean. In 1875, he went, as the corres- pondent of that paper, with the Black Hills exploring expedition which made the gold discoveries in that region; and in the winter of 1875-76, and again in the summer of 1876, went in the same capacity with Gen. Custer's forces operating against the hostile Sioux in the famous Sifting Battle, his graphic letters attracting much attention. In 1878, he made an extended tour through Europe, and in 1880, succeeded Robert R. Porter as editor of the department of "Our Curiosity Shop," in which position he remained two years, when he succeeded George B. Burt as city editor. After two years, he succeeded Professor W. P. Jones as editor of "Our Curiosity Shop," in which position he still holds. In January, 1883, Mr. MacMillan was married to Miss Mary C. Goudie of Nauvoo, Kendall Co., Ill. Mr. MacMillan, for some time, has been prominently identified with various public institutions, educational and otherwise, and has found time from his work as a journalist to serve the public in various useful ways. Among other duties, he served three years as a member of the Cook County Board of Education, and for five years has been secretary and director of the Chicago Free Kindergarten Association, being also a director of the American Educational Aid Association of Illinois. Mr. MacMillan is now serving his second term as a director of the Chicago Public Library. He was elected as a representative to the lower house of the Illinois Legislature of 1883, from the fourth Chicago district, in which he served with credit. He was a charter member of the Chicago Press Club, is first vice-president of the Illinois St. Andrew's Society, and in June, 1885, had conferred upon him the honorary degree of Master of Arts by the Illinois University of Jacksonville.

I. White Bussey, news editor of the Inter Ocean, was born at Vienna, Clark Co., Ohio, on November 22, 1852. He received a common school education, and then taught several years. In the spring of 1872, he commenced journalism as a reporter on the Inter Ocean, and served on the city staff until March, 1874, when he became the news editor.

THE DAILY NEWS.

The Daily News was founded on December 25, 1875, by Melville E. Stone, Percy Meggy, and William E. Dougherty. It was an evening paper at one cent. The combined circulation and concern was about five thousand dollars, and its quarters were extremely limit- ed. It had an office about ten by twelve feet on the first floor of the building now occupied by it, at No. 123 Fifth Avenue, and its editorial and composing room took up a part of the fourth floor of the same building. For the first few weeks the printing was done by the Scandinavian newspaper which occupied a part of the same premises. After a short time Mr. Dougherty got discouraged and gave up the enterprise, and a few weeks later Mr. Meggy did the same, thus leaving Mr. Stone in sole possession. Although the paper was not yet paying expenses, Mr. Stone saw before six months had passed that it was rapidly gaining. It published three editions regularly, at 12 m. and at 3 and 5 p.m. One difficulty that the cheap papers had always encountered was the lack of cents in circulation. Mr. Stone purchased, at the mint, cents by the thousand dollars' worth, and would send them around to trades-people and get them to take a quantity for change. In this way he got them in circulation. The paper did not succeed in attracting much attention, but instead was reported to be a failure or an expression in the Scandavnic tongue, "eris siti laes snellum onchi." and then followed a translation. Sure enough the dispatch appeared in a later edition of the Post. In its next edition, the News in great glee pointed out the fact that the so-called foreign words, taken backwards, would read "The Mc- Millens will steal this sure," thus raising a great laugh
at the expense of its contemporary. This event gave the News an increased notoriety and consequent increase of circulation, but it did not become an assured success until the time of the labor strike and riots in the summer of 1877. Then it was that Mr. Stone developed his capacity for gathering news, and during the period of highest excitement he published an edition nearly every hour in the day, and ran up the circulation to about seventy thousand. In 1878, the Post suspended, and Lawson & Stone purchased the remains of it, including the associated press franchise, for $16,000.

The reputation of having absorbed its principal rival gave the News an additional impetus, and its circulation now seemed to be governed solely by the press facilities it could obtain. On March 21, 1881, a two-cent morning edition was commenced, thus making four regular daily editions of the paper. This last venture was soon afterward placed on a permanent footing by being admitted to a full membership in the Western Press Association. This was obtained by the assent of the five morning papers of Chicago belonging to the Association, and is a thing unprecedented in the history of that organization. The combined daily circulation of the Daily News has since reached as high as two hundred thousand copies. Increased room and press facilities have been added from time to time, until now the paper occupies the entire four-story building on Fifth Avenue in a small part of which it had been started, and portions of the three adjoining buildings. On January 1, 1883, the partnership between Mr. Lawson and Mr. Stone having expired by limitation, they organized a stock company and formed a corporation with a capital of $150,000, they remaining the sole owners of the stock.

While taking a strong and decided interest in political issues, and in all elections, the Daily News has pursued an independent course and has not uniformly supported any party. In the national campaign of 1880 its leanings were against General Garfield, and in 1884 it advocated the election of Cleveland, but would have supported Arthur had he been nominated. It has been outspoken and vigorous in support of civil service reform and low tariff, and in opposition to the present silver dollar and its coinage, favoring gold and silver dollars of equal value. It is courageous on all questions.

The morning edition, is kept entirely distinct from the afternoon editions, both in business and editorial management. Although under the same name and ownership, they are treated as separate properties.

The Daily News employs very nearly three hundred persons, about forty of whom are editors, special writers and reporters. Some of the ablest Chicago journalists have, at one time or another, been attached to its editorial staff, or been regular contributors to it. Among others are Joseph K. C. Forrest, John Flynn, Francis B. Wilkie, Van Buren Denslow, John F. Ballantine, George E. Plummer, Slason Thompson, Eugene Field, Willis Hawkins, Robert B. Peattie and Henry T. White.

Melville E. Stone, the founder of the Daily News, was born on August 18, 1833, at Hudson, Ill. His father was a Methodist minister. A great uncle was Rev. Dr. Isaac Stone, for many years a leading Methodist divine of Northern New York. An ancestor on the maternal side was Rev. James Creighton, an eminent coadjutor of John Wesley, the founder of Methodism. In 1856, Mr. Stone, Sr., moved to Chicago to take charge of a church, and his son attended the public schools, graduating from the high school in 1863, and in 1866 entered upon a long career by the purchase of an interest in an extensive foundry and machine shop. In 1870, he succeeded by purchase to the sole proprietorship of the business, and prospered until it was destroyed by the great fire, which left him deeply in debt. He now turned to journalism, for which he had always had a predilection. During his school days, as early as 1864, he had been an assistant in the proof-reading rooms of the Chicago Tribune and had frequently taken a part in reporting. He found an opening first on the Republican, which was soon to be merged in the Inter Ocean, of which paper Mr. Stone became the city editor. A year of over-work resulted in breaking down his health, and rest became necessary. After travelling six months through the South, in June, 1873, he returned and became assistant editor on the Evening Mail.

When the Post and Mail were consolidated, he became managing editor, and displayed a spirit of enterprise which, up to that time, had been unknown in the evening journalism of the West. Some months later he withdrew from the Post and Mail, and went to Washington, where he became correspondent for a number of Western newspapers, and for a time served in the bureau of the New York Herald. Returning to Chicago in the summer of 1874, he resumed his position on the Post and Mail, but soon resigned, and on December 25, 1875, published the first number of the Daily News. He has been the controlling spirit of the enterprise since its inception, never for a moment losing faith in its ultimate success, ever alert to take advantage of the varying gales of fortune, and quick to profit by popular excitement in the matter of gathering news. He has shaped the policy and tone of the Daily News, and, while bestowing upon it all his time and thought, does not allow his personal sentiments to interfere with the policy of his paper. He is a vigorous and incisive writer, and at all times gives the editorial management necessary supervision, thus shaping in every way the character and moral tone of the paper and directing its influence. In politics he is independent, and by avoiding the meshes of active and constant party service, he has been able to make the Daily News the medium of many political reforms that redound to the advantage of our institutions.

Victor F. Lawson, the senior proprietor of the Daily News, was born in Chicago, on September 9, 1850. His father was a native of Norway, who emigrated to the United States prior to 1840, and soon after settled in Chicago. A man of thrift and industry he accumulated a handsome estate, and among other valuable property of which he died possessed was the premises No. 123 Fifth Avenue, now occupied by the Daily News. Victor F. Lawson was educated first in the public schools, graduating at the Chicago High School in 1869. He afterward attended Phillips's Academy in Massachusetts and Cambridge University. Returning to Chicago, his time was occupied partly in taking care of his father's estate, and partly in publishing the Scandinavian. Purchasing an Interest in
the Daily News he assumed the business management of that paper, and in a few years had no small degree of success as a result of his improved business methods. Mr. Lawson was married in 1850, to Miss Bradley, daughter of Hon. W. H. Bradley of Chicago.

ROBERT P. BATTIE was born on October 3, 1857, in Wisconsin, but his family came to Chicago where he was mainly educated. He first entered the ranks of journalism on the local staff of the Chicago Times in 1880, Clinton Snowden being then city editor, and for about two years continued the thorough training incident to such a position in the ever increasing metropolitan daily. His tastes running largely to dramatic matters, much of his work during this time was done in connection with the amusement column of the Times. In September, 1882, Mr. Battie joined the staff of the Daily Herald, under John F. Ballantine, and in September, 1883, he became connected with the Daily News, with which he has since remained, doing editorial and other work. He has been especially associated with "A Rambler's Notes," a column of light, gossipy matter. In 1883, Mr. Battie was married to Miss Elia A. Wilkinson, who is well known through her literary work.

MRS. ELIA W. BATTIE was born at Panama, Mich., in 1862, her maiden name being Elia A. Wilkinson. For several years past, she has been known to the public as a writer of short stories for children, in which she has attracted considerable attention. Several of her children's stories have appeared in St. Nicholas, Wide Awake and other juvenile periodicals. Much of her work has, however, appeared in the columns of the Tribune, Times, and other Chicago daily journals and literary papers, taking the form of short articles on literary and historical subjects, and short tales and local sketches. The most noted of the latter was a Christmas story of Early Chicago, which appeared in the Tribune of December 26, 1885. Mrs. Battie was educated mainly in Chicago, where she has lived since 1874. In 1883, she was married to Robert P. Battie, of the Daily News.

EUGENE FIELD was born at St. Louis, Mo., on September 2, 1857. At the age of not quite six years old, he was taken to Amherst, Mass., and reared by his cousin, Miss Mary F. French, at that place. His early education was received at Monson and Williamstown, Mass., and afterward completed at the State University of Missouri. On reaching his majority, Mr. Field came into the possession of a large fortune, which, his friends are fond of saying, he soon spent like a gentleman. He travelled extensively in Europe in 1872-73, gaining a store of valuable knowledge. Returning from abroad, he began his newspaper career in June, 1873, as a reporter on the St. Louis Evening Journal, of which paper, later in the same year, he became city editor. In May, 1875, Mr. Field went to St. Joseph, Mo., to take up the position of city editor on the St. Joseph Gazette, which he retained for about a year and a half, when he returned to St. Louis as editorial paragraphist on the Journal and Times-Journal, the brightness of his work attracting considerable attention. During 1879-81, he was managing editor on the Times, of Kansas City. In the latter year he left Kansas City to become managing editor of the Denver Tribune, remaining in that position until August, 1883, at which time he became Chicago's special city editor for the Daily Herald. Since that time he has conducted the special department entitled "Sharps and Flats," and has made a wide reputation as a pungent and sparkling paragraphist. During his career as journalist, Mr. Field has given considerable attention to literary work in poetry, prose and fiction, writing his first verse in 1879 and his first story in 1881. While in Missouri, he was, for two years, corresponding secretary of the Missouri Press Association. Mr. Field was married at St. Joseph, Mo., on October 16, 1873, to Miss Julia S. Comstock. They have four children,—three sons and a daughter.

THE CHICAGO HERALD.

The Chicago Herald was founded as the representative of stalwart republicanism, but, under successive editors, it has drifted into independent democracy. Intended as the advocate of Lincoln's republicanism before its first presidential campaign it became the exponent of Cleveland democracy. After its first year it seems to have owed allegiance to no party. It was lively, bright and aggressive. It rather recklessly took an undue interest in the private lives and past careers of certain citizens of Chicago, and became at once enmeshed in a net work of libel suits, one of which resulted in a $25,000 verdict against it. This culminated in a sale of the Herald to a new company. The founders of the Herald were James W. Scott, Frank W. Palmer, A. M. Jones and Daniel Shepard. The company was organized about the first of May, 1881, with a capital of $150,000, and articles of incorporation duly executed. The Chicago Daily Telegraph at this time was about to fail, it had a national press franchise, some machinery, presses, and type, and these its creditors were willing to sell at a reasonable price. The Chicago Herald Company purchased them. The last issue of the Telegraph was number 1046; the first issue of the Chicago Morning Herald was number 1047, and its date May 10, 1881.

Mr. Palmer became editor-in-chief, with William D. Evans as assistant, and John F. Ballantine, city editor. James W. Scott was the publisher and business manager. The Herald was a seven-column folio, beautifully printed on good paper, and was sold at two cents, and had a Sunday issue of eight pages sold first at three cents and afterward at five. It had the usual difficulties to encounter, one of the chief of which was that, not being a member of the Western Press Association, it could not get their dispatches, and its telegraphic tolls were also higher, owing to the same fact.

Under Mr. Palmer the editorial work of the paper achieved as great a success as could reasonably be expected, but it was not a remunerative success. Its chief political characteristics were stalwart republicanism and a very decided hostility to George R. Davis, the republican congressman from the Third District.

In the latter part of 1882, Mr. Palmer retired, and Mr. Ballantine became managing editor, and associated with him were I. S. Lothrop and David Henderson. The paper never became more independent politically, though still republican. It was sparkling and entertaining but not intentionally malicious. A series of articles on the various churches, published in the Sunday issue, attracted considerable attention for their brightness and humor. In the spring of 1883, it met with a tremendous reverse in the Lehman libel suit, and a re-organization of owners and staff followed in August, 1883. Palmer, Jones and Shepard disposed of their stock to John K. Walsh and Martin J. Russell, and these two with Mr. Scott, who retained his interest, became the owners of the paper. The Lehman judgment was settled by Mr. Lehman on the payment of $3,000 by the Herald to charitable objects. Under the new ownership Martin J. Russell became editor-in-chief, and James W. Scott continued as publisher and business manager.

On the re-organization of the staff Horatio W. Seymour became assistant editor; Robert D. Bogart, who had been on the paper since the previous spring, dramatic critic and general writer; and Frank H. Brooks, night editor. William A. Taylor continued city editor, and Margaret B. Sullivan became the literary editor.

The change in the management brought about a change in the tone and policy of the paper. Since that time it has been democratic, though not an organ, and with a strong tendency to independence. It favors low tariff, civil service reform and opposes the standard silver dollar and silver coinage. It gave a hearty support to the election of President Cleveland, and fully sustains his administration. Its news department is carefully edited, and it lays before its readers all important news in a compact and readable form.

MARTIN J. RUSSELL, editor-in-chief of the Herald, was born December 20, 1845, in Chicago. His father, Martin Russell, was a captain on the lakes, and was lost with his vessel in Lake Michigan, in a storm, about six weeks before Martin J. was born. He was educated in the public schools, but on the breaking out of the Civil War, when he was sixteen years of age, he accompanied Colonel James A. Mulligan, who was his maternal uncle, with his regiment to Missouri, and was with it at the time of the surrender at Lexington.
Not belonging to the regiment at that time he was not held as a prisoner of war, but was permitted to return to Chicago. After the regiment was exchanged, it was re-organized at Chicago in the winter of 1861-62, as the 23d Illinois Volunteers, and Mr. Russell was chosen second lieutenant of Co. “A,” his commission being dated November 1, 1861, when he had not yet reached his sixteenth year. The regiment was ordered to Virginia, in June, 1862, and the following December, Colonel Mulligan being assigned to the command of a brigade, Lieutenant Russell was appointed on his staff as assistant adjutant-general, and served through the various campaigns in Virginia with him. After the battle of Winchester, where Colonel Mulligan was killed, the 23d regiment was so largely reduced in numbers through constant service, that it was ordered to be consolidated into five companies, and on September 14, 1864, Lieut.

moved to Galena with his family, where he became associated with Dr. Charles H. Kay, in the publication of the Jeffersonian. James W. Scott was educated at Galena and was hired to the newspaper business. His first newspaper venture on his own account was made in 1870, at Huntington, Md. A year or two later he returned to Galena and started a paper called the Industrial Press. About 1874 he removed to Chicago, and, in company with F. W. Rice, purchased the Daily Hotel Reporter, which is still published by the firm of Scott & Rice. He was married, in 1873, to Miss Carrie K. Greene, of Naperville, Ill. In the spring of 1881, he actively promoted the formation of the Chicago Herald Company, and his business enterprise has contributed largely to its success.

WILLIAM A. TAYLOR, city editor of the Herald, was born at Oswego, N. Y., on November 13, 1854. In 1875, his family removed to Chicago, and here Mr. Taylor was educated, graduating from the high school in 1872. In July, 1874, he commenced newspaper work on the Tribune as night police reporter, and continued in that position until February, 1883, when he joined the Herald as a reporter. In June, 1883, he became the city editor, which position he has filled to the entire satisfaction of the management of that paper.

THE CHICAGO EVENING JOURNAL.

When the great fire of 1871 compelled the Journal to suddenly seek temporary quarters on the West Side, which it did without losing a single issue, the managers also took immediate steps to erect a building at Nos. 159 and 161 Dearborn Street, the site it now occupies. In the spring of 1872 the building was completed, and in April the Journal removed to its new home, where it continued without change of management until the early part of 1878, when the failing health of Charles L. Wilson, who for a long time had owned the paper, induced him to put the management in the hands of a joint-stock company, of which he was president, and Henry W. Farrar was secretary and business manager. As Mr. Wilson held most of the stock, there was no real change of ownership, however. The editorial management continued as before,—Andrew Shuman, who had been editor-in-chief since 1861, still remaining such, and W. F. Sullivan, his city editor. The latter had been in the same position since 1874, having succeeded Professor J. W. Larrimore. In March, 1878, Mr. Wilson, who had gone to Texas for his health, died at San Antonio. His wife and daughter, the only heirs, succeeded to the control of the company, Mr. Shuman being elected president in place of Mr. Wilson, and Colonel Farrar remaining secretary and business manager. In March, 1880, Andrew Shuman and John R. Wilson, a nephew of the late proprietor, leased the Journal from the company, the latter having been connected with it from October, 1871. Early in December, 1883, the Journal building was burned, and the paper found temporary quarters at Clark Street and Arcade Court, from which place it was issued until the following April, when it re-occupied its old home, now thoroughly rebuilt, and enlarged.

During 1884 the Journal Company was re-organized, the board of directors, consisting of Andrew Shuman as president, W. K. Sullivan as secretary, and John R. Wilson as treasurer. Under this ownership and management the paper still continues, Mr. Shuman being chief editor and Mr. Sullivan city editor, assisted by Thomas M. Wignall, Colonel E. A. Calkins, James Chisholm, George S. Killen, N. R. Cozzens, Oliver H. Perry, and others. Among the various gentlemen connected with the Journal since 1871, may be mentioned

Andrew Shuman.

James W. Scott, who has been the publisher and business manager of the Herald since its foundation, was born in Wisconsin in 1849. His father was a journalist, and a few years later re-

tenant Russell was mustered out of service, and returned home. In 1870, Mr. Russell became a city reporter on the Chicago Evening Post, and remained on that paper until the latter part of 1873, serving as city editor a part of the time. In December, 1873, he joined the city department of the Times, and shortly after was advanced to the editorial staff as paragraphist. When Mr. Stroey published the afternoon paper called the Telegram, in 1876, Mr. Russell was made the editor of that paper, and upon its cessation, resumed his place on the Times, which he continued to hold until he joined the Herald in August, 1883. He was married, in 1873, to Miss Celia C. Walsh, of Chicago, and became a resident of Hyde Park. They have six children. He was a member of the Board of Education of Hyde Park during 1874-80, and was village clerk during 1876-80. In 1880, the circuit judges of Cook County appointed him a commissioner of the South Parks, and on the expiration of his term, in 1885, again appointed him without solicitation. Mr. Russell has done no literary work outside of professional labors. His reading has been extensive in general English literature, Shakespeare being his prime favorite, and in political history. His style is forcible, and his articles are freighted with good humor and wit.

WILLIAM K. SULLIVAN was born at Waterford, Ireland, on November 10, 1843. He was educated in boyhood in the national schools of Ireland, and while quite a youth became pupil-teacher in the Waterford Model School, where he remained for two years. He afterward graduated from the Northborough Street Training School of Dublin, taught school for a time in Malin, County Donegal, and came to the United States in 1863, with no capital but the hopefulness of youth and what he had in his head. After a brief sojourn in New York, he found his way to Illinois, and engaged soon after in teaching school in Kane County. In 1864, he enlisted in the 141st Illinois Volunteers, serving about six months. Upon returning to Illinois, he taught school, near Bristol, Kendall Co. Not long after he went to the oil regions in West Virginia, where, for a time, he found occupation in running a steam engine. His next move was a trip to Europe and a visit to his native land, where, however, he did not remain very long. Returning to New York, Mr. Sullivan entered upon his journalistic career as a reporter on the Sun of that city; coming back to the West, he engaged on the reporter staff of the Chicago Tribune. While connected with the Tribune, he was elected to the Legislature as a member of the XXVIIth General Assembly, serving two years. In 1874, Mr. Sullivan became the city editor of the Evening Journal, which position he still occupies. Mr. Sullivan is also well known as a public spirited citizen. He has served three years as a member of the Chicago Board of Education, being appointed by Mayor Colvin, and was twice re-elected president of that body; while he has also been connected at various times with societies and movements devoted to the interests of the general public. In 1874, Mr. Sullivan was married to Miss Amelia Shackelford; they have had three children, two of whom are living.

—Helen Amelia and William.

THE ILLINOIS STAATS ZEITUNG.

This journal suffered a total loss by the fire of 1871, but it hastily got together the necessary materials and, in temporary quarters, resumed publication within forty-eight hours after that calamity, while preparations were at once made for the building of permanent quarters. A. C. Hesing was, at this time, president of the Staats Zeitung Company, and Hermann Kaster was the chief editor of the paper. On March 10, 1873, sixteen months after the great fire, the commodious five-story Staats Zeitung Building, on the corner of Washington Street and Fifth Avenue, was completed and occupied, the cost of the building, machinery, presses, etc., amounting to nearly $300,000. For a long time there has been no change in the ownership or management of the paper, which is controlled by a stock company as formerly, in which A. C. Hesing and Washington Hesing, his son, hold the majority of the stock. The latter became actively connected with the paper soon after leaving college, in November, 1871, and for several years past has been the managing editor. Mr. Kaster has continuously remained as editor-in-chief to the present time. The Staats Zeitung has steadily increased its circulation and influence, in which it leads all other German-American newspapers in the West.

WASHINGTON HESING, managing editor of the Illinois Staats Zeitung, is one of the young men who have made themselves felt in Chicago and have achieved a substantial success in the business and social world. He is a son of Anthony C. and Louise (Lamping) Hesing, and was born at Cincinnati, Ohio, on May 14, 1849. During his youth, he was constantly in school until 1861, when he visited Europe. Upon his return in the following winter, he entered University St. Mary's of the Lake, where he continued until July, 1863. He then studied at the Chicago University for a year, after which he was prepared by Dr. Quackenbush for admission to Yale College, which institution he entered in 1866, and from which he graduated with the degree of Bachelor of Arts, in 1870. Immediately upon completing his studies at Yale, he went to Europe and attended lectures in Berlin and Heidelberg universities. He devoted himself to the study of political economy, international law, the science of government, history and German literature. The great fire of 1871 served as a summons for him to return home, and upon reaching Chicago he at once entered upon an active business life, on November 21 of that year, with the Illinois Staats Zeitung. In April, 1880, Mr. Hesing, with his father, secured a controlling interest in the journal, and since then he has continued in the editorial management of the same. Shortly after his advent into journalism, Mr. Hesing naturally became active in politics. When only twenty-three years old he distinguished himself by a series of eloquent speeches, in both the English and German languages, in favor of the election of General Grant to the presidency. The City of Chicago early recognized his abilities; at the age of twenty-two he was appointed a member of the Board of Education. At the expiration of his first term of office, Mayor Joseph Medill tendered him a re-appointment, but he declined. While a member of the Board, Mr. Hesing, as one of the committee on German, made a report in which he advocated the system of grading the German instruction as the English was graded, and his proposed system was adopted and is now in practice. In August, 1880, Mr. Hesing was elected a member of the County Board of Education. He is a member of the Roman Catholic Church, and attends the Cathedral of the Holy Name. In 1873, he was elected president of the Union Catholic Library Association, an organization which embraces all the Catholics of the city. He was married to Miss Henrietta C. Weir, of Boston, Mass.

THE PRESS CLUB OF CHICAGO.

The profession of journalism in Chicago and the Northwest has a noted and justly famous adjunct in the Press Club of Chicago. While comparatively a recent organization, having been formed in December, 1879, the Press Club has made an enduring imprint on the profession. At the time of its formation there was but one similar organization—the New York Press Club—
in existence in the United States. Prior to 1871, there had been a Press Club organized, an account of which appears in the second volume, but the fire terminated its existence.

A small coterie of journalists formed an organization in the spring of 1872, meeting in various cafés and public resorts. So regular and enjoyable did these meetings become, that a formal organization was seriously discussed, and finally formed under the name of the Press Club. But half-a-dozen meetings were held, none of them attended by the full complement of members, and the organization came to an early end, the last meeting being held at the Briggs House on December 23, 1872. For the ensuing five years the working journalists were intimate in their inclinations; having no regular place of meeting nor caring for a more formal gathering than the chance meetings of the few who were personally friendly with each other. The Coliseum, Kirchoff's Café, an office in Arcade Court, and, later, the Tivoli Garden were the more popular places of resort at the time. Some of the journalists were held at home at the rooms of the order of The Elks, where they met friends of the dramatic profession, and many joined the Owl Club, a social organization having rooms in McCutcheon's Theater building. Indeed, it has been maintained by many that the working journalists were instrumental in organizing the Owl Club, and it is certain that their withdrawal from the organization hastened the demise of that once celebrated club.

Early in January, 1880, an informal meeting was held in the Tremont House club room, a committee was appointed to draft a constitution, and sixteen pledged themselves to membership by signing the roll. The Chicago Press Club was formally organized on February 15, 1880, when nine names were voted to the roll. The constitution was approved and adopted on January 22, the following being the preamble of the instrument:

"For the purpose of bringing the members of the newspaper profession together in close personal relations, to elevate the profession, to further good fellowship, and to extend a helping hand to all members of the organization who may desire it, the undersigned hereby form themselves into a society."

The twenty-five charter members were the following:

On January 15 the permanent officers for the year were formally elected. F. B. Wilkie was chosen president; Guy Magee, W. T. Collins, John F. Ballantyne, vice-presidents; M. E. Stone, treasurer; Elwyn A. Barron, recording secretary; T. O. Thompson, financial secretary; Joseph K. Dunlop, Theodore Gesterfield. T. C. MacMillan, W. K. Sullivan, James Maitland, executive committee.

The constitution has been amended and modified from time to time since its first adoption. A charter was secured, upon the adoption of which the name Chicago Press Club was abandoned, owing to the fact that a coterie of German journalists laid legal claim to the same, and the title The Press Club of Chicago was adopted. The treasurer was required to give a bond of $10,000 and the financial secretary one of $2,500. The rooms secured were at the northeast corner of Clark and Madison streets, and they are still occupied by the club.

Once fairly established the membership of the club increased rapidly. The social features consisting of an annual banquet; occasional special "spreeds" in honor of noted guests, or members departing for other fields of duty, and regular "fourth night" receptions in the club rooms, at which ladies are present, have become a potent factor in assisting the development sought for by the organization.

On September 30, 1886, at the Central Music Hall, the Press Club inaugurated a system of annual entertainments. By these the Press Club has assisted many of the prominent men and women connected with the lyric and dramatic stage of this country, and the most famous artists cheerfully lend their talents to make each entertainment more successful than its predecessor.

Among the many people who have received entertainment at the hands of the Press Club may be named: Madame Marie Rose, Colonel Mapleson, Emma Abbott, Annie Louise Cary, Minnie Hauk Wartegg, Jessie Bartlett-Davis, Marie Stone, Blanche Roosevelt Marchetti, Samuel L. Clemens, Thomas W. McCullough, Thomas W. Keene, Joseph Hatton, of London, England, Baron Wartegg, Whittow Reid, General E. S. Grant, Vice-President Thomas A. Hendricks, Senator John A. Logan, Senator and Governor Richard J. Oglesby, Edward Kamenyi, the renowned violinist, Don Juan Marcia and Don Carlos E. Leonardo, of Mexico, Mary Rodish and Frank H. Taylor, and Paul George Augustus Sala, Ben: Perley Poore, George Alfred Townsend, J. B. Mantrop, of Edinburgh, Scotland, Sol Smith Russell, Bartle Campbell, Maurice Barrymore, James Whitcomb Riley, the "Hoosier Poet," Robert Reed, Thomas Whiffen, Robert Barrette, the Williams College Glee Club, and a long list of others equally noted in drama, art, literature and public life.

Formal receptions were tendered Marie Rose, on December 16, 1886; Keene and McCullough, on February 19, 1887; and a supper to Congressman John F. Flood in December, 1882; a reception and banquet to the Mexican editors on June 28, 1885.

It will thus be seen that the Press Club of Chicago, with proper motives underlying its foundation, and with dignified and able management, speedily achieved a prominence and influence never excelled by any similar organization in this country. The advantages accruing to members of the organization can not be easily enumerated.

The rule as to membership, that only reputable journalists, having a direct connection with some recognized newspaper, or a standing in literature, pursuits, are eligible, has at all times been enforced. The death of a member has always been observed with suitable ceremonies, and those sick or disabled, if in need, have profited by the benevolent features of the Club. In 1882, the Club put its seal of censure on the "penny-a-line" system, which its promoters thought to make a successful innovation in Chicago. In March, 1883, a proposition to join a National Journalists' League was voted down by a large majority.

The Club rooms are bright, attractive and cheerful, being handsomely carpeted, and decorated with paintings and works of art, among the collection are oil portraits of the deceased and ex-presidents and prominent members. The rooms are also provided with a valuable reference and reading library, the periodicals of the day, billiard tables and games, day and night stews, and other adjuncts of club-life.

Following is a list of the officers elected since 1880:

**Election January 20, 1889.**—President, W. K. Sullivan, Evening Journal; First Vice-President, Guy Magee, Tribune; Second Vice-President, W. H. French, Associated Press; Treasurer, J. F. Flynn, News; Secretary, Elwyn A. Barron, Inter Ocean; Assistant Secretary, John M. Dandy, Saturday Evening Herald. Board of Directors: J. R. Dunlop, Times; T. C. MacMillan, Inter Ocean; Henry F. Donovan, Journal; W. H. French, Associated Press; R. A. Patterson, Tribune.

**Election January 19, 1883.**—President, Samuel J. Meill, Tribune; First Vice-President, John B. Hinman, Times; Second Vice-
HISTORY OF CHICAGO.

President, W. D. Eaton, Herald; Third Vice-President, W. E. Curtis, Inter Ocean; Treasurer, J. B. Bradwell, Legal News; Secretary, E. A. Barron, Inter Ocean; Financial Secretary, Edgar J. Wakefield, Courier-Journal. Board of Directors: J. Harry Ballard, Inter Ocean; Frank S. Davidson, Times; R. W. Ransome, Tribune; Nate A. Reed, News; Oliver H. Perry, Journal.

Year 1881.—President, W. E. Curtis, Inter Ocean; First Vice-President, J. F. Ballantyne, Herald; Second Vice-President, N. A. Reed, News; Third Vice-President, Martin J. Russell, Times; Treasurer, J. B. Bradwell, Legal News; Secretary, R. B. Peetle, Herald; Financial Secretary, Edgar J. Wakefield, Courier-Journal; George F. Wright, Miners’ Review, vice Wakeman, resigned. Board of Directors: Samuel V. Steele, Times; W. A. Taylor, Tribune; J. H. Ballard, Inter Ocean; John Ritchie, stenographer; vice Perry, Journal.

Election January 7, 1882.—President, J. F. Bradwell, Legal News; First Vice-President, Victor F. Lawson, Daily News; Second Vice-President, Guy Magee, Tribune; Third Vice-President, T. C. MacMillan, Inter Ocean; Secretary, Charles D. Wright, Inter Ocean; Treasurer, James W. Scott, Herald; Financial Secretary, John McGovern, Tribune. Board of Directors: Leo Cannan, Tribune; W. S. Walker, at large; Thomas O’Neill, Herald; E. R. Dillingham, Times; W. M. Knox, News; J. H. Ballard, Inter Ocean, vice Knox, resigned.

Election January 6, 1883.—President, Joseph R. Dunlop, Inter Ocean; First Vice-President, T. Z. Cowles, Mirror of American Sports; Second Vice-President, W. M. Knox, News; Third Vice-President, Rodney Welch, Times; Secretary, W. T. Hall, Tribune; Treasurer, Leo Cannan, Tribune. Board of Directors: J. B. Bradwell; Financial Secretary, Charles H. Dennis, News; F. F. Johnson, of J. T. Lester & Co., vice Dennis, resigned. Board of Directors: E. L. Wakeman, The Current; Leo Cannan, Tribune; E. O’Cotten, Daily News; W. H. Harper, Inter Ocean; Arnold Pierce, Times.

Election January 7, 1884.—President, John F. Ballantyne, Daily News; First Vice-President, T. Z. Cowles, Mirror of American Sports; Second Vice-President, W. A. Taylor, Herald; Third Vice-President, Washington Hesing, Staats Zeltung; Financial Secretary, John J. Fuller, Car-builder; Recording Secretary, W. H. Harper, Inter Ocean; Treasurer, Leo Cannan, Tribune. Board of Directors: John M. Dandy, Saturday Evening Herald; R. W. Ransom, Tribune; W. M. Knox, News; C. A. Snowden, Mail; Frank B. Wilkie, Times.

The Club membership at the date of this election numbered about one hundred and seventy-five.

THE WESTERN ASSOCIATED PRESS.

The Western Associated Press may be said to have originated in 1860, although it did not become a distinct news-gathering and disseminating agency until 1881. At the former date the New York Associated Press was the chief news agency of the country. During the period of the War it comprised a few of the more important eastern papers, and by an arrangement with the papers in Cleveland, Detroit, Chicago and St. Louis, exchanged its news with the papers of the Western Circuit. William Henry Smith was the manager of the Western Department; and it is to his energy, discrimination and good judgment that the Western Associated Press to-day owes its great serviceability to the press and public. Under Mr. Smith’s direction the western news circuit was enlarged and extended to new fields, taking in Milwaukee, St. Paul, Minneapolis, Dubuque, Omaha, Kansas City and other important news-centers. The exchange of news with the New York Associated Press was kept up until early in the year 1881, when Mr. Smith, upon consultation with the management of the leading Western journals, decided to establish and maintain an independent Western bureau. An organization was effected under the name of the Western Associated Press, and Mr. Smith established agents in New York, London and the chief cities of the continent of Europe. Many of the more important daily journals of the country appreciated the power of the new association and the advantage of membership, and applied and were admitted. When the association was firmly established and was proved a great success, the New York Associated Press evinced a desire to enjoy its advantages, and an amalgamation was effected as to news matters alone. The officers of the Western Associated Press are Joseph Medill, president, and William Henry Smith, manager. In respect to the admission of new members, policy and important ventures, the advisability of such moves is passed upon by an executive committee composed of the editors of leading Western papers. The New York Associated Press has a similar executive committee, and there is a joint executive committee of the two, to consider matters affecting mutual interests.

THE AMERICAN PRESS ASSOCIATION was organized in August, 1882, by Major O. J. Smith, R. W. Nelson and George W. Cummings. They had had a long experience in the newspaper field, and although starting with small capital, in a remarkably short space of time they revolutionized the daily newspapers in all towns and cities outside of the few very large cities of the country. By their system of furnishing news, both the smaller papers and those of medium rank are placed upon a real footing with the metropolitaan journals in the matter of publishing news, being able at a trifling expense, to publish daily an amount of telegraphic news which under any other system would cost thousands of dollars annually.

Major O. J. Smith, president of the Press Association, is forty-two years of age, and was raised on a farm near Terre Haute, Ind., and is a graduate of Asbury (now DePauw) University at Greencastle. At the beginning of the War, he enlisted in the 71st Indiana Volunteers, and with which he served nearly four years, and soon after became President of the Press Association. When the War was ended he was for a short time engaged as a cotton planter in Alabama. He next established the Daily and Weekly Gazette at Terre Haute, Ind., and afterwards this paper for a couple of years, he sold it, and established the Terre Haute Saturday Evening Mail, now the most largely circulated weekly paper in that section of Indiana. He sold this and bought the Daily and Weekly Express, one of the oldest papers in Indiana. After publishing it for a number of years he separated the Daily and Weekly, sold the former and moved the Weekly to Chicago in 1878, and soon had a circulation of nearly 100,000 copies. In 1882, he sold this paper to join in the organization of The American Press Association, of which he has since been the president.

Robert W. Nelson, vice-president of the American Press Association, and manager of the Cincinnati house, was born in New York State, and is about thirty-four years old. At an early age he acquired a varied experience in different kinds of mercantile business, and finally drifted into the newspaper field. One of his first newspaper ventures was the establishment of the Joliet (Ill.) Daily News, which he soon made a leading newspaper. He sold this paper and was for a time engaged in the ready-print business in Chicago. He next established the National Liberator, still a leading exhibition journal, which he sold in 1882, to engage in the establishment of the American Press Association. Mr. Nelson has for many years been prominently identified with the prohibition party, holding prominence in their National Conventions.

George W. Cummings has been secretary and manager of the American Press Association, and manager of the Chicago house, from the beginning of the enterprise. He is thirty-six years of age,
and was born on a farm in Vermillion County, Ill. When he was quite young, his parents settled on a farm near Terre Haute, Ind. At the age of fifteen, he entered the school near Terre Haute, where he remained three years. He then taught a country school near that city for two successive years, earning money enough to carry him through the Indiana State University, where he graduated in 1879, and the school of law in the University of Michigan, where he spent Major O. J. Smith on the Terre Haute Mail. After leaving college he entered the St. Louis (Mo.) Law School, from which he entered upon the practice of his profession in that city shortly after he was admitted to the bar. In 1874 he married Mr. Dandy, one of the prominent newspapers and the financial secretary of the latter and is now chairman of the directory of the club.

FRANK HATTON, editor-in-chief of the Chicago Mail, was born at Cambridge, Ohio, on April 28, 1846. His father, Richard Hatton, was a prominent publisher of the Cincinnati Times. During Frank Hatton's early boyhood his father removed to Cadiz, Ohio, where he purchased the Republican. It was on this paper that Mr. Hatton received his first instruction in the business with which he has been identified, and closely identified with his life. At the age of eleven he entered the Republican office, and before he had finished his fourteenth year he was foreman of the office and local editor of the paper; not in name only, but the hard work of the mechanical management of the paper devolved upon him, and he was obliged to furnish the usual quota of local news every week. It was a stern school and proved the best of educators; it developed him into a political writer he was among the leading Republican editors of the nation. During the last year of his residence in Mr. Pleasant, he was postmaster of this place, and for a few years prior to October, 1851, he was postmaster at Burlington. In the month and year above mentioned, President Arthur appointed Mr. Hatton assistant postmaster-general, and disposing of newspaper and other interests in Iowa, he entered the office and upon his duties.

In October, 1854, Postmaster-General Gresham resigned, his position was filled by Mr. McLean, and Mr. Hatton was appointed by the Secretary of State to fill the office of postmaster, in which official capacity he served until the close of President Arthur's term. In October, 1882, Mr. Hatton became interested in the Chicago Evening Mail, and in 1888 became its owner and publisher. In 1896 he was made editor of the Evening Mail, and his paper had a circulation of about 60,000. He was re-elected at the last election and has held his position. His editorial influence is of the highest order, and he is now the most important of the city's newspapers. His qualities are those of a man of intelligence and integrity, and his position is one of the highest in the city.
Louisiana, and, in July, reported the Pittsburgh riots for the Times, and during the winter of 1877-78 was that journal's representative in Texas and Old Mexico. He made a complete tour of the latter country in July, 1879, on an expanded General Bureau expedition against the Sioua, and was with General Merritt in the Ute campaign, during the months of October and November of the same year. In 1880, he made an extended tour of the United States, and in 1881 was the Times' editorial correspondent at Washington, D. C. In the summer of the same year he made the tour of the Canadian and North Pacific railroads, both then unfinished for the Season, 1881, he was assigned to duty in the office of General Carr's expedition against the Apaches. In November, 1881, he withdrew from the Times, and organized the first Irish National Land League Convention, which was held in New York City. On January 15, 1882, he established The Citizen, a paper devoted to American and Irish interests, which since its inception has proved highly successful. Mr. Finerty has always been the editor-in-chief of it, and his articles in behalf of the oppressed people of Ireland give unqualified evidence of his ability, loyalty, and devotion to the cause. In November, 1882, Mr. Finerty became an independent candidate for Congress from the Second Illinois District, and was elected. During the fall of 1883, he supported Mr. Blaine in the Ohio campaign, and in November, 1884, he was again a candidate for Congress, running as a Blaine independent. In this contest Mr. Finerty was defeated. In April, 1886, he was made a candidate for the Republican ticket for the office of city treasurer, but in this Mr. Finerty was defeated, chiefly, it is said, because of local prejudice among certain Anglo-Americans. Of Irish position. With him was married the last marriage occurring in May, 1882, when Miss Sadie I. Hennessee, of Chicago, became his wife. They have one child living.

E. H. TAlBOTT, editor and manager of the Railway Age, is a prominent and popular journalist. Mr. Talbott was born at McConnellsville, Ohio, on August 9, 1839. He completed his education at the Iowa State University, and began his career as legislative reporter for the Iowa Gazette and other papers, during the last session of the Legislature held at Iowa City. Some two years later he became editor of the Madisonian at Wintersott, Iowa. In 1858 he was appointed to a clerkship in the United States Senate, and subsequently examined candidate on the Repub- lican ticket for the office of city treasurer, but in this Mr. Finerty was defeated, chiefly, it is said, because of local prejudice among certain Anglo-Americans. Of Irish position. With him was married the last marriage occurring in May, 1882, when Miss Sadie I. Hennessee, of Chicago, became his wife. They have one child living.

J. E. STRONG, editor and manager of the Chicago Newspaper Union, was born in Union City, Branch Co., Mich., on March 28, 1841, being the son of George and Emily II. Strong. His parents were among the early pioneers ofthat State, his father, with several others, having opened the way and established himself in the city, is the only guide to their new homes being an Indian trail through the wilderness from Detroit. Charles E. Strong was the eldest of three boys, and remained at his native place until he was ten years of age. In 1853, having received his early education, and, when fourteen years old, applied himself to mastering the details of the typographical art. He has contributed several papers representing an apprenticeship to S. M. Booth, with whom he remained for four years. He then went to work as a compositor, being engaged at various times on nearly all the daily newspapers of Milwaukee. In 1860, Mr. Strong entered the office of the Evening Wisconsin as a compositor, and two years later was made foreman of the establishment, a position he filled with signal ability and success until 1870. Previous to this time the proprietors of the paper, Cramer, Atkin, & McFarlane, had originated a plan of supplying their readers with a daily newspaper and a Sunday paper for the use of country newspapers. Mr. Strong, recognizing the journalistic and mechanical advantages of such a plan, and having been engaged for a few years in supplying the Chicago papers with news for the use of country newspapers, Mr. Strong received the original proposal with the expression of his desire to organize a newspaper union in this city. All the necessary arrangements for an extensive business were perfected, and the offices of the Union were then opened with great prosperity. Mr. Strong gave up his office proper to those in distress, and with a pile of paper for an editorial and cashier's desk, for several months operated five presses and two gangs of men night and day, publishing the Republican, Post, St. Louis Zettelung, Union, Re- ligious and Philosophical Journal, and numerous other dailies and weeklies.

The business of the Union was at once extended, branches established at Fort Wayne, Ind., Sioux City, Iowa, Cincinnati, Ohio, and Memphis, Tenn., the two latter offices being established primarily to serve the railway interests in those cities, and to the latter date. The Chicago offices and its branches operate seven hundred different daily and weekly newspapers employing over one hundred men in the various departments of the business. The Union is the largest and most extensive institution of the kind in the West, and in addition to its regular business has a large trade in paper, type and printing machinery. The Chicago office has become the largest in the country, and Mr. Stone's management, has done more to advance the ready-printing presses than to introduce new features in the same, and to give variety and value in its publications, than any similar institution in the West. Person- ally, Mr. Stone has done more to advance the trade of the printing field, and has contributed largely to the advancement of educational, temperance, religious and political literature. Among his solid successes is the Chicago Ledger, which was started in 1872, and as a first-class family story-paper is unrivaled in the field it occupies, his associate member of the American Railway Master Mechanics' Association and a member of the Union League Club of Chicago.
being the first venture of its kind in the West that has weathered the storms of more than a decade, and won its way to permanent popular approval. Mr. Strong is one of the large stockholders in the Union, and in his private life he is highly esteemed as a citizen and a friend. He was married in 1862, in Milwaukee, to Miss Jane Nolden, of that city, where his father for twenty years has been connected with the municipal police department. They have two children.—Emily G. and George A., the latter of whom is the superintendent of the supply department of the Chicago Newspaper Union. Mr. Strong is quite active in political circles and is a member of several clubs of this nature, and belongs to Hesperia Lodge, No. 411, A.F. & A.M. After a successful business career of fifteen years, Mr. Strong enjoys the respect and confidence of his associates and friends, and ranks high for commercial integrity and as a valuable citizen in the community where he resides.

THE RELIGIOUS PRESS.

That the Religious Press of Chicago has been, and now is, a most important factor in promoting the growth of the city, and a very powerful influence in moulding and directing public opinion, must be apparent to all who are conversant with the quality of management and extensive circulation of the various journals of this class. The journals representing the leading Christian denominations here do not suffer in the least by comparison with those of the same class published in New England and New York; while in point of circulation they have already equaled or outstripped their Eastern competitors. It is estimated that the various religious papers of Chicago reach at least three hundred thousand readers in the aggregate, each week, a considerable percentage of whom are in the East and the South, and by no means confined exclusively to the West.

THE ADVANCE.—After the demise of the Congregational Herald, in 1861, the Congregational churches of the West were without a representative journal until 1867, when, in response to a general demand, the Advance was established, and has since been published weekly in this city. In the year named a few Chicago gentlemen organized The Advance Company, with a capital stock of $50,000, and, on September 5, 1867, commenced the publication of the paper, with Rev. W. W. Patton, D.D., as editor-in-chief, and J. B. T. Marsh, an experienced newspaper man from Ohio, as office editor. While the great fire of 1871 occurred, the Advance occupied the building on Monroe Street where the Montauk Block now stands, and lost everything excepting the subscription list. For a few weeks the paper was printed in Cincinnati, but was soon again issued regularly from Chicago. Soon after this, H. L. Turner and J. B. T. Marsh became the owners of the paper for a time; Mr. Marsh, however, retiring soon from the partnership and Mr. Turner becoming the sole owner. Mr. Marsh had been on the editorial staff from the beginning, and vacated that position in 1875. In November, 1873, Mr. Turner sold the paper to Charles H. Howard & Co., when Dr. Patton retired as editor-in-chief, and General Howard assumed that position, with Rev. Simeon Gilbert, who had been on the editorial staff since 1871, as chief assistant. No change took place in the business or editorial management of the Advance until July, 1882, when C. H. Howard & Co. sold out to a new company, in which Rev. Dr. Robert West was the principal stockholder. Dr. West has since been the controlling spirit of the paper, which has achieved a large circulation and commanding influence among the churches of the Congregational faith.

THE INTERIOR.—This paper, the representative of the Presbyterian denomination, was started in March, 1870, by a joint-stock company, with a paid-up capital of $50,000, of which Hon. R. B. Mason was president. Rev. Arthur Swazey, then pastor of the Third Presbyterian Church, was chosen editor. The paper was issued as a large eight-page weekly, of attractive make-up. In the fire of 1871, the Interior went down in flames and found itself out in the open air, and had to pay $10,000 in debt. At this time the company secured the services of W. C. Gray, as publisher, who at once took the remains of the subscription list to Cincinnati, from which place the paper was issued, until January following. Mr. Gray was then selected editor, and has remained such ever since. In January, 1873, the publishing company sold the paper to C. H. McCormick, who put into it about $50,000, and continued its management under Mr. Gray until January, 1883, when he sold a half-interest to the latter. The McCormick estate and Mr. Gray now own the paper. The Interior has grown to be a leading paper of the Presbyterian denomination and has a national circulation.

William Cunningham Gray, the editor of the Interior, was born in Butler County, Ohio, in 1830. His youth was spent in farm work, school-teaching and attending college, as his time and means allowed, having to provide the latter for himself. He succeeded, however, in working his way through college (Farmers' College, near Cincinnati), and graduated with credit. After leaving college he entered upon the study of the law under Chief Justice Josiah H. Humphreys; he was admitted to the bar in 1857. He practiced his profession but a short time, however, relinquishing it in 1853 to found the Tiffin (Ohio) Tribune, which is still a flourishing paper. After several years of successful work at this place, Mr. Gray removed, in 1863, to Newark, Ohio, where he took editorial charge of the Newark American. In 1867, he removed to Cincinnati, and established the Elm-street Printing Company, in the management of which he was engaged when the great fire of 1871 occurred in Chicago, burning out the Interior, which had been running about a year under the management of a stock company. A good deal of money had been expended on the paper, it was badly in debt, and the outlook at this time was very discouraging. The company sent for Mr. Gray, and induced him to take charge of the paper. When Mr. Gray took hold of the Interior he brought it to it, to a great extent, the methods of secular journalism, something new in the conduct of a religious paper. Pungent paragraphs, brief editorials, and wide-awake treatment of current events, from an everyday, practical standpoint, at once marked the new and better era in religious journalism. Mr. Gray was married in 1856, to Miss Anna (Gurns, of Waynesboro', Penn., and has two children,—Frank S. Gray, publisher of the Interior; and a daughter, Mrs. Anna C. Parcell, wife of a prominent member of the Chicago Board of Trade. Mr. Gray received the honorary degree of Ph. D. from the University of Woorser (O.) in 1874.

THE NORTHWESTERN CHRISTIAN ADVOCATE.—The historic sketch of the early days of this paper, as given in the first volume of this History, comes down to 1857, at which time Rev. T. M. Eddy was the editor. He was re-elected to the position by the General Conference of the Methodist Episcopal Church in 1860, and again in 1864. In July, 1864, Rev. Arthur Edwards of Michigan, became the associate editor, Dr. Eddy continuing as before until 1868, when he was succeeded by Rev. J. M. Reid, Dr. Edwards still acting as associate editor. In May, 1872, Mr. Reid withdrew, and the General Conference elected Dr. Edwards chief editor, a position to which he has been re-elected by each General Conference, and which he still holds. The Advocate is the official organ of the Methodist Episcopal Church for the Northwest, and under the able management of Dr. Edwards has attained a commanding influence and reached a circulation of nearly twenty thousand. Preachers and people of the Northwest were outspoken in its anti-slavery sentiments, and during the civil strife yielded an unmistakable influence on the side of the Union. When the question of lay representation in the conferences of the Methodist Church began to be agitated, the Advocate took a decided stand in
favor of the movement, to which it adhered. It has long and persistently favored the legal prohibition of the liquor traffic, as the best solution of the temperance question. For many years, until 1880, the business affairs of the Advocate were managed by Rev. Dr. Luke Hitchcock, assisted by Mr. Walden, as publishing agent of the General Conference. In the latter year, that body appointed Walden & Stowe, as publishers, and in 1884 Cranston & Stowe were elected to the position, which they now hold.

The Standard.—This paper, published in the interest of the Baptist Church, was first issued in 1853, in this city, as the Christian Times, which had absorbed the Watchman of the Prairies—a Baptist paper conducted by Rev. Luther Stone. For the first three months, the Times was conducted by Rev. Dr. J. C. Burroughs, assisted by Edward Goodman, Drs. L. D. Boone, H. G. Weston, and A. J. Joslyn. In November of the same year, Rev. Leroy Church and Rev. Dr. Justin A. Smith became joint proprietors and editors of the paper. Soon after the latter, who still remained as editor, transferred his proprietary interest to Edward Goodman, and the paper was thereafter owned and published by Church & Goodman, until January, 1875. At this time, Mr. Church sold his interest to Dr. J. S. Dickerson, of Boston, the firm then becoming Goodman & Dickerson. Dr. Dickerson died in March, 1876, but his interest was perpetuated, under the old firm name, by his widow, Emma K., and his son, J. Spencer Dickerson. Since its establishment the Standard has absorbed, at various times, the Illinois Baptist, of Bloomington, the Witness, of Indiana, and the Michigan Christian Herald, of Detroit. The Standard has been a prominent factor in the building up of Baptist insti-
tutions in Chicago and the Northwest, and is recognized as one of the first among American Baptist periodicals. Rev. Dr. J. A. Smith, the present editor, has had a continuous connection with the paper, in that capacity, since November, 1853.

Edward Goodman, the senior proprietor of the Standard, was born at Chipstone, Northamptonshire, England, on May 10, 1830. He was educated as a druggist, and in early youth entered the establishment of Mr. Clark in Leicester. In 1852, he came to the United States, his objective point being Chicago, whither two elder brothers had preceded him. In August of the year following, he entered the service of the Christian Times, and travelled extensively in Illinois, Iowa, and Wisconsin, in which he met with gratifying success. He was engaged actively in this and other work in the business interests of the paper until January 1857, when, with Rev. Leroy Church, he became joint owner, and has remained such, a moving spirit in the enterprise, to the present time. It was largely through the enterprise and foresight of Mr. Goodman that several Baptist papers published at various points in the West were absorbed by the Christian Times, the name being changed to the Standard in 1867, when the Michigan Christian Herald, of Detroit, was taken in. Mr. Goodman was married at Milwaukuee, on September 30, 1858, to Miss Mary E. Brande, and has one son and one daughter,—Herbert E. and Zula A. He has for many years been prominently connected with the various Baptist enterprises having their center in Chicago. He has been treasurer of the Chicago Baptist Theological Seminary, at Morgan Park, since its foundation in 1863, and during 1881-82 was president of the Chicago Baptist Social Union.

The Alliance.—The Alliance was started in January, 1874, by a syndicate of prominent gentlemen connected with the various denominations of Christians, as the exponent of that oneness of belief and fraternal spirit assumed to exist among a large number of the members of the different sects. The financial interests of the paper were in charge of the Alliance Publishing Company, of which H. L. Ensign was appointed manager. The editors of the paper were as follows: Rev. H. N. Powers, D.D., Episcopal; Rev. C. D. Helmer, D.D., Congregationalist; Rev. H. W. Thomas, D.D., Methodist; Rev. Professor David Swing, Presbyterian; Professor William Matthews, Baptist; and Rev. Robert Collyer, Unitarian. Rev. J. B. McClure, who was one of the moving spirits in the enterprise, became the managing editor of the new paper. The paper was conducted on the basis above named for a year or two, but, from various causes, chosen dropped out one by one, excepting Professor Swing, and after a time the Alliance became known as the special organ of the independent church movement, of which he was the leader, called the Central Church, and which held services in McVicker’s Theater, Professor Swing’s sermons being published weekly in its columns. From this time Professor Swing’s name appeared as the chief editor, Mr. McClure, however, remaining as the managing editor and Mr. Ensign as business manager, until the beginning of 1877, when Mr. McClure disposed of his interest to Mr. Ensign, who, with Professor Swing, now owns the controlling interest. Mr. Ensign at once took steps to increase the resources of the paper and to enlarge its scope, especially in literature and politics. In accordance with this purpose, in the spring of 1877 the services of F. F. Browne, formerly the editor of the Lakeside Monthly, were secured as literary editor, and A. H. Huling, western editor of the Morning Star, of Boston, placed in charge of the new political department, while several general writers of eminence were engaged as regular contributors. Under this régime, during which the circulation largely increased, the Alliance continued until the following fall, when Mr. Ensign disposed of his interest to
Rev. Z. S. Holbrook, a Congregationalist minister, who took charge of its interests, financially and editorially, in conjunction with Professor Swing, Messrs. Browne and Huling soon after retiring. Mr. Holbrook retained the management but a few months, when his interest passed into the hands of Henry L. Shepherd, formerly of the Golden Rule, Boston. Soon afterward, Willard Smith, of the Railway Review, became a partner with Mr. Shepherd in the management, both disposing of their interests in a few months to T. S. E. Dickson, who in a short time sold out to J. S. Gregory, for some time the advertising solicitor of the paper. During this time, and until its demise, Professor Swing's name appeared as editor or editorial contributor. After a few months, Mr. Gregory and the parties in interest turned over the good-will and list of the Alliance to the Radical Review of this city, and its career closed.

The Unity.—This journal, published in the interest of the Unitarian Church, commenced its career in September, 1878, and was published monthly, being the successor of the Pamphlet Mission, started six months earlier. It was at first a monthly and edited by a committee of five, consisting of Revs. Robert Collyer, J. Lloyd Jones, W. C. Gannett, C. W. Wenande, and J. C. Learned. Miss Frances L. Roberts was business agent, in charge of the business of the paper. At the beginning of March, 1879, the paper was enlarged to sixteen pages, quarto size; published semi-monthly, and substantially the same editorial and business management continued, with the addition of Rev. H. M. Simmons as managing editor in charge. In March, 1881, the publication of the Unity was assumed by the Colegrove Book Company, of this city, at which time eight more pages were added to its size, and Rev. J. L. Jones took principal editorial charge. He was assisted by the same editorial contributors, with one or two additions, who had been such from the first. The paper continued under this general management, without change, until May, 1885, when it became a weekly of sixteen pages, of the present size and form. On January 1, 1886, Charles H. Kerr & Co. became the publishers, Mr. Kerr being office editor, and Revs. J. L. Jones, David N. Utter and James V. Blake resident editors. A corps of associate editors, outside of Chicago, also lend their names and assistance to the columns of the paper.

The Universalist.—Under the old name of the New Covenant, the history of this journal is given in the first volume of this work down to 1857. In 1858, the paper passed into the hands of Rev. D. P. Livermore, who was largely assisted in its editorial management by his wife, Mrs. D. P. Livermore, since widely known in journalism. The paper continued under this management until May, 1869, when Rev. J. W. Hanson, D.D., and Rev. Selden Gilbert became the owners. In September of the same year, the Northwestern Universalist Publishing House assumed control of the paper, and Dr. Hanson was placed in charge as editor, Mr. Gilbert acting as business manager. In October, 1871, Mr. Gilbert retired, and Dr. Hanson became both editor and manager for the publishing house. This position he occupied until 1874, when Rev. W. A. Start became business manager; but he retiring a year later, Dr. Hanson again added to his editorial duties those of publishing agent. Under this arrangement, the paper continued until the fall of 1885, when the Star of the West, of Cincinnati, was consolidated with the New Covenant, and the name changed to the Star and Covenant, being still published in Chicago and managed as before. In December, 1883, the paper was sold to the Universalist Publishing House, of Boston, its pages enlarged, and the name changed to The Universalist. In May, 1884, Rev. J. S. Cantwell, D.D., was appointed editor, and still occupies that position, the paper being under the same control.

The Living Church.—This periodical, published in the interest of the Episcopal Church in the West, was founded in 1878, by Rev. Samuel S. Harris, D.D., L.L.D., second Bishop of Michigan, and published in connection with Rev. John Fulton, D.D., for the first few months. It then passed into the hands of Rev. C. W. Leffingwell, D.D., who has been its editor continuously since, and who has shared its management for a considerable time past with Rev. Arthur P. Seymour. The Living Church has enjoyed a very satisfactory history, and is growing steadily with the growth of its constituency.

The Free Methodist.—This paper is the recognized and only organ of the Free Methodists of the United States, and was first started in the fall of 1867, at Rochester, N. Y., by authority of the General Conference of the Church, with Rev. Levi Wood, as editor. In October, 1870, the paper passed into the hands of Joseph Mackey, of New York, and was removed to that city, where it remained until 1872, when Lewis Bailey became its owner, and removed it to Aurora, II. In 1874, D. P. Baker and T. B. Arnold purchased the paper, and removed it to Sycamore, where it was published in connection with other general denominational works. In 1886, the paper and entire establishment were moved to Chicago, where it has since remained. In 1882, the General Conference of the Free Methodist Church appointed Rev. Joseph Travis as editor, who still occupies that position. At this time, Mr. Baker retired from the firm, and the ownership and financial management has since been vested in T. B. Arnold. The Free Methodist is a sixteen-page four-column journal, and is published weekly.

The Christian Worker. — This sixteen-page weekly, issued by the Publishing Association of Friends of this city, is the Western organ of the religious order correctly known as the Society of Friends, erroneously called Quakers. The paper was first published at New Vienna, Ohio, in 1870, with Rev. Daniel Hill as editor and John W. Hussey as financial manager. It continued to be issued from that place, under this management, until the spring of 1885, when it was removed to Chicago, and the publication assumed by the association first above named. It was also enlarged at that time to its present size, and Rev. Calvin W. Pritchard placed in charge of its columns as editor, which position he still occupies.

The American Israelite. — This journal is devoted to the interests of the Jewish Church, and has long been the organ of the Union of American Hebrew Congregations. For thirty-two years, it has been published from Cincinnati, but, in February, 1885, a Chicago office of the paper was established, and a distinct edition issued from this city, under the same name, devoted to the interests of Chicago and vicinity,—the two editions being almost entirely different. Rev. Dr. Isaac M. Wise is the editor, and the Bloch Publishing and Printing Company the publishers.

The Occident, a weekly paper, and the leading radical reform Jewish journal, was the first of its kind published in the United States, and was founded by its present editor and proprietor, Julius Silverman, in 1873. It is not only the first radical reform Jewish organ in this country, but in the world, and it is making itself a world-wide reputation by the able way it is conducted and the fearless position it has taken for reform.
The Occident has proved itself as able exponent of the advancement in the religion of the ancient Jewish people, and platform of reason. For thirteen years it has ably marked out its course, and never for a moment changed front, and its subscribers are located in nearly every country on the globe. Its subscription list has reached its thirteenth thousand, and its news is gathered from the whole world, making it a notable enterprise in this city.

Julius Silversmith, M. A., the editor and proprietor of the Occident, was born in Saxony, Germany, in 1837. He was educated in the gymnasium in his native town and later in the universities of Berlin and Kiel in Germany. He landed in Philadelphia, and after a short stay, went to Baltimore, Md., and apprenticed himself to a jeweler. After he had served his time, he returned to Philadelphia and was employed at his trade, when a gentleman, Mr. Wheeling, of Pittsburg, invited him to return home with him, and installed him as bookkeeper in his establishment. At the end of a year, he went to Cincinnati and continued his trade with the firm of McKee & Son. He opened an establishment for himself, but, finally disposed of it and went to St. Louis, Mo., entering the employ of Captain Andrews, in his jewelry business. From there he went to New Orleans, La., and was for a time engaged in commercial pursuits, when he joined the Lopez Expedition and went to Cuba. When the expedition failed and the commander was captured, he narrowly escaped death through the kindness of the American consuls at Vedado. He then went to Panama, where he made an anamnesis for the British consulate, and afterward sailed for the South American States, visiting Guatemala, Central America, Lower California, and finally arrived in San Francisco in 1852. He then went to San Francisco with the intention to metalize and perfect his chemistry. His superior knowledge was soon elected a member of the Academy of Sciences. He began the publication of works on minerals that same year, and were two works: "The Practical Mining Book for Miners and Assayers," the "Miners' Companion and Guide," and in 1839 commenced the publication of the Mining and Scientific Press. He issued many important pamphlets in the interests of minerals and the alloy deposits. He published the Press for eight years, and issued a notable work on the "Origin of Metallic Deposits," and afterward completed the manuscript for a work entitled the "Metallic and Agricultural Wealth of the Pacific States, the result of twelve years' labor." The third volume made it impossible to find a publisher that would take the chances of issue, and he abandoned it. He established in New York City, in 1872, the Mining Judges, a journal devoted to mining interests, and published it for six years. On several occasions during his stay he addressed large audiences at Steinway Hall on the wealth of the Pacific Coast, and also on the Union Pacific Railway before it was completed. He left New York and went to Denver, where he published the Colorado Democrat; then to Cheyenne, and published the Argus; from there he went to Omaha, and published and established the North西部ern Journal of Commerce; thence to Council Bluffs, where he established the first paper in Nebraska; then he became a citizen of Chicago. He commenced the publication of the Cosmopolitan and American Farmer, which the great fire rendered impossible, and at the end of the first term, he was elected a member of the society, and is still a member and editor. In 1835, so popular had this journal become, and such a demand was made on it for its especially prepared news, that it was found necessary to enlarge it to an eight-page paper. During the last campaign, Mr. Silversmith took an active part in behalf of the republican party. He is an enthusiastic worker, whether on the stump or in editorial work, and an earnest, able and fearless journalist. He was married in New York City, in 1857, to Miss Kate Barlow, and they have one son, —Koosman.

STENOGRAPHERS.

James Abbott, stenographer (senior member of Abbott & Jaquis, general stenographers), was born in New York City, on December 12, 1852. Mr. Abbott, when quite young, became a nominal, and by the time he reached his majority he had run through every State of the Union between the Atlantic and the Rocky Mountains. His earliest recollections are of a life with Spotted Tail and his tribe of Indians, and of the visits of old John Brown to Tabor, Iowa (where Mr. Abbott then lived), after a raid in "bleeding Kansas." He attended Western Reserve College at Hudson, Ohio, leading his class in languages, of which he was an adept student. It was at this school that, in 1863, he began the study of stenography as a pastime, and became fascinated with its novelty never stopped until he mastered it. At the age of twenty-one he drifted to Chicago, arriving here in 1874, a total stranger and dead broke. His first day's search for employment was successful, and he has never been idle a day since. He soon established a good clientele, and has since built up a splendid reputation and patronage as a law reporter, being regarded as among the most accomplished in the city. He has reported largely for the press, and in 1874, short-handed the proceedings of five different National Conventions, which shows how much his services have been in demand. From 1876 to 1850, Mr. Abbott was an official reporter in the Courts of Wisconsin, taking in all the counties from the Mississippi to the St. Croix, and Saukau. In hundreds of leading cases he has been employed at his calling, and has distinguished himself by the excellence of his work. Among his more noted recent cases are the Daily County (Carpen ter v. Harris) and the Viehe breach of promise suit, the Lehman v. Chicago Herald libel case, and Sam Jones' sermons. He has also conducted shorthand classes several seasons, Mr. Abbott has been a member of the Stenographers' Association, and vice-president of the International Association of the United States and Canada; he is a member of the Chicago Philosophical Society, and one of the Council of the Western Society for Psychological Research. He has contributed liberally to the different shorthand publications of the country, his articles being clear-cut, somewhat humorous, and always readable.

He is a regular contributor to the Religious-Philosophical Journal, of Chicago.

L. C. Jaquis, of the firm of Abbott & Jaquis, general stenographers, is one of the youngest members of the fraternity in the city, and has made rapid progress in the profession. He was born in Cattaraugus County, N. Y., on December 30, 1857. When the son was but four years of age, the family removed to a farm in Kaukakee County, Ill. He assisted his father in farm work during the summer, and continued the development of his mind in the art of shorthand writing by attending the common school in this manner combining physical development with educational acquisition. After Mr. Jaquis finished his common-school studies, he left the farm and entered mercantile life. He soon became interested in the art of stenography, and entered the business in 1854, and is now thoroughly acquainted with the work. He entered the business of general reporting in 1851, at Indianapolis, where he remained one year. Then, on coming here, he engaged with Mr. Tucker; afterward he carried on business alone, and in December, 1884, formed partnership relations with James Abbott, under the firm name of Abbott & Jaquis. Mr. Jaquis reported the proceedings of the last General Convention held in December, 1884, and has also done considerable work for the St. Louis Globe-Democrat, reporting Sam Jones, in company with John Ritchie, an old and well-known reporter. His attention, however, has been chiefly devoted to law reporting, and in this field of work he has won an excellent reputation. Mr. Jaquis is a member of the Chicago Law Stenographers' Association.

M. H. Dement & Co.—This house was originally established in December, 1872, but was then known as Dement, Gray & Co., and this firm was among the first to carry on a business of general stenographic reporting. In 1876, Mr. Gray withdrew, and Mr. Dement carried on his work with other leading reporters until 1882, when he admitted to partnership Mr. Mathias C. Jaquish, a brother of the senior partner, and an old stenographer, and the style of the firm was changed to M. H. Dement & Co. and the office enlarged, the business undertaken by the firm has considerably increased, and Mr. Jaquish has been engaged in inventing, perfecting and bringing before the public the "Monotype," a machine which takes the place of typesetting, and which bids fair to cause a revolution in the work of printing transcripts, abstracts, etc. The machine is plain and simple in its construction, yet most effective in its work. It is stationed on a table, and has an appearance somewhat like the typewriter machine. The keys, in three rows, are of ivory, and each has a letter of the alphabet upon it. The keys are connected with a cylinder, at the end of which the paper is pressed against the outer surface of a wheel immediately above, by a simple cam construction. A series of ink rollers, mounted on the same spindle as the power printing press, connect with the type. A narrow, continuous roll of paper feeds into the machine, upon which the printing is done. An expert operator can print on this machine, from 15 to 20 lines a minute, the best typewriters only by at least five hundred per cent. When the continuous roll is printed, it is then cut into regular lengths, according to the width of the page for which it is desired, corrections are made, and the slips are placed, on a sheet of paper, in the same manner as pages of the book. These sheets are then lithographed, and then as many number of pages of each are printed as are desired, the whole is bound, and the work is complete. The invention is a wonderful success, and M. H. Dement have been preparing their transcripts in cases in this manner. The invention was patented in the United States on July 9, 1884, and patents have also been obtained in Europe. —M. H. Dement and J. Clayton
Yoeker passed the winter of 1855-56 in London, England, engaged in manufacturing and exhibiting the invention. They will soon commence the manufacture and sale of the machines here, and the new plant will be more improved and fitted up than those already made. The "monotype" will in time be of inestimable value in countless ways, and will fully demonstrate its usefulness to the particular profession of stenography.

Burlington. At this time he was employed as a shorthand writer in the office of Senator James F. Wilson, and prepared himself for admission to the bar. The war came on, and he laid down his Blackstone, to become a private in Co. E, Second Iowa Infantry, and was afterward promoted to sergeant, and served in all the engagements in which his regiment participated until May 1863. Just after the battle of Corinth, Mr. Brown applied himself to the study of shorthand, and in May 1863, his services were called into requisition at the military court at Corinth. He remained there until the following October, when he was transferred to the military court at Memphis, where he was engaged until May 1864. He returned to his home, but immediately went to St. Louis to engage as an official reporter in the State. The winter of 1864-65 he passed in St. Louis, and returning home in the following spring, he reported in county courts until 1870, when he went to Burlington as reporter to Judge Tracy, of the first judicial district. He was thus engaged for one and a half years, at the end of which time he entered the office of General Passenger Agent Touaullin, of the Chicago, Burlington & Quincy Railroad, at Burlington. He remained there three years, and then came to Chicago as corresponding clerk to Mr. Stirling, general baggage agent of twenty-four different lines of roads. At the same time he became instructor in the Chicago Athenaeum, and in 1873 opened the Institute, to which he devoted his leisure. In 1877 Mr. Stirling resigned, and was connected with the Athenaeum until 1882. In 1875, Mrs. F. A. Holland became interested in the Institute as a partner, she having been employed under Mr. Stirling, and they have built up a very large and successful enterprise. In 1881, Mr. Brown was the prime factor in organizing the International Stenographers Association, and has been secretary thereof since its establishment.

Petit, Brod & Co.—This firm was established in 1872 by Frank W. Petit and Charles H. Briot. Both members are old and well known shorthand writers, accomplished and accurate, and their field of work is only bounded by the limits of States and Territories, being prepared to handle work wherever they are called.

Frank W. Petit was born at Hinsdale, Delaware Co., N. Y., on Dec. 3, 1833. His parents removed to this State when he was but a lad, and located at Belvidere, where he was reared and educated. After completing a common-school course of study, Mr. Petit engaged in the dry goods business for a period of about three years, which time he believed was wasted, and thus employed took up the study of shorthand. He soon accomplished the Graham system, and in the early part of 1877 came to Chicago and entered the law office of General George W. Smith, reading law under Mr. H. Dement & Co., stenographers, and later was identified with the shorthand firms of Pettit, Abbott & Co., and Pettit, Abbott, Sabin & Nute. He remained with General Smith about two years and a half, in the meantime forming a partnership with C. H. Briot, and employing a portion of his time as a stenographer. From the time of the dissolution of the firm of George W. Smith & Co., Mr. Petit became associated with M. H. Dement & Co., stenographers, and later was identified with the shorthand firms of Pettit, Abbott & Co., and Pettit, Abbott, Sabin & Nute, and later still succeeded Sabin & Nute. In the spring of 1883 the firm was dissolved and the present firm of Petit, Briot & Co. formed. Mr. Petit has been engaged in many important legal cases, and was Associate Press reporter in the recent Republican and Democratic National Conventions held in this city. He is a member of the Chicago Law Stenographers' Association, and was for some time identified with the Chicago Yacht Club.

Charles L. Driessel, one of the oldest stenographers in Chicago, has been engaged in shorthand writing for the past twenty years, and has been located in this city, engaged in the profession, for nearly a quarter of a century. He was born at Dinkelsbuhl, Bavaria, Germany, on Sept. 2, 1853, and emigrated to America in 1859, and they located in New York City. Charles attended the German schools there till he was ten or eleven years old. He was then sent to the common schools from which he was promoted to the New York Free Academy, an institution devoted to the free instruction of higher English studies. It was at the Free Academy he learned the art of stenography. He studied there with Professor Andreas from 1860 to 1862. Mr. Driessel was the first stenographer in America who introduced shorthand as a regular branch of study. After completing his education, Charles went sailing before the mast, and made several trips across the Atlantic. For fifteen years, he was the agent of the Northern Transportation Company, at New York. In 1855, he was transferred to the office of the company's agent at Oswego, where he became cashier and bookkeeper and remained one year. He was then sent by the company in a similar capacity to Ogden, New York, where he was engaged for six years. In 1862, he came to Chicago and went into the employ of McCormick Brothers as general clerk, and remained with them three years. In 1865, Mr. Driessel was engaged by Homer E. Sargent, general agent for the Michigan Central Railroad. He was the first man in this city to be engaged in regular duty as shorthand amanuensis. After one and a half years service with Mr. Sargent, he was made agent of the Chicago and Wilmington Coal Company. He only remained there one year; after which he was engaged by General Anson Stager, general manager of the Western Union Telegraph Company, as its private secretary, and was engaged in the public work of entering into the business of general stenography on his own account.

During the years 1868-69, when German mass-meetings were being held here, he was engaged in reporting the meetings and speeches for the Chicago Times. Since 1872 he has been chiefly engaged in court reporting, and has reported the testimony taken in nineteen-twentieths of all the cases in Cook County since that time. He is the most accomplished stenographer of the old school in shorthand, and is well known as one of the great stenographers in the city. He has adapted and published a manual of the Roman system of shorthand in the German language, and the volume has had much success in this country and Germany. Mr. Driessel has been the recognized leader of the shorthand writers of this city, as well as being a most accomplished stenographer, he having performed the most important of secretarial and mechanical duties for the city, which may be mentioned his "Electric Type-Writer" and "Coal Mining Machines." He has been one of the oldest stenographers in the city, but was the first and the only person, for a period of five years, who transcribed testimony in court cases. Mr. Driessel has been married twice—first, to Miss Catharine M. Gunn, of Washington County, N. Y., on November 26, 1856, by whom he had eleven children. His death occurred in 1878. He was again married on February 8, 1880, to Mrs. Priscilla B. Carey, of Freeport, Ill., and her demise occurred in July, 1894. He has five children now living.—Louisa M., Emma A., Charles W., George A. and Homer Sargent, the last-named in honor of his old-time friend above mentioned. Mr. Driessel has been a member of the Masonic fraternity since 1857, and belongs to the Chicago Law Stenographers' Association.

John Gray was born at Derby, England, on September 5, 1849, and was there reared, being educated at public schools of his native town. At the age of fourteen he entered the employment of the Midland Railway Company of Great Britain, as clerk, subsequently to the position of shorthand writer, and later to the impression of shorthand in the courts. In 1867, he came to Omaha, Neb., and took possession of a mercantile house, and was also employed by the Omaha Herald for special service. He was likewise engaged by the State of Nebraska to report the proceedings of the Legislature, and by the United States to report the sessions of the General Assembly held in 1871. In 1870, he was appointed deputy county clerk of Douglas County. In February, 1872, upon the resumption of operations of the Chicago Journal, Mr. Gray was employed as the official stenographers until December, and then formed the firm of Dement, Gray & Co. They continued their business relations until 1875, when the firm was dissolved, and the new firm of Dement, Gray & Co., was organized. In the business of shorthand writing, he has always been a prominent member since. The firm devote their almost exclusive attention to reporting law work for corporations, and an idea of their business patronage may be well obtained when it is known that they are the official stenographers for the Pennsylvania Railroad Company, the
MANUFACTURES AND TRADE.

The following year (1875), although a complete recovery from the effects of the panic had not been made, was one of more general prosperity among manufacturers. No general reduction of wages occurred, and the working classes, as a rule, were more generally employed. Continued improvements in labor-saving machinery affected mechanics in a few departments, but, on the whole, the increase in demand more than kept pace with the increase in facilities of manufacture.

The manufactures of the year 1876—when the industries of beef and pork packing were omitted—showed a slight falling off, although if those industries be included in the tabulation the net product shows an increase of between four and five per cent. Wages fell off about eleven per cent., and the number of employés was somewhat reduced. The history of the trade during 1876 presented no features of special interest.
During 1877 a slight advance was noticeable in the volume of the city's manufactures. Prices of almost every description of manufactured goods declined, but a corresponding decrease in the cost of raw material and labor helped to swell the profits of manufacturers.

The year 1878, however, was the most prosperous known in the history of Chicago manufactures up to that time. Prices continued to fall, but the volume of business largely increased. The augment was largely the result of an improvement in the packing and iron industries. The labor market was in a notably healthful condition. While the number of workmen in the city was considerably increased, wages were not reduced, except in a few departments, while the greater purchasing power of the dollar resulted in an improved condition of the working classes.

In general manufactures, no extraordinary improvement characterized the year 1879, although a comparison of the figures given below those for 1878 (preceding) show a healthy though not spasmodic growth in the volume of business. An increase in the cost of production, resulting from a rise in the labor market (although the numbers of workers was increased in nearly all departments), reduced profits of manufacturers. That important branch of manufacturing—hog-packing—showed a marked falling off in consequence of a disastrous strike among the operatives at a period when the season is usually at its height.

The year 1880 witnessed an increase of prosperity, due not only to a revival of activity in the packing business, but also to the enhanced value of iron and an increased demand for those wares into whose manufacture it entered. The following table affords a comparative view of the years 1879 and 1880, the figures for the latter year having been taken from the U. S. Census Report, and covering the twelve months ending with June 1 in that year:

In 1881, another marked—though not abnormal—advance occurred, as is shown by the figures given below. A decline of nine per cent. took place in the amount of hog-packing, but this was more than compensated for by a rise in prices. Nearly all other branches of manufacture show a substantial gain in the aggregate of results, to the mutual profit (in most instances) of both employers and employés, although the price of labor materially advanced. The only notable strike of the year was that of the boiler-makers, about six hundred of whom “went out” in March and refused to work for six weeks, at the expiration of which time they had succeeded in carrying their point. The comparative table given below shows that, while a larger amount of capital was invested in manufactures, a greater number of hands were employed and more was paid out as wages in 1882 than in 1881, the value of the manufactured product slightly decreased. The causes are to be found, not only in a shrinkage in values and a conservative spirit on the part of buyers, but in a long-continued strike of iron workers, as is noted elsewhere.

The financial depression and the lack of confidence which had characterized 1882 was even more marked in 1883. A decrease in consumption in many lines resulted in an over-stocked market, and a cutting of prices became the rule rather than the exception. The greatest depression was felt by the manufacturers of iron and steel, ready-made clothing, boots and shoes, and furniture for the trade. The volume of business done by the packing houses was greater than in 1882, but lower prices prevailed and, profits were proportionally diminished, and the cash value of the product was reduced. Despite the increase in competition, however, and the smaller volume of work done, the scale of wages was not materially reduced and the number of unemployed was not above the average. It may be noted that the general depression was not shared by the building trades, including stone-cutters, marble-workers, architectural iron works, etc. The history of the manufacture of iron and steel, which was extended in 1883, with more detail elsewhere. There was a partial failure of crops in 1883, and the country orders in 1884 were small. In addition, a general feeling of uncertainty, attendant upon the result of the presidential election, on all buyers reduce their purchases to the lowest possible point. The result of these circumstances was to stimulate competition to sell, and prices fell accordingly: the year proved a disastrous one, and was marked by many failures and retirements. The reduction of the working force was almost universal, and the lowering of wages very general. Not a few establishments reduced expenses by adopting both these methods—i.e., discharging a considerable number of employés and lowering by ten per cent. the wages of those who were retained. This policy, however, was abandoned early in 1885, the depression not proving so long-continued as had been feared, and the belief becoming general that the reduction was not demanded by the exigencies of the situation. While there can not be said to have been much over-production, stocks were sufficiently large to stimulate competition among sellers, and thus reduce the margin of manufacturers' profits, which, in some cases, were, to say the least, at a minimum. Considered as a whole, however, the position of Chicago manufacturers at the close of 1885 exhibited a decided improvement over the opening of the year. The ability of Western buyers to purchase was greater, and this city received a full share
of the increase due to this fact. The following table affords a comparative view of the condition of Chicago manufacturers during the years 1883 to 1885, inclusive:

The general classification of many of the more important manufactures of this city are given in various other portions of this volume.

THE DRY GOODS TRADE.

The growth of the trade in dry goods in Chicago was at first gradual. From such a small beginning as might have been expected in a frontier settlement, its increase has been steady, but healthful. The wholesale trade was represented here in 1859, by twelve houses, all of which creditably withstood the panic of 1857-58. While Eastern journals were at that time fond of ridiculing the commercial interests and importance of Chicago, the dry goods interest in no city was better sustained. The aggregate sales by Chicago merchants in 1859 were nearly twenty-four per cent. greater than in 1858; short credits and prompt pay were the principles underlying the trade, while greater ease in making collections showed that country merchants had been taught a lesson in the school of experience. About this time, also, buyers from the smaller内地 cities began to find it to their advantage to make purchases in Chicago in preference to Eastern cities. From this period until 1864, the progress was surprising, influenced, no doubt, to a certain extent by the inflation of the currency and prices during the War, and in part to the reaction from a slight temporary depression in 1860. Chicago had become, in 1864, the great dry goods market of the country outside of New York; the merchants from the entire interior of the Northwest, and even from Ohio and Missouri, had become customers here. A special article devoted to the “Dry Goods Market” appeared almost daily in the Tribune. The only record of the volume of the year’s trade obtained is that given by that paper; which, in summarizing the business of that year, confesses its inability to give complete figures, but furnishes the following estimate:

"The sales of four of the largest houses in the city during the year amounted to $24,550,000; and the sale of the entire trade can not fall short of $35,000,000. This includes wholesale dry goods dealers, fancy dry goods jobbers, and wholesale dealers in Yankee notions, etc."

These figures appear very large, but probably closely approximate the truth. It must be borne in mind, however, that they represent sales made in a currency whose value, as compared with a gold standard, was depreciated.

Among the prominent firms engaged in the dry goods trade at the close of the War were the following: Field, Palmer & Leiter, J. V. Farwell & Co., Field, Benedict & Co., Keith & Faxon, A. S. Gage & Co., Carson & Pirie, and Gale & Van Wyck.

From 1865, until the date of resumption of specie payments, the purchasing power of greenbacks and National Bank notes continued to appreciate, and as a result the volume of business, as shown by the amount of sales reported for several years following 1865, did not increase in as marked a ratio as during the War. To illustrate: The volume of trade in 1869 exceeded that of 1868 by from five to six per cent., yet, during the same year, prices on all lines of dry goods, and particularly on domestic goods, declined from seven to eight per cent. It may be seen from the table that the fall in prices, it was necessary, in order to an increase on the amount of sales, that the quantity of goods sold should be largely in excess of that of the year preceding. It is worthy to note in this connection, that the loss resulting from the depreciation of prices fell most heavily upon the retailers, many of whom found themselves unable to dispose of their goods with sufficient rapidity to pay the expenses of handling, in addition to the loss resulting from the shrinkage of quoted values.

In referring to the trade of 1869, it should be remarked that one of its most noteworthy features was the increased demand for western-made fabrics. This branch of manufacture was yearly growing in importance, and very satisfactory progress was achieved in the year named. The following are approximate statistics of the dry goods business in this city during 1869: Wholesale firms, 20; retailers, 150; hands employed in both, 3,500; capital employed in jobbing, $6,000,000; in retailing, $8,000,000; wholesale sales, $35,000,000; retail sales, $15,000,000.

The panic of 1873 found the dry goods trade of Chicago not unprepared. Among the wholesale dealers, only one firm was obliged to go into liquidation. No new firms embarked in the business during 1874, but the total capital invested in the business at the close of the year did not vary from $77,000,000. The sales for the year aggregated $50,000,000, which was an increase of about five per cent. over the year preceding. The depreciation of prices still continued, and the inference pointed out above, from a comparison of the increase in business and the decrease in prices, held good also during that year, and the amount of goods sold was much in excess of that sold during the year of the panic. The year 1874 was a prosperous one for the jobbing trade, owing, chiefly, to the steady decline in the prices of cottons, which was from fifteen to twenty per cent.; a marked decrease also occurred in woolens; and both were largely attributed to over-production. Manufacturers at once began to curtail operations, and the downward tendency was checked. The main feature of the trade of that year was the surprising development of the trade with the Southwest, and especially with Texas. The opening of new railroad lines, and the extension of those already in operation, enabled Chicago merchants to ship goods to new markets, resulting in the enlargement of established commerce and the opening of a trade which has since proved very prosperous. The trade with the West was also active, although prices ruled lower. The panic of 1873 ultimately proved beneficial to Chicago. Eastern dealers at once began to shorten credits, and Western buyers commenced to turn their attention to this city, since the main inducement which had attracted them to the seaboard was thus removed. New York dealers soon offered to extend credits, but buyers had found that they could purchase here at lower prices, besides saving the cost of travel and avoiding delay. The statement that prices were lower in Chicago appears at first to be paradoxical; the cause, however, is to be found in the fact that merchants in this city then, as now, bought goods directly from manufacturers—both European and domestic—while living and selling expenses fell much below those in New York."
Lack of space forbids tracing the history of the trade year by year; yet certain periods may be selected as showing the growth of what has become one of the city’s vital commercial forces.

In 1876, the total sales reported aggregated $4,000,000, which was about equal to the figures for the preceding year, and an increase of seven and one-half per cent. over 1874. The reduction in prices was more marked than for several years, averaging fifteen per cent. on staple and from fifteen to twenty-five per cent. on fancy dry goods. Large lines of stocks were carried as a rule, and few, if any, jobbers did more than pay expenses. The amount of capital invested in the dry goods business at that time was by far the largest in any branch of business having been increased about $1,000,000 during the year by the opening of a branch house of A. T. Stewart & Co., of New York. In speaking of the business of 1876, however, it should not be forgotten that the Centennial Exhibition at Philadelphia was not without influence on Chicago dealers, many Western buyers availing themselves of low railroad fares to visit the Exposition and to replenish their stocks in Eastern markets while near the sea-board. One noticeable feature of the year’s trade was the increase of the sale of foreign fabrics. American manufacturers had “carried the war into Africa,” and being able to compete with foreign manufacturers in European markets, found no difficulty in holding their own at home.

The year 1879 saw the resumption of specie payments, but this exerted no disturbing influence on the business of the country. The aggregate sales of dry goods in this market during that year were estimated at $5,500,000 as against $4,600,000 in 1878,—an increase of about fifteen per cent. The capital invested in the trade was about $5,000,000, and may be said to have been steady as compared with the fluctuation in prices in other lines of business, although profits were smaller than in 1878.

Between the years 1879 and 1886, the general features of the trade have been the same as those already outlined. A succinct review of the year 1885, and the condition of the business at the opening of 1886, will be of interest. As compared with 1884 and 1885, 1886 was a fairly prosperous year. The average shrinkage in values on all classes of goods was about five per cent., while sales increased in about the same proportion, leaving the value of the goods sold about the same as for the two years preceding,—viz., $57,000,000. The capital invested at the close of the year was about $8,000,000, a trifle less than at the end of 1884. The near-by trade proving to be of a rather unsatisfactory character, merchants pushed for new fields. The result was a material increase in the trade with the extreme Northwest (especially Oregon and Washington Territory), and a less noteworthy advance in the trade with California and Arizona. The trade with the South is growing apace, and would be much more rapidly developed were Chicago merchants willing to grant longer credits. This, however, has always militated against the vast extension of business in the Southern States, not alone in the dry goods but in every branch of trade. The long credits that obtained in ante-bellum days, the Southern merchants have still nurtured in their commercial relations, the virtual exclusion of Northern competition, and this custom has worked detrimentally to Southern interests. Financially, the dry goods trade at the opening of 1886, was believed to be in a sounder condition than for many years past, and the outlook for the future was hopeful in the extreme.

---

**Field, Benedict & Co.**—This firm of wholesale dealers in woolens is among the very oldest of the wholesale houses in Chicago. It was in 1873 that Field & Benedict, under the firm name of Field & Benedict, their first place of business was on South Water Street, between Wells and LaSalle streets, where they were established until 1876, when they removed to the corner of South Water and State streets. Two years prior to this removal, however, a change in the firm had taken place. Field & Benedict were partners, and the style at the same time changing to its present form, Field, Benedict & Co. In 1861, another removal was made to the corner of Wabash Avenue and Lake Street, where they remained until burned out in the fire of October, 1871. In 1871, Benjamin M. Field retired from the firm and active business life, and returned to the East to live; his successors in the house were Richard I. Field and Frederick L. Snyder, young men who had been connected with it since 1864, and who were received into partnership. A month after the fire, in which the firm sustained losses aggregating $140,000, business was resumed at the house of Mr. Snyder, on Wabash Avenue, near Eighteenth Street. They remained there until the following spring, when they moved to a new building which had been erected on the corner of Market and Washington streets. Two years later another change of location was made to the corner of Wabash Avenue and Madison Street, and in 1879 they moved to Nos. 244-46 Monroe Street, and in the fall of 1883 to No. 222 Franklin Street, their present location. As evidencing the remarkable growth of the wholesale trade in Chicago, the house of Field, Benedict & Co. has, from the first, enjoyed a steadily increasing trade; its sales, which, in 1859, were $25,000, an excellent showing indeed for that time, now amount to over $500,000 annually. The present members of the firm are Amzi Benedict, Jr., Frederick L. Snyder, Richard I. Field and Peter J. Stewart. Benjamin M. Field was born in New Jersey, in 1820. He was early connected with a leading woolen house in New York City. In the spring of 1849, he came to Chicago, where his first business venture was with Mr. Benedict, in establishing the house whose history has been given. In 1864, he retired from business, and is now living in retirement on his farm at Round Brook, in New Jersey.

**Amzi Benedict** was born in Oneida County, N. Y., in 1826, passing his boyhood largely on his father’s farm. When eighteen years of age, however, he was placed in a store in Utica, N. Y., where he remained until 1839, when he came to Chicago. Here he came into trade with Mr. Field, he formed the house of which he is now the senior member. Mr. Benedict was married, in 1856, to Catharine C. Walnath, daughter of Major John I. Walnath, of Madison County, N. Y. Six children have been born to them, three of whom have deceased. The three living are Ellen L., Caroline F., and Sidney A.

**Osborne Kessellner Keith,** the eldest of the brothers whose names have been conspicuous in the commercial history of Chicago, was born at Barre, Washington County, Vt., on September 2, 1831. He is the son of Martin and Betsy (French) Keith. His branch of the Keith family were of Scotch descent, who settled in Massachusetts in 1649, when very young, and came to Vermont, and followed the occupation of farming during the most of his life. The New England ideas and religious convictions of right were early impressed upon the character of Martin Keith, and his wife being a most exemplary Christian woman, they exercised a great influence upon their family and a large circle of acquaintances. In his early youth, Osborne Keith attended the common school, and afterward went to Bakerville, Vt., and studied one year. He then engaged as a clerk in one of the mercantile stores at Montpelier, where he continued, until starting...
Manuel Brothers.—This firm was organized in 1853, and is composed of three brothers, Simon, Leon and Emanuel. The first place of business was on the corner of Clark and Van Buren streets, but the great fire of 1871 consumed their building and forced them to take up quarters on the corner of Michigan Avenue and Twenty-second Street. This property they purchased for ten thousand dollars, and have since conducted a branch store. In 1872, they erected a building on the corner of State and Harrison streets, and again in-town, occupying it until driven out of business by the fire of 1874, after which they opened again on Washington Street, between State and Dearborn. Here their trade steadily increased until 1875, when they removed again to what is now, and was once, the largest quarters of the business at that time, occupying Nos. 121-23 State Street, where they soon secured the best trade of the city. They continued in this double room until 1883, when they purchased the building they now occupy, and added to it Nos. 117-19, throwing four large store-rooms into one, extending to the alley in the rear and making one of the finest dry goods establishments in Chicago. In addition to the many improvements consisting of elevators and handsome, newly finished furniture and fixtures, they added a plant for one thousand of the Edison electric lights. To-day they employ in their general business in Chicago about eight hundred persons.

In 1883, they opened their New York concern at 220 Twenty-second Street, New York City, and No. 6 Conservatoire, Paris, France.

The firm of Manuel Bros., is a representative Chicago business house, and a fair example of the success that awaits those who combine energy, perseverance, and business tact, and attach themselves to a business they are capable of mastering. Composed as it is of three brothers, coming to this country at an early age, having nothing to assist them, except willing hands and ambitious impulse, they commenced at the lower rounds of the ladder, and against the severest trials and afflictions—twice their establishments were destroyed by fire, in 1871 and 1874—and the general discouragements incident to starting up of a large business, they are standing these calamities, one of the great and important business firms of the City of Chicago. Is it of the lives of such men that the history of this city is composed?

The eldest member of the firm, was born in Germany, on the Rhine, educated at an institution at Ketznerheim, and did not come to Chicago until he was about twenty-one years of age. He then commenced business as a dry goods dealer, the firm which he still remains a member. He has the management of the carpet and upholstering departments in the great State Street store, having continued himself by years of patient toil for the partnership.

He was married in Chicago, in 1866, to Miss Pauline Schub, and has nine children.—Frank, the eldest, attending college at Grey Lock Institute, N. Y.; Milton, attending college at Kauene, Wis.; Ada, Sarah, Leonard, Aaron, Maude, Eugene and Bella.

Leon Manuel was born in Germany, on the Rhine, in 1853. He attended the public schools in this city, and after closing his studies entered the employment of Messrs. Ross & Foster, of the well-known dry goods dealers, as a common boy, and soon became a favorite, nearly always accompanying Mr. Ross to his stock-farm in hunting excursions. After considerable experience as a clerk in this establishment, he formed a co-partnership with Simon and Emanuel, and located, on the corner of Clark and Monroe streets. After a time, both he and his brother Simon withdrew, and they associated together, forming the firm which is still known as Manuel Bros. He is considered the resident expert in furs and furs, and has a branch establishment there. He was married in Philadelphia, in 1869, to Miss Belle Foreman and has seven children.—Frederick, the eldest, now in college at Frankfort-on-the-Main, Germany; Robert, Fannie, Ida, Blaine, Lulu and Florence.

Emanuel Manuel was born in 1843, on the Rhine, in Germany, and came direct to Chicago with his mother and brother, arriving here when about seven years of age. He attended school until he was thirteen years old, when he began his business career as errand boy with John Smith, at that time a prominent hatter. He left this position and accepted one as bundle boy in a dry goods and Four store, and was soon promoted to a clerk, and after faithful service was taken in as partner in the establishment located on Clark Street, owned by Simon Klein, commenced in the dry goods business for himself, and, in due course of time, took over his old store and merged the business in the one now known as the firm of Klein & Manuel, located on the corner of Clark and Monroe streets. After a time, both he and his brother Simon withdrew, and they associated together, forming the firm which is still known as Manuel Bros. He is considered the resident expert in the management of the fine dry goods departments of the store in New York City, and has control of their branch establishment there. He was married in Philadelphia, in 1869, to Miss Belle Foreman and has seven children.—Frederick, the eldest, now in
MANUFACTURES AND TRADE.

rapidly developed. In 1873, he established a store of his own at the mining town of Braidwood, Ill., and, later, another at Wilmington, Ill., even in this period of his business managed so capably as to win from Marshall Field the title of the "boy merchant." At the expiration of about seven years, Mr. Tuohy decided to dispose of his property in the rural districts and return to his father's business. Subsequently he purchased the store of Mr. Ehrich, and his son, also a household name and engaged in the grandest business of the city, being quite a contrast to the majority of families in our land in point of numbers. He and his aged wife still live in New York City, and enjoy the pleasant reflection of a well-spent life.

In 1874, the firm of J. W. Tuohy & Co., of which Mr. Tuohy is the principal partner, the "Company" being made up of heads of departments to whom a conditional interest is given. Their store occupies the building Nos. 1060 to North Clark Street, and has become, under the splendid administration of the "boy merchant," a first-class dry goods house of exceeding popularity, ranking among citizens of the North Side, in this respect, with that of Marshall Field & Co., on the South Side. The store is one of the largest and grandest in the city, well stocked with seasonable merchandise, employs about sixty persons in its various departments, and in its marvelous success fully realizes the expectations of its proprietors. In his career as a dry goods merchant Mr. Tuohy has been the leader of a careful business man by his close attention to the details of his establishment, by his talent as a purchaser of popular fabrics, and by his unyielding for his store, for which he is well known, it possesses. On April 26, 1886, this firm opened the West Chicago Dry Goods House, at the corner of Madison and Wook streets, in an elegant new building especially designed and erected for the purpose. Mr. (formerly known as "Jim") Tuohy was married to Miss Nellie Cavanaugh, at Ottawa, Ill.; they have three children—Mettie, Josie and Walter Grant, an infant. Mrs. Tuohy is an accomplished lady, and with her bright mind and singularly keen notions of business, she lent invaluable aid to the then "boy merchant" who now stands with the leading business men of the Northwest.

Benjamin F. Dare, manager of the dry goods department of Chalmers & Co., has been in the dry goods business for the past twenty years. He was born at Bridgetown, N. J., on June 21, 1834, and is a graduate of the Classical Institute at Hackensack, N. J. At the close of his secondary course, he was associated with the Phoenix Iron Company, of which his father was manager, and remained with them four years. Following that, he engaged in the dry goods trade in Chicago, and spent some years in the same business at St. Louis, Chattanooga, Tenn., and Harrisburg, Penn. He entered the house of Carson, Pirie & Co., here, in 1883, and when they purchased the establishment of Charles A. Gossage & Co., was transferred to the position of manager. He entered the army in the Jersey Infantry in the early part of 1861, and was one of the participants in the battle of Manassas. Mr. Dare is Past Chancellor of St. Louis Excelsior Lodge, No. 19, Knights of Pythias, at St. Louis. He was married at Chattanooga, Tenn., in 1872, to Miss Ella Jones, daughter of Abel Jones, of Chicago.

Morgenthau, Bauland & Co. — The Bee Hive, the well-known dry goods establishment, was opened in 1855, and the organizers were the Morgenthau Brothers and Bauland Brothers, comprising an association of merchants who, by the combination of their energies and capital, have made their enterprise what its name indicates—a hive where the inhabitants manufacture commercial honey for the customers who attend there. This establishment is located in the business center of the city, at Nos. 172-76 State Street, opposite the Palmer House, and occupies the two double stores from basement to roof, and contains nearly everything pertaining to the hive of business that could be expected to be found in such an establishment, and they have also demonstrated the fact that an institution such as they have built up can be successful.

Maximilian Morgenthau, the senior member of the firm of Morgenthau, Bauland & Co., was born at Mannheim, Germany, in 1847. He came of his native state at the age of six years, and was educated in the schools of the city. He engaged in the wholesale and retail dry goods business with his father and brother in this city, and has remained with them until he came to Chicago in 1870, when he opened his store at 376-378 State Street, which has since successfully operated the Bee Hive. He is an active business man, giving close attention to business, and at the head of an establishment that has been, under a household word. Mr. Morgenthau, the father of the two brothers by that name com-

DRIY GOODS COMMISSION.

KINSBLY & HOLMAN have inaugurated a new enterprise that is the pioneer of its peculiar line in the West. On May 1, 1885, they opened, at Nos. 75-77 Randolph Street, a vast sample room, in which they carry samples and samples only, of nearly different manufacturing houses and importers in the East. It is the largest sample room in the country—so by 160 feet in size, and they carry at this room the largest sample stock ever exhibited. The building is valued at $80,000, representing a stock in the East valued at about $2,000,000, consisting of fancy goods, art goods, toys, frames, brackets, stands, china, glassware, cutlery, show cases, musical instruments, holiday goods, lamps, looking-glasses, cahps, glassware, clock cases, papier maché, china, toys, art objects, books, jewelry, shoes, perfumery, etc. They are representatives of Eastern importers and manufacturers, and, from its inception, this new enterprise has been wonderfully successful. Representing in their samples full lines from the best of the manufacturers through those who do the leading business in their respective lines, in America, they have the greatest opportunity for saving to the retail buyer a large cost, for the reason that the country merchant is not obliged to go to New York to secure his bargains, but by coming to Chi-
HISTORY OF CHICAGO.

Cago he can purchase his goods from samples, and also save a large percentage in freight, as the goods sold by Kinsman & Hol- 
mans are shipped direct to the buyer. Their arrangements are such that a position located in the largest dry goods house in the city, the buyer a trip to Eastern markets, save a large cost in freight, and fill orders quicker than sending to the East or buying of the road merchants. They have a large space in New York, where buyers attend to their orders and make prompt shipments to their customers. The firm employs ten assistants in their large warroom, and the business has already made for itself a solid foundation for future success.

Charles Kinsman was born in Concord, Mass., on October 17, 1854. In 1859, his family removed to Chelsea, and it was there that Mr. Kinsman was reared and educated, attending the public schools for seven years of age. He then went to New York, and secured a position in the fancy goods house of Horace Partridge & Co. From an errand boy, Mr. Kinsman, by earnest and faithful work, progressed to a stock position in that concern, and took charge of their entire Western business until 1882, when he with- 
drew and formed a copartnership with E. J. Lehman, under the firm name of Lehman & Kinsman. "The Fair" is one of the institutions of Chicago, and its great success and popularity was due in a great measure to the untiring energy of Mr. Kinsman, who was the active manager of the inside business. In May, 1885, he conceived the idea of establishing a house in this city that should be the representative of large Eastern concerns, and in company with Mr. Holman opened up the present business.

Strange A. Holman, of the commission house of Kinsman & Holman, was taken by birth, and was born in 1852. He was reared in the West and educated in the schools of his native state, finishing his studies by taking a course in college for one year. In 1871, he came to Chicago and secured a position with the old house of Cul- va & Co. After two years' association with this concern, he was offered a more advantageous position with a New York blank- 
book house, and he accepted, serving them for three or four years. When the firm of Horace Partridge & Co. decided to open a store in this city, Mr. Holman was secured to take charge of affairs and establish their branch. He opened the "Boston Store," and re- 
mained in charge of that well-known emporium until he formed a partnership with Mr. John N. Turner, of the present house of Kinsman & Holman. Mr. Holman was married, on De- 
ember 14, 1882, at Newark, Ohio, to Miss Mabel Dean.

Laurin Hilliard Turner, member of the firm of Turner Bros. & Co., is one of the oldest dry goods stores in Chicago. Mr. Turner was born in Chicago on September 26, 1845. His parents came from Philadelphia and settled in this city in 1835; his father engaged in the lake marine of about seventeen years, afterward enter- 
ing the lumber business, and subsequently retiring to agricultural 

pursuits in Kane County. Captain John M. Turner was widely known for his active interest in municipal affairs and earnest efforts for the city's welfare. He was the first marshal of the fire depart- 
ment, and to him is credited the laying of the first water-pipe used in this city. Young Laurin attended the public schools, and, after being fitted for business life, assisted his father until 1859, when he entered the employ of Thomas Kohn, with whom he remained one year. In 1870, he was engaged in the lumber business at Omaha, Neb. Disposing of his business in Omaha, he returned in this city and associated himself with his brother, Edward H. Turner, and in 1875 they purchased the lumber house and entered the dry goods trade at No. 242 Monroe Street, under the firm name of Turner Bros. Co. In 1873, they moved to No. 245 of the same street, and, on November 1, 1855, removed to the Mc- 
Cormick building, corner of Market and Jackson streets, their present commodious quarters. Mr. Turner was married, on Octo- 
ber 14, 1873, to Miss Mary Duffyfield, of Chicago. They have two children, Laurin H., and Marie Adelaide.

Jeffrey & Co. — This house was organized in 1836, in New 
York City, the firm being at the time R. J. Jeffrey & Sons, and continued for some time under that name, and was then changed to Jaffe & Co., and later to Jaffe & Co., in 1845. Jaffe & Co. was one of the most important in the dry goods interests in the United States, and the house proper is located at No. 350 Broadway, New 
York City, and has branches at N.Y. St. Mildred's Court, London; No. 54 Union Street, Glasgow, Scotland; Broadway, N.Y.; England; No. 116 Portland Street, Manchester, England; No. 5 
Kne Martel, Paris; No. 12 Bedford Street, Boston: No. 1002 Mar- 
ket Place, Pittsburg, Pa.; No. 48 West Baltimore Street, Balti- more; No. 719 Market Street, Washington; No. 644 Washington 
Avenue, St. Louis; Nos. 144 and 146 Madison Street, Chicago. 

The trade of this house is scattered all over the world, and their Chicago establishment, under the management of Mr. Jaffe 
has an extensive reputation throughout the West as a thoroughly reliable institution, having for years been prominently before the mercantile community in the dry goods line.

Morley F. Forster, manager of S. Jaffrey & Sons' branch 

house in this city, is a native of Durham, England, where he was born on September 9, 1832. He came to America in 1854 and 
located in Chicago, where he engaged in the dry goods business. When the War broke out he became a member of the 20th Infantry, and on was transferred to the 10th Regular Infantry. He was through the seven-day fight, under McCollum, the siege of Yorktown, and participated in all the battles with his regiment. He entered the army as a private and was mustered out at the close of the Rebellion as a colonel. He then entered the employ of E. S. Jaffrey & Co., with whom he has since remained. He was married, in Chicago, in 1856, and has two children,—Jennie and Minnie.

JAMES W. FAY was born at Auburn, N. Y., on July 30, 1823, 
where he lived and attended the various schools, and graduated at the age of eighteen. He opened in the spring of 1841, a dry goods store in this city, which he conducted as a clerk, work- 
ing his way up to a position of importance enough to the house that he was selected as their Chicago agent, coming here in 1854 and 
opening an office at No. 145 Fifth Avenue. In 1875, the immense increase in business obliged him to remove to the present location, No. 225 Monroe Street. Gardner & Co. are the largest manu-

facturers of cotton goods and prints in the country. Their largest trade West is in this city, St. Louis, and the Northwest, and from St. Paul to New Orleans. The business of the house has become enormous, their sales for the past year amounting to $1,500,000, with prices of goods averaging only five cents a yard. Mr. Crut- 
enden married Miss Susie R. Smith, of Brooklyn, N. Y., in 1871, and resides at Kennecott, N. Y.

WHOLESALE CLOTHING.

Prior to 1851, only a small retail trade in clothing was done in this city. The pioneer among the whole-
sale clothing merchants was probably Henry A. Hunt-
lington (afterwards of the firm of Huntington, Wads- 
worth & Parks), who opened a store on Water Street in November, 1831, in which he conducted a jobbing store, but the stock, but which speedily disappeared, and the firm's sales for the first year reached nearly $150,000. The opening of railroads, whose construction created a demand for all kinds of supplies, soon induced other enter-
ing capitalists to invest money in this line of trade, and within eight years the volume of trade exceeded $8,000,000 annually. In 1864, the number of firms had been very largely increased, and the sales for the year were estimated at $12,000,000, three wholesale houses alone reporting sales aggregating more than $4,000,000.

Among the leading houses in the trade at the close of the year were King, Kellogg & Co., Tuttle, Thomp-
sen & Co., A. Pierce, Foreman Brothers, B. L. Ferguson 
Young Bros. & Co., and Kub & Leopold.

For many years after the War the trade remained almost in status quo, a position of note, however, that several new firms embarked in business during 1873, despite financial depression. The sales for 1874 did not exceed $1,000,000, and this was an advance
of from twenty to twenty-five per cent. over those of the year of the panic (1873), the increase being chiefly confined to the country trade. The capital invested in the business at that time was probably about $5,000,000, including that employed in manufacturing. Nearly all the clothing then sold here was of Eastern make, about eight times as many goods being manufactured here in 1874 as in 1870. The largest manufacture of ready-made clothing then existing in the United States was located in this city. The special feature of the year's business was the extension of trade with the South and West. A manifest preference for Chicago-made clothing was noticeable among buyers; this may be, perhaps, attributable to the fact that the manufacturers of this city kept in mind two fundamental considerations—the climate and the wants and needs of the prospective wearer, while Eastern factories, as a rule, adopted one style for both North and South, giving satisfaction to neither. At the beginning of the year 1875, Chicago stood at the head of the list of cities supplying ready-made clothing to the trade; not even New York being excelled.

The year 1876 was not a prosperous one for Chicago clothing merchants. While the volume of business for the first six months exceeded that for the corresponding period of 1875, the total sales for the year fell short of $11,000,000 as against $12,000,000 in 1875,—a falling off of about one-twelfth. This may probably be traced to the influence of the Centennial Exposition, which attracted to the sea-board Western buyers, who embraced the opportunity to replenish their stock from Eastern dealers, who offered extraordinary inducements both as to prices and credits. No failures were reported, however, during the year, and the general condition of the trade was sound. It should be remarked further, that, at that time, Chicago dealers, with but one exception, sold only Chicago-made goods, which appeared to suit the Southern and Western trade better than those of Eastern make; it was claimed, at the same time, that goods of this description could be manufactured here cheaper than in the East. The capital invested (including that of manufacturers) did not greatly vary from $5,000,000. At the end of three years, it had increased to $6,000,000. No failures occurred in 1879, nor were any new firms of prominence added to the list of those engaged in business. Wages had increased, however, as well as the cost of material, and profits were proportionately diminished. The trade, on the whole, however, was fairly prosperous.

To follow its advance, step by step, would consume more space than, in a work of this character, can be devoted to the subject. It is interesting, however, to note the condition of the trade at the close of the year 1885. Chicago had then become the recognized center of the American clothing interest as regards both manufacturers and their distribution. The amount of capital had increased to $7,000,000; the number of firms at the close of the year was about the same as at the beginning, some having dropped out and their places having been filled by others. The total sales reported during 1885 aggregated about $20,000,000, an advance of nearly ten per cent over those of the previous year. The only specially noteworthy feature of the year's business was the contrast between its first and last portions. During the first six months, prices fell off nearly ten per cent, while for the same period there was a marked diminution in the volume of business transacted; the latter half of the year, however, saw a largely increased demand and a correspondingly large advance in prices, and the period closed with every promising prospect for the future.

The following table, compiled from the U. S. Census Reports for 1860—70—80, shows the growth of the clothing manufacturing interest in Chicago during twenty years:

<table>

HENRY W. KING & CO.—This house was established in 1854, under the firm name of Barrett, King & Co. at No. 189 South Water Street. In 1857, a removal was made to Nos. 205—207 South Water, and three years later to Nos. 25—27 Lake Street. In 1863, Mr. Barrett retired from the firm, which then became King, Kellogg & Co., composed of Henry W. King, Charles P. and Palmer V. Kellogg. In 1865, this firm dissolved, the Kelloggs continuing in business at the old location, while Mr. King, in company with W. W. Browning and Edward W. Dewey of Newark, New Jersey, in 1865, formed a new firm under the name and style of Henry W. King & Co., and started in business at the corner of Michigan Avenue and Lake Street. This was the last change in the personnel of the present house, its proprietors being the same as in 1858, when the present building was first occupied. At the time of the great fire, the house of Henry W. King & Co. was, of course, burned out, sustaining a total loss of $500,000. Mr. King tells, and with evident pleasure, that they succeeded in saving $100,000 worth of goods in the building, brought to the thoughtful courtesy of Wirt Dexter, the attorney for the Michigan Central Railroad. Mr. Dexter placed a train of freight cars at the disposal, into which the goods were loaded as fast as they could be conveyed from the store to the depot. More valuable goods were saved, had not the depot building taken fire, compelling the engineer in charge of the train to hastily pull out for safer quarters. The goods were taken to Michigan City, and there stored for two weeks, at the end of which time, the firm having secured quarters, temporarily, at the corner of Canal and West Washington streets, they were re-shipped to this city. Owing to their good fortune in saving this portion of their stock, and to the fact that they then, as now, had a large manufacturing in the East, the firm, within two weeks after the fire, were again doing business as though no fire had occurred. In 1872, a removal was made to the Farrell Block, on Market Street, and three years later to their present quarters, at the corner of Franklin and Madison streets. Within the past few years this house has established, in addition to its wholesale business, retail stores in Cincinnati, St. Louis and Milwaukee, as well as Montreal; these, in combination with the settings of the original house in this city, do an annual business of over $4,000,000. In 1884, their total sales did not exceed $8,500,000. Comment on the growth of their trade is superfluous.

Henry William King was born on December 15, 1828, at Martinsburg, Lewis Co., W. Va., and was educated in the public schools of his native place. After completing his studies he was employed in several stores in Martinsburg until 1848, when he came to Chicago and began business. In addition to the labor of his extensive business, Mr. King has led a very active life in working for the good of Chicago's distressed inhabitants. In the years 1850, 1851, 1852 and 1873, he was president of the Chicago Relief and Aid Society, and during that period the Society disbursed the $5,000,000, given as the world's bounty for the relief of the sufferers from the great fire of 1871. His dealings with this large amount were conducted with so much fidelity and ability, that the Society became a model for similar organizations in all parts of the world. Since 1873, Mr. King has been treasurer of the same Society. He is vice-president of the Chicago Orphan Nursery and Home, and was one of the founders of the Old People's Home. He is a member of the Fourth Presbyterian Church, and gives much time and attention to the local work of that society as well as to its interests in other channels. Mr. King was married, in 1852, to Miss Amelia Case, of Chicago. They have four children, two sons and two daughters.

Clement, Bane & Co.—In February, 1867, H. C. Clement, Charles H. Morton, James C. Clement, Edward P. Phelps, Oscar F. Bane, and Samuel A. Seiber, associated themselves under the firm name of Clement, Morton & Co., and began the wholesale clothing trade at Nos. 27—29 Randolph Street. They remained at this location, enjoying a constantly increasing trade, until 1871, when the fire burned them out, destroying their stock valued
at over $200,000, and left them, with hundreds of other Chicago merchants, to begin in business again from the bottom. They resumed the same old race against time, and both companies remained on the Lake Front, where they remained until the fall of 1872, when they removed to the southeast corner of State and Madison streets. There they continued for three years, when a change was made for the purpose of being better located in the West Adams Annex of Walshaw Avenue and Madison Street, in the Rutter Building. In January, 1878, the house was reorganized under its present firm name of Clement, Bane & Co., the members of which were H. C. Clement, G. L. B. Bane, and H. C. Clement & Sons, of Rutland, Vt. At the same time they removed to their present location, at the northwest corner of Adams and Franklin streets. In 1881, when Clement, Morton & Co. removed to Crawford and Lake, Bane & Co., remaining manufacturers, and continuing, after they at first employed only one cutter; now they employ fifty men in this department of their factory, besides four large cutting machines, each of which can do the work of ten men. They also furnish employment, the year through, to an average of two thousand persons.

H. C. Clement was born at Bridgewater, Vt., on March 6, 1835. His early life was spent in the store of his father, Ebenezer Clement, at Hydeville, Vt. In 1858, he went to Chicago, III., where he engaged in the general merchandising business. In 1861, he organized the First National Bank of that place, and served as cashier at the time of organizing his other business. In 1865, he sold out his business interests at Charleston and came to Chicago. He married Miss Minna Bliss, daughter of Ephraim Bliss, of Hydeville. She died in Chicago in 1871, leaving one daughter, V. C. Clement, of New York City. His wife was Miss Fannie Crocker, daughter of Elisha Crocker, of Boston, Mass.

Oscar F. Bane was born in Washington County, Penn., on September 11, 1842. His parents were William C. Bane and Miss Maria Treece, who removed with the family to the West a short time after their marriage and settled in Charleston, Ill. At the breaking out of the Civil War in 1861, Mr. Bane, then only nineteen years of age, enlisted in the 8th Illinois Infantry, and was transferred to the 2nd Infantry. In 1862, he was made second lieutenant of his company, and, after being promoted to the rank of captain in the spring of 1864, he was detailed as assistant adjutant-general of the 2nd Illinois Cavalry Brigade, in which capacity he remained until the close of the war. Returning home, he remained for one year in Charleston, and in the fall of 1866 came to Chicago, forming, in February, 1867, his present connection with the old house of Clement, Morton & Co. Upon the reorganization of the house in 1873, he became a member of the new firm, and has ever since continued to the present time.

Mr. Bane was married, in October, 1866, to Miss Ella M. Clement, daughter of James C. Clement, of Charleston, Ill. She died in Chicago, on February 26, 1873. In May, 1874, Mr. Bane was again married to Mary A. Crocker, daughter of Elisha Crocker, of Boston, Mass.

Charles R. Kuppenheimer & Co. are one of the oldest houses in Chicago in their line, as manufacturers and wholesale dealers in clothing. This house was originally established here in 1852, by Palmer & Kellogg and H. H. Hanlinton, under the style of Palmer, Kellogg & Co., at Nos. 150 and 152 South Water Street. In 1854, the firm, by changes, became Barrett, King & Co., and removed to Nos. 205-207 South Water Street, where they remained until 1859; then they removed to Nos. 25-27 Lake Street, where they remained until 1865, when they transferred the firm name to the present location, in which capacity they have remained ever since, though, and without any change in the name of the firm, remained at that location until the fire of October, 1871, when they were burned out, suffering losses amounting to $200,000. On the first of December following, they resumed business on the Lake Front, and in July, 1872, removed to the corner of Randolph Street and Wabash Avenue. The firm remained there until the fall of 1876, when it was dissolved, Mr. Kuppenheimer forming the firm of B. Kuppenheimer & Co., composed of himself, Samuel Kellogg, and two brothers, members of the old house also reorganized, forming the firm of B. & D. Kuppenheimer & Co. As this firm, on the death of Mr. H. A. Kuppenheimer, in 1882, was followed by Messrs. Kohn, Clayburgh & Einstein. This firm first opened at No. 27 Lake Street. Two years later, Mr. Kohn retired, and B. Kuppenheimer and David Lindauer became partners, and, without any change in the name of the firm, remained at that location until the death of Mr. Louis B. Kuppenheimer, in 1887, when the firm was again reorganized, forming the firm of B. Kuppenheimer & Co., composed of himself, Samuel Kellogg, and two brothers, members of the old house also reorganized, forming the firm of D. Kuppenheimer & Co., and started in business at Nos. 79-81 Wabash Avenue, and stayed there until, in January, 1886, it removed to Nos. 204-206 Madison Street. At that time Louis B. Kuppenheimer, a second son of the senior member of the firm, was admitted as a partner. The house of B. Kuppenheimer & Co. has from its founding enjoyed a successfully growing trade, its sales amounting to nearly $1,000,000 annually. B. Kuppenheimer was born in Baden, Germany, in 1829. At the age of eighteen he went to the United States, and came to Chicago, settled in Lichtenau, Germany, as a clerk for three years, and then to Chicago, and in April, 1853, at the age of twenty-four, he formed a partnership with his cousin, J. W. Kohn, in Chicago, Ill., and engaged in peddling goods and notions. In the fall of 1852, he went to Terre Haute, Ind., and opened a retail clothing store, he remaining at this occupation until 1866, when he came to Chicago, and became a member of the firm of Clayburgh, Einstein & Co. Mr. Kuppenheimer married Augusta Rosenfeld, daughter of F. Rosenfeld, of Württemberg, Germany. They have three children. — Louis, a member of the above firm; Emma, now wife of Aaron Stern, of New York; Louis, also in business with his father; and Philip and Albert.
continued by Mr. Grosse and his brother John Grosse until May, 1831, his brother then retiring. Henry Wieland succeeded to a partnership in the firm and the business of the firm since that time being conducted by the two brothers. Mr. Grosse is well and favorably known to the public, and he is recognized by the trade as a thorough business man.

Henry L. Hatch, manager of the Golden Eagle Clothing Company, in the business for about thirty-three years. He is a son of Albert G. Hatch and Harriet (Lemmem) Hatch, the latter a native of Denerman, South America, and grandson of Major Reuben Hatch, an early pioneer on the West Coast, which was explored by his grandfather. He entered the importing business in New York City, where he remained three years. In 1834, he came to Chicago, and became associated with the firm of H. H. Husted & Co., with which he is identified to this day. He then started in the clothing business alone, under the firm name of Hatch & Co., which he continued until 1874, when he closed his business to accept the position he now occupies. He was married at Penn Yan, N. Y., on October 15, 1839, to Miss Helen Kate Derry, daughter of John I. Derry, a former merchant of New York City, and has had six children.—Margaret, Hattie, Daisy, Kittie, Henry L., Jr., and Helen, of whom the latter are living. Mr. Hatch has been a member of the Emmanuel Lodge of Odd Fellows, which is a charter member of the Grand Lodge of the State of Illinois, and is also a charter member of Home Lodge, No. 503, A.F. & A.M.; and was one of the moving spirits of the old Chicago Light Guards. Mr. Hatch is a well-known member of the Reformed Episcopal Church for many years, and is a public spirited gentleman who has done much toward the advancement of the city.

Remick & Newell.—This firm is composed of W. C. Remick and L. C. Newell, and is the successor of the old established house of E. W. Holbrook & Co., known in the trade as carrying in this city the first stock of stockers' linings, which are now so extensively used in vest-linings and coat-sleeves. The firm do a large business with wholesalers and manufacturers in Chicago and Milwaukee. The house was organized in 1853, and has been very fortunate in obtaining the agency for the Gilbert Manufacturing Company of New York, cotton goods, and for the house of Hall, Newell & Co., diamond-pointed and fancy slvwe Goods. L. C. Newell, member of the firm of Remick & Newell, at No. 155 Fifth Avenue, was born in Framingham, Mass., on August 15, 1856. After attending various schools, he was graduated in 1872 at St. Mark's School in Southborough, Mass. Soon after, he came to Chicago, where for several years he was engaged in a subordinate capacity in the old established house of E. W. Holbrook & Co. He has been employed by the firm as salesman until 1873, when the company of Holbrook & Co. was dissolved, being succeeded by the present house of Remick & Newell, with the subject of this sketch as the junior partner.

Holbrook & Co.—This house was established as early as 1852, in Hartford, Conn., by Joseph W. Griswold; four years later he removed to Milwaukee, where for five years he enjoyed a steady increasing trade. In 1863, he decided to remove to this city and in the same year he located his establishment at No. 50 Lake Street. At the same time his brother, Edward P. Griswold, who had previously been in his employ as a clerk, was admitted as a partner, the firm then changing to its present form. A few years later he removed to No. 51 Wabash Avenue, where they were located at the time of the fire, in which their losses aggregated $30,000. Immediately following that catastrophe, they resumed business on the Lake Front, where they stayed until the premises at No. 254 Madison Street were re-built, and into which they removed early in 1872. In 1879, a change was again made to their present quarters, at Nos. 24-46 Monroe Street. Through a long career, the house of J. W. Griswold & Co. has always paid an hundred per cent on the dollar, and to-day is doing a larger business than it has at any other time before in its history. In 1853, their sales did not exceed $100,000, while now they amount to over $500,000, per annum, and still they are increasing.

J. W. Griswold, the founder of this house and its senior member, was born near Wethersfield, Conn., on August 24, 1831, his parents being Thomas Griswold and Jerusha (Wells) Griswold. In his earlier days the elder Griswold followed the calling of a farmer, but later became a wholesale dealer in seeds in the town of Wethersfield. The son was reared mainly on the farm, but as he grew older removed to the city, working as a clerk and as a sales clerk. In 1852 he started in business on his own account and founded the house of which he has since been the head. Mr. Griswold was married, on August 21, 1857, to Miss Mary Chapman, daughter of Charles Chapman, a well-known furrier. They have five children,—Charles, Kittie, Kittie, Cora, and Alice. Edward P. Griswold was also born near Wethersfield, Conn., on August 6, 1838, and passed his boyhood's days on the farm and in school. In 1860, he came West and entered the employ of his brother in the wholesale dry goods business. In 1869 he was admitted as a partner, and has since retained his connection with the house. Mr. Griswold was married, on June 9, 1864, to Miss Mary Browning, daughter of Thomas Browning, of Kalamazoo, Mich. They have the four children,—Edward Browning, Mary Maud, Grace G. and Harold G.

Louis Stein & Co. are wholesale dealers in hats, caps, gloves and umbrellas at Nos. 200 and 202 Madison Street. The firm was organized in the latter part of 1872, and, while the elder Mr. Stein was a saw firm, is already ranked among the largest of its class in the city. Mr. Stein is the happy possessor of the three essential requisites to commercial success: first, a knowledge of the market; second, a spirit of thoroughness; third, an iron will. In 1856, his brother, Marcus Stein, established a house dealing in the same line of merchandise at Milwaukee, where, in 1871, L. Stein joined him. In 1875, the senior of the Milwaukee house retired, L. Stein, met the demands of business, and his place in the firm was taken by Charles Stein, the style then being changed to Charles Stein & Co., and so continued until December, 1879, when Louis Stein came to Chicago.

Louis Stein was born near Neisse, in the Krosen Prussia, Germany, on October 24, 1841. He received a portion of his education at his native place, until his father died. His mother came to this country with her children in 1845, settling first in Philadelphia and afterwards moving to Detroit, where they remained three years. In 1858, he went to school in a log-school house until 1858; he then began his business career as clerk and student of chemistry, in the retail drugstore of K. & L. Jackson, in Detroit, where he was then known as Mr. Stein. In 1861, he joined his two brothers, and started a general store there, under the name of Stein Bros. There he continued until 1871, when he sold out his interest, and went to Milwaukee, where he continued the wholesale business, and attracted a great amount of business. In 1879, he came to Chicago, and established himself at Nos. 200 and 202 Madison Street. Mr. Stein married, in January, 1875, Miss Gertrude L. Moss, of New York City. They have two children,—Lawrence D. and Elizabeth.
education. He remained at home until 1852, when he came to this city. Mr. Hart married Hannah Rosenheim, daughter of Isaac Rosenheim, of Württemberg, Germany; they have three children—Bertha, wife of Jacob Levi, of Chicago; Harry R. and Milton R.

Linderer Bros. & Co.—This firm was founded in 1867, by Abraham Linderer, who adopted the name of Kohrbach, Linderer & Co., commencing business at No. 25 Lake Street. Two years later, Mr. Kohrbach disposed of his interest in the firm to Messrs. Benjamin Linderer, Elias M. Rosenheim, and Levi C. Linderer, and the firm name was changed to Linderer, Levi & Co., and M. E. Linderer was admitted as a partner. In 1879, a removal was made to No. 21 Lake Street, where business was carried on until October, 1871, when the entire stock was consumed by fire. The total loss and insurance paid amounted to $125,000, of which amount they received $30,000 through policies of insurance. After the fire, the business was resumed at the residence of M. E. Linderer, at No. 1570 Waldorf Avenue, where a cutting table, and improvements from the store, and an oval shed, supported on trellises, in order that employment might be at once furnished to their work-people. After a few weeks, they opened temporary quarters on Lake Front, and in July, 1873, removed to the premises Nos. 55-57 Winthrop Avenue. Ten years later (1882) they established themselves at their present location, Nos. 155-157 Monroe Street. In 1872, the Linderer Brothers became sole proprietors, when M. E. Levi when he became involved with the fire. The firm was again changed to Linderer Bros. & Co. In 1874, Seligman Linderer, another brother, became a partner, and in 1881 E. M. Rosenblatt retired, his son, Aaron, succeeding to his interest in the house. The present incorporation of the firm is: M. E., Abram, and Benjamin Linderer, and Aaron Rosenblatt. In their manufacturing department, which was begun in a small way in 1867, Linderer Bros. & Co. employ over four hundred people, and rank as one of the largest establishments in the West.

Benjamin Linderer was born at Jenahausen, in the kingdom of Württemberg, Germany, in 1839, his parents, Judas and Miriam (Kohrbach) Linderer, having also been natives of the same place. When about sixteen years old he learned the trade of a weaver, and subsequently attended the Academy of Weaving at Reutlingen, Württemberg, for one year, when he assumed charge of the cotton and woolen manufacture of his uncle, L. and R. Kohrbach, of Jenahausen. He came to Chicago in 1859, and for three months engaged in peddling goods between this city and Joliet. He next entered the employ of J. W. Anderson, then in the retail dry goods and notions business on West Washington Street, and at his sale purchased a stock of goods in that line, and opened a store in 1860, and remained in business until 1864, when he was compelled to make a change in his business. In 1866, he returned to Chicago, and in the following year, as has already been said, assisted in founding the house of which he is to-day the head. Mr. Linderer married Hen- rieh, daughter of Israel, and granddaughter of David, and of the Rabiners, of Jenahausen, in Saxe-Weimar. They have six children,—Kosa, Lotta, B., Julius B., Lillie, Miriam, and Arthur.

48. RUBBER BROTHERS, haters and men's furnishes, have their hats and heads in the manufacture of the city, the haters, leaping in the Chicago market, and No. 100 West Madison streets. This firm is composed of Philip and Adam Paul Kastler. They established their business in the city in 1857, at No. 1265 North Clark Street, where the fire of that fall swept away, involving a large part of the building. The firm was reorganized at Nos. 258 South Halsted Street, under the style of Kastler & Jones, Adam P. Kastler being unable to engage in active business at the time on account of poor health. The Halsted-street house continued business under the above name until 1864, when Philip Kastler withdrew, and formed a co-partnership with John Ligingert, under the firm name of Kastler & Ligingert, and engaged in the manufacture of caps, their business being located on Fifth Avenue. After a successful business of about one year the firm was dissolved. In August, 1875, the brothers again formed a co-partnership, and resumed their former business at the corner of Blue Island Avenue and Twentieth Street, on the same honorable terms of methods and commendable enterprise their business since that time has steadily increased, until they are considered one of the prominent firms in the city. In this business the stores which they now operate, carry a stock of merchandise valued at $30,000, and their annual business is over $60,000.

Philip Kastler was born in 1817, his education was received at the public schools prior to his thirtieth year. At that age he entered Potter Palmer's dry goods establishment as a book boy, and there continued nine years, gradually working himself up to positions of confidence and trust. In 1859, he identified himself with the firm of Ligingert & Kastler, furnishing goods trade as a salesman, and in 1861, in partnership with his brother, embarked in the same busi- ness. He is a member of Herder Lodge, No. 669, A. F. & A. M.; Wiley M. Egan Chapter, No. 129, R. A. M.; and Chicago Commandery, No. 9, K.T. He was married to Miss Catherine Fiehler in 1858. They have had five children.

Adam P. Kastler was born on May 5, 1849, and in most respects followed in the footsteps of his brother Philip. At the age of thirteen he entered Potter Palmer's dry goods establishment as a cash boy, and, after becoming conversant with the business, and reaching a more mature age, he was engaged by different concern in the same line as a salesman. In 1859, he entered his present line of trade, and in 1871 engaged in business with his brother. In 1853, he had for the most part regained his health, and, in connection with Mr. Kline, went into the grocery business under the style of Kine & Co. This partnership lasted about a year, when a change was made, with Mr. Kastler operating alone under the name of P. H. Kastler, Ill., where he opened a hat, cap and furnishing goods house. There he remained until the summer of 1875, when he closed out his business, returned to Chicago, and the firm of Kastler Brothers was re-established. He was married in Chicago, March, 1859, to Miss Johanna Randolph. They have two children.

Scheider & Neuzet.—This firm are the successors to a house established shortly prior to the great fire of 1871. In November, 1870, Messrs. Kister & Scherder opened a wholesale and manufacturing establishment at No. 68 Randolph Street. In the following October they were burned out of everything, but within ten days after the conflagration the firm of Messrs. Scheider & Neuzet was once again in business, occupying a new stock of their own manufactured goods. They were located then at No. 177 Fry Street, on the West Side, but subsequently moved down town, being located at two different points prior to securing their present establishment, No. 59-65 Fifth Avenue, which they occupied for the past eight years. In 1878, Mr. Kister died, but the business was carried on in the name of Kister & Scherder until 1880. After retaining the interest of his husband. In 1860, she disposed of her share in the business to Mr. Scherder, who was with Marshall Field & Co. for many years, becoming a partner, and the firm became Scherder & Woodrich. They then opened a retail clothing house on the North Side, under the name of M. A. Sholbe & Co., the latter being represented by Messrs. Scherder & Woodrich. This they continued for two years, when the business was sold to Mr. Woodrich, and he withdrew from the firm. Mr. Neuzet, retaining his interest therein. The firm of Scherder & Neuzet rank among the most prosperous and representative houses in the city, their business embracing the manufacturing and wholesaling of shirts, pants, vests, over-all and knitted underwear,等., etc. They give employment to a force of fifty to sixty skilled operatives, both members having an extensive and valuable knowledge of the business, and their executive ability has been clearly evidenced in the successful conduct of their enterprise.

Frederick Scherder was born in Hanover, Germany, on March 5, 1841. He passed the first twenty-six years of his life in his native town, where he was educated in the common schools, and entered business life as a child. In 1867, he left Germany and came direct to Chicago, where he has since permanently resided. He secured a position with American & North Western Express Company, and remained in their employ until the fall of 1879, when he, in company with Mr. Neuzet, established the business of which he is now the head. Mr. Scherder is a sharp, shrewd, energetic business man, and has driven his enterprise to the success which it has attained. The fire of August, 1875, to Miss Charmaine Elfring, of Chicago. They have now four children,—Frida, William, Frederick, Jr., and Herbert. Mr. Scherder belongs to Apollo Lodge, No. 150, A. O. U. W. James M. Harms was born in the City of New York in 1840, and spent his boyhood days and received his education and busi-ness training in that city. He was engaged therein as a large furnishing goods house up to 1859, in which year he came to Chicago. He commenced business in 1870 at No. 22 Madison Street. The great fire of 1871 swept every thing he had away, involving a loss of over $10,000. Within a few days he opened a new house, and at present carries on his business in men's fine furnishing goods at No. 144 North Clark Street, corner of Ontario. His annual sales amount to over $15,000. He is a member of Kilwinning Lodge, No. 903, A. F. & A. M.

RUBBER GOODS.

E. B. Presten & Co.—This house was established by E. B. Presten, who came to Chicago in 1860, and opened a store, dealing in leather belting and leather goods. This house was a branch of an eastern concern, Mr. Presten being located here as its western representative. His first place of business was at 12 South Wabash Street, opposite the tunnel, where he remained until the October fire, in the latter part of which his individual losses were nearly $20,000. After the fire he again established himself in business at Nos. 35-39 South Canal Street.
George Preston was born at Northampton, Mass., in 1824, the eldest son of Henry D. and Sarah (Moore) Preston. In 1847, when the family moved to Chicago, he entered the employ of his father and brother, E. B. Preston, in the firm of E. B. Preston & Co., wholesale milliners and purveyors of millinery andahouse furnishings. In 1849, he was made a partner in the business, and in 1853, the firm was incorporated as E. B. Preston & Co., with an authorized capital of $100,000. The business was conducted at Nos. 137 to 143, Clark Street, a location which remained continuous until 1893, when the business was transferred to 153 Lake Street.

In 1851, Mr. Preston married Miss Minnie E. Parrish, daughter of H. H. Parrish, of Grand Rapids, Mich. They have had two children, Desi and Howard E. Four years later, in 1855, the business was incorporated as E. B. Preston & Co., with an authorized capital of $100,000. The business was conducted at Nos. 137 to 143, Clark Street, a location which remained continuous until 1893, when the business was transferred to 153 Lake Street.

In 1857, Mr. Preston married Miss Minnie E. Parrish, daughter of H. H. Parrish, of Grand Rapids, Mich. They have had two children, Desi and Howard E. Four years later, in 1855, the business was incorporated as E. B. Preston & Co., with an authorized capital of $100,000. The business was conducted at Nos. 137 to 143, Clark Street, a location which remained continuous until 1893, when the business was transferred to 153 Lake Street.

entered the Army, and remained in the service of his country until the close, entering as a private soldier and becoming a non-commis-
dioned officer, he was made a Knight of the Iron Cross, an honor
conferred upon him for meritorious conduct on the field of battle.
He left Germany in 1871, and came to Chicago, where he remained
for a year, looking about and having in view the selection of some
permanent business. He finally entered the service of D. F. Fisk
& Co. in 1872, and remained in their employ until he formed the
present partnership. Mr. Wittmeyer was married in Chicago, in
1876, to Miss Lilly Born, daughter of Ralph Born. They have
two children living,—Eugene and Ella.

**Jules Ballenberg**, importer of millinery, was born in 1850,
at Wheeling, Va. At an early age he removed to New York City
and was educated at the Kindskoph Institute. His mother being a widow with small means, he determined not to be a
burden upon her, so, when young, he went to Philadelphia to seek
means of support. He sold newspapers on routes of his own work-
ing a dollar a week, and a time found his way, and in a short time
in that city, where he remained until 1871, when he came to Chicago.
Upon his arrival here he began work as a traveller for Walsh &
Hutcheson, wholesale milliners, with whom he stayed until 1874,
when he entered the service of D. Webster & Co., and opened
and managed their retail millinery establishment at No. 109 State
Street. In 1875, having saved some capital, he opened a store at
No. 147 State Street, and his business succeeded so well that he
was compelled to move to larger premises at No. 135 State Street,
where he remained till March, 1885, when he took possession of
his present elegant and handsome store. Mr. Ballenberg employs
about forty operatives and pays in wages about $4,000 a month.
During the last four years he has visited, once each year, the best
markets of Europe, notably Paris and London, to select goods
suitable for the refined tastes of his numerous customers. Many
of his original designs are being reproduced and carried on the
market. Mr. Ballenberg is now quoted as the correct authority and leader in American-fashions.

**Mrs. A. M. Pfeifer**, dealer in fashionable millinery and hair
goods, was born at Württemberg, Germany, in 1840, and is the
daughter of John Chris and B. M. (Miller) Sailer. She was ed-
ucated at Stuttgart, and left Germany in 1856, and came to Galena,
III., residing there with her parents until 1862, when she came
to Chicago to learn the millinery business. After receiving two years'
training she began business on her own account, in 1864, at No. 77
North Clark Street, and was very successful. In the great fire of
1871, her goods being destroyed, she reopened her store in the
same place, and a short time after opened a store at the corner of
West Madison Street and Milwaukee Avenue, where she also was
successful, but again lost heavily through some injudicious specula-
tions. In 1881, she located at her present store, where she is doing
a large business. She married, in 1872, C. H. Pfeifer, and has one
daughter, Cecilia Maria Pfeifer. She is a member of the Presbyterian
Church. **TAILORS.**

**In the early days of Chicago, custom tailors were unknown.**

**William Dunlop** (1830–1885), merchant tailor, son of Hugh and
Elizabeth M. Dunlop, of Kilmarnock, Scotland, was born on
October 15, 1854. His father was a tailor before him, and was widely
known in Scotland as one of the most reliable of tailors. He was
in business for himself.

**Alexander Dunlop**, merchant tailor, son of Hugh and
Elizabeth M. Dunlop, of Kilmarnock, Scotland, was born on
October 15, 1844. His father was a tailor before him, and was widely
known in Scotland as one of the most reliable of tailors. He was
in business for himself.

Mr. Dunlop left Scotland in 1867, and went to the United States
with his brother, John Stevenson, and settled in New York City. In
1873 he came to the United States and chose this city as his future
home. He engaged as a partner with John Stevenson, then at No. 5 Wash-
ington Street, for two years. This partnership was dissolved, and afterward was employed by J. H.
Pope & Co., southeast corner of Dearborn and Monroe streets,
and succeeded the firm of John Stevenson, and has since been con-
ducting business at his present location, No. 129 Dearborn Street.
They engaged in first-class business. In 1883, he associated himself
with Mr. Dunlop's trade has become correspond-
ingly exclusive. He was married on September 22, 1870, to Miss
Janet G. Murchland, of Scotland. They have five children,—Jennie,
Sydney, Bertha, Charles and Grace. He is a member of the Dou-
glas Club.

**Collins & Newland**—The members of this firm are M. J.
Collins and W. D. Newland, who associated themselves in their
present business in February, 1862, at No. 205 West Madison Street.
For a short time they occupied quarters at No. 205 West Madison
Street, but then removed to their old place, whence they
changed to their present location, No. 207, in 1882.

**William James Collins**, a son of Thomas P. and Mary Collins,
was born at Bristol, England, on May 14, 1848. He attended
school until he was twelve years of age, when he was thrown upon
his own resources. Naturally poor and self-reliant, he was
available as a matter of course, and set about making his own way through
the world. His good judgment induced him to cross the ocean, and
in 1869 he landed at New York. Entering the employ of Marshall
Elli, New York, he remained with him four years; afterward he
went to St. Louis and was engaged by Frank Davenport of that city,
as cutter, for two years. In 1870, he came to this city, and was
employed by Matthews & other establishments two years, when he
engaged with Hitchcock & Co., manufacturer of machine-made
looms, and continued in their employ during the next six years.
Immediately after the fire of 1871 he came to this city, and engaged in merchant tailoring at No. 209 West Madison Street, and
in 1875 he associated himself with Mr. Newland. Mr. Collins was married, on May 14, 1872, to Miss
Anna McCullough, of Chicago, formerly of Rochester, N. Y. They
have five children,—Sydney E., William J., Anna L., Mildred I.
and Alice G.

**William Darius Newland**, a son of Darius and Emily New-
land, was born in Oneida County, N. Y., on October 16, 1842.

**The first custom tailor in Chicago probably was Solomon Lincoln**, whose sobriquet was "the
prairie tailor." Since his days, the growth of the trade has
been enormous. It is not too much to say that the
work turned out by Chicago tailors may be compared,
without disadvantage, with that produced by any branch
of the trade in any city in the United States. Not a
few leading Eastern firms have established agencies
in this city, conducted by managers chosen from Chicago
citizens, the demand having fully justified such
establishment.

During the years 1871 and 1876, the number
of custom tailors has been more than quadrupled,
notwithstanding the increased competition militated against
the profits of first-class houses, because of the importation of
woolens by Chicago merchants has done not little toward
advancing the interests of tailors, while, on the
other hand, the tailors themselves have constituted one
of the most numerous classes of importers' customers.
at No. 115 Madison Street. He was one of the sufferers by the great fire of 1871, but re-opened business on Halsted Street before the flames were extinguished. In May, 1873, he removed to No. 127, Madison Street, where he occupied a residence which he fitted up as a business place. In February, 1873, he removed to his present location.

Mr. Hyde held the position of president of the Deposers' and Tailors' Exchange for the past two years. He has been prominently identified with the Masonic fraternity, and has received all the degrees, taking the 32nd twenty years ago. He was one of the principal founders of the Grotesque Lodge, No. 526, of the city and county; his senior warden and second master of this prosperous lodge, now the largest lodge in the State of Illinois. He is a member of Apollo Commandery, being an honorary member of the same, and a member of the Order of the Ancient and Accepted Scottish Rites.

He is also a member of the Illinois Club and other organizations. He was married on August 10, 1869, to Miss Melvora A. Sammons, of Chicago. They have three children,—Charles A., Walter W. and Grace M.

William George Jerrems, successor to Alexander Nicol, better known as "Nickol the Tailor," was born on January 3, 1843, being the only one of that name in America. Both of his parents were from old English families, one of his father's uncles was the founder of the town of Lometon, not far from Stratford-on-Avon, the birthplace of Shakespeare. He was a diligent pupil in the public schools until his twelfth year, when he began learning the trade with George Markham, of Gainsborough, with whom he remained three years. Going to America he engaged in journalism at Sunday School Publishing." The first pictorial sheet printed in New South Wales. At the expiration of sixteen years he came to America, via San Francisco, in 1875, and engaged with Mr. Nicol as general manager of his Philadelphia branch. He spent the next three years his services were secured by buyer, with headquarters in England. Two years later he was made superintendent of the branch houses at Chicago, Milwaukee, St. Louis, Cincinnati, Cleveland and Indianapolis, which position he filled until 1885, when he succeeded Mr. Nicol at Chicago and Milwaukee. During the past year he has also succeeded to the proprietorship of the branches in St. Louis, Cincinnati, and Indianapolis, and has extended operations by establishing two in St. Paul.

The Chicago house is the receiving and distributing point for all of the Western branches. The stock of goods displayed here is the largest and most varied to be seen west of New York. Mr. Jerrems was married on December 25, 1867, to Miss Mary, daughter of Alexander Nicoll of London, England, and has six children,—William G., Ellen E., Arthur W., Alexander N., Mary N. and Annie L.

William Smith Downs, merchant tailor, only son of William and Sophia E. Downs, of Hominy Falls, Monroe Co., N. Y., was born on July 10, 1834. His lineage is Irish-American, his father emigrating from the North of Ireland and his mother being of old New Jersey settlers. His maternal grandfather, Jacob Smith, was an extensive land owner, and was at one time wealthy. In 1853, N. Y., he began to spend his boyhood of fifteen years of age, at home, during which time he was a diligent pupil of the schools of his birthplace. At that age he began to learn his trade with his uncle, Edward Downs, the leading tailor of the district; he remained with him ten years to this city, and was employed by Messrs. Eames & Thomas, then on Lake Street, two years; afterward by A. D. Titworth & Co., until the fire of 1871, at which time he had succeeded to a general partnership in the firm. After the fire he began business at 259 West Madison Street, removing in 1873 to the Lakeside building where he remained two years. At the expiration of that time he removed to No. 39 Clark Street, and in 1884 changed to his present location. No. 72 Illinois Street, Mr. Downs was married on January 22, 1861, to Miss Margaret T. Reeves, daughter of Abraham Reeves, of Bridgeport, N. J.; they have two children,—William T. and Harry M.

Harry Berger, merchant tailor, son of Jacob and Sophie Landenberger, of Hamburg, Bavaria, was born on October 28, 1856. His father was a cattle dealer and his maternal relatives were in the same line of business. His early years were spent in the public schools of his birthplace, and at the age of fifteen he engaged in the woolen business with S. L. Oppenheim, Wurtzburg, Bavaria, with whom he remained three years. The following three years he traveled in Germany, spending four years in the public schools of Berlin. Mr. Berger has been employed by Alexander Bros., No. 77 West Madison Street, clothiers, and continued with them for six years. He then began business as a merchant tailor at No. 243 West Madison Street, and has since continued in the same line of business. Carrying on a large business of goods and performing first-class work has secured him an extensive and faithful patronage. By successfully fulfilling their requirements he has achieved the reputation of being one of the leading tailors of the city. Mr. Berger was married on November 30, 1881, to Miss Fannie H. Goodkind, of this city.

Joseph Leverett Day, merchant tailor, is a son of Henry B. and Mary F. Day, of New Haven, Conn., and was born on March 20, 1859. Until fifteen years of age he was reared on his farm. In January, 1874, he went to Detroit, Mich., and was connected with the firm of Roe, Kirkland & Co. for some time. After a short stay in the East, he came to this city in the interest of insurance companies, and remained with the Charter Oak and the Hartford of Connecticut, in which business he remained until 1884. At the outbreak of the War, he enlisted in the Chicago Mercantile Battery, and followed his command in General Grant's Mississippi campaign, participating in the siege of Vicksburg, and the engagements at Arkansas Post, Chickasaw Bayou, Port Gibson, Champion Hills, Black River Bridge, Jackson, Miss., and was with General Banks during the Red River Expedition. He was taken prisoner, and for fourteen months was confined at the prison of Tyler, Texas. In 1886, he was honorably discharged at New Orleans, and returned to this city. He then embarked in his present line of business, with J. W. Lyon & Co., on Clark Street, near Adams, and was connected No. 259 West Madison Street, continuing there until 1873, when he removed to his present quarters. Mr. Day was married on October 26, 1885, to Miss Ida F. Browne, daughter of Sidney E. Alvord, formerly of Westfield, Mass. He is a member of the Washington Park Club.

Charles Codd, merchant tailor, is a son of John and Judith (Charles) Codd, of Tulip Grove, Calhoun Co., Ala., and was born April 19, 1836. His father was steward and forester to the Earl of Charlestown, of Kings County, as was his father before him. His boyhood was spent in the schools of Tallahome until his eleventh year, when he went to Manchester, England, and remained until 1853, when he returned to his native country. He attended the Manchester school of excellent standard. After a course of study in that institution he began the tailoring trade with Matthew Richardson, a prominent merchant tailor of Manchester, with whom he remained six years. After various engagements with other establishments he came to this country in 1857, and in 1863 was employed in New York City, when he went back to Manchester, England, for a visit of several months. After his return from England he went to New York two years, he took a position as cutter with Samuel Perry, Davenport, Iowa, and continued with him until 1874. In June of that year he came to this city, and was employed by Harry Hart as cutter for two years. During the following three years he was connected in the same capacity with the firm of H. F. Wachsmuth, and afterward with Thompson & Wetmore. In September, 1881, he began business for himself at his present location, and has since continued in the same. Mr. Codd was married on September 23, 1863, to Miss Catharine Duff, of Manchester, England, and has four children,—Catharine, John, Thomas and Mary. He married Miss Margaret, daughter of John and Mary Haggerty, of County Waterford, Ireland. His early years were spent in his native county, and when opportunity offered he attended the public schools of Lismore, where he obtained a good education. In 1846, he came to America and began the tailoring trade with John O'Mahoney, of New York, with whom he remained two years. At the expiration of that time he engaged with Michael Murphy, a leading merchant tailor of the same city, and continued in his employ three years. In 1871, he came to this city, a short time before the great fire, and was employed by Louis Gilbert, near the corner of Adams and Clark streets, also by several other tradesmen, until 1874. Having accumulated sufficient means he established himself in business at 122 State Street, and in the following year moved to No. 127 State Street. Three years later he removed to his present location, 259 West Madison Street, and has since continued in the same line of business. Mr. Haggerty was married, on November 13, 1869, to Miss Bridget Ryan, of Laxin, Ill., and has three children,—Mary A., William H. and John T. He is a member of the Ancient Order of Hibernians and of the Illinois Catholic Order of Foresters.
when the fire came, jobbers and manufacturers were overburdened with goods. No department of business activity, however, showed more energy and enterprise than this; and it is worthy of note that, with new locations, manufacture, and stocks, a one-third larger business was transacted in November and December, 1874, than during the same months of the preceding year, while the average of the entire twelve months was considerably in advance of that of 1870. It has been impossible to obtain anything like an accurate statement for 1872, but a brief and concise review is presented of each year subsequent to that.

The boot and shoe trade in Chicago was not materially affected by the panic of 1873. A good share of the business was conducted in November and December, 1874, and the capital employed was about $17,000,000 and the working capital $5,000,000. The decline in prices was owing to the lessened cost of material and that of live-stock, which, that year, ruled very low; but losses from bad debts were fewer and collections more prompt than at any time since the panic of 1873. Chicago slaughter-houses, supplying large quantities of hides, which were tanned here and available to the manufacturer without cost of transportation, gave an advantage over the Eastern manufacturer, and established the Chicago trade on the firm basis of home manufacture.

The sales of 1876 were estimated at $17,000,000 and the working capital at about $25,000,000, an increase of ten per cent. So large was the aggregation of business in the latter half of this year, that stocks were worked down to a low point. It was with difficulty that manufacturers supplied themselves, and local tanners could not meet the orders which poured in upon them; consequently the manufacture of boots and shoes was greatly checked and prices were acted upon as a preventive to any material advance in the price of labor. More goods were sold from Chicago this year than ever before to Ohio, Indiana, Michigan, the South and Mexico, and large demands came from Colorado, Arizona and the Far West. Rubber goods advanced from forty-five to fifty per cent.

The reports for 1871 show a gain of fifteen per cent. in the amount of business transacted, and the trade as the largest ever known here to date. New opening territories created large demands. Dakota, Colorado, towns in Arizona and New Mexico, rich mining districts—an attraction for railroads and settlers—became more and more the operating fields of Chicago salesmen. The business of the year was said to have been affected by a keen competition, which narrowed the margin of their profits. There were twenty-four principal business concerns in the trade, four of which reported a business of over $2,000,000 each, while seven others reported $1,000,000 and upward. The larger houses reported an increase of trade over 1870 of from fifteen to twenty per cent., while some smaller houses held only their own.

The year 1872 marked an increase in the capital of $500,000 and in the sales of $1,000,000. Some of the larger firms found it necessary to secure more commodious quarters, while additions were made to the manufacturing capacity of the larger houses in consequence of the great growth in the trade. A slight decline occurred in rubber goods, the prices ranging higher than in 1871, in consequence of a corner in the raw articles. On October 18, a meeting of rubber manufacturers was called, representing sixty firms aggregating a capital of $30,000,000. The meeting resulted in a resolution on their part to close their manufactories on December 23, and to keep them closed until the price of rubber was reduced. This action was followed by a decline of twenty cents a pound. It was claimed by the manufacturers that eighty-four cents a pound for raw rubber left a fair margin of profit for the importer.
and they would not resume active operations at such a price.

The year 1883 showed a steady and persistent growth. The aggregate of sales was about the same as for 1882. Prices ruled steady, reductions were submitted on some stock items, and the trade was comparatively free from the general loss by shrinkage in the value of stocks on hand. The capital employed was about the same as in 1882. More than ninety per cent. of the capital and business was confined in the area of four blocks bounded by Madison, Adams and Market streets and Fifth Avenue.

In 1884, there was a slight falling off in the quantity of goods handled, with a decline of ten per cent. in the prices of foot-wear, making an aggregate of $17,000,000. An aggregate of $9,000,000 capital employed; no new firms appeared and no failures were reported, but the trade was dull in all departments.

The year 1885, however, showed a slight improvement, an increase of five per cent. being reported. Prices were more stable and there was less difficulty in making collections and few bad debts. Still, during ten months of the year business was dull, and was done at smaller profits than ever before. The year witnessed a fierce rivalry between Western and Eastern manufacturers, to a reduction in profits that was the part of the former and the substitution of a poor quality of goods on the part of the latter.

The close of the year 1885 *found Chicago with a larger boot and shoe business than any other city in the United States, a fact which is owing to the peculiar advantages and facilities of home manufacture, the large amount of capital invested, the geographical position of the city, and its means of ready communication with all portions of the great Northwest and West, and last, but not least, the ability, energy and enterprise of the men who manage this important branch of the city's industries.

*PHelps, DODGE & PALMER.*—In February, 1864, Erskine M. Phelps and George E. P. Dodge, who had previously been associated in business in Boston, came to Chicago, and, under the firm name of Phelps & Dodge, established themselves in the retail boot and shoe trade at the northwest corner of Lake and State streets. They remained at this location for a year, when they removed to No. 50 Lake street, and at the same time N. B. Palmer became a partner, and the firm name was changed to Phelps, Dodge & Co. In 1867, owing to there being in New York a firm of the same name, Phelps, Dodge & Co. changed the name of their house to its present one, 169, and in 1869, having purchased the building now known as Nos. 49 and 50 Wabash Avenue, they removed to that place, where they remained until burned out in the fire of October, 1871. In that fire their losses were very large, but two days later saw them re-established in business at the residence of Mr. Phelps on Indiana Avenue, where they remained for a brief period, when a removal was effected to the temporary buildings which had in the meantime been erected on the Lake Front. At the same time, too, they had, as soon as practicable, begun the erection of a new building on the site of their former quarters on Wabash Avenue. This building, which was the first brick structure built in that locality, was two stories in height, with store front, was completed and ready for occupancy by March, 1872, and two years later, three more stories were added. In 1876, owing to the remarkable increase of their trade, they were compelled to enlarge their facilities, and accordingly they rented the premises Nos. 52 and 54 adjoining. A year later, the house sustained a severe loss in the death of Mr. Palmer, who for years, in fact since the fire, had been in rapidly declining health. From 1871 to 1876 he had spent much of his time abroad, in endeavoring to revive his failing energies, which were now at a low ebb. In 1876 he returned from Paris to Chicago, and shortly afterward went to San Francisco, from which point he took a sailing vessel for Shanghai, where he arrived after a voyage of two weeks. He returned to Shanghai but a few weeks, when it became apparent to himself no better, and being fully aware of his precarious condition, he at once took steamer for home; but died only when two days out from that port, on May 15, 1877. In November of that year Messrs. Phelps and Dodge purchased from Mr. Palmer's estate his interest in the firm, but still continued to do business, in accordance with his wishes, of the deceased, that the firm name should remain unchanged. They remained on Wabash Avenue until January, 1882, when they removed to their present location at the northwest corner of Fifth Avenue and Adams Street. The house of Phelps, Dodge & Co. is to-day, without doubt, the largest of its kind, not only in Chicago, but anywhere in the West. They employ in their manufacturing department about nine hundred hands, turning out over two thousand pairs of shoes a day. As evidencing the growth of the business, it may be stated that in 1864, the total sales did not exceed $90,000, while now the annual volume of trade foot up over $17,000,000, and is still increasing. The territory over which their trade extends from the Falls of St. Anthony to the Rio Grande.

C. M. HENDERSON & Co.—The boot and shoe house of this firm was established by Charles M. Henderson in 1839, the firm at present being comprised of Charles M. and Willard S. Henderson and Francis D. Everett. From a small business of about $250,000 per annum, their operations have increased to the yearly handling of about $5,000,000 worth of stock. They occupy a fine six-story block, at the corner of Adams and Market streets, 120 x 120 feet of which is used as a general office and distributing depot. Besides their manufacturing here, they also operate two other extensive factories, which produce two thousand pairs of shoes a week, one of which is devoted to the production of ladies' misses' and children's shoes and the other of heavier goods. These factories afford employment for five hundred persons. All of the machinery in their establishment and the latest pattern of every piece of goods are used in the saving of time and stock finds places on their floors. Their trade is mainly east of the Rocky Mountains, yet heavy shipments are made to California and Oregon, and extends from Lake Superior to New Orleans. This concern owns a distributing and jobbing house in the United States, and their facilities place them beyond the competition of Eastern establishments.

*Charles Mather Henderson,* senior member of the firm of C. M. Henderson & Co., and son of James F. and Sarahina Henderson, was born at New Hartford, Conn., on March 21, 1834. He received his education in Connecticut and Massachusetts, and came to Chicago in 1853. He began commercial life in the wholesale boot and shoe establishment of his uncle, C. M. Henderson, and in 1864, took a controlling interest in the firm of C. N. Henderson & Co., No. 169 South Water street, as clerk, and continued in their employ for two years, when he organized the firm which has been known as C. M. & W. S. Henderson & Co. In 1862, Willard S. Henderson was taken into the firm as partner. They were located at No. 32 Lake street when burned out in 1868, and at Nos. 58-60 Wabash Avenue at the time of the fire of 1871. In 1873, they moved to Madison and Franklin streets where they remained five years, and then removed to the corner of Monroe and Franklin streets, and went into their present quarters in January, 1885. Mr. Henderson was an active participant in the development movement undertaken by several prominent citizens of Chicago in 1874, to purify its municipal government, and contributed large sums to that end. They caused the removal of Mayor Colvin, and their action was instrumental in causing the present city charter to be adopted. They were also prominent in organizing the fire department. Mr. Henderson was married on March 4, 1858, to Miss Emily Hollingsworth, of Chicago. They have three children—Florence H., Caroline W., and Enos S. Henderson, son of James F. and Sarahina Henderson, was born at New Hartford, Conn., on March 10, 1839. In his seventeenth year, after having obtained a thorough business education in the public schools of his birthplace, he came to this city, and entered the boot and shoe establishment of C. N. Henderson & Co., who were then located at No. 169 South Water Street. Mr. Henderson was married on October 16, 1866, to Miss Josephine Presby, of Chicago. They have two children—Willard F. and Madeleine.

Francis Denton Everett is a son of Jacob W. and Hannah R. Everett, and was born at Halifax, Va., on December 6, 1839. When he was seven years of age, his parents removed to Springfield, Mass., where he received his education. In his sixteenth year he came to Chicago, and entered the employ of C. N. Henderson & Co., the capacity of stock of which, at the time he joined the house, was limited to very competent, to a clerk's position, and for many years was one of the firm's most valuable salesmen. In 1878, he succeeded to a partnership interest in the business of the house of C. M. Henderson & Co., for the past several years having been in the representation department of the establishment. Mr. Everett was married on June 15, 1851, to Miss Sarah E. Campbell, of Chicago. They have five children.—Adelle M., Charles F., Frank W., James C. and Daniel T.

George W. Ludlow & Co.'s shoe manufacture is owned by George W. Ludlow, of Chicago, and George R. Keep, of Lockport, N. Y., and was instituted in 1859. It was first located at Nos. 152-54 Monroe Street, where it was operated until September...
BER, 1883, when it was moved to its present location, on Michigan Avenue, corner of Randolph Street. There are manufactured exclusively ladies', misses' and children's shoes for the best retail trade, and the sales extend over the entire country. The factory commenced in a small way, operating only about fifty hands, but it has extended until it now operates over three hundred and has a weekly pay-roll of over $2,500. The sales of the first year aggregated $100,000, while last year's business showed sales of about $400,000, the manufacture only being increased to correspond with the orders. This is the only factory in the West exclusively en-
gaged in manufacturing fine shoes, and the firm owes its success to the persistent and untiring efforts of Mr. Ludlow, who is a practical man in every part of the work.

George H. Ludlow, son of Ezra Ludlow, of Elizabeth, N. J., was born at that place in 1838. He was educated at private schools, and at an early age manifested a desire to continue in the footsteps of his father and his grandfather, who were engaged in the shoe trade before him. After his school days he was at once opened a retail store in Elizabeth, which he retained until 1861, when he changed his residence to Rochester, N. Y., entering the service of Churchill & Co., and afterward went to Utica, and was with Reynolds & Co., as their designer for six years, finally going into the manufacture of shoes, associating himself with Mr. Holbrook, under the style of Holbrook & Ludlow, he being the practical man of the establishment. He remained in the firm for about seven years. While with Mr. Holbrook he took occasional trips West, visiting the larger cities and thoroughly acquainting himself with the merchants. He discovered that the trade suffered quite a disadvantage, on account of the distance from manufacturing, and also in the lapse of time between the visits of travelling salesmen, and he saw that Chicago was the coming market. After consulting with experienced men in the boot and shoe business already in Chicago, he determined to engage in manufacturing, and to establish himself while there was an opening. Hav-
ing two sons nearly grown, he thus sought for them an opportunity of benefiting by his experience and under his personal supervision. When he had fully determined upon the plan, he consulted Mr. Henry M. Keep, of Lockport, N. Y., united his capital with him, and they were enabled to start on a good financial basis, and in 1838 commenced the manufacture of a superior grade of shoes for ladies, misses, and children, heretofore unknown to the public. Lud-
low's experience is that of all men who are real pioneers in any advance business—that of severe strain and tremendous competition to overcome, of having had to contend against old established Eastern firms with heavy capital, and of having to educate the unskilled hands of the West, all of which he has accomplished. He has found in his two sons, Andrew W. and George N., able assistants, who have become experts in several important features pertaining to shoe manufacture. Mr. Ludlow was married, at Elizabeth, N. J., in 1861, to Miss Mary Arrison, who died in 1875, leaving four children,—Andrew W., George M., Minnie E. and Willie E. In 1876, he was again married, at Lockport, N. Y., to Miss Anna Roberts.

Almon D. Ellis is one of the largest boot and shoe commission dealers in the West, and has been actively identified with the manufacturing and mercantile interests of Chicago for the past twenty years. Mr. Ellis was born in Putnam County, N. Y., on March 8, 1826, and is a son of Townsend and Maria (Ludlow) Ellis. The father was a tanner and currier by trade, but in his later life devoted his attention to farming. Almon Ellis was reared on his parents' farm; he assisted his father in the summer months, and during the winter attended the district schools, with the idea of that way obtaining much practical knowledge with his common school education. He thus imbued those habits of industry and integrity which have since characterized his business career. When twenty-one years old, he took a position in a dry goods store at Sylvania, Ohio, and at the close of his engagement he removed to Toledo. In 1851, he engaged as travelling salesman for C. Beggs, a tobacco manufacturer. He was thus connected in business, until the latter part of 1864, when he enlisted in Co. "B," 19th Michigan Volunteer Infantry, as a private. Within sixty days, he became first lieutenant of his company. He was afterward promoted to the captaincy, and retained his command till the early part of 1864, when, by reason of ill health, he tendered his resignation. While in the field of battle, Captain Ellis made a most honorable record, and rendered valiant service in the engagements at Corinth, Stone River, siege of Nashville, and other battles of the Western campaign. In 1865, after recovering from his protracted illness, he resumed his old position as salesman for Mr. Bronson, of Toledo. He remained there until 1867, when he removed to Chicago. In the early part of 1870, he formed a partnership with Charles W. Allen of this city, and engaged in the manufacture of fine-cutoff tobacco. Their entire business was swept away by the fire of 1871, and although they suffered heavily, they met their fate bravely. They re-estab-
lished the business on their old ground, and not only suc-
cceeded in retaining their immense trade, but in three years thereafter had increased their business till it yielded an annual product of one million dollars. Mr. Ellis was identified with the tobacco trade until 1879, when he disposed of his interest to Mr. Allen and retired from active business life. This retirement proved monotonous to his en-
ergic nature, and in January, 1881, he re-entered in business, establishing his present house, in company with A. A. Putnam, under the name and style of Ellis & Putnum. The partnership was dissolved in January, 1884, Mr. Putnum withdrew, and Mr. Ellis has since carried on the business alone. The business occu-
pied by him are at No. 10 Market Street. He is a member of the Washington Park Club and of Home Lodge, No. 508, A. F. & A. M. 

Morris Selz was born in Württemberg, Germany, on October 2, 1826. He came to America in 1841, and settled at Hartford, Conn., where he was employed for three years as a clerk in the dry goods business. In 1848, he went to Talbotton, Ga., and opened a general merchandise store, which he carried on until 1851, when
he went to California. While in that State he was engaged in mining and carrying on a clothing business, at Jamestown and Somers, Montana. Later he came to Chicago, for the first year he was a member of the firm of Selz & Cohn, wholesale dealers in clothing. Mr. Selz married Rosa Frank, of Wurttemberg, on May 10, 1863, who died on June 21, 1869, leaving two children;—Harry and Marguerite. May 5, 1874, he married Alice, daughter of Abraham Kohn, of Chicago, who has borne him two children,—Lillie G. and Abraham K.

Charles H. Schwab was born at Mulhouse, Alsace, Germany, on October 15, 1855. In his nineteenth year he emigrated to America, and came directly to Chicago. He first engaged in the liquor business at No. 360 South Clark Street, which he continued and maintained until 1873, when he became a partner with Mr. A. F. Swedberg, and now is a member. Mr. Schwab was married, in June, 1862, to Rachel Monheimer, daughter of Isaac Monheimer, of Cincinnati, Ohio, and has five children,—Charlotte, Henry C., Alfred, Clara and Albert Schwab.

H. F. C. Dovenmuehle & Son, wholesale dealers in boots and shoes, have occupied their present premises, at Nos. 168-85 Fifth Avenue, for the past two years. When the firm was organized, in 1875, they were located on Wabash Avenue, where they remained until they moved to their present location. H. F. C. Dovenmuehle came to Chicago in 1875, since which period he has been a resident and has been enabled to rise from the work of his father and the industry of his youth to the position of a high city citizen. This house carries a complete line of boots and shoes, and has a large constituency through the Northwest, and employ several traveling representatives.

H. F. C. Dovenmuehle was born in Hanover, Germany, in 1834. After he had received a common school education, he learned the trade of boot and shoe making, which he followed up to the time of his emigration. After arriving in Chicago, he was employed in a boot and shoe workshop up to 1866. His energy and ambition soon elevated him to a better position, and he started a retail store, and success followed him from that time. Subsequently he was employed as city salesman by the Dovenmuehle wholesale dealers, who position he resigned to start in business for himself. In 1861, he was married, in Chicago, to Miss Maggie Brandt. They have two children,—H. C. and Annie.

William H. Brown & Bro.—This firm was established in the spring of 1859, at No. 77 Lake Street, by William H. Brown. Trade having considerably increased during the ensuing four months, Nathan H. Brown, a younger brother, was admitted as a partner, and business continued steady to progress until in 1871, when the great fire destroyed the establishment. The loss was to the firm of about $17,000, over insurance. Immediately after the fire, the firm re-established itself at No. 325 West Madison Street, and remained there until the spring of 1874, when it was moved to its present location, 52 Stude Street, Chicago. During this period, Nathan H. Brown died in Italy, and he, by will, let his entire interest in the business to William H. Brown. In the spring of 1880, Arthur K. Brown of Boston, Mass., came West, and entered the firm in that year. This well known and popular establishment is situated in one of the best business localities in the city, in the Stewart Block, opposite Marshall Field & Co.'s dry goods emporium. Herein trade the best classes of the people of the city and throughout the Northwest. Goods from this firm are sent from Maine to California.

William H. Brown was born at Boston, Mass., on March 15, 1837, within a stone's throw of the historic 'Common,' and is the son of Nathan and Ann (Haggett) Brown, of Lyndhoro, N. H. He was educated at the Latin and High Schools of Roxbury, since incorporated in the City of Boston. After finishing his studies, he entered the boot and shoe manufacturing establishment of Joseph Whitney & Co., then the principal house in its line in Boston, and served in the capacity of wholesale clerk for seven years. At the breaking out of the Civil War, Mr. Brown was a cavalry man, and entered the employment of the new house of Pagé & Clarke as salesman, with whom he continued for nearly two years, when the firm dissolved, Mr. Page withdrawing. Mr. Brown then joined Mr. John M. Hall, who had been his former employer in the drug business in West Street, Chicago, in 1836, and the firm was known as A. F. Clarke & Co. The advantages, brilliant prospects and rapid growth of Chicago presenting an attractive field for future business operations, Mr. Brown in 1869, moved to New York, where he continued the representative establishment of the firm, in New York, in 1869, to Miss Fanny L., daughter of Rev. Sumner Clark, of Wolforo, N. H., and has three children,—Grace Sumner, Allen A. and Arthur Lane.

Arthur K. Brown, the other member of the firm, was born at Boston, Mass., in 1849, and was educated at his native place. He was married, in 1864, to Miss Elizabeth Jacobs, a daughter of War- ren and Elizabeth Jacobs, whose residence is in Danvers, Mass. They have one child, a daughter,—Elizabeth P.

Neeley Bros.—This firm was organized in 1879, by M. C. and J. C. Neeley. From 1872 to 1879, M. C. Neeley and Mr. Smith controlled the business under the name of H. W. & W. Neeley. At the retirement of Mr. Smith, through the purchase of his interest in the business by J. C. Neeley, the style was changed to Neeley Bros. The firm is now conducted by M. C. and J. C. Neeley, a silent partner in the business.

M. C. Neeley was born at Philadelphia on October 31, 1841, when he received his education and was engaged in the grocery business. He then went to Davenport, Iowa, to the home of his parents, and there began his business career, as a boy in a retail boot and shoe store. At the breaking out of the War, he enlisted in Co. "D," 30th Ill. Vol., and was honorably discharged from the service, he returned to Davenport, where he remained until 1872, when he came to Chicago. He is a member of Post No. 90, A.G.A.M.

Joseph C. Neeley was born at Philadelphia on February 5, 1852. He entered the public school at Davenport, Iowa, and received his course from his junior school years until his graduation from the high school. He attended to his present business affairs in the firm with which he is now connected. He is a member of Hesperia Lodge, No. 411, A.F. & A. M.; of Washington Chapter, No. 43, R.A.M.; and of Apollo Commandery, No. 1, K.T.

Rev. J. E. Neeley was born in the North of Ireland, where he received a common-school education, coming to this country in 1856. After living a short time in Philadelphia, he moved to Davenport, Iowa, where he worked as a farm hand for twenty-one years. In 1873, he went to Chicago on August 16, and entered the employ of E. H. K. Ashley, in charge of the circulating department. In 1877, he came to Chicago, since which period he has been interested in the retail and wholesale business. In June, 1885, he married Miss Anna Frazier. They have had nine children, two of whom deceased. Mr. Neeley is a member of the People's Church, over which Rev. Dr. Thomas presides.

Nelson H. Holden, manufacturer of boots and shoes at Nos. 234 and 3046 State Street, opened his doors to the public, in 1866, near the corner of State and Van Buren streets, and remained at that location until the fire of July 1, 1871, when the establishment was destroyed. Immediately after the fire, the business was re-opened at the corner of State and Twenty-first streets. In 1879, he removed to No. 234 State Street, which is now his principal store. Mr. Holden was born at Jackson, Washington County, Indiana, V., in 1834. In November of that year he went to Chicago, and immediately entered business. Previous to coming to this city, he was engaged in the tannery business with his father. Mr. Holden is a courteous gentleman, gifted with a high degree of ability, energy and industry. He is a member of the Fifty-sixth Club, and enjoys the amenities of social life with the same zest with which he pursues his business.

Forman M. Martin was born at Rahway, N. J., in 1846. His education was commenced in the common schools, but his parents emigrating to Illinois during his boyhood, he subsequently prosecuted his education at Dixon College, this state. His father, upon coming West, settled near Dixon, Ill., and engaged in agricultural pursuits, afterward removing to Bloomington, Ill., where he pursued the same vocation. In 1860, the family, accompanied by Forman, who had by this time completed his education, moved to Potosi, Mo., where the father, William W. Martin, was identified with the lead-mining business until 1865, when he and his family, on account of expressing their Union sentiments, were driven from their homes by the rebels, losing all their property, and his father dying from the effects of exposure to the hardships inflicted on them. Escaping to the North with his mother and the rest of the family, Forman located in Northern Indiana, where he engaged in farming for a few years, and in 1869 removed to Chicago, where he began his business. In 1872, he entered business with Mr. J. S. B. Meehan, and held the position of manager of the firm, in the same line of trade, until 1876, when he established a business for himself. In 1880, he withdrew from his business and organized the firm of Forman & Co., in which he is a member of Apollo Lodge, No. 139, A.O.U.W., Chicago Legion, No. 4, Select Knights, and is grand vice-commander of the Grand Legion of Select Knights for the jurisdiction of Illinois. He is also a member of Lakeside Council, No. 620, Royal Arcanum.
num, and Court Energy. No. 10. I.O.F. Mr. Martin was married at Bloomington, Ill., on November 11, 1873, to Miss Esther Mc.

Charley, a child, and at age

Joseph Loranger, wholesale and retail dealer in fine boots and shoes, No. 138 West Madison Street, was born in Monroe County, Mich., on February 6, 1842, and is the son of Lep and Eliza (Dunbar) Loranger, who were French emigrants. His grand ancestors served in the War of the Revolution (1777), under the celebrated French general, Marquis de Lafayette. Mr. Loranger was brought up on a farm, and devised himself to agricultural pur-
suits until he was fourteen years old, at which time he went to school at Detroit, Mich., for three years. There he received at the public schools the advantages of a good and practical education. After the expiration of his apprenticeship, he commenced business at the printing establishment of Hon. Edward G. Morton, then publishing the Monroe Monitor, and who was also a member of the Michigan Legislature, wherein he displayed diplomatic skill and unceasing industry, as Mr. Loranger having served two years in this establishment, an accident occurred to his hand, from a crush in a printing press, which unfitted him for that business, and he therefore abandoned it. The War then being in progress, in 1863 he enlisted in Co. "D," 9th Michigan Cavalry, as a private. He took part in the battles of Lookout Mountain, Chattanooga, Dalton, Resaca and Marietta, Ga., and was at the siege of Atlanta.

After the capture of that city, he remained in General Sherman’s

practical Bloomington. His shoe necessary.

found accommodations was the spring membci he Ga., 148.

M. I.O.F. While he was there, he worked as a journeyman shoemaker until 1858. He then went West to a shoe store in Mercer City, Ill., and worked at his trade until the breaking out of War in 1861.

He enlisted in the 17th Illinois Volunteer Infantry under Colonel F. L. Pass, and served at Milledgeville, Ga., and his term of enlistment was for three years, but the War terminating he was mustered out.

In 1869, Mr. Braiband returned to Chicago, where he maintained employment in custom shoe-shops. In 1872, he em-

barked in business for himself at No. 345 Lawrence Avenue, and remained there for three years, subsequently moving to larger premises at No. 221 North Avenue, where Mr. Braiband is a practical and satisfactory boot and shoe dealer of the old school. His firm has its head office in Chicago, 1878, to Caroline Fraise. He is a member of the North Chicago Masonic Lodge, No. 996, I.O.O.F., and also of Lyceum Post, No. 9, G.A.R.

Charles Trein, manufacturer of boots and shoes, was born in Germany, on October 2, 1831, and is the son of Jacob and Caro-

line (Weber) Trein. He received a common school education at his native place for eight years, after which he served an apprenticeship to his father at the boot and shoe trade, and came to this country in April, 1857, landing in New York, and coming on to Chi-

cago, Washington Street, and from there he moved to No. 650 Canal Street, remaining at this place until he died in 1865, after 

Mr. Braiband is a member of New Chicago

served for a term of five years, and from this he moved to No. 202 Clybourn Avenue. In the meantime he opened another store at No. 121 Dearborn Street, and continued to run these two stores for two years, until 1879, when the business was moved to its present location, No. 228 North Avenue, and from this place he moved to Chicago, in 1876, to Caroline Fraise. He is a member of the North Chicago Masonic Lodge, No. 996, I.O.O.F., and also of Lyceum Post, No. 9, G.A.R.

ored gentleman, and was born at Quire Creek, Va., near the Potomac River, in 1847. He was educated at Warren, Mass., after leaving the eight grades of school. At the completion of his carpenter's education, he entered the building trade in Virginia. When his school studies were finished, he went to Albany, N. Y., and engaged in the wall papering business for some time, and in 1866, came to Chicago. In 1868, he went into the boot and shoe business at 827 Lake Street, and conducted these stores until 1882. In that year he sold the interest of his business at No. 897 Lake Street, and continued to sell the store at No. 276 on the same thoroughfare. After a lapse of ten months, he opened another store at 860 West Indiana Street, and carried it on for about two years, and on December 20, of the same year, he opened another spacious store at No. 356 West Indiana street, where at present he is engaged in the wholesale trade. He has worked himself forward through life, and has the reputation of being honest in all his business transactions, thus securing a large amount of custom from the general public. Mr. Johnson was married in Albany, N. Y., in 1872, to Miss Lovina Pettiford, of Raleigh, N. C., and has two children,—James M., Jr., and Lovina.

J. Lee, boot and shoe dealer, No. 570 West Indiana Street, was established in 1875 at the present location. Mr. Lee was born in St. Sylvestre, near Quebec, Canada, in 1842. When only fifteen years old, he went to Vermont, and was educated in the district schools there. On leaving school he was employed at farming for some time, and afterwards moved to Massachusetts, where he learned the boot and shoe trade. He then went South and engaged in the lumber trade for a short time, and subsequently returned to Canada. In 1895, he came to Chicago, and worked in the establishments of Alfred C. and Frank C. HAAKKR. In 1897, he opened another store at 897 Lake Street, and conducted these stores until 1882. In that year he sold the interest of his business at No. 897 Lake Street, and continued to sell the store at No. 276 on the same thoroughfare. After a lapse of ten months, he opened another store at 860 West Indiana Street, and carried it on for about two years, and on December 20, of the same year, he opened another spacious store at No. 356 West Indiana Street, where at present he is engaged in the wholesale trade. He has worked himself forward through life, and has the reputation of being honest in all his business transactions, thus securing a large amount of custom from the general public. Mr. Johnson was married in Albany, N. Y., in 1872, to Miss Lovina Pettiford, of Raleigh, N. C., and has two children,—James M., Jr., and Lovina.

Peter Hammerschmitt, manufacturer of and dealer in boots and shoes, was born in Germany, on July 27, 1821, and is the son of Frank and Mary (Wirtz) Hammerschmitt. His father was a farmer, and died when Peter was only eleven years of age. His mother is now eighty-five years of age. She was with her son emigrated, this country in 1842, residing in New York and coming direct to Chicago. Mr. Hammerschmitt attended the village schools of his native place and received a common school education. After coming to Chicago he went into the wholesale business of five years to his brother Michael, now deceased, who kept a large boot and shoe store at No. 160 Blue Island Avenue. In 1857, he embarked in business for himself, on Twelfth Street near Union, and remained there about one year. In the meantime, Mr. Hammerschmitt purchased a lot, and built thereon a large store and residence, at No. 790 South Halsted Street, and as soon as it was completed moved his business thereto, now his present location. Mr. Hammerschmitt early became the most prominent of the wholesale boot and shoe merchants on the Street. He keeps a very extensive store. Mr. Hammerschmitt, by industry and perseverance, has built up a flourishing business, and must have accomplished a great deal. In 1882, in Chicago, to Miss Maggie Mangold, and has five children,—Rosie, Anna, Mary, Matilda, and Laura. He is a member of St. Francis' Society of the Twelfth-street Catholic Church.

The first cabinet-makers in Chicago, like those of other small towns in the State, were those skilled mechanics who worked at the bench, and did their turning with a foot lathe. The directory of 1839 records the names of seven persons who were the owners of shops with the signs of "cabinet-maker" and "chair and furniture maker." The census of 1840 shows the amount of capital invested in this business at $2,500, and the number of hands employed four. The published census returns of 1850 fails to throw any light on the subject, but it is known that there were firms or individuals in Chicago at that time engaged in the manufacture of furniture. Among these were two or three firms who employed as many as fifteen or twenty hands each, but the amount of capital invested, or the annual product, there is no means of ascertaining. The business at that time was confined to the making of chairs, bedsteads, and bureaus, all of them of a very common grade.

The revolution in the manufacture of cabinet work is, perhaps, more than that of any other industry, the result of remarkable improvements in machinery. The adaptation of the rotary-cutting principle to the working of wood, the invention of the hand saw and the automatic lathe, gave an impetus to the business which accounts for its extraordinary increase and the important position which that industry occupies in the manufacturing interests of this country. In 1853-54, there had been introduced by several establishments in Chicago some of these improved machinery. The increased railroad facilities opened up new avenues of trade, and the shipments of those years show that among them were two hundred and sixty-four packages and forty-one tons of furniture. One establishment employed forty hands, with an annual product of $45,000, and another fifteen with sales amounting to $20,000. But even up to 1860, when the entire product amounted to $2,547,865, the principal demand for this class of goods was for those who were then engaged to supply came from the local trade.

It was not until 1868 that this industry began to assume its present stupendous proportions. The advantages of Chicago at that time as a manufacturing point presented themselves to capitalists in a striking manner. Its extended distribution facilities, its stately increasing that made it a home market, the great supply and cheapness of labor, the immense lumber trade, were inviting and controlling facts in its favor. The enterprise and skill which these considerations enlisted made it no longer necessary to look to the East for any kind of plain and serviceable, or ornamental and expensive, furniture that the demands at home or of the growing country around might require.

The figures of 1870 show that a growth was made in the preceding decade of nearly one thousand per cent. But in 1871 he had the fire, and the succeeding years so were numbered fully one-half of the furniture manufactories of the city. This catastrophe, followed by a period of stringent times, checked for a while the natural increase of this industry. With the revival of business in 1877, however, it again came to the front, where it held a leading place ever since.

The following table is compiled in periods of ten years from the United States Census, excepting for 1860 and 1895, which are the results of local reports:

<table>

By way of comparison, Chicago in 1870 manufactured about one-half as much furniture in value as Cincinnati, one-third as much as Boston and Philadelphia and one-sixth as much as New York. In 1880 the census returns show that Chicago was in advance of all other places excepting New York; but in 1885 the footings show that Chicago marches to the front both in the number of employees, and in the amount of the annual product. In parlor furniture especially, Chicago leads the world, the annual sales of upholstered goods and frames equalling those of New York, Boston and Cincinnati combined. It is the fourth largest industry in Chicago, being exceeded in the amount of its annual product only by the meat-packing business, the manufacture of clothing, and that of iron and steel.

The prominence of Chicago in this industry is owing not alone to its superior shipping advantages, but also to the immense variety of goods made, the different classes, and the large range of patterns to select from. Thus is it that customers are attracted from every point of the compass, and furniture is daily shipped, not only to the large cities of the East, but to the South and West, even to Oregon, California and Manitoba.

Charles Tobey, president of the Tobey Furniture Company, came to Chicago in 1855, and is one of the practical pioneers in the second greatest mechanical industry of this city. He was born at Dennis, Cape Cod, Mass., on September 10, 1831, on a veritable ancestral acre, the farm his father owned having descended through the family for over two centuries. Until he was eighteen years of age, he divided his time between going to school in the winter and fishing in the summer and then entered a furniture establishment in Boston, beginning his experience in the trade. He was destined to follow at a salary of five dollars a week. There he remained for three years. His quick mind took in all of the details of the business readily, and he resolved to try his fortunes in the West. On the train to Chicago he met the agent of the house of Boston, and made arrangements to represent that establishment in this city. In 1855, Mr. Tobey opened his first store on Lake Street, and conducted it as a branch house for one year, when the firm failed, leaving him entirely on his own account. He holds to this day a note, yellow with the memories of a quarter of a century, the evidence of unrepaid enterprise in its initial stage. In 1856, Mr. Tobey secured five hundred dollars from his former creditor, who shared with him a couch made of piled mattresses nightly, until business began to prosper, and by borrowing a second five hundred dollars from his former creditor, he was enabled to do better than to buy his stock at retail prices. In the days of the panic, a brother, Frank B. Tobey, came West, and began working on salary in the State Street establishment. The two brothers combined their abilities, under the style of Charles Tobey & Brother, and the ensuing year a loan of one thousand dollars from Frank enabled them to take in the adjoining store and enlarge their business. In 1859, they removed to No. 72 State Street, occupying also the hall overhead, and materially increasing their stock and trade. During the period of financial stringency from 1857 to 1860, the Tobey brothers contracted no debts and did not manufacture, but bought the stock of those who had succumbed to the storm, more fortunately weathered. In 1862, they removed to No. 52 Lake Street. In 1870, the Thayer & Tobey Furniture Company was organized; F. Porter Thayer being president, Charles Tobey vice-president, and F. B. Tobey treasurer, occupying the premises Nos. 72-74 State Street. By the death of the president, Thayer factory, at the corner of Randolph and Jefferson streets, came under the company's control. During these years, the company, separate or combined, did a large business in hotel furniture, furnishing the entire Grand Pacific Hotel, the old Sherman House, the Tremont House, and partially the Gardner and the Palmer Houses. The fire of 1871 entailed a loss of $85,000, more than the amount of insurance. After the fire the company continued business at their factory, taking as an order to furnish the Sherman House (now the Gault House) the day after the fire, the order to be complete in one week; which was successfully accomplished. In 1873, they moved to the handsome structure at the corner of Dearborn and Adams streets, which they now occupy. In 1875, the brothers bought out Mr. Thayer's interest, and re-organized as The Tobey Furniture Company, with Charles Tobey as president, and his brother as vice-president. Mr. Tobey was married, in 1861, to Miss Van Arman, the daughter of John M. Van Arman, who died in 1872. At the present time he is a director of several large corporations. He is a member of the Union League Club, and on the building committee of the organization.

Frank R. Tobey, vice-president and manager of the Tobey Furniture Company, became associated with the business from which that corporation grew in 1857, two years after it was founded by his brother, Charles Tobey, born in Dennis, Cape Cod, Mass., on September 15, 1833, his father, Jonathan H. Tobey, being a farmer and a descendant of one of the oldest New England families. His mother, Rachel Bassett Tobey, is of French Huguenot ancestry. Mr. Tobey was born on the Tobey farm, which came into the family in 1650. During his early years, Frank remained on the farm. After leaving the home-fool, his first experience was as clerk in a general store in his native town of Dennis, of which village he was assistant postmaster for a term of five years. His partnership with his brother consisted of active practical interest in the firm until 1866, when he retired from the same. In 1868, he formed a partnership with F. Porter Thayer, under the style of F. Porter Thayer & Co., at Nos. 110-112 State Street. In 1870, that establishment consolidated with Charles Tobey. In June, 1875, M. Thayer retired, and, as the chief executive officer of the company, Mr. Tobey has seen its business exceed that of any like institution, the magnificent warehouse at the corner of State and Adams streets being the envy of the world in the West. In 1871, he inaugurated the first in the introduction of model apartments in the city, and was the first to introduce an office for the inspection and selection of furniture. Mr. Tobey is quite well known in the higher grade of charitable and progressive associations, as in social and business circles. Like his brother, he has been a stockholder and director of the Paris and Savings Banks, and has been identified with prominent banking interests. Both have attended St. Paul's Church for twenty years, Mr. Tobey being treasurer for several terms. He is also local member and vice-president of the relief society, under the aus-
pieces of the Society for Ethical Culture, an organization composed of many of our best citizens. His usefulness in this beneficent interest, and his interest in all advanced movements that look to the advancement of the welfare of the general community, are on a par with his business integrity and his high standing as a citizen of Colorado, for which he has added in crowning with happiness, wealth and prosperity.

A. H. ANDREWS & CO.—This house is among the representative and leading furniture manufacturing firms of Chicago. Their manufacture has been increased to seven buildings. Their stock includes office furniture, bank and library fittings, fine brass work, school and church furniture, opera chairs and folding-beds, the latter being a new feature. This company was incorporated on March 17, 1873, with capital stock of $1,000,000, and is wholly taken. The board of directors was elected March 31, 1884, and, subsequently, officers were chosen as follows: A. H. Andrews, president; H. L. Andrews, vice-president; and J. S. Holbrook, secretary. They have retained their respective positions to the present time. On January 1, 1885, they became the successors of Baker, Pratt & Co., of New York.

Alfred Hinsdale Andrews, the president of this company, came from Hartford County, Conn., in 1857, and engaged with George Sherwood, then in the school furniture manufacturing business. In 1865, Mr. Andrews went into business for himself in the old Crosby Opera House, his factory being located at the corner of Washington and Jefferson streets. The buildings were too far west to be included in the list of property destroyed by the great fire of 1871, though the warerooms, at No. 211 State Street, were burned. They were then fire, and a large addition, caused loss of or greater, to the company at various times, but the hopeful disposition, energy and perseverance of the principal member of the firm has surmounted every obstacle and carried the business to success. In the present time the approach time has been surpassed by no establishment of a similar character in this or any other country. The volume of business in 1884 exceeded one and a half million dollars. The company now has five factories, in which are employed over five hundred hands, many of them skilled in their various departments, as draughtsmen, carvers, cabinet-makers, etc. The lumber which they handle is mainly chestnut and mahogany. A description of their large and important building (a large amount to the Pullman Palace Car Company), is obtained from St. Domingo. A considerable proportion of the school furniture manufactured by the company is shipped to Great Britain, Germany, and other countries. (See Illustration. 1.) On the 17th of March, 1884, the three Hayden Brothers sold the interests they had in the business to A. H. and H. L. Andrews, since which time the company has been incorporated.

The ANDREWS LUMBER COMPANY was incorporated on May 26, 1884, under the laws of Illinois, with $100,000 stock capital, for the purpose of dealing in lumber of all kinds. The incorporators were: A. H. Andrews, who was made president; H. L. Andrews, who was elected secretary; and J. S. Holbrook, who was chosen treasurer. The company purchased large tracts of timber land and considerable quantities of timber in Northern Arkansas.

Reuben A. Hitchcock & Co. have in existence a firm under that title since 1873. The enterprise they represent has numerous branches. The Chicago firm, known by the above name, comprises John S. Ford, Henry W. Hitchcock, and Philip C. Derby. John W. Hitchcock and R. A. Hitchcock, both of Chicago, and Mr. Derby of Gardner, Mass. The house was first established in 1861, by Mr. Ford, who began manufacturing chairs at Columbus, Ohio. In 1865, the firm of Ford & Johnson was organized, moving to Michigan City, where Reuben A. Hitchcock joined the enterprise, the firm becoming Ford, Johnson & Co., in 1866. In 1883, they removed to Chicago, their location being on Monroe near Franklin Street, until 1876, when they removed to the corner of Van Buren and Jackson streets, and in 1885 to Nos. 300-306 Wabash Avenue. When the firm came to Chicago, they brought out chairs designed by Mr. Hitchcock, who was the chief projector of this great enterprise. Mr. Derby is an extensive manufacturer at Gardner, Massachusetts, and Mr. Johnson operates the factories at Michigan City, Ind., but all the goods of the firm are manufactured in the state of Indiana. The firm have five factories, and one of these is now occupied by the firm of Hitchcock, who was a member of the firm of Hitchcock, & Co., in 1884, and has since continued to occupy a prominent position in the operations of the firm.

PHILANDER DERBY, member of the firm of J. S. Ford, Johnson & Co., is a resident of Gardner, Mass., and an extensive manufacturer of furniture, one of the largest enterprises in that line in this city entitles him to a place in the history of the industry. Mr. Derby is a native of Vermont, and was born at Somers in 1816. Until he was twenty-five years of age he was employed on a farm, and then began an apprenticeship to the chair-making trade, in the employ of Windsor White, of Templeton, Mass. In 1843, Mr. Derby engaged in the manufacture of Grecian chairs at Jamaica, in 1845 working as journeyman, and later forming a partnership with S. K. Pierce, at which time Mr. Derby visited our city; selling goods when Chicago had no railroads, and he sold them all over this western country. When the firm dissolved, he returned to the chair business under the name of Philander Derby & Hinsdale Hitchcock. Under the name of Hitchcock, & Co., in 1884, and has since continued to occupy a prominent position in the operations of the firm.

John Sharrock Ford, member of the firm of J. S. Ford, Johnson & Co., chair manufacturers, son of Stephen and Euinice Ford, was born at Burton, Geauga Co., Ohio, on September 16, 1831. He graduated from the Academy at his birthplace, having studied with the view of taking a collegiate course, but as a consequence of the move to Columbus, Ohio, his plans were changed, and at the age of sixteen he began business life as a clerk in the employ of D. T. Woodbury, wholesale dealer in furniture, and in February of the same year he left Woodbury & Co., and entered the employ of John Hinsdale Hitchcock, under the name of Hitchcock, & Co., and was afterwards in the employ of Mr. Stage, under the name of Ford, Stage & Co., and upon the death of Mr. Stage, in 1865, purchased the entire control of the business. He afterward conducted under his own name, on Town Street. Forming a stock company, he extended his business, and subsequently sold out to the stockholders, retaining the chair department. He then formed a co-partnership with H. W. Johnson, the firm being Ford & Johnson, and, after disposing of an interest in the business, the firm moved to Michigan City, Ind., in 1868, where they established an extensive factory. In 1872, the firm came to this city and began business, the house here being known as J. S. Ford, Johnson & Co., as distinct from the firm of Ford & Johnson, at Michigan City. Mr. Ford was married, on September 16, 1856, to Miss Sarah M. Starrett, of Columbus, Ohio. They have two children,—Alice M. and Reuben A.

Henry W. Johnson was born at Philadelphia, Penn., in 1834, and his business history is contemporary with that of his partner, John S. Ford, since 1865. Previous to that date Mr. Johnson resided in Sturbridge, O., having been born in that town. He received his education at Hiram College, Portage Co., Ohio, of which institution of learning James A. Garfield was president. At the first call to arms when the War of the Rebellion broke out, he was teaching school in Missouri, and, returning to Burton, O., enlisted as a private in the Union Army, serving through the War under General W. B. Hazen, in the 41st Ohio Volunteers, and coming to Chicago, in 1869, with the rank of major of U. S. V. (of which the rank of major has been since conferred), now a large and important manufacturer, located at 211 Wabash Avenue, and has since continued to occupy a prominent position in the operations of the firm.

Edward F., Helen F., Margaret F. and Alice F. Hitchcock have been a member of the firm of J. S. Ford, Johnson & Co., since 1886, and a resident of Chicago for twelve years. Mr. Hitchcock, who was the son of Hon. Peter Hitchcock, and the grandson of Judge Hitchcock of the Supreme Court of Ohio, was born at Norton, Mass., in 1837. In 1843, he entered into business with the firm of which he was now a member was in 1867, when he was barely of age, and employed in travelling salesman for a year, and, upon the removal of the enterprise to Michigan City, Ind., has since continued to occupy a prominent position in the operations of the firm.

Reuben A. Hitchcock has been a member of the firm of J. S. Ford, Johnson & Co., since 1886, and a resident of Chicago for twelve years. Mr. Hitchcock, who was the son of Hon. secured an interest in the business, and the firm of F. Mayer & Co. was founded, remaining so until 1881, for many years being located at Nos. 332 and 334 South Canal Street. In 1872, the fire that destroyed their establishment and which cost them $72,000, the insurance indemnity being one-sixth of that amount. In 1872, the firm built a large factory at Nos. 300-314 South Clinton Street. In 1881, Mr. Mayer retired, assigned Mr. Mayer's partnership to his brother, Joseph. The firm occupies 88 x 170 feet on Canal Street, and 200 x 170 feet on Clinton Street, and rent a large lumber yard on Lumber Street, buying and carrying on a two years' store, having a dry-hoist in the yard. They manufacture all kinds of cabinet suits, sideboards and bookcases. They employ some three hundred workmen, and sell their goods all over the United States.

Frank Mayer, a pioneer in the furniture industry of this city, and founder of the firm of F. Mayer & Co., has been a resident of Chicago since 1862, and identified with the progressive commercial development of the metropolis for nearly a quarter of a century. There are few men in this line whose business careers have been so fully a measure of prosperity. He has seen the city develop and enlarge, and his own business increase, since the comparative infancy of manufactories in Chicago. Mr. Mayer was born in Bavaria, May 14, 1833. When twenty-one years of age he came to America, and first settled in New York. He was educated in his native country, and learned his trade, that of a cabinet-maker, in Germany. From 1854 until 1862, Mr. Mayer worked at his trade in Ulster County, N. Y., and in New York City, and on May 20, 1862, took up a permanent residence in Chicago, and established himself in the furniture trade at Nos. 332 and 334 South Canal Street. Mr. Mayer had no friends and a bare capital of $200 when he started.

AN SIMMEN, founder of the firm of Simmen & Sebastian, first started in business in the desk manufacturing line, in 1858, although he for many years held responsible positions in this city in his peculiar line of expert proficiency, that of a designer and cabinet-maker. He was born in Hamburg, Germany, in 1827, and learned his trade in his native country. He first located at New York, after his arrival in America, and in 1867 removed to Chicago. For five years he was connected with the Sugg & Beilendorf furniture firm, as a designer and twice started his business for himself, his ventures finally culminating in the present prosperous enterprise of which he manages the mechanical details. In 1862, Larsen & Jorgenson, who occupied the factory now connected with the Simmen & Sebastian establishment, were retired, and the latter was inexperienced in the furniture trade, and sought Mr. Simmen's co-operation. On September 10, 1883, the two formed a partnership, under the firm name of Simmen & Homan, the former assuming almost the entire operation of the business. Shortly afterward Mr. Sebastian purchased Mr. Homan's interest, and the firm was re-organized in 1884. They have offices and showrooms at Nos. 352 and 354 South Clark Street, and a factory employing some thirty men at the corner of Nineteenth and Blackwell streets. Mr. Simmen was married in Milwaukee, Wis., in 1867, to Miss Louisa Poel. They have four children, the eldest of whom, Francis, is trained to the cabinet-making trade.

MICHAEL SEBASTIAN, secretary of the Sugg & Beilendorf Company, at No. 400 Canal Street, and member of the office-desk manufacturing firm of Simmen & Sebastian, has been a resident of Illinois for nearly forty-two years, and has been connected with the furniture industry for nearly the same period of time. Mr. Sebastian was born in Bavaria, in 1826, and when twenty-two years of age sailed for America, first locating at Philadelphia and there engaging in his trade, that of a cabinet-maker. This practical line he followed until 1851, when he removed to Joliet, Ill. Here he started in business, manufacturing and selling furniture, his enterprise becoming a well known addition to the commercial interests of Joliet. In 1868, Mr. Sebastian removed to Chicago, and shortly thereafter became associated with the Beilendorf establishment, following its fortune for seventeen years. His mechanical proficiency and business ability gave him an important position in the business of which he eventually became a partner.

In January, 1884, he joined Mr. Simmen in the business they have operated since that date. His son, Joseph Sebastian, aged twenty-one, is bookkeeper of the firm. He married, in September, 1890, Miss Salina Zips, of Germany. They have one son,—Joseph.

WILLIAM NIEMANN has been a resident of Chicago for forty years, and during that time has been prominently identified in the development of the furniture industry. His long term of citizenship entitles him to an honorable place on the old settler's list, and his busy and useful career is deserving of extended mention as showing of which Chicago's pioneers were made. Mr. Niemann was born in Brunswick, Germany, on June 6, 1821, the son of Henry and Doro Niemann. The former was a preacher in the Lutheran Church, where the son received his early education, and then learned the carpentering trade. At the age of fifteen, designing he served a five years' apprenticeship, during which time service he received not one dollar of remuneration, but graduated as a thorough artisan in his line. He then travelled over Europe and the United States, visiting Europe for six months' sojourn in New York City, Mr. Niemann came to Chicago and settled permanently here, engaging at once in his trade, and working for two years and a half in the firm of Beilendorf & Company, on West Randolph Street. He then started on the same thoroughfare and Peoria Street in a small way, conducting a limited business, having one boy to aid him in turning the wheel of his enterprise, and doing a large business, through his ingenuity was quite an improvement on the machinery of the time. Later, Mr. Niemann removed to LaSalle near Division Street to a larger shop, and afterward, for two years, ran a horse-power establishment on Elm Street, where he united with, and, with Jacob Lauer, operated a six horse-power engine factory at No. 279 Wells Street, where his brother is now located. With Mr. Lauer he formed a partnership under the name of Niemann & Lauer. Mr. Niemann kept the woodroom department, and his partner moving the factory to Halsted Street, the former operating the business for two years. In 1884, Mr. Niemann removed to his farm at Norwood Park, and worked there at the manufacture of furniture until 1886, when he returned to the city and became foreman for Louis Schultz, on Milwaukee Avenue. Here he remained three years, then took charge of the factory as partner of Ulbe & Co., and the Saturday before the fire, built his first factory of the present enterprise on Wood Street. The fire caused a great demand for factory room, and Mr. Niemann sold out to Gerts, Lummbard & Co., for $5,000, and entered into partnership with Mr. W. H. Hopf, of forty years standing, and, then joined the firm of Herold, Lenz & Co., on Erie Street, with whom he was associated till fire destroyed their factory in 1892, building the present factory at Nos. 309-402 North Wood Street, taking into partnership his sons William Henry (who manages the shipping department) and Albert (who is a turner in machine shop), and his son-in-law, Hermann Weinhardt (a partner). The firm has done a large business in the manufacture of all kinds of furniture. Mr. Niemann has been married twice, and is the ancestor of a large and interesting progeny. His first wife was Miss Dora Krieger, of Hamburg, Germany, in 1847, and they have four children living,—Mrs. Louisa Theodore Schultz, Mrs. Dora Fischer, Mrs. Albina Weinhardt, wife of his partner in business, and William Niemann. By his second wife, Miss Mary Hoffmann, Mr. Niemann has four grandchildren, namely, Albert and Emilie. He has eighteen great-grandchildren, who, with their parents, all live in this city. Up to 1857, Mr. Niemann had purchased a large amount of property in and about Chicago. When the reverses of the panic overtook him, he divested all his real estate among his creditors, paying every dollar he owed, and working day and night to sustain an unblemished business reputation. In his later years, surrounded by an affectionate family and possessed of sufficient fortune, Mr. Niemann enjoys the esteem of the community as a man of the strictest commercial integrity, and as a useful and representative citizen, whose forty years' residence has augmented his wealth and his jurisdiction in the business, and who, in the estimate of all, is the oldest furniture manufacturer in business in this city.

HERMANN WEINHARDT, junior member of the firm of Niemann, Weinhardt & Co., manufacturers of furniture at Nos. 309-419 North Wood Street, joined a partnership with Mr. Niemann in 1885, when the present extensive establishment at that place was built. The enterprise, which is under his business management, was founded by his father-in-law, who came to this city in the year 1845. While Mr. Niemann, who is an expert designer and cabinet-maker, and who made some of the first mahogany chairs in the city, attends to the mechanical details of the factory, Mr. Weinhardt has charge of the offices, at No. 243 State Street, whence orders are filled from Texas to Canada, all over the United States, and even from Mexico. The factory employs fifty to seventy-five men, and has an equipment suitable for the production of American furniture. Mr. Weinhardt's business experience is of a high character, was born, in 1853, in Hamburg, Germany. Until he was eighteen years of age he remained in his native town, where he received his early education, studied for America, and after that time sailed for the United States, where he entered the employ of Juergens & Anderson, and had general charge, as bookkeeper, of their jewelry establishment. Here he remained for nine years, and then joined his father-in-law in the furniture business, which was established, in partnership, to Miss Albina Niemann. They have had three children, two of whom are living, Adele and Martha, and one, Hermann, Jr. is deceased.

JACOB BEILENDORF, one of the veterans in the furniture interest in this city, and a representative of that industry whose practical development of the same has kept pace with local prosperity and growth, materially to the growth and success of the city, has been a familiar figure in Chicago's manufacturing operations
for over a quarter of a century. He is the son of Jacob and Johanna (Keim) Beiersdorf, and was born at Pirmasens, in the Palatinate, on April 18, 1872. Jacob received his early education in his native town and attended the Latin school for a term of four years. About to enter the Gymnasium, the National prejudices against his race and unjust persecution drove him from school. In 1848, he began to serve an apprenticeship as a house carpenter and cabinet-maker. He followed this for over three years, and then went to France and Switzerland, and finally returned home. Finding, however, that liberty was still denied to men of his creed, on June 6, 1855, Mr. Beiersdorf removed to the country in which rigid adherence to principle disqualified him for citizenship. On August 20, he reached New York, and on September 8, 1854, took up his residence permanently in Chicago. His first work was as a foreman in house carpenter and cabinet-making in the sash and door factory of Laube & Co., on Canal Street. This establishment he served for only a few weeks, and then opened the building of Stendel & Isadore, at No. 170 Randolph Street. Here he remained until December, 1855, when he started in business in a very small way with Henry Buschmayer as a partner, taking orders for counters, desks and the like, and manufacturing them at the factory leased from Dr. Foster on the lot now occupied by the wholesale establishment of Marshall Field & Co. Here Mr. Beiersdorf did the first fine mahogany work in Chicago, at a date when even common furniture was imported in barrels, making decisions by Mr. Thos. Taylor, architect, among others, and a bookcase for George S. Bowén, which the latter now treasures as a valuable antiquity that also has the merit of artistic construction. Mr. Buschmayer retired from the firm in 1858, and on January 1, 1859, Mr. Beiersdorf removed a block south to Clark Street, where, for two years, his establishment was destroyed by fire, with no insurance. He then secured a factory near Quincy Street, but at the same thoroughfare; later removed to No. 217 Lake Street; thence to 224-56 Randolph Street; here, at 170 Lake Street, where he remained until the ill-fated evening of October 8, 1871. In 1865, Messrs. Beiersdorf, Sugg and Lozier secured a frame factory at 100-05 Canada Street, where a business was started, although entirely independent of the Lake Street establishment, was operated. Both this place and the main store were utterly swept out by the great fire. Mr. Beiersdorf losing personally over $50,000. He then bought another block of two stories, having received aggregate loss of $3,000. Mr. Beiersdorf refused to take advantage of a reduced settlement offered by his creditors, and determined to pay dollar for dollar. To this end he resumed business in a small way at Nos. 209-215 Randolph Avenue a few months after the fire, and soon after moved to Varen Street. In 1873, he secured quarters at Nos. 209-219 Randolph Street, the very day before his recently vacated establishment was swept out by the fire. In 1879 he removed to No. 186 Wabash Avenue, and in 1883 to the commodious structure at Nos. 412-16 Canal Street, where he carried on an extensive upholstering establishment until 1892, when a new factory was built to accommodate the business. Beiersdorf Furniture Company was carried on as a stock company, with Mr. Beiersdorf as president, a new building being erected at the original location of the company. In September, 1884, failing to meet a demand for payment to Mr. J. W. G. Taylor, and, being an expert in wood turning, devoted his energies to the manufacture and repairing of shuttles for the local weaving mills. He had married Miss Jane Spence, who died in 1899, and in 1893 he retired from business and entered the New World. On this point there is still some uncertainty, it being claimed by some that he came to Chicago as early as 1857. I hear this as it may, in July of the former year, Mr. Phillips started a small shop on Canal near Lake Street, running a single lathe by foot power and operating a primitive establishment for jobbing work. Here he remained a year, and then removed to Lake near Franklin Street, adding horse power to his equipment. His sons recall the blind old rackeuse that used to turn the wheel they often rode on, and two of them, John and William, began at that time to learn the rudiments of the business. The shop was moved the following year a block further west, and thence to a lot near Kinzie street bridge, where a large frame factory was erected, capable of giving employment to some thirty men. This was in 1857, the site of the factory being the property later occupied as the North-Western fields, and used for manures. It was burned by fire in 1874, years later a new establishment was built on the corner of Phillips and Green streets, Mr. Phillips purchasing an entire block of ground for his new factory, where he employed as high as a hundred and fifty men. It was after the fire, when the factory was completely out of business, that he was connected with the founder of the enterprise as sole proprietor, though his sons were associated with him in various capacities, under the firm name of Phillips & Co. Mr. James was in charge of the paint shop. The business was almost exclusively chair-making, in which line Mr. Phillips had a very wide national reputation. In 1879, Mr. Phillips died at the advanced age of sixty-eight years, a bachelor from cradle to grave. He left a fortune aggregating nearly two hundred thousand dollars and a will most peculiar in its apportionment of legacies: Three-sevenths of his estate he left to the town of Forfar, Scotland, one-seventh to the Rush Medical College, and the remaining interest
to his sons. Dr. J. P. Ross, Henry Fieblecorn, David Russell and John Marr, his former bookkeeper, were appointed trustees. The factory was operated especially under their direction by Henry Fieblecorn, his brother-in-law and John Marr, as manager. In 1854, the estate was closed up, and the establishment, which had suffered two extensive fires but no failures since its commencement thirty-three years previously, was sold out. Mr. Phillips was the father of seven children; three of whom are now deceased. The three surviving Mrs. Mary, the wife of Thomas Winters; William S., who died in 1857, aged fifty-five; David, who died in 1852, aged seventy; and John, who died in 1851, aged fifty-three. The surviving children are Andrew, the wife of George Oliver, of Milton, aged fifty, and of a tender, aged forty, now a farmer in Nebraska; and James M., aged fifty, still a resident of the city. Mr. Phillips was a man of strong character, of integrity, and his reputation for marked adherence to justice and system. His endowments were peculiar ones, and caused some litigation, but were in harmony with erratic views he entertained. As the western furniture manufacturer of Chicago, his name has been a household word among members of the craft, and his long career, from the primitive stage of the industry to the time of his death, has not been equalled or shared by any living manufacturer, certainly not by any whose birthday reaches back into the past century.

James M. Phillips, the only son of the western furniture manufacturer, John Phillips, now resident in Chicago, is one of the few remaining old families of this city, who came here as a family over forty years since. James was next to the youngest of the family, and was born in Forfar, Forfarshire, Scotland, on June 5, 1835, the son of John and Jane Phillips. When he was eight years of age, his father died, leaving him and his majority helped about the establishment the latter founded, learning the details of the business as an experience solely and not as a trade, although he became most proficient in the finishing department. The factory was destroyed for high enemy and the green room. When Phillips looked after the painting department of the establishment, and continued with the same until its final abandonment in 1854, manufactured, his native country, on two different occasions. More recently he has been interested in the sale of furniture for the firm of Phillips & Liebenstein, of which his brother John, was the founder. The latter was manager of several large cities in the United States, Germany, and up to 1862, Mr. Phillips had accumulated a competency, but his long connection with the trade has given him a business acquaintance he utilizes by occasional brokerage in furniture. He was married, in 1860, to Miss Ellen Stewart, at the home of his brother-in-law, at Allegan, Mich. They have two children, named James D. and William O., the former of whom is engaged in an architect's office in this city. As a member of an old and established family, and himself a long resident of Chicago, Mr. Phillips enjoys a large knowledge of the city's early days, and is a recognized industry in the city his father founded nearly half a century since.

Franklin N. Hanson has been prominently identified with the commercial interests of Chicago for over a quarter of a century, having been one of the first furniture manufacturers of the city, a member of the Board of Trade, and founder and present proprietor of Franklin N. Hanson & Co., a noted household landmark in the West Division since 1855. A biographical sketch of his life furnishes many points of interest, his close association with local business progress constituting him a representative citizen of the personal merit and integrity forming a general system of enterprise that has made Chicago the great metropolis it is to-day. Mr. Hanson was born on August 6, 1832, near the Green Grove, Mount Washington, N. H., and is the son of Joseph Hanson who, with his own hands, made the first opening in the forests where the hotel mentioned now stands. His grandfather Finkham was one of the earliest settlers in that region. It was here he built the road through the notch in the White Mountains, now known as Finkham's Notch, for which work he received a large tract of land in that section. After several years' residence in this picturesque district, these pioneers of New Hampshire, for a mere novelty of their interest in these farms at Lancaster, Coos County, in the same State. There Franklin, with his brothers, worked on the father's farm in the summer and the village school in the winter. This, with a few terms at the academy of his uncle, Daniel, D. Finkham, completes all his educational advantages. At Lancaster, where Mr. Hanson spent his boyhood, his father, mother and grandparents were buried in the family cemetery belonging to the family (consisting of his father, brothers and sisters, their mother having died) at Salem, Mass., in the vicinity of which place they resided for four years, when, with an older brother, Daniel, Franklin came to Chicago, and engaged in the manufacture and sale of furniture. Their first store was at the northwest corner of Randolph and Wells streets, and, later, at No. 74 State Street. The factory of the firm was out on the prairie, where now stands the New England Mills, at Nos. 115-17 West Lake Street. For a number of years the business was a prosperous one, requiring the services of some sixty workmen. By the use of steam power, large quantities of furniture were turned out, and sold all over the West, chiefly on credit. The years 1857- 1860 were exceedingly hard years in every line of trade, and not through the West were numerous, and the firm of D. P. & S. Hanson went down in the general crash, not being able to collect five cents on the dollar of what was due them in the city and country. They sold the factory and property and called the New England Mills. It was in this year that Mr. Hanson became a member of the Chicago Board of Trade. Separating from his brother, D. P. Hanson, he began running the mill in a very small way, until the practice of diligent attention to business and strictest integrity, he soon increased the trade, until the establishment is now one of the principal feed and corn merchant houses of the city. In England kiln-dried corn-meal is manufactured. This brand of corn-meal has been sent into nearly all the hot climates of the world, and never has been known to sour or heat, as meal is sure to do that does not go through this process of kiln-drying. At Mr. Hanson was one of the early members of the Plymouth Congregational Church, having joined it soon after its organization. He has also been a member of the First Congregational Church of this city, and one of forty members of that body who organized the Tabernacle Congregational Church, at the corner of Morgan and Indiana streets, and was connected with their Sabbath-schools as principal, teacher, choirmaster, and superintendent, for twenty-seven years. He is now again a member of the Plymouth Congregational Church, and has charge of the Sabbath-school for two years. Mr. Hanson was married, on September 12, 1859, by the Rev. Dr. William W. Haight, to Miss Mary M. N. Hanson, and before his marriage. Mr. Hanson is regarded as a progressive citizen of the great community whose enterprise and ability, in so eminent a degree, have served to benefit.

Joseph Spiegcl, the founder of the firm of Spiegcl & Co., who operate one of the most extensive furniture establishments in the city, started in that business in 1863. Mr. Spiegcl was born in Bremen, Germany, in 1829, and came to this country at the age of twenty-five years. He is now again a member of the Plymouth Congregational Church, and has charge of the Sabbath-school for two years. Mr. Hanson was married, on September 12, 1859, by the Rev. Dr. William W. Haight, to Miss Mary M. N. Hanson, and before his marriage. Mr. Hanson is regarded as a progressive citizen of the great community whose enterprise and ability, in so eminent a degree, have served to benefit.

John H. Thayer, successor to the W. W. Strong Furniture Company, became associated with the latter corporation in 1868. The history of the enterprise referred to is familiar to the community. The company, which controlled the furniture industry in this city, and controlled a fine line of specialties in the trade. The house was formerly a branch of the firm of Sheeter & Paine, of Boston, from which city Mr. Thayer came when twenty-one years of age, and entered the agency of the Eastern house under Mr. Strong, first as bookkeeper and then as member of the Chicago firm. In April, 1879, the Strong enterprise failed, and Mr. Thayer engaged in business for himself, located at No. 193 Wabash Avenue. In 1877, Mr. Cahn retired from the presidency, and Joseph Liebenstein becoming a partner. In 1885, Albert Liebenstein entered the firm, which is one of the most prosperous in its line in the city.

Charles C. Holton, founder of the firm of Holton & Hil- dreth, and more latterly engaged alone in the wholesale furniture business at No. 224 Wabash Avenue, first came to Chicago in 1863, and has been a resident of this city for many years. As a representative and progressive business man, he has contributed largely to the commercial interests of the community. He was born in 1832, at White Creek, Washington Co., N. Y., a village thirty
ADOLPH STUM, member of the firm of Keller, Sturm & Ehmian, became associated with that house when it was first organized in 1875. He had engaged in wholesale business in New England which, except so far as financial direction and business counsel were concerned, as, in addition to this line of trade, he operates a fancy wood and veneer business at No. 69 West Washington Street. Mr. Sturm, a native of Westphalia, was born in 1823, and worked in a large silk manufactury as well as in a large tannery in Vienna. He came to this country in 1868, since which time he has been a resident of Chicago, and a representative and active member of the business community. In 1879, he commenced to work in the veneer business with T. S. Constantine, on Lake Street, and remained with him to 1872, when he engaged in the veneer business on his own account on West Division Street, purchasing and selling, and made several removals in that neighborhood until 1876, when he came to his present location. He is also connected with the firm of John D. Zernitz Co., wholesale importers of toys and druggists' supplies, at No. 43 Lake Street (since 1873). Mrs. Sturm, born Johanna Schoth, of Germany; they have seven children living,—Arthur, Amanda, Gisela, Irma, Litta, Ernst and Charlotte.

CHARLES EHMANN, founder of the present firm of Keller, Sturm & Ehmian, came to Chicago in 1866, and has been identified with the furniture business ever since. Mr. Ehmian was born in Hesse Darmstadt, Germany, in 1844, and received his early education and learned his trade, that of a cabinet-maker, in a warehouse on the Rhine, in that country. In 1866, he came to Chicago, and for many years operated a furniture factory on Division Street, in the North Division of the city, as Charles Ehmian & Brother. In 1874, he formed the firm of C. W. Betsch and C. W. Ehmian, and has been the head of the trade ever since. He has entire management of the mechanical details of the enterprise, and superintends the operations of the factory. Mr. Ehmian was married on June 5, 1873, to Bertha Mohr, of this city. Her parents were natives of Sweden, and Charles I. Mohr, of Chicago. They have five children,—Frederick, Ida, Amanda, Carl and Adolph. This firm was in the first to make special business in the manufacture of pant and mantel frames. The Betsch & Ehmian Manufacturing Company, manufacturers of parlor furniture, bed lounges and rockers, was founded in January, 1889, by Charles W. Betsch and Henry Rieke, at No. 22 Canal Street, in the back of the present building. The enterprise was on a large scale, the mechanical skill and business enterprise of C. W. Betsch comprising its main capital. In 1882, the firm was merged into the present company, the incorporation being followed, in May, 1885, by a removal to No. 42 Lake Street South (since 1873). This manufactury engages some forty skilled workmen and sells its goods by travelling agents all over the United States. The owners of the company are A. J. Cop, president; Charles W. Betsch, secretary; and Charles W. Betsch & C. W. Ehmian, directors.

Charles W. Betsch, founder of the firm of Betsch & Rieke, and secretary and manager of the Betsch & Rieke Manufacturing Company, into which the former enterprise was merged, has been identified with the furniture business ever since his arrival here, in 1849. His father was a native of Germany, and was born in Baden, in 1824. When seventeen years old he came to America, and since 1846 has been identified with the furniture business. When first here, he was apprenticed to a mechanical trade and became an upholsterer, mastering all the details of that branch of the furniture interest. In 1879, he associated himself with his first partner, and the firm of Betsch & Rieke has been continued since then, and has soon secured a large business patronage in parlor furniture, which has become a representative enterprise in its line. Mr. Betsch was married, in 1854, to Miss Kate Fischer, of this city. They have six children,—Emma, Lydia, Oscar, William, Arthur and Clara.

A. J. COP, president of the Betsch & Rieke Manufacturing Co., was born at Albany, N. Y., in 1847. When nine years old he went to Erie County, N. Y., where, at the age of fifteen, he enlisted in Battery "G," 1st New York Artillery. He served in the same company until the close of the War, when he was mustered out with the rank of sergeant. Returning to New York, he entered the engravings business, and has been a representative of the firm ever since. In 1873, he organized the firm of Betsch & Cop, and was continued, however, the firm remained business at No. 424 Lake Street. In 1872, Mr. Cop withdrew from the firm and went to Burlington, Iowa, where he entered the employ of Todd, Pollock & Granger, furniture dealers, as traveling bookkeeper. On January 1, 1875, he opened a position with the Bloomington Furniture Company of Bloomington, III. In 1882, he returned to this city, and became the president of the firm of Betsch & Cop, which firm was married, in 1874, to Miss Martha J. Kindred, of Sabula, Iowa.

ANSELM LANDAU CROCKETT was born at Claremont, N. H., on October 22, 1817, being the tenth child of a family of eleven children, and was educated in the schools of his native town. He moved to Chicago in 1830, and his descendants have ever proved to be. His father was a builder and furni-
HISTORY OF CHICAGO.

Mr. Scholle was born in Hanover, Germany, in 1841, and coming to this country at the age of thirteen years entered the furniture factory of Robert Mitchell Furniture Company, at Cin-
cinnati, Ohio, largest of its kind in the United States. There he learned the business, and has been identified with the furniture interest since that date. In 1879, he became a member of the present firm, and acts in an important managerial capacity in the furnishing establishment. The firm manufacture all their parlor furniture, and make the Williams furniture in a patent bed-

Theodore W. Buemann became a member of the firm mentioned above at the date of its organization, in 1884. Previous to that time he was, for years, connected with many historic enterprises in the furniture business, and, although he has had a busy and progressive career. He was born in 1858, in Schleswig-Holstein, Germany, and came with his parents to this country when ten years of age, located in Chicago in 1868. When a boy he began a thorough apprenticeship to the upholstery business, by engaging in an unimportant position in the establishment of Hol-
ton & Co. He was also in the employ of Liebenstein & Co. and the Toley Furniture Company. He rose from the start, at one time becoming the head of the upholstery department of the firm. Mr. Buemann attends the office details of the enterprise with which he is now associated, and which makes a speciality of upholstered parlor furniture. He was married, in 1881, to Miss Isabel Lutz, of this city. They have one daughter,—Marie Buemann.

Henry C. Hansen, the junior member of the firm of Keck, Buemann & Hansen, was a resident of Chicago, for four years, and identified with the interest of this city since 1872. Mr. Hansen was born at Milwaukee, Wis., in September, 1855, but came to Chicago with his parents when three years of age. In 1872, he entered the employ of Ansel L. Scholle, then doing business at Madison & LaSalle, and remained with him for about two years. In 1874, he entered the employ of Holton & Co., and, mastering the details of the upholstery trade, in 1880 took the management of the upholstery shop. In 1884, he became a partner in the enterprise now operated at Nos. 90-94 Franklin Street. He has the management of the mechanical depart-
ment of the business, employing some thirty men, and manufactures a fine line of grade parlor furniture, special orders in artistic furniture, and, as a specialty, the family and patent bed-

Frederick Lehmann, deceased, at one time closely identified with the establishment of Mr. Gramer, was a resident of Chicago, for a quarter of a century a resident of Chicago, and his name will be remembered by nearly every old citizen. Mr. Lehmann was a native of Germany, and was born at Colmar, in 1819. He received his education in various educational institutions of his native land, besides learning the trade of millwright. In 1847, he came to Chi-
cago, and two years later was one of the early pioneers who went to California during the gold excitement in that State. There he remained several years, and, learning the art of upholstery, entered into a partnership with Conrad Seipp, and organized the well known firm of Seipp & Lehmann. The brewery they operated at the corner of Twenty-seventh and Johnson streets, was one of the earliest

Newark, N. J. Coming West for his health, and after visiting Chi-
cago, he went to Rock Island, where he remained two years, and,

later, for eighteen years, followed his trade and farming in Bureau County, Ill., and for four years he was resident of that city, being engaged in altar building. In 1879, he came to Chicago, and, with Sebastian Buschert, purchased the pioneer establishment of Anton Buschert. In 1881, the firm of J. Martin Keck & Mr. Gramer dissolved, and the present establishment at the original location, filling out Catholic churches throughout the United States. He is one of the two manufacturers in this line of business in the United States. Germany, having established

and most extensive of its kind in Chicago, and year by year increased its business, particularly after the great fire of 1871, when it was one of the few breweries that escaped the conflagration. Mr. Lehmann died in 1872, his death being lamented by all. The outstanding characteristic of Mr. Lehmann's business interests were carried on by the estate for a year, when the brewery business was abandoned to his partner, Mr. Seipp. Later, his son, Frederick A. Lehmann, managed his large estate, and with the widow still resides in the city. Mr. Lehmann left a family of four children. The eldest, Alfred A. Lehmann is a member of the firm of Cadell & Lehmann, and the youngest child, Emma, is attending school in New York. Two children, George and Marie Lehmann, are now in Europe, where they have completed their education. They are now examining the processes of beer manufacture there, with a view of engaging in the brewing business upon their return to Chicago.

ALFRED A. LEHMANN, member of the firm of Cadell & Lehmann, has been a life-long resident of Chicago and connected with the most progressive interests of high-art furniture and interior finishing since 1885. Mr. Lehmann is the son of Frederick and Marie Lehmann. The son was born in this city on August 1, 1858, and until he was fourteen years of age made his early studies in the schools of Chicago. In 1872, he was sent to Germany to complete his education, and devoted five years to the acquirement of a practical training. In 1878, Mr. Lehmann returned to Chicago, and here continued his studies, making a specialty of a legal course with a view of entering the practice of law. However, he ceased all studies, and in 1885 began the manufacture of fine cabinet work and art fittings for banks, residences offices and public buildings. The firm name was changed to that of Cadell & Lehmann. His business ability and Mr. Cadell's architectural and inventive talents combine to form a most advantageous combination, and the work of the firm has won the highest praise. In 1895, the principal public buildings and private houses in the city and State has gained him a high reputation for exceptional work and marked its members as representative men in the interest with which they are so prominently identified.

The SHAW BROS. has been connected with the furniture interests of Chicago since the early days of the city, and has been directly identified with the practical growth of that industry as a manufacturer and dealer since 1865. In 1855, Mr. Neuberger, a German family and a large circle of sympathizing friends, assumed the management of the firm of Cudell & Heimann and became the partner of Adolph A. Cudell in the manufacture of fine cabinet work and art fittings for banks, residences offices and public buildings. The firm name was then changed to that of Cudell & Lehmann. His business ability and Mr. Cadell's architectural and inventive talents combine to form a most advantageous combination, and the work of the firm has won the highest praise. In 1895, the principal public buildings and private houses in the city and State has gained him a high reputation for exceptional work and marked its members as representative men in the interest with which they are so prominently identified.

Charles Tarnows, a Burmese money dealer, who has been a resident of the city for over thirty years, and became identified with the active commercial interests of the city a quarter of a century since: Mr. Tarnow was born in Germany, in 1831, and came to Chicago when he was twenty years of age. He learned the trade, that of cabinet-making, in his native town. There, after receiving a preliminary education, he served an apprenticeship of four years, when he went to Chicago, and opened a retail store in the city, which he conducted for a number of years. He is a principal member. He manages the shipping and finishing departments, and has a general supervision over the office details. In 1879, Mr. Tarnow was married in this city to Miss Marguerite Olen. He has a large family, and the business firm and integrity have won him an enviable position in the estimation of his fellow-citizens.

KOCIOIEN, the June, was most business native Wendell Sidney, has a 1840, 1845, member tilled that I'.ryant Moore, A. William 1849, Stadt-llernanl maritime furniture, which found the required village, the the business 1875. MI.S In Nos. The this design, MOI erier Miss Gertrude Dillhoff, of Germany; they have three children, Hermann W., a member of the firm; Philip H.; and Emily, now wife of W. M. Taite, of Chicago.

The W. CARRIAGE MANUFACTURE COMPANY was organized and incorporated in June, 1853, with a capital stock of $5,000 and the following officers: William Harper, of Kalamazoo, president; and Thomas G. Lilles, secretary. The management of the organization was the manufacture of water-proofed clothing, awnings, tents, horse and wagon covers, and other articles of a kindred character. Since the incorporation of this company it has widely extended its business throughout the West and Northwest, and is largely represented in the stores of the large cities in those regions.

Thomas G. Lilles was born in Stavanger, Norway, in 1849, and received his education at the public schools of that locality. When he was sixteen he determined on following a maritime life, and left his home and became a sailor, shipping on a vessel bound for Quebec, Canada. After his arrival there he again sailed on a sloop in the slave trade for London, England, going thence to the West Indies, and from there to St. Louis, Missouri. From that port he went to the East Indies, to Madras, and then to Java, from whence he returned to London. He then went to Australia and South Wales, the capital of the viceroy; he was married, and to avoid being implicated he fled; the crew subsequently forsook the ship. He afterward shipped from Sydney to Newcastle-on-Tyne, and from that port made another tour to Shanghai, China, from whence he came to America. This was a man of year, and to avoid being implicated he fled; the crew subsequently forsook the ship. He afterward shipped from Sydney to Newcastle-on-Tyne, and from that port made another tour to Shanghai, China, from whence he came to America.

As a result of this visit he returned to England, and from London shipped to America, and from America again to England in the same year, where he remained to 1857. In that year he was married, and to avoid being implicated he fled; the crew subsequently forsook the ship. He afterward shipped from Sydney to Newcastle-on-Tyne, and from that port made another tour to Shanghai, China, from whence he came to America. This was a man of year, and to avoid being implicated he fled; the crew subsequently forsook the ship. He afterward shipped from Sydney to Newcastle-on-Tyne, and from that port made another tour to Shanghai, China, from whence he came to America.

The sign of the "wagon maker" was conspicuous when Chicago was a village, but the principal work done in the shops of those early days was the repairing of wagons which had been made somewhere else. In 1839, however, such progress had been made that there appeared also signs of "carriage and wagon maker." According to the census of 1840, there were eight establishments of this kind, working thirteen hands, with a capital of $5,000 and a yearly product of $9,250. As firms multiplied, and the country around increased its settlements, the demand for wagons, especially, soon became greater than the hand-labor of the country shops could supply. Then, as the country still more rapidly improved, and the rich soil brought its rewards of prosperity and wealth, came a desire for something better than a lumber wagon to ride in, and the demand for carriages sprang up. The attention of capitalists being directed to this demand, the question arose why these articles were not manufactured in Chicago instead of being brought from the East. The answer is found in the successful establishment of the city. But it required time to accomplish these splendid results. The first shop devoted exclusively to the manufacture of wagons was established in 1843, but, up to 1853, there were a great many more vehicles brought into the city than were shipped out. In 1854, one firm had a capital of $32,000, and employed seventy opera-
tives. It sold that year one hundred and eighty-five carriages, including five which brought from $500 to $800 each, the entire product amounting to $45,000. Another establishment turned out over four hundred wagons and one hundred and eighty-nine buggies and carts. In 1865, as will be seen by the subjoined table, the annual product amounted to $224,170. Between 1860 and 1870, the remarkable increase of seven hundred and fifty per cent. was made in the annual product and in the amount paid for wages.

The disastrous effects of the great fire of 1871 were felt for some years, the product of 1872 being much less than that of 1870. Then came the "hard times," which affect this industry more seriously than any other. It is only when people are prosperous that they buy new and expensive carriages; when they feel the pressure of hard times, they make the old ones answer. In 1875, however, while the number of establishments did not equal those previous to the fire, the amount invested as capital had been increased to $1,400,000, and the annual product amounted to $2,197,000.

The returns for 1880 show a steady growth, especially in the number of establishments, which had more than doubled within the past ten years.

The period ending with 1885 was also notable for the great augmentation in the trade achieved, and in the number of houses engaged in its transaction; and this semi-decade was likewise noteworthy, in the great advance in the beauty and style of the equipages manufactured.

The following table gives the periodic growth of this industry since 1840. The even years, except 1850, are compiled from the United States Census Reports; the others from the local annual revenues.

The report for 1885 does not evidently include many of the smaller establishments, the fact being that there was never before so much money invested in the business, nor so many show houses as in 1885. The dullness in manufacturing generally the past few years has left its impression on this industry as well as others, yet the decreased cost of almost every kind of material has enabled the manufacturers of carriages, buggies and wagons to maintain their former volume of business.

The work done by the manufacturers of Chicago will compare favorably with that of any other city in this country or in Europe. For smoothness of finish indeed, the best work of London is not equal to that of Chicago. As a result of this superiority of workmanship the foreign demand for vehicles of every kind is increasing yearly. Carriages, landaus and buggies are shipped from Chicago, not only to the States adjacent, but to New York City, Philadelphia, California, Oregon and also to Canada, London, Paris and Australia. First-class work of the kind done here will always be in demand, and the higher grade of carriages, such as will bring from $1,000 to $1,500, are always finding customers. The sales of one Chicago firm alone have increased from $50,000 in 1877, to $500,000 in 1885.

STUDEBAKER BROTHERS' BUILDING.

The Chicago Carriage Repository of this manufacturing company is one of the finest houses of the kind in the city. The general offices and factories are located at South Bend, Ind. In a humble blacksmith shop in that town, in 1839, the father of the Studebaker Brothers pursued his toilsome vocation, earning his daily bread and bringing up his boys to a knowledge of the anvil and the forge. Thirty-four years have wrought a great change. The carriage and wagon works of the brothers and the buildings immediately adjacent, cover over thirty acres of land (including lumber-yards, etc., eighty acres); and their wagons and carriages have now, in the broad field of competition, a world-wide renown and have achieved great triumphs wherever they have entered the lists of the World's Industries. At hundreds of local and State expositions many verdicts have been adjudged in their favor. At the National Fair at Chicago, in 1867, they were awarded the first prize for excellence. At the United States Exposition in 1876, they led all the Centennial awards. At the World's Great Fair, at Paris, in 1878, they were awarded the silver medal, and the same by the Mexican Republic in 1879. Thirty-five years ago they were humble blacksmiths; to-day, beyond doubt, they are the largest carriage and wagon manufacturers in the world. They have five repositories in the United States, the one in Chicago being made a leading feature. The members of the company are all residents of South Bend, Ind. Their repository was established here in 1874. Wilbur F. Studebaker, son of P. E. Studebaker, treasurer of the company, is the resident manager, and has been one of Chicago's citizens for about six years. The building now in course of erection on Michigan Avenue, is one of the finest buildings on the American continent, and is a tribute as well to the enterprise of the firm as to our city.

C. P. Kimball & Co., at the corner of Wabash Avenue and Harrison Street, is about the oldest carriage-building house in this country. The business was founded by Peter and Porter Kimball in Maine in 1815, and they attained a good reputation in those early times as skillful builders of carriages and sleighs. In 1838, the business was conducted by J. M. Kimball, and in 1848...
Charles F. and George F. Kimball entered the business, and the name of Kimball Brothers has been well known for more than a quarter of a century as one of the largest carriage houses in the United States. There were six sons of Peter Kimball, all of whom entered the carriage trade, and they, with their fifteen children, constituted a family of carriage builders. On January 1, 1857, C. P. Kimball and his brother, Charles F. Kimball, opened a Chicago house, which at once sprung into favor, and their sales increased so rapidly that five years later they were obliged to seek more quarters. In 1870, when they occupied the building, it seemed at that time a large industry to establish in Chicago,—a carriage house occupying the whole of a building forty by one hundred and sixty feet, and five floors. Now, they occupy a building, three times the size of Washington Avenue and Hanover Street, which is in all respects one of the most complete carriage factories on the continent. It is eighty by one hundred and eighty feet in dimensions, six stories in extent, and contains over two acres of floor space, and is always filled with the choicest and largest assortment of the finest carriages shown in the West. The business of the house has constantly increased, until, in 1884, it amounted to nearly half a million dollars, which places the firm second in the United States in sale of fine carriages. They employ about one hundred and fifty skilled workmen in the mechanical department, some of whom have been with the house for twenty-five years and many for fifteen. A few years ago they began to harness their other business, and they are now one of the leading firms in that branch of trade in the West.

Charles F. Kimball was born in Oxford County, Me., in 1826. His father was a farmer and his mother was a teacher.
successful manner until 1874, when he disposed of the same and carried on a carriage business. He was a fisherman until 1858, to Miss Martha E. Hopkins, of this city. They have four children.—Frederick P., Walter B., Frank B. and Charles K.

The Hitchcock Manufacturing Company, of Nos. 209-213 South Street, are manufacturers of spring carriages, road wagons, also extension tops, park phaetons and cutters of the very latest designs. The manufacture of this company is located at Cortland, N. Y. C. B. Hitchcock moved to Cortland, afterward retired, and commenced business in a small way in 1823. He is a thoroughly skilled mechanic and of an inventive turn of mind, originating new patterns and styles, the products of his shops became wonderfully popular, and the concern has steadily grown under his able management, until today their buildings of gr01, their buildings all being four stories high, giving them over twenty-five acres of floor surface, which is all used in the production of the first-class business which they give employment to over seven hundred men, all thoroughly skilled. They produce annually about five thousand wagons and buggies and twenty thousand cutters, it being without a doubt the largest cutter establishment in the world. Their annual sales are fully commensurate with the superiority of their work and the liberal inducements they are able to offer. Their immense trade in the West has necessitated the establishment of a repository in Chicago, which has full control of the Western trade. The company own their own cars and run special trains in large shipments. The repository was first established in Chicago in the spring of 1884, and placed under the management of K. D. Buckingham, through whose efforts the business has been greatly increased. In May, 1885, Mr. Buckingham associated with himself in partnership N. D. Preston, of Bradford, Penn., and the repository is now under the management of Buckingham & Preston. They occupy a building one hundred fifty feet by sixty, containing them two hundred thousand square feet of floor surface, which is all utilized. They carry a stock varying from $20,000 to $40,000, and do a business amounting to $200,000 annually. The firm are also general western agents and carry a large stock of the products of the well-known establishment of Peters, Calhoun & Co., of Newark, N. J., manufacturers of all descriptions of light and heavy road wagons and turf goods. This department their trade is quite heavy and is steadily growing.

REUBEN D. BUCKINGHAM was born in Chenango County, N. Y., in 1856, and received his education in the De Krayer (N. Y.) Seminary, from which he graduated at the age of twenty. He then was a telegraph operator four years, and in 1880 came to Chicago and assumed charge of the Cortland House, on East Adams Street, which he operated until he took charge of the present repository. In business, as in other relations of life, he is honorable and upright, and treats all with courtesy, winning good opinions and esteem from all.

WILLIAM D. PRICE was born at Madison, Madison Co., N. Y., on February 1, 1842, and received his education in the public schools of that village. In 1853, he went to Fulton, N. Y., and entered the Patriot and Gazette office, and commenced to learn the trade of a printer in 1861. He remained until 1864, when he went to Syracuse and enlisted as a private in Co. "A," 10th New York Cavalry, and served until November 30, 1864, passing through hard service, and being wounded three times—one wound he received was a serious nature. He was a member of his own company, on General Sheridan's recommendation, in June, 1864, and on leaving the service was brevetted lieutenant-colonel of his regiment. After leaving the army, he returned to Fulton, N. Y., and entered the milling business, and afterward, at Syracuse, N. Y., was in the furniture manufacturing business. In 1874, he went into the oil country, making his headquarters at Besford, and for three years was an oil broker. He was a member of the Trusville Oil City, Parker City and Bradford oil exchanges, and is at the present time a member of the New York Stock and Petroleum Exchange. In March, 1885, he left Bradford with his family, and came to this city, his home being Manhattan, commencing on April 1. He was married, in 1884, in Fulton, N. Y., to Miss Annie L. Sanford. They have two children.—Charles E. and Helen G.

PETER D. DRYDEN & Co., of Nos. 71-73 Twenty-second Street, are manufacturers and dealers in carriages, harness, tenders, buggies, light road and delivery wagons; also harness, horse clothing and turf goods. This factory began business in the spring of 1865, and has been in successful operation ever since. In 1882, Mr. Dryden commenced his factory at its present location, and the firm name was changed to E. W. Dryden & Co. This firm carries a stock amounting to about $100,000, and its annual business amounts to over $50,000. Thirty-eight to forty expert mechanics are employed in their shops constantly. The harness department, up to 1883, was owned and operated by William Dahnke & Son, but during that year was purchased by E. W. Dryden & Co., and the two establishments are now operated under one management.

Edward W. Dryden was born in the County of Limerick, Ireland, on September 29, 1843, and came to this country in 1847 with his parents, settling in Canada. At the age of nine years he left his native home, and came to New York State, where he was brought up and was destined to a life of a farmer boy, working on the farm in the summer and going to school in the winter. In 1857, he went to Detroit, Mich., and commenced the carriage maker's trade, serving an apprenticeship of about three years. In 1860 he came to Chicago, and four years afterward commenced to work in different cities throughout the Union, returning to Chicago in June, 1865, and one year subsequently again left, returning in 1876. He then entered permanently into business here, and has since the spring of 1877 in this city, wherein he has been highly successful and through which he has accumulated a handsome property. He was married in 1867, to Miss Huang.

The Western Carriage Repository of Henry J. Edwards & Sons is located at Nos. 201-03 Wabash Avenue. They are manufacturers and dealers in all the latest styles of light carriages, pony phaetons, road wagons, jump-seat buggies, and light harness. The establishment is under the personal supervision of the firm; their eastern repository and manufactory is located at Salisbury, Mass. The works were first established in Syracuse, N. Y., in 1856, and the Western repository in Chicago in 1865; has recently acquired the business in the carriage business. The partnership continued for nine years, until Mr. Dunbar retired, and J. R. Gillman entered the firm, which was known as Edwards & Gillman. At the end of two years, Mr. Edwards bought out Mr. Gillman's interest, and conducted the business alone until 1869, when he sold it to A. K. Randall and came to this city. His first location in this city was at 43 Adams Street, but this was destroyed by the fire of 1871. He was on Michigan Avenue for one year afterward, and since that time has located on Wabash Avenue. In 1868, he associated with himself in business, his sons, George D. and Henry B. Mr. Edwards has been married twice, first to Miss Jennie Dunbar (deceased), at Syracuse, N. Y., by whom he had two sons, his present partners,—George D. and Henry B. He was again married to Miss Metta A. Barnes of the same place; she bore him four children,—Metta B., Lizzie B., Frank H. and Howard J. He is a member of Evans Lodge, No. 524, A.F.&A.M., and Evans Chapter, No. 144, R.A.M.

WILLIAM D. PRICE was born at Syracuse, N. Y., on February 5, 1845, where he received his early education and spent his youthful days. Passing through the public schools, he entered Oberlin College, at Oberlin, Ohio, and afterward the Homestead Medical College. He finally chose medicine, and, however, prior to his entry into business in this city, spent some three years in Colorado; one year as clerk at Trinidad, and two years at Apesta, where he had a ranch, a store, a livery stables and a hotel. He went to New York in 1881, and went into business with his father. He was married the same year to Miss Viola Pearsall, of Irving Park. They have one daughter.—Mina.

Henry B. Edwards was born on January 24, 1861, at Syracuse, N. Y. He received a common school education in that city and graduated from Bryant & Stratton's Business College in Chicago. For five years he was a member of Co. "E," 1st Regiment, N. G., during three of which he was second lieutenant. He has recently resigned from this organization. His life has always been spent at the home of his father, except one year, when he made a tour of the Western and Eastern states connection by the Great Lakes. He was taken into the firm at the same time as his brother.
one year old, his parents moved to near Cazenovia, N. Y., then to Delphi, and thence to Manlius Square, Oneida Co., N. Y., where his education was obtained and he learned the carriage trade. He then established and ran a business for himself for several years at Fayetteville, N. Y., in which he met with more than ordinary success. In the fall of 1867, he came to this city and established himself in partnership on Randolph Street, thence to the fire, and on Clark Street afterward. In 1876, he disposed of his clothing business, and took charge of the Kean & Lines Repos- ition. This firm has been associated ever since. He is a member of Garfield Lodge, No. 86, A.F. & A.M. He was married, while a resident of Fayetteville, N. Y., to Miss Philena P. Good- rich; they have three sons:—Charles, Frank and Edward. The business is conducted by Messrs. Wels and thriving on Clark Street, are manufacturers of carriages, buggies, etc. This widely known house was founded in 1862, by Messrs. Smith & Vonder- kaer, and they were succeeded by the present firm in 1877. Their present office is in the same building, in the city, and has increased in every way since. The works are in constant operation, and bear the name of Smith & Vonderkaer, and the efficiency of the work is evident in every way. The firm is now, after forty years, as large and successful as it was at the beginning. The firm has always been able to pay dividends, and is, therefore, one of the oldest and largest in Chicago, and its trade not only reflects credit upon itself, but also upon the business of the city.

Peter Smith was born in Germany, in 1837, and came to Chi- cago in 1847. He is the oldest in a family of six brothers and sisters. He has spent his entire life in the carriage business, first selling to the wholesale distributors, and later as a retail dealer. He is a member of Emanuel's Benevolent Association since 1863, and chairman of the finance committee for the last eight years.

Peter Smith was born in Germany, in 1837, and came to Chi- cago in 1847. He is the oldest in a family of six brothers and sisters. He has spent his entire life in the carriage business, first selling to the wholesale distributors, and later as a retail dealer. He is a member of Emanuel's Benevolent Association since 1863, and chairman of the finance committee for the last eight years.

Jacob Metzler was born at Naperville, DuPage Co., Ill., on November 19, 1861, and is the son of Dr. Samuel Metzler, one of the leading veterinary surgeons of Chicago and the Northwest. He was educated in local schools of this city, and at the age of eighteen commenced to learn the carriage and wagon maker's trade in the works of which he is now a partner. He was married in this city, on November 19, 1880, to Miss Lucia Metzler, they have two children,—Elyse and Robert.

George Kuhnen, of Nos. 214-16 Superior Street and Nos. 211-13 Huron Street, is the proprietor of the North Side Carriage Works. He manufactures carriages and light running vehicles of all descriptions, in which business there is no establishment in the city that enjoys a higher reputation for first-class work. He gives regular employment to about twenty-five men. His works include two buildings, one 40 x 100 feet, two stories high, and one 40 x 110 feet of the same height. He carries an average stock of about $20,000, and his business reaches $50,000 annually. He is one of the oldest and largest in Chicago, and his trade not only reflects credit upon himself but also upon the business of the city.

Nicholas Kuhnen, of Nos. 215, 217 and 220 Superior Street, is one of the oldest and most prominent carriage dealers and manufacturers in Chicago. He was born in Germany, in 1835, and came to America settling in this city, where he worked at his trade for some years. He then formed a partnership with his brother, Nicholas Kuhnen, which continued until 1872, when it was dissolved, each continuing the business on his own account. He was married in this city, in 1853, to Miss Katherine Stottet, by whom he had three children,—Amelia, Alexander J. F., and Clara, all of whom are still living, though Mrs. Kuhnen died in 1857.

Johnson & Metzler, of Nos. 260-62 Michigan Street, are manufacturers of buggies, carriages, wagons and trucks, the firm being composed of Mats Johnson and Jacob Metzler. The works were established in 1852 by Mats Johnson and were continued by Mr. Johnson at No. 226 Michigan Street. This firm existed for two years, when it was changed to Johnson & Thornquist. The business was continued under this style for about two and one-half years, when it was again changed, and has been continued by Johnson & Johnson ever since. This partnership continued for four years, when Mr. Johnson bought his partner's interest, and up to May, 1883—when the present partnership was formed.—Continued as Johnson & Johnson. The works have been moved several times from the original location, but are now permanently located in a substantial brick building, fifty by one hundred feet in dimensions, with two stories and base- ment, having 100 workmen employed, doing a business of about $16,000 annually, and will always be found in the advance striving to increase their patronage by best serving the interests of their customers.

Matt Johnson is a native of Denmark, born in March, 1839. He received his education in his native place and also learned his trade there, which he commenced at the age of sixteen years, serving an apprenticeship of four years. After completing his apprenticeship he came to America. He spent several months in viewing the country, but in June, 1863, settled in Chicago, and has since that time made this city his home. He has been in his present business for six years, and has now a large and high shop, and offices, and will be found at his shop at 426 Superior Street, where he is conducting a flourishing business.

John J. Hicks—The wagon and truck works of John J. Hicks, at Nos. 1-5 Illinois Street, are among the pioneer enter- prisers of the city. The firm was established in 1850, by Philip Hicks, upon a moderate capital. With the growth of the city, the business of this house expanded, and assumed important proportions. Later, Philip Hicks was succeeded by John J. Hicks, the present proprietor, and a gentleman of unbounded ability and
broad practical experience. The works are large and sufficiently arranged to work in his line. All requisite machinery of the best patterns is provided, and the equipment of the factory is complete, a large number of expert artisans being kept constantly employed. This is one of the largest and most reputable factories in the city, and its proprietor is universally known and respected.

**JACOB PRESS**, of Nos. 62-64 North Halsted Street, is a manufacturer of wagons, buggies, trucks, etc. Mr. Press, who is identified with successful carriage and wagon trade in this city since 1855, commencing work on February of that year for Henry Webber, who is now conducting one of the largest factories in the city. He worked by him for many years and was a journeyman, until 1859, when, in partnership with John Kuhl, he went into business at No. 23 Milwaukie Avenue, the firm being known by the name of Kuhl & Press, under which style it was successfully conducted for eight years, during which time, he was engaged in the wagon business for two years, during which time, in connection with his brother, John, he conducted a multi-liquor restaurant at No. 61 West Kinzie Street. In June, 1859, he commenced business at his present location. The premises occupied by him are a warehouse frontage of forty feet on Halsted Street and one hundred and forty on Fulton Street. The front or main building is forty by fifty feet in dimensions, and two stories high. He gives regular employment to ten men, and does a business that amounts to from $15,000 to $20,000 annually. This is now among the oldest establishments of this kind in the city. Mr. Press has met with success, and has built up a trade that is a credit to himself and Chicago. Mr. Press is married to Ida Hess Darmstadt, Germany, on September 6, 1855. He received an excellent education in the regular schools of that country, and enjoyed the unusual advantage of a thorough military training from his father, who was a wagon-flage builder of the best repute in Germany. In the fall of 1854, his father and mother decided to emigrate to America, and at once started with their family, consisting of seven children, for this country. The father and one son were taken sick and died during the voyage. On December 24, 1854, the surviving members of the family reached this city, which they since have made their home. In the following February, Jacob Press went to work at his trade, and, under the guidance of the wagon-building industry, he acquired a ready and complete knowledge of every department of his trade. He is a member of Germania Lodge, No. 182, A.F. & A.M. He was married on June 7, 1862, to Miss Lizzie Pluss, who came from his native town. They have had nine children,—Louis (deceased), Ida, Lizzie, William, Jacob (deceased), Elvina, Jacob, Mary and John.

**ROSSOW BROTHERS**, of Nos. 128-34 Chicago Avenue, corner of Halsted Street, are well known manufacturers of fine carriages. Twenty-six years ago their business was started in a very circumscribed way. But in a country like this, energy, enterprise and integrity never fail to achieve success, as the prosperous trade bears out the fact. The Rossows are careful to meet all the little details and exemplifies. The stationary wagons and carriages when they compare their small beginning with their establishments of the late nineties, consisting of two large two-story buildings, with basement, one eighty by forty feet, fronting on Market Street, the other sixty by eighty by seventy-five feet, fronting on Washington Street. Attached to rear of latter building is the blacksmith shop, twenty-five by sixty feet, and a wooden building, the engine house, fifteen by forty feet, the lower story being occupied by the blacksmith shop and the upper story, in structures afford them eighteen thousand square feet of floor surface, which they utilize in the prosecution of their extensive business. The company is neatly arranged, and has a complete equipment of all modern machinery and appliances, and an engine of eight horsepower supplies the motive power; from thirty to forty hands are constantly employed, many of them being of long experience and of exceptional skill. The stock carried to fill the requirements of the business varies in value from ten to fifteen thousand dollars, and their business transactions amount to over thirty thousand dollars annually, which, in prosperous years, is sometimes trebled. They maintain arrangements with the most reliable manufacturers, and the products of the works are of the highest quality. The firm was composed of Charles and Frederick Rossow, but since April 1, 1884, Charles Rossow has not given it his personal attention. Frederick Rossow is now active in the business at 34 Chicago Avenue.

**ROBERT HENRY**, member of the firm of Vivian & Henry, carriage and wagon manufacturers, was born in Wisconsin, on January 14, 1836. He was brought up in the wagon-making business, learned the trade, and commenced business for himself in Chicago, in 1863. He was married to Miss Mary Laxon, of Rochester, N. Y., on November 17, 1870. They have two children,—

**STEIN BROTHERS.**—This firm, at No. 693 West Madison Street, is the largest manufacturer in its line, and is composed of Julius W. and Matthias H. Stein. The brothers were born in Hamburg, Germany; Julius W., on March 4, 1861, and Matthias H., on March 3, 1863. In 1871, the brothers, while but two years old, came from Germany to America, and directly to Chicago, each one finding employment.
here. About a year after their advent into this country they entered the carriage works of Jerrett & Sherman, on the corner of Jackson and Franklin streets. In the spring of 1851, they opened a shop for themselves at No. 221 East Jackson Street, where they were engaged on private work and prospered finely. In 1858, they erected the large three-story (one hundred and twenty-four by twenty-four feet) brick building that they now occupy at No. 963 West Madison Street. They employ, on the average, about twenty men, are doing a successful and rapidly increasing business.

Calvin David Tower, member of the firm of S. T. Tower & Co., carriage manufacturers, is a son of Calvin and Ann B. Tower, and was born at Providence, R. I., on July 16, 1832. The family is of English origin, the members of his immediate family having settled in New England in an early day, and finally locating at Providence. When he had reached the age of twelve years his parents removed to Boston, where he proved himself a bright and intelligent pupil in the public schools. Three years later he began business life as an apprentice in the trimming department of Joseph Fray's carriage manufacture, Fourth Street, South Boston, where he remained for four years. At the expiration of his time he travelled through the Eastern States until 1850, when he returned to Boston and worked at his trade six years. He then went to Nashua, N. H., and established himself in business, which he continued until the latter part of 1858, when he disposed of all interests and came to Chicago. In connection with his brother Isaac S., who had preceded him several years, he established their present business at 625 South Clinton Street, where he has since resided. Mr. Tower was married, on December 27, 1857, to Miss Sarah J. Richardson, of Coatbridge, Canada East. They have one child.—Grace E.

WATCHES AND JEWELRY.

Within the forty-five years which cover the period during which most of the branches of trade in Chicago have recorded their beginning and growth, the jewelry trade, no less than other branches, has made wonderful progress. The first record of the jewelry trade appears in 1839, when Smith Jones Sherwood, at No. 144 Lake Street, was a watchmaker and jeweler. In 1845, the number had been increased to three, in 1848 to four, and in 1850 to five, by which time the population had augmented to a fraction less than thirty thousand. In 1855, the number of persons engaged in the trade in Chicago had increased to twenty-four, all retailers; and in 1860, when the population was a little over 109,000, to fifty-four, of whom five were classified as manufacturing jewelers and one silversmith, the six turning out an aggregate product of $600,000.

The beginning of the wholesale trade seems to have been in 1863-64, at which time three firms were advertised as wholesale and retail. Two years later the wholesale trade was represented by nine firms out of the sixty-nine dealers in the business; about twenty were also manufacturing jewelers and silversmiths, their estimated product being upward of $150,000. In 1870, there were thirteen wholesale dealers and one hundred ten retailers, and the volume of trade had become about $2,500,000. The great fire of 1871 prostrated the jewelry business, as it did everything else for a time, but courage and enterprise soon gave to this branch of trade an impetus which carried it steadily forward, until, in 1875, there were about twenty-five wholesale firms—six of them exclusively so—and one hundred and forty-five retail dealers. Four watch companies—including the National, of Elgin, and the American, of Waltham—had in the meantime established branch houses here, and the manufacturing jewelers had increased their business materially. The aggregate trade of the Chicago jewelers for 1875 may be set down at about $4,250,000, as against $3,700,000 for the previous year, while the aggregate capital involved in the business was not much short of $1,000,000.

The increase of the business during the next five years kept pace with the wonderful growth of the city and the development of the great Northwest, so that by 1880 quite an addition had been made to the firms doing an exclusively jobbing business, and the half dozen or so older wholesale houses had begun to rank with those of New York and Philadelphia. The manufacturers of watch-cases, as well as of watches, had also established branch houses, and light manufacturing in jewelry and jewelers' supplies had made rapid progress. At this time the trade was represented by about thirty-five wholesale and one hundred and sixty retail dealers, and eighteen import manufacturers. The volume of trade belonging to the former was about $6,500,000 and that of the retailers about $700,000; this was an increase of about $400,000 for the wholesale and $150,000 for the retail trade over that of 1879.

It was during 1879 that The Jewelers' Journal of Chicago was established by S. M. & W. W. Wilcox in the interest of the growing trade of the city and the Northwest. It has ever since, under the editorship of the latter gentleman, most ably represented its constituency.

During the five years last past the jewelry business has shown fluctuations from year to year, but, on the whole, has made substantial progress. The jobbing trade in watches has become enormous, all the American manufacturers being represented by the trade, and all of the product of the National Watch Factory of Elgin passing through the hands of Chicago houses. The trade in silver-plated ware has also grown to large dimensions, that item alone being now estimated at $1,500,000 annually. A brief summary of the jewelry business for each of the past five years will best show its condition and progress.

For 1881, we find that the number of dealers reported was—

- Wholesale, 42; retail, 150.
- Amount of trade, wholesale, $6,250,000; retail, $750,000; watch cases, $300,000; watch movements, $1,000,000; manufactured jewelry, $300,000; aggregate for the year, $9,700,000.

In 1882, there were of dealers, wholesale, 42; retail, 170.
- Amount of trade, wholesale, $6,850,000; retail, $1,000,000; watch movements (including all of Elgin watches), $5,300,000; watch cases, $1,200,000; sales by clock companies' agents, $750,000; aggregate for the year, $13,100,000.

In 1883, the number of dealers was, wholesale, 42; retail, 178.
- Amount of trade, wholesale, $6,750,000; retail, $4,000,000; watch movements, $4,000,000; watch cases, $1,250,000; clock cases, by agents, $1,200,000; plated ware, $900,000; aggregate for the year, $14,100,000.

For 1884, we find 52 wholesale and 182 retail dealers. The amount of trade was, wholesale, $4,600,000; retail, $800,000; watch movements, $3,200,000; watch cases, $1,000,000; clocks, $900,000; plated ware, $500,000; aggregate for year, $11,300,000.

In 1885, there were in business 60 wholesale dealers and 205 retailers.
- The amount of trade was, wholesale, $5,500,000; retail, $900,000; watch movements, $3,750,000; watch cases, $1,100,000; clocks, $1,000,000; plated ware, $900,000. Aggregate transactions for the year, $13,250,000.

The above estimates will be found to fall short of, rather than to exceed, the aggregate volume of the jewelry trade, inasmuch as jewelers' cases, jewelers' tools and general supplies and optical goods are not included, only so far as these have passed through the retailers' hands or formed a part of the trade reported by the regular wholesale jewelers. There must also obviously be a considerable item of manufactured jewelry, not included either in the sales of the retailers or wholesalers, and not here reported. It is probable that a round half million of dollars might justly be added to the annual aggregates for each of the past three or four years for the above items.

The wholesale business in this city is on a firm basis, thoroughly systematized, and so organized as to protect its interests. As a means of doing this, as well as for the cultivation of a social and friendly feeling
among the members, the "Chicago Jewelers' Association" was formed in 1876, and includes all the regular houses connected with the wholesale trade. The Association has succeeded in fixing and registering a list of horseracing and baseball games, some of which are held in the thousands, and many thousand dollars for the benefit of the Association. It is gradually extending its operations into Mexico, Canada, and other countries.

Giles Bro. & Co.—This extensive jewelry house was established by Charles K. and William A. Giles, in 1860, at No. 142 Lake Street, where they remained until 1871, when they moved to No. 302. After the fire of 1871 they resumed business at No. 122 Twenty-second Street, and while the business portion of the city was being re-built, they opened in the Hutchinson residence, No. 122 Twenty-third Street. At the close of the workmen's strike in Hubbard Park, they re-opened Congress Street, retaining the store on Twenty-second Street as a branch establishment. In the summer of 1873, they built their elegant store, at Nos. 266-68 Wabash Avenue, and occupied it until the following year, when they moved to the building which formerly stood where the dry goods house of Mandel Bros. is located. Fire again caused a change, but business was resumed at No. 266-68 Wabash Avenue. During 1879, they removed to the building at 301 corner of State and Washington streets, which has since been occupied by the firm and Charles K. Giles, present proprietor. This establishment has grown with the population of the city, and from its modest beginning, in 1860, has developed into the largest retail and wholesale jewelry house in the west of New York. Their business extends throughout the United States and Canada, and reaches to the Sandwich Islands and other distant points.

Charles K. Giles, proprietor of the jewelry house of Giles Bro. & Co., is the fourth son of Prescut and Elmina Giles, of Athol, Worcester Co., Mass., and was born on August 2, 1859. His grandfather was among the hardy pioneers who first of all occupied Worcestershire County, and was recognized as one of its most worthy and respected citizens. Mr. Giles spent his boyhood days at home, assisting his father in farming until he was eighteen years old, and then entered a jewelry house of the retail and wholesale line in New York City. He then went to New York, and entered the jewelry establishment of his brother, Frederick Giles, Maiden Lane, where he remained one year. In connection with his brother, William A., he opened a retail and wholesale jewelry store at Prairie du Chien, which was successfully conducted until 1860, when the superior advantages of this city, as a distributing point, became apparent, and he came to this city. Forming a partnership with his brother, William A., he laid the foundation of his present business. In 1882, he purchased the control of the house, and is now sole proprietor. Mr. Giles was married, on March 25, 1873, to Miss M. C. of Washington. They reside in a house situated at 1634 North State Street.

Eliza Morris, vice-president of Giles Bros. & Co., is a native of Wales, Great Britain, and was born in 1838. When he was thirteen years of age, the Morris family emigrated to America and settled in New York. It is that State that he means when he says that the term implies, as he has made his home in this city for about thirty-five years. He was the son of a prominent family, and is the only survivor of the family. He was trained in the principles of the brotherhood of jewelers, and after serving his apprenticeship, and then took a salesmen's position with the firm, with which he remained until their retirement from business some years before the great fire. He afterward took a position with W. M. & John B. Mayo, jewelers, with whom he was connected until 1890. In that year he became connected with Giles Bros. & Co., and has since that time been identified with that well-known house. In 1883, upon the withdrawal of E. A. Giles, Mr. Morris was elected vice-president of the company and still retains that office, as well as holding an interest in the business which was obtained upon the formation of the incorporated company in 1883. Mr. Morris is one of the oldest jewelers in the city, and a member of Blaney Lodge, No. 271, A.F. & A.M. His firm was organized in 1837, and has been continued by three generations of the family. He was married to Miss Jennie 1. (Mrs. Charles J.) of Chicago, and has two children.——Edward W. V. Farwell & M. Steward; and Annie B., now Mrs. E. E. Carr, of Wisconsin. On June 15, 1857, Mr. Morris was wedded to Miss Jennie E. Manahan, of Chicago, and has three children.——Harry E., now living. This lady died on July 17, 1870, and in June, 1872, Mr. Morris married Miss Harriet Safford; they have two daughters.——Hattie and Edna.

James V. Ridgeon, secretary and treasurer of Giles Bros. & Co., was born in New York City. He entered the business at an early age, and remained there, and during his boyhood studied at the public schools, but finished his education at an academy at Nazareth, Penn. In 1872, he came to Chicago and took a position in the office of Morton, Cole & Co., with whom he remained for five years. He was then tendered a responsible position with Giles Bros. & Co, which he accepted, and held for a period of fifteen years, since 1882, when the firm became a stock company. Mr. Ridgway secured an interest in the business and was elected secretary and treasurer, which office he holds up to the present time. Mr. Ridgway was married on July 25, 1857, to Miss H. R. of Chicago, and has three children.——They have two children.——Helen and Philip. Mr. Ridgway is a member of Blaney Lodge, No. 271, A.F. & A.M.

Jurgens & Andersen—This firm of manufacturing jewelers was established in 1857 by George Jurgens and Peter Anderssen. During the early part of that year Mr. Jurgens was engaged in the jewelry business, in connection with his father, at No. 117 Washington Street, in the rear of the house built by his father, Mr. Andersen, taking Mr. Andersen into the business, their quarters were enlarged and occupied until the great fire of 1871. In a few days after that event, a large barn was rented on Eldridge Court, and their entire stock of jewelry was removed there to work. They removed to Jackson Street and Washington Avenue. In 1876, they moved to their present location, at the corner of State and Madison streets. They are the largest manufacturers and wholesale dealers in jewelry in the city, and are widely known throughout the West.

Paul Jurgens was born at Oldenburg, Holstein, Germany, on September 19, 1834. His father was a member of a jewery firm in Oldenburg which had been doing business over three hundred years, and the occupation of the family for generations had been that of jeweler and watchmaker. Until thirteen years of age Paul Jurgens remained in his native city, learning the trade, and then entered the Polytechnicum, graduating in 1848. At that time the revolution of his province against the Danish Government took place, and he joined the popular army of General Bonie, whom he served until near the close of the revolution. In 1850, the family moved to country, landing at New York on October 25, and shortly afterward entered the employ of Meyer, the jeweler, at No. 117 Lake Street, with whom he remained one year, when he engaged with Cooper & Fisher, of Amity Place, until 1854. Paul Jurgens then came to this country. After a prospecting tour throughout the West, he returned to Chicago, and opened a shop at No. 77 Lake Street, in connection with the establishment of Isaac Spear, then the largest jeweler in the city, where he remained two years. In 1857, he formed a partnership with Sebastian Andersen, and removed to No. 115 Lake Street, where they stayed until the fire of 1871. Three days after the great fire they rented a barn on Eldridge Court, and resumed business with twenty-five employees. The next year the firm moved to the corner of Jackson Street and Washington Avenue, where they remained nearly five years, when they removed to their present location at the corner of State and Madison streets. Mr. Jurgens was married to Miss Augusta Kruger, of Chicago, on October 23, 1861, and has five children.—Mary, Emma, Frederick W., Anna and Hannah.

Eugene Drouet Anderson, another member of the firm of Jurgens & Anderson, was born at Tondern, Schleswig, Germany, on August 2, 1827. He attended the public schools of his birthplace until sixteen years of age, when he entered the employ of Joseph Hansen, a manufacturing jeweler of that city, and from 1845 to 1847 he went to Hamburg, and while there the revolution of 1848, of his province against the Danish government, awoke his sympathies. He enlisted on the popular side, and participated in the events which, when the increase of his sympathies, he returned to Hamburg and resumed work at his trade. In 1845, he came to this country, and remained in New York until 1857, when he went to Chicago and formed a partnership with Paul Jurgens, his present associate, and with him began the wholesale jewelry business. He married the sister of his associate, Miss Carolina Jurgens, in 1854, and has two children.—Julius and William.

Calter Clapp, a member of the firm of Clapp & Davies, wholesale jeweler, was born at Montgomery, Vt., on March 28, 1834. His ancestors were among the English families who first settled the New England States, his father's brother, Joel Clapp, being the first white child born in the old settlement. Joel Clapp came into this country. He spent his boyhood days, until sixteen years old, at home, and attended the district schools. Having secured an excellent common school education he went to Clinton, New York, to learn the business of his brother, William B. Clapp, jewelers, then located on the corner of Fourth and Vine streets. His industry and business ability, in three years, were rewarded by a half-interest in the business from his brother. On his brother's marriage, Mr. Clapp and his brother came to this city, and started in business, under the old Clapp and Bro. On February 18, 1871, the firm was reorganized, and moved to a new store, Nos. 140-144 Main Street during the following year. He sold his interest in the business to his brother, William B., and Otto Young in 1876, and the next year resumed business at No. 104 Clinton Street. Two years later he formed a partnership with
Both of these gentlemen are well and favorably known to the trade, and it is to their reputation and judgment that the company owes its success.

Edward R. P. Shurly, president of the Shurly Manufacturing Company, was born in Cambridge, England, on January 27, 1829. When he was eight years old, his family came to this country, and after a year or two in New York City, they moved to Baltimore, Maryland, and then went to New Philadelphia, Ohio, where they remained one year, afterward settling in Buffalo, N.Y. He attended schools for a few years, where he entered the employ of H. O. Hood, jeweler of that city, with whom he stayed one year. Upon returning from St. Catherine’s, Canada, where he made a short stay, he engaged with C. H. Goodrich, and remained with him seven years in the jewelry business with C. W. Baugh, having purchased the store of his late employer. Two years later he secured his partner’s interest and continued the business with his brother, C. J. Shurly, until 1861. He enlisted in the New York Infantry Volunteers in the spring of 1861. He was a member of the 26th New York Infantry Volunteers, in which he served two years, participating in the engagements of Bull Run, Slaughter Mountain, Thoroughfare Gap, second Bull Run, Antietam, Fredericksburg, and others. In the last-named battle he was severely wounded. He became captain in the Veteran Reserve Corps, and was transferred to the 18th United States Infantry Volunteers. In 1864, he was stationed at Camp Douglas, and all of the papers, documents, and other matter concerning the conspiracy to liberate the Confederate prisoners passed through his hands. In 1866, he was relieved from the military service. He returned to Chicago in 1866, and resumed business at No. 693 Clark Street. After the fire of 1871, he opened a jewelry store in the Sherman House, upon whose being burned, he removed to the dwelling house at No. 13 Maiden Lane, where he remained until 1868, when he located at Dubuque, Iowa, and organized the firm of E. A. Giles & Co., wholesale and retail jewelers. His health failing, he sold out his interests and traveled to Europe, where he formed a new business and became a member of the company which he now represents as secretary and treasurer. Mr. Giles was married, on January 20, 1861, to Miss Lucy Margaret Shurly, of Little Rock, Arkansas, and has two sons—Frederick M., and Edwin T.

Edward A. Giles, secretary and treasurer of the Shurly Manufacturing Company, was born in New Salem, Mass., on August 13, 1829. Until he was twenty-eight years of age, he attended the public schools of his birthplace and graduated from the New Salem Academy in 1861. He was among the first to respond to President Lincoln’s call for troops at the beginning of the War, and enlisted in the 27th Massachusetts Infantry Volunteers. He saw active service for three years, and participated in the engagements of Rousone, Newburn, Little Washington, and others of the same campaign. Upon his discharge, he returned to New York City, where he went into the close lines of the jewelry business, and was located at No. 13 Maiden Lane, where he remained until 1868, when he located at Dubuque, Iowa, and organized the firm of E. A. Giles & Co., wholesale and retail jewelers. His health failing, he sold out his interests and traveled to Europe, where he formed a new business and became a member of the company which he now represents as secretary and treasurer. Mr. Giles was married, on January 20, 1861, to Miss Lucy Margaret Shurly, of Little Rock, Arkansas, and has two sons—Frederick M., and Edwin T.

J. B. Storey, of the firm of J. W. & J. B. Storey, was born in Philadelphia, on February 18, 1838. When he was three years of age, the family removed to Hartford, Conn., and there he remained until he was twenty-one years old. His education was obtained at the Easton Academy, and when he was eighteen years old he apprenticed himself to the jeweler’s trade and became a first-class watchmaker and jeweler. In 1856, he located in Chicago. On January 1, 1859, he opened a jewelry store on Clark Street, opposite the Sherman House, remaining there for three years. Mr. Storey can well establish his claim of being among the oldest jewelers in Chicago, as there were few stores of this kind here twenty-five years ago. In 1863, he made a business of fitting and furnishing military equipments, such as swords, pistols, saddles, harness, and regimental goods generally. This he continued throughout the War, and was also transacting business on the Board of Trade. In 1867, he opened a private bank for the purchase and sale of securities, loans, financial negotiations, etc., and this business he continued at the same time at No. 57 Madison Street. In 1874, Mr. Storey formed a co-partnership with C. B. Shurly, and the firm opened an elegant jewelry house at the corner of State and Randolph streets. This is now one of the leading and best-known houses in the city. In 1856, Mr. Storey formed a co-partnership with E. A. Clarke, under the title of “The Reliable Furniture Company.” They erected a fine three-story building at No. 1349 State Street, placed in it a large stock of furniture, and commenced a business which has gradually grown to considerable
proportions. The business to which Mr. Storey devoted the greater part of his life was in the wholesale and retail furniture business, owned by J. W. & J. B. Storey, the senior of the firm being the father of the subject of this sketch. This was established on October 20, 1879, and owing to the infirmity of the father, the management fell to his son, and he continued it successfully for nearly twenty years. In the great fire of 1871, Mr. Storey lost everything but his credit, and with this as his backing he re-opened his private bank on Clinton Street. Securities of all kinds were greatly depreciated and his claims and dealings in the brokerage business, which proved very remunerative and soon placed him on a sound financial basis again. Mr. Storey has now for over forty years been engaged in his lifetime, and it is owing to his wisdom, shrewdness, and enterprise that he has been so successful. He was married, on April 30, 1864, to Miss Sarah E. Shippen, of Chicago.

Augustus Edward Shafter, member of the firm of Chandler & Shafter, wholesale jewellers, No. 172 State Street, and residence No. 133 State Street, was born in Brandis, Bohemia, on August 28, 1851. When he was three years of age his parents emigrated to this country and located at Racine, Wis., where he remained until twelve years old, during which time he attended school. He came to this city in 1863, and spent two years with various parties, chiefly with the Chicago Tobacco Works. In 1866, he engaged with Charles Wendell, No. 87 Lake Street, wholesale jeweller, with whom he continued until 1873, and at the end of that time began business for himself in the retail trade, at No. 246 West Madison Street. At the expiration of a year and a half he closed out and engaged with Kearney & Swartzchild, wholesale jewellers, No. 172 State Street, and remained in the business until 1884. He then formed a co-partnership with D. D. Chandler, and under the firm name of Chandler & Shafter has since been in the wholesale and manufacturing business. The firm of Chandler & Shafter is located at No. 106-108 State Street. The firm has been continuously in business for over forty years. The firm of Chandler & Shafter is widely known throughout the West, and both members of the firm are held in high esteem by the trade as reliable and thorough going business men, who opened the first establishment in the city devoted exclusively to wholesaling jewelry. Mr. Shafter was married, on July 9, 1878, to Miss A. Marie Kitt, of Chicago. They have three children,—Olive G., Ethel M. and Eugene A.

Theodore Kearney,—Theodore Kearney, the senior member of the firm of J. B. Chambers & Co., jewelers, was born on March 14, 1819, in Sharon, Litchfield Co., Conn., the son of George and Currence (Johnson) Chambers, of Yorkshire, England. His early education fitted him for the occupation of school teacher. As a "Yankee Schoolmaster," and as a student of law and music, he passed the years of his early manhood. In 1843, his career was changed, and he moved to Tompkins County, N. Y., where he married to Alice F. Reynolds, of Groton, and was engaged for about thirteen years in mercantile pursuits at Ithaca, N. Y. In 1857, he arrived with his family in Chicago, and engaged in the auction and commission business at No. 110 Kan- dan, later moving to No. 74 Kan- dan, from which he started in the wholesale jewelry business. His business was a wholesale jewelry business, though the auction sales were continued for many years. In 1868, the firm secured the location they now occupy, at the corner of Clark and Madison streets. They were obliterated by the fire of 1865, and temporarily removed to No. 61 West Madison Street, but in 1873 moved back to their old store, where, for over twenty years, they have done a jewelry business second to none in Chicago. Beverly R. Chambers, born in California, and sons of J. B. Chambers, born in this city, are members of the firm; and Ava W. Farwell, born in 1827, wife of ex-comptroller John A. Farwell, is his daughter. J. B. Chambers died on January 15, 1886, and B. R. Chambers died in April, 1886.

Theodore Kearney and Samuel Swartz- child entered the firm of Wendell & Hyman, jewelers, as junior partners in 1856. The place of business was then at No. 95 Lake Street. In May, 1870, these two gentlemen purchased the material and tool department of the firm of Wendell & Hyman, and opened a store on their own account on the second floor of No. 115 Lake Street. In 1870, they added a machinery manufacturing department, of which they were among the first in the Western part of the United States, and they successfully carried on business until overtaken by the conflagration of October, 1871, in which they suffered total loss. They re-opened at No. 439 State Street on October 20, 1871, and continued until the following 4th of July. Pike Building, corner State and Monroe streets, they occupied rooms there, moving in November, 1872. After five years' increasing trade at No. 172 State Street, they moved to Nos. 113-15 State Street. In 1882 the firm removed to the present store, Nos. 133-35 State Street. The firm remained the same during all these years, until January, 1882, when Theodore Kearney died. In 1881, a complete line of watches and jewelry was added to the business.

Theodore Kearney was born in County Sligo, Ireland, on No- vember 2, 1840. His father, who was a farmer, moved to Oswego, N. Y., the following winter, and began operations as a salt dealer.

In those days (1830-41), British emigration to America was generally made by way of Quebec and Montreal. When but ten years of age Theodore Kearney was for seven months a scholar under A. G. Wilder, at the Kinzie School. He left school, and began work at the ship carpenter's trade for Miller & Doolittle. Three months later, he tried a short time in a general store, and after five months' work, that taught him that he was out of his element, he found employment with Louis Nolan, a jeweller at No. 95 State Street, where he remained five years. This was in 1856. He remained with Mr. Nolan for three and a half years, when receiving a good offer from William A. Hendriu, he engaged with him for a year. Before the expiration of the time a business opportunity opened for him at Ch. Bloch, where he remained five years, and had an experience with James Wilson, in Belvidere, induced Mr. Kearney to undertake business for himself. In 1857, Aurora, Ill., held out such attractions that he and George Bement opened a store. This was the beginning of the present business of the firm in 1879. The following year Mr. Kearney was in Chicago again, and was salesman for George W. Stevenson & Co. for the following eight years, until 1858, when he took up business for himself as herein before stated. Mr. Kearney was married, in 1860, to Bridget E. McDonough, daughter of John Melody, of Waukegan, Ill. They have had four children—Devin, Charles E., Theodore and Frank.

H. Muh's Sons.—The house of H. Muh's Sons, of Philadelphia, Pa., was established in 1840. They manufacture the crown-filled cases, rings and locks, for which they have become celebrated over the entire United States, and are doing a very important business in these specialty cases, In any establishment where they are manufactured, and have in all the large cities branch offices, presided over by their agents. The partners of the establishment remain at home. In charge of their Chicago branch, at room Nos., 200 to 204, is Theodore A. S. Kaiser, a son of the late gentleman, S. Kaiser, who has been connected with the wholesale jewelry business for the past seventeen years.

S. Kaiser was born at New York City, on May 29, 1853, where he attended the public schools. At the age of fifteen he graduated from the high school, corner of Twenty-third Street and Fourth Avenue. He then began his business career as clerk in the employ of the jewelry house of Bloch Bros., No. 4 Madison Avenue, with whom he remained nine years. Then he went to H. Muh's Sons, where he has since remained. On March 15, 1881, he was married, in Chicago, to Miss Jennie Kohn. They have one child,—Sylvia. Mr. Kaiser is a member of the Merchants' and Standard Clubs of this city.

Frank Lewald, of F. Lewald & Co., wholesale jewelry merchants, was born in New York, on September 20, 1854. During his infancy his parents removed to 1325 15th Ave., Wis., where he remained until he was fourteen years of age, during which time he attended the public schools. In 1868, he came to this city and entered the employ of E. Devere, who was carrying on painting, clock, and watch business, at 115-17 Broadway. In 1873, he went to Lewald & Co., C. E. Weber & Co., on South Water Street, and for ten years continued in their employ. In 1883, he went to St. Louis and began the jewelry business on his own account, at No. 211 Fourth Street. At the expiration of five years he sold his business to F. M. H. & Co., and re-opened business at No. 135 Madison Street, under the firm name of F. Lewald & Co. His success may be attributed to characteristic energy and persevering effort which have won for him a position of the first rank in the trade. He was married, on March 7, 1883, to Miss Bertha Kohn, of Rock Island, and has one son—Clarence. Mr. Lewald is a member of the Ideal Club and of several charitable institutions.

Seth Thomas Clock Co.—Machines for measuring time date back to the early part of the 18th century. Since then, invention has worked great changes. The first American clocks are said to have been made by Seth Thomas, who manufactured them for the trade in 1813, at Plymouth, Conn. The American Clock Company was organized on January 1, 1865, in New York, by E. C. Hine and Seth E. Thomas, for the purpose of putting a machine on the market of clocks of different styles, and the company used the name Seth Thomas Sons & Co. Soon after the organization of the company these companies had manufacturers only of different styles of clocks. In October, 1865, at No. 115 Lake Street, the American Clock Company established their Chicago house, with W. F. Tompkins as agent. They continued at No. 105 Lake Street, after the great fire of 1871.

After the fire, in which their combined loss was $70,000, they re-opened at No. 170 State Street, remaining there until January 1, 1874, in the spring of that year they removed to No. 121 Lake Street. The American Clock Company decided to go into liquidation on January 1, 1879, and use the year 1879 to settle up their business. After 1879, the different companies carried on their own interests respectively under their own managers. Mr. Tompkins, as manager,
represented the Seth Thomas Clock Company at No. 170 State Street. This company is a corporation organized under a special act of the Connecticut Legislature.

Mr. T. A. CHENSLIN TOWNS, manager of the Seth Thomas Clock Company, was born at Bristol, Conn., on August 24, 1829. His education was begun in the public schools of his native town, where he applied himself assiduously to his studies until he was seventeen years of age. In the wholesale and retail merchandising establishment of Mr. Welch, of Bristol, with whom he remained three years. The following year was spent in the employ of Mr. J. A. Pond, of Chapel Street. In 1860, he was engaged by the American Clock Company in their New York department, until October, 1865. He then came to this city in the interest of that company, where he remained until 1872, since which time he has been connected with the Seth Tompkins Clock Company's Western branch. The latter concern was established at Thomaston, Conn., in 1817. It is one of the oldest companies in this country, and is probably the most widely known clock company in the world. Mr. Towns was married on May 2, 1852, to Miss Julia M. Cook, of Cheshire, Conn.

WILLIAM HENRY SMITH, western manager of the Terry Clock Company, was born at Adams, Mass., on April 35, 1858. His education was begun and finished at his native place, where he remained until twenty years of age. He first entered commercial life in a retail store in Pittsfield, where he staid two years, then transferred his business, where he entered upon the employ of the Terry Clock Company. Through close attention to business and energetic industry, he attained his present position, and is recognized as a business man of unusual ability. The company he represents is the oldest of its kind in the United States. The Terry, or order brothers, made their first clock in 1792. It had a brass dial, silver washed, with his name engraved upon it, and still keeps accurate time, being now in possession of the estate of his late grandson, James Terry, of Terryville, Conn.

In 1875, the Ed Terry, also entered the employ of his father in the business. They both learned their trade as clock-makers. During the next five years, clocks were manufactured by others at Waterbury, Winsted, Litchfield and Bristol, Conn.

GLASSWARE, ETC.

French, Potter & Wilson, importers and dealers in crockery, china, glassware, etc., is an offshoot of the original Boston house, established there in 1832, by Abram French, who continued at the head of its affairs until his death, which occurred in February, 1854, at an advanced age. In May 157, the branch house was established in this city, under the name of A. French & Co., with William O. Chapman as resident partner. Their first place of business was at No. 337 Washburn Avenue, where they remained two years, when they moved to Nos. 101-103 on the same thoroughfare; from there, went to the northwest corner of Wabash Avenue and Washington Street. At this location the business assumed proportions necessitating their seeking larger quarters. In December, 1853, they removed to their present location, in the Taylor Building, northeast corner of Wabash Avenue and Washington Street. In this connection having retired from the firm of French, Potter & Wilson was formed by W. A. French, Edwin A. Potter and W. Herbert Wilson.

Mr. French is a son of the original founder of the house, and resides at his father's home in the historical section, having since been the property of that famous writer, Peter Parley.

Edwin A. Potter was born at Bath, Maine, in 1832 and is the son of William Potter and Cornelia (Gilmore) Potter. His grandfather, William Potter, was a native of Georgetown, Maine, born July 16, 1765, and died May 30, 1831, and was a son of John Potter, who was born in Rhode Island in 1738, his death occurred February 11, 1792, at Georgetown, Maine, William, the father of E. A., was twice married; first to Jane Mary Morse, of Fitchburg, Maine, in March, 1733, and by whom he had one child. His second marriage was to Farnella Gilmore, daughter of John Gilmore, of Maine; from this marriage the children were all of whom are yet living. Edwin A. being the second child of this marriage, was early given a business training, in connection with his father's business of lumber and ship-building. In 1792, when the business was transferred to Fitchburg, the Pot-ter now has a charming home and family, at the suburb of Kenwood. In October, 1873, he married Harriett A. Berry, daughter of Colonel Alfred Berry, of Georgetown, Maine. They have three children,—William Chapman, Edwin and Gertrude.

Ovington Bros. & Ovington, This firm is composed of Theodore T., Edward J., Edward J. Jr., and Charles K. Ovington. The business was commenced in Brooklyn, New York, by Theodore T. and Edward J. who are parents of the other two members of the firm. About thirty-eight years ago, the father of these two gentlemen was obliged to take a stock of china and glassware on a debt, and in order to amuse his son and occupy his time, he allowed them to open a store and dispose of the goods. At this period the great Brooklyn fire swept away nearly everything in the crockery line except their establishment, and this resulted in a demand upon them to fill away, that forced them into the trade which has been regularly kept up. In 1872, they concluded to open a branch firm in Chicago, and each interested a son to commence business here in a small way, while the others continued in the New York house. First opening on West Madison Street, they then moved to the South Side in 1875, and in 1886 took possession of their newly fitted up quarters at No. 145 State Street, occupying the entire building. They now own none of the buildings in their line of trade, and are doing an immense wholesale and retail business.

Theodore T. Ovington, a son of Charles K. Ovington, was born in Brooklyn, New York, and is the present owner of the house of Ovington Brothers, crockery merchants of Brooklyn, New York, and also occupies the same relation to the firm in Chicago. This house is one of the oldest in Brooklyn.

Edward J. Ovington was born at Brooklyn, N. Y., in 1856, and educated in that city. He left school at the age of fourteen, and entered the crockery business with his father, in which he has since been continuously engaged. He is connected with the house of Ovington Brothers, Brooklyn, N. Y., and is also interested in the Chicago house.

Edward J. Ovington, Jr., member of the firm of Ovington Brothers, of Brooklyn, New York, was born in New York City, and since the opening of this house has held his position as partner. He is the father of Edward J., Jr., and is a native of the house and has given up the same line of business. The importance of Chicago led the New York firm to establish the young man in the West, that they began their career, besides giving them the benefit of their experience.

Edward J. Ovington, Jr., was born in Brooklyn, N. Y., in 1855, and was educated in that city and entered the store of his father at an early age. He remained in Brooklyn until 1876, when he came to Chicago, and has since that time supervised the business of the firm. He has seen the enterprise grow from a small establishment to a mammoth concern, having a selection of goods creditable to any city, and occupying one of the finest stores in Chicago, with every appliance for convenience adopted in modern business, and located in the heart of the business district, a great metropolis. He was married in 1880, to Miss Mary Barnes, of Brooklyn, N. Y., and has three children,—Earle, Raymond and Edward.

GeorgeBohner & Co., manufacturers and jobbers of lamps, glassware and chandeleirs. The pioneer wholesale house in the above line of business in this city was that which was established in 1863 by N. P. Merrill, now retired from active business life, though still a resident of Chicago. When Mr. Merrill opened his house, which was located at No. 71 Randolph Street, the trade was very limited—a few barrels of oil and a few dozen lamp chimneys and burners being considered a good day's business. Since then the city has grown from a few towns to the great city of 500,000 people, and has given rise to the production of good manufacturing in this metropolis. He is married in 1880, to Miss Mary Barnes, of Brooklyn, N. Y., and has three children,—Earle, Raymond and Edward.

Prior to 1821 there were no hanging extension lamps, such as are now to be found in nearly every home, and none were put on the market until Mr. Bohner brought out his invention—"Bohner's Patent Library Lamp." From his device has developed the great variety of library lamps now to be found all over America. Prior to the fire of 1857, Mr. Bohner sold out to Eaton, Maguire & Co., and they were succeeded by Eaton & Brown. On January 1st, 1871, the firm became Brown & Bohner, the members being H. S. Brown and George Bohner. The firm of George Bohner & Co. succeeded them in 1875, since which time Mr. Bohner has had exclusive management. In the great fire of 1871 Mr. Bohner was completely burned out at No. 71 Randolph Street. They immediately resumed business in one of the lake-front shanties at the foot of Van Buren Street, at the rear end of their store projecting out over the "basin" of the lake. Later on, the store was removed to the business district, and the premises are now located at Nos. 55-57 Wabash Avenue. The house employs forty persons, and does a business aggregating $20,000,000 a year. The firm is essentially one of which is not to be diminished by the fact that Mr. Bohner & Co. are unsurpassed in variety, beauty, and originality of design, and the reputation of the firm is the highest.

PATENT MEDICINES.

11 E. BUCKLE, manufacturer and dealer in patent medicines, was born in Herkimer County, N. Y., on July 19, 1848. His education was completed at the New York State Academy and at Bryant
& Stratton's Commercial College in Chicago. In 1850, he moved to Elkhart, Ind., where he lived and worked for sixteen years, as a druggist's clerk and a druggist. He came to Chicago in 1857, and was married in the same year to Miss Bertha E. Redfield, daughter of Hon. George Redfield, who was State Senator, and State Treasurer for Michigan. They have two children. Mr. Bucklen is the proprietor of four patent medicines in which he does a very large and successful business. — Dr. King's New Discovery for Consumption, Coughs and Colds, Dr. Bunte's Arnicas Salve, Electric Bitters, and Dr. King's New Life Pills. He also prints a newspaper called the "Druggist," devoted to "Health, Business and Science," to advertise his medicines, and also expends, annually, about one hundred thousand dollars with the leading newspapers of the United States and Territories, setting forth the excellent qualities of his wonderful remedies.

Theodore Noel, proprietor of the celebrated natural remedy, "Elixir Vite," is a native of Niles, Michigan, and was born on July 3, 1840. His father, Dr. William T. Noel was a Virginian by birth and was lineally descended from the Huguenot stock; his mother, who is still living at ninety-two years of age, is from one of the oldest and most respected families of Virginia, and is related to the descendants of the pioneer settlers of Jamestown. In 1853, the family removed to San Antonio, Texas, where young Theodore continued in school until his fifteenth year, when he left home to seek his fortune. After having been engaged in several vocations he became an agent for "Audubon's American Fowls," "Appleton's American Encyclopaedia," and other works of similar character, and in a twelve month received $22,000 in commission. With these proceeds he established himself at Galveston, Texas, in the publishing trade, which he continued until 1861. Notwithstanding he voted the Republican ticket, and was in full sympathy with the political principles emanating from the old Whig party, he, with thousands of others, rather than to be stigmatized as a traitor to his State, friends and family, was induced to join the Confederate flag. He served under General Sibley in New Mexico and Arizona for some time, and subsequently was attached to the secret service and signal corps until the war closed. He participated in fourteen battles and thirty-two skirmishes, and was wounded six times. During the war he was army correspondent for the "Galveston News," and the "Richmond (Tex.) Enquirer," and when released from the service he published a volume entitled "From Sante Fe to the Mississippi," which detailed the operations of the Confederate Army in the Southwest, and was a success as a literary work and from a financial standpoint. The next four years were spent raising cotton and cane on a plantation in Southern Texas with great success, which he relinquished to engage in publishing at Waco, where he remained until 1876, when he came to Chicago as the representative and manager of the Texas Land and Emigrant Association. He disposed of his property in Texas for lands in Utah and Montana, and established a paper, "The American," in this city, in the interest of mining and internal improvements. Mr. Noel was first to introduce the mineral substance "Elixir Vite" to the public, which has become famous as a remedy throughout the world. Mr. Noel was married, on January 12, 1864, to Miss Harriet S., daughter of Judge Harris, of Brazoria, Texas. They have one child,—Joseph R.

CONFECTIONERS.

BUNTE BROS. & SPOCHER.—In making a careful review of the various commercial branches and manufacturing industries which have materially aided the metropolis of the Northwest, many establishments worthy of special note can be found. Among the prominent houses of Chicago is Bunte Bros. & Speicher, manufacturing confectioners. This firm has been in business but a few years, but in a comparatively short time they have built up a trade that is truly wonderful, placing their goods with success in States where no other Chicago manufacturer in this particular branch of trade had ever thought of venturing. This firm was established in 1876, and was first located at No. 416 State Street. Cramped quarters soon compelled a change of location to No. 83 Market Street, and at the time of their removal, in March, 1885, to Nos. 72-74 West Monroe Street, they were also occupying Nos. 79-81 on the former thoroughfare. Two hundred hands are employed, many of them of long experience and exceptional skill. The trade of the house now extends into every State and the majority of the Territories, and amounts to over $500,000 annually. This firm was the first in Chicago to introduce their products in Eastern cities, and met with heavy competition from the manufacturers of New York and Boston. But Messrs. Bunte Bros. & Speicher, as well as other Chicago manufacturers who have since entered the Eastern market, found they could more than compete with those cities, and have built up a large and increasing trade. The firm is composed of Ferdinand Bunte, Gustavus Bunte, and Charles A. Speicher.
Charles A. Spehr was born at Greepingen, Germany, in 1841, and was educated in a commercial school at Stuttgart. He came to America, in 1867, and settled in Philadelphia, residing in that city for two years. He came to Chicago in 1869, and until the outbreak of the Civil War served in the United States Navy. He then engaged in different enterprises in this city, being identified with John Kranz's establishment from 1871 to 1876. He was married, in 1881, to Miss Johanna Bunke, of this city, by whom he had one son. Contrary to the popular belief, Mr. Spehr did not die in the spring of 1882, after marriage. Mr. Spehr was married again, in August, 1884, to Miss Frida Bauerlein; they have one son,—Herman.

Mark, of Nos. 214 and 216, 6th and Kinzie Streets, is a manufacturer and wholesale dealer in confectionery. This business was originally established in 1855, by J. B. Hennegnau & Co., which was afterward N. Crickard & Co., of which firm Mr. Dawson was a member. Mr. Crickard died in 1878, and Mr. Dawson succeeded to the business and formed a partnership with M. Shields, the firm being known by the style of Dawson & Shields. The history of this house is wonderful, as a fitting commentary on the unprecedented progress of the city. The products from his factory have attained a reputation for pure and prime excellence on their own merits, exceed those of the South, West, Northwest, and also many of the best in a vast business for the same, until the transactions of the house now amount to over $100,000 annually. The premises now occupied are of a convenient and spacious arrangement for the business, consisting of two large brick buildings, forty-five feet by forty-four, and one hundred feet deep, four stories in height with basement, giving him twenty-two thousand five hundred feet of floor surface, which he now uses in the prosecution of his extensive business. Mr. Dawson was born in Ireland in 1845, and came to Chicago with his parents in 1852. He received his education at St. Mary's of the Lake private school, destroyed in the fire. Mr. Dawson entered his father's business, in which his father died in 1876, at the age of twenty-live, as clerk, next as bookkeeper, and now sole proprietor. Success has attended him, and to-day he stands in the front rank of our wholesale merchants. He is a member of the Union Catholic Association, of the Irish-American Club, and is secretary of the National Confectioners' Association.

John C. Neemes & Co., manufacturers and jobbers of confectionery, are located at Nos. 28-24, Michigan Avenue, at 103-45 State Street. They have been in business in Chicago for twenty-live years. This house was founded in 1853, by C. W. Sanford, and in 1867 the style was changed to C. W. Sanford & Co., John C. Neemes, now the senior member of the house, at that time entering the firm, Fred A. Neemes was located at 212 State Street, after the fire, business was resumed at the corner of Lake and Pearson Streets, and in 1873 was removed to its present location. The house now occupied are four stories and basement, one hundred and fifty feet in length, and 80 x 124 feet in width, giving them 75,000 square feet of floor surface, which they now utilize in the prosecution of their extensive business. When operations were resumed, George E. Hill purchased the interest of Mr. Sanford, and the house became known as Brooks & Neemes. In 1879, Mr. Brooks withdrew from the house, and the present firm, consisting of John C. Neemes, Mark S. Van Deusen and William Leimert was organized. Industries, enterprise, and conducting their business upon the most elevated plane of integrity, the firm have inspired confidence in trade and attracted custom. They have built up a reputation, as mentioned above, and on the merits of their superior goods have extended their trade from contract limits until it now reaches from the Eastern States to the Pacific Coast and the Gulf of Mexico, their transactions amounting to over $600,000 annually, and are constantly increasing.

John C. Neumes was born at Poultney, Vt., and there he received his education and spent his boyhood days. He came to Chicago in 1857, and in 1868 became a member of the house of which he now is the senior member. He and his uncle, W. J. Neemes is a good looking and genial gentleman, as befits his trade, and is respected socially as well as commercially. He was married in 1862, and has four children, daughter, Miss Helen May, Grace M. and John C.

M. E. Page & Company, located at Nos. 207-13, Lake Street, are manufacturers of confectioners and wholesale dealers in confectioners' supplies. This house was established, in a small way, by Mr. Page, the entire space occupied by him at that time for offices, store-room and factory being only a few feet front and forty-five feet deep. The history of this house, and its wonderful growth, is a fitting commentary on the unprecedented progress of Chicago. The firm has extended its trade until it reaches from the Eastern States to the Pacific Coast and Gulf of Mexico, and amounts to over $1,000,000 annually. The premises occupied by the firm are commodious, convenient and specially arranged for the business. The factory has a complete equipment of the most modern machinery and apparatus, the largest amount of which was invented, designed and built under the supervision of Mr. Page. Engines of two hundred horse-power supply the motive power, and three hundred hands are employed. The stock carried to the fire estimated at over $200,000, twenty-five tons of material being daily used. For years Mr. Page gave his unremitting personal attention to the business, and now requires the additional help of his partner, R. P. Patterson, who became a member of the firm in 1874, and with whom Mr. Page has been connected with the business for about twenty-five years.

Milton E. Page was born in Maine, in 1852. His father, Samuel J. Page, one of the earliest settlers, lived in Wisconsin, in 1852, and died in 1863. The son was reared and educated in this city. In 1868, Mr. Page was married to Miss Dora St. George, a native of Milwaukee and a descendant of the St. George family. She died on January 24, 1885, leaving five children.

Milton E. Page, Jr., now in the employ of his father; Walter Henry, Laura O., Albert G. and Frances Virginia.

PAPER BAGS.

Godfrey & Clark, of No. 120 Lake Street, are manufacturers of, and wholesale dealers in, paper and paper flour-sacks, and carry red and grey express, manilla, hardware and rope papers as specialties. Successful from the start, this popular house was established in the city of Van Buren, in the State of Alabama, in 1862, and for a few years after this time they were in business in New Orleans with a small capital. In 1872, they established one of the largest houses in the State of Alabama, in Birmingham, and after a few years had acquired a large business. The firm made the first step to the West, and located in Chicago, in 1883, on the corner of Van Buren and Jackson Avenues, in the city of Chicago, and after a few years had acquired a large business. The firm are in the business of making and selling paper bags, flour-sacks, flour-bags, paper sacks, paper flour-bags, flour-sacks, flour-bags, paper sacks, and paper flour-bags. They have a large and extensive manufacturing interest, and are constantly required in the different departments of the Chicago house to conduct it properly. They especially cater to the millers' trade direct, making a specialty of the celebrated Godfrey & Clark double satchel-bottom paper flour-sack, which can not be excelled by any house in the country. The long standing and prominent of this firm for making good stock from the best of materials, and the high rank they have attained in the trade during the ten years years gives them a leading position in the trade. The Chicago house has a complete printing office for printing labels on flour-sacks, the machinery being entirely new, their ink the most brilliant colors, the lines beautifully drawn. The paper bags are of the best grade in the market and are in demand in all parts of the country.

The Union Bag and Paper Company was first organized as a private house by Francis T. Wheeler and J. Hinman in 1866. It was then located on LaSalle Street near South Water. In 1873, a new building was formed, consisting of 120 State Street, and W. E. Hale, under the firm name of Wheeler, Fisher & Co. After the fire they did business at Nos. 107-109 Lake Street for about five years. In 1878, Mr. Fisher bought out Mr. Hale. In 1891, a stock company was formed, with the firm name of Wheeler, Fisher & Co., with a capital of $50,000. This was subsequently increased to $255,000 and in July, 1882, to $500,000. From 1876 to 1878, the product of the factory was at Nos. 53-55 Michigan Avenue. During that year, at the corner of Third and Wabash Avenue, they erected a substantial six-story brick building, 75 x 100 feet, all the first floor of which is occupied by the factory and the remaining floors are used for stock and offices. Wheeler & Fisher erected a substantial six-story brick building, 75 x 100 feet, all but one floor of which is occupied by the factory and the remaining floors are used for stock and offices. Wheeler & Fisher erected a substantial six-story brick building, 75 x 100 feet, all but one floor of which is occupied by the factory and the remaining floors are used for stock and offices.
cuts, dries and counts at the rate of three hundred bags a minute. The shipments of the company go all over the world. Francis T. Wheeler, its president, came to Chicago from Madison, Wisconsin, in the spring of 1866 and in October of that year established this business. This was his first independent business enterprise, and how great a success he has made of it, is told by the foregoing statement of facts. L. G. Fischer, Jr., secretary of the company, has contributed his energy and business ability toward bringing about these flattering results.

NOTIONS, TOYS, ETC.

The notion trade in Chicago was for many years conducted as a feature of the business carried on by the dry goods houses and drug stores, coming under the general designation of fancy goods. It was not until 1833 that the notion and toy trade began to be considered as a distinct branch of business, four establishments at that time giving attention mainly to this variety trade, though not then, or for two or three years afterward, doing so exclusively. In 1855, the firms devoted for the most part to this trade numbered ten, and, in 1858, eleven. In the latter year, one house—Vergho, Ruhling & Co.—commenced the wholesale business in connection with the retail. From this time the wholesale trade steadily increased, while the retail business kept pace with the growth of the city. Thus we find, by 1860, some dozen notion and toy stores, of which three or four had a very respectable wholesale trade. In 1865, the number of stores had reached a total of forty. Of these, three confined their wholesale business to toys proper, and six others to the wholesale trade in notions. During the five years following, the growth of the population seems to have justified the existence of sixty-five general notion and toy stores in 1870, while fifteen were devoted to the wholesale trade, a few of them exclusively. Two years later, the latter had increased to seventeen and the former to one hundred and two. The aggregate trade being estimated at not far from $400,000. By 1875, the business was represented by twenty-two wholesale and one hundred and sixteen retail houses, some of the latter in combination with dry goods, etc. With the wonderful impetus given to all kinds of business by the growth of the population in Chicago from 1875 to 1880, the notion and toy trade had increased so rapidly that, in the latter year, two hundred and eighty notion and variety stores were found doing a retail business, and thirty-five firms were engaged in this branch of the wholesale trade, some of them in connection with other lines. The estimated value of the entire trade for 1880 was $900,000. The business, especially among retailers, has shown a large increase since 1880, no less than 385 stores, great and small, being devoted to this particular trade as retailers, and thirty-six ranking as wholesalers in 1885. The business of the latter year is meared by an aggregate of about $1,200,000, fairly belonging to the legitimate notion and toy trade of Chicago. During the past five years the manufacture of toys, mostly wooden, and of toy furniture, has grown to considerable proportions in this city, being represented by four or five establishments, with an aggregate capital of about $250,000, and producing, for each of the two years 1884 and 1885, about $600,000 worth of goods.

Vergho, Ruhling & Co.—This house, now one of the oldest and best known of any in this branch of trade in the West, was formed here in 1855, by Charles Vergho and Adolph Ruhling, under the present firm name of Vergho, Ruhling & Co. Their first place of business was at the corner of Dearborn and South Water streets. They remained at that location until 1869, when they moved into one of the new buildings which had been erected at No. 154 Lake Street, that portion of the block on Lake Street between Dearborn and Clark having been visited by a big fire on September 15, 1859. Here they continued until the great blaze of October, 1871, in which they were burned out, sustaining losses amounting to $250,000. Notwithstanding their reverses here, however, two weeks later saw them re-established in business on the Lake Front, and (with the exception of a wonderful diminution of stock) doing business the same as though no fire had ever occurred. In the summer of 1871 they removed to 133 and 135 Wabash Avenue, where they remained until 1885. Their business having greatly increased, they were compelled to seek larger quarters, which they found at the corner of Wabash Avenue and Madison Street. In this connection, and as evidencing the remarkable growth of the business of this house, it may be of interest to state that in 1855 their total sales did not exceed $50,000, and even these figures were reduced considerably a few years later, in consequence of the panic of 1857; however, their annual receipts have steadily increased, while the territory covered by their sales extends over the entire West and Northwest. The house of Vergho, Ruhling & Co., is the oldest in its line of trade, having been in existence longer without a change of firm name and style than any other house in the West.

Charles Vergho, its founder, was born in Bavaria, Germany, in 1830. His parents were Benedikis and Josephine (Herrog) Vergho. He came to Chicago in 1852, and was for three years engaged in banking. In 1855, he founded the house of which he is still the head, and which ranks among the very foremost of Chicago's commercial institutions. His uncle, Mr. Louis Vargus, M.D., of Chicago. They have three children,—Agnes, Ida and Charles; another son, Herman, is dead.

Adolph Ruhling was born in Hanover, Germany, in 1821. He was engaged in clerking for several mercantile firms in Chicago from 1850 to 1859, when he came to Chicago. He went to Milwaukee, remaining there for one year, returning to Chicago in 1850. He then clerked for Urlich & Stettler, dealers in fancy goods and notions on Lake Street, and in 1855, when he and Josephine married, he established the above house. He married Josephine Haack, of New York City; they have four children,—Herman, Adolph, Fritz and Gustav.

OILS.

The P. C. Hanford Oil Co.—The firm to which this corporation became successor was originally established in 1861, by O. P. Chase and P. C. Hanford, under the name of Chase & Hanford Co. They were then located at the corner of LaSalle and South Water Streets, and business steadily developed from a small beginning. In those days petroleum products were four or five times higher in value than at the present time, and the five years' business of the firm showed a volume of about $200,000 annually. Prior to the great fire of 1871 the firm removed to the corner of South Water Street and Wabash Avenue, and in that location in 1872 they re-built their burned-out block. In 1875, Mr. Chase withdrew and Mr. Hanford purchased his interest, changing the name to P. C. Hanford & Co., the company however being nominal. During the succeeding years the business developed wonderful, and Mr. Hanford, declining the active management of the firm, and thus bring to his aid the monetary assistance necessary to properly carry on such a large business. In 1883, the P. C. Hanford Oil Company was organized with a capital of $500,000. P. C. Hanford was elected president, Albert E. Hutchins vice-president, and Stephen N. Hard secretary. These gentlemen are all active in the management of the business, each having many years of experience in the oil trade. They are wholesale dealers in all grades and kinds of illuminating and lubricating oils and such goods as are handled in the general paint trade. They also carry and handle large stocks of turpentine and rosin, and in their line are probably the heaviest operators in the West. Their barrelling works at Englewood have a capacity of one thousand barrels a day; and at Milwaukee they also have a branch, where an average of about five hundred barrels per diem are handled. The company owns the building in which its city offices are located, Nos. 54-55 LaSalle Street, and carry heavy stocks there at all times. They are direct buyers, and have all the facilities for handling oils. The business is of the most renowned character, the annual transactions reaching the sum of $5,000,000.

Hanford, Hall & Co.—This firm was organized in 1854, and became successors to the business of the Chicago Linseed Oil Company. The firm is composed of Mr. P. C. Hanford, in the general management of the business being in charge of the last named gentleman. The mills of the company are located at Grand Crossing, III., and have a working capacity of fully one thousand bushels of linseed per day. They manufacture everything that comes under linseed products, and do a business annually of over $500,000. Twenty-five persons are employed in the works. Since the mills have come into the hands of Messrs. Hanford & Hall they have greatly increased the volume of business.
HISTORY OF CHICAGO.

Lyman Blair, deceased, was born at Cortland, N. Y., on November 19, 1815. After receiving a common school education, he started out in the world to shift for himself at the age of nineteen. He came by canal to Buffalo, and thence by steamer to Detroit. The trip across the State of Michigan to St. Joseph, and thence to Michigan City, was made partly by wagon and partly on foot. There he expected to find his brother, Chauncey, but he was disappointed. Unable to get employment in Michigan City, Mr. Blair came to Chicago, and was no more fortunate. He then proceeded to Milwaukee on foot, but finding no work, returned to Michigan City, where he secured a place in a hardware store, receiving his board as compensation. Subsequently he became a dry-goods clerk in the same town. In 1837, he took charge of a store which his brother Chauncey had purchased, and not long after became interested with him in the business as a partner, the firm name being C. B. & L. Blair. The firm prospered, and in 1862 Chauncey removed to Chicago, and he was followed by Lyman a year later. He soon became a member of the Board of Trade, and in a few months realized a handsome profit from the sale and purchase of grain. About that time Mr. Blair became connected with the firm of Jones & Culbertson, then quite extensively engaged in the packing business. In 1856, Mr. Jones disposed of his interest in the business and the firm of Culbertson, Blair & Co. was formed, and was continued for nearly a score of years, when the commission firm of Blair & Blair was established. Mr. Blair was a member of the Tollestont Shooting Club, and was preparing to make an expedition to the shooting grounds of the club, in November, 1855, when his gun accidentally exploded in his hands, and he was almost instantly killed. Mr. Blair left a widow and three children,—Mrs. Cyrus Adams, Miss Mamie, and Lyman Blair, Jr. Deceased was a brother of Chauncey Bulky Blair, president of the Merchant's National Bank; of William Blair, and of Mrs. Crosby and Mrs. E. W. Densmore.

WALTER CASS NEWBERRY was born at Waterville, Oneida Co., N. Y., on September 23, 1863, and is a son of Anna P. and Cornelia P. (Longshore) Newberry. He received an academic education, and entered into business as a dealer in hops—the staple product of his native county—succeeding his father in the trade, who died soon after Walter had attained his majority. Mr. Newberry prospered in his business, and attracting the attention of his uncle, Oliver Newberry, in Detroit, he was offered and accepted a partnership interest with him in the shipping house of O. Newberry & Co. When the War of the Rebellion came on, Mr. Newberry volunteered his services, and joined the 51st New York Volunteer Infantry, and went to the front as a private. In May, 1862, the company to which he belonged had the misfortune of losing their gallant captain; but Mr. Newberry, then a lieutenant, was equal to the occasion and assumed the position, and a short time afterward was created captain by General George B. McClellan. In 1863, he was serving on the staff of General Negley at Gettysburg, and on account of his bravery and splendid services in that memorable battle, he was made major of the Twenty-fourth Cavalry, and, in the same year, became lieutenant-colonel. His honors did not rest here, for, in 1864, he was commissioned colonel of the Twenty-fourth Cavalry, and, in 1865, he was brevetted brigadier-general, and confirmed as such by the Senate for distinguished services at Hillsborough County, Virginia; where he was wounded nine days before the surrender of General Robert E. Lee. In July, 1865, General Newberry was mustered out of the Army, and laid aside his sword to re-enter the peaceful life of a civilian. After a few years residence in Virginia, where he served as superintendent of public property of the State, on the staff of Governor Walker, for four years, and as mayor of the city of Petersburg, he removed to Chicago in 1876, and re-entered his old business in hops, malt, and brewers' supplies, in which he has continued to the present time, having built up a large and extensive trade. General Newberry is prominent in military circles, and numbers his acquaintances by the score, all of whom have the highest respect and esteem for him. He is an active member of the Iroquois Club and interests himself in democratic politics in his ward and the city. General Newberry is a nephew of Walter L. Newberry, whose name is perpetuated in Chicago's history by reason of his magnificent bequest for a public library; he also represents a portion of the non-resident heirs of his uncle's vast estate. As a citizen and business man General Newberry is as useful and valuable as he was when a soldier, and he commands the highest respect and greatest confidence of all classes of men.

FREDERICK TUTTLE, one of the early residents and business men of Chicago, and well known to nearly every prominent business man here, is a native of New York, having been born in Onondaga County, on October 26, 1808. He was brought up and educated in the East, and resided there for some years after attaining his majority. On January 3, 1836—fifty years ago—Mr. Tutt- le landed in Chicago. He at once became identified in business life by becoming a part proprietor in the stage line—then known as the Western Stage Company—which ran between this city and Detroit, Mich. He continued thus engaged until 1842, when, with his brother, Nelson Tulle, he opened a general store at what is now known as No. 68 Lake Street. Mr. Tulle continued engaged in general merchandising for four or five years, and then, with Jeduthan Brown, became proprietor of the American Temperance House and afterward of the first City Hotel in Chicago. Brown & Tulle continued in the management of the City Hotel until 1853, when they took a lease of the Sherman House. They kept that until 1857, and while there they were highly successful. Mr. Tut- tle then became a special partner of the hardware firm of Tuttle, Hibbard & Co., the successors to whom is the present firm of Hibbard, Spencer, Bartlett & Co. Since 1857, Mr. Tulle has not been actively engaged in mercantile life, he having wisely placed
the greater part of his fortune in real-estate, which, with the growth and development of Chicago, has so increased as to make him one of our wealthy men. When the law establishing a Board of Police Commissioners was passed in the city when the close of 1860, on February 22, 1861, honored Mr. Tuttle with the appointment as one of three commissioners. He served a short time, and then resigned in a few months, but for many years has been a stout member of the Rosehill Cemetery Association, and is now president of the same. He was married, on August 6, 1846, to Mrs. Mary M. Norton, of Chicago. They have one son, Frederick E. Tuttle. Mr. Tuttle is a hard-working man, and has prospered. He was the original member of the Calumet Club, and for many years has been a leader of the Old Settlers' Society. He resides in a handsome house on Michigan Avenue, near the Calumet Club House, and at the latter, his favorite retreat, he meets the acquaintances of "broad hang sung," and makes the best of the many honors which have been showered upon him in years, and has been president of the Calumet Club for many years, and is still a member of the same. John Wesley Daane, president of the Merchants' Loan and Trust Company, was born at Thompson, Windham Co., Conn., on March 23, 1833, and is a son of Joel and Elvira (Heasle) Daane. Mr. Daane was reared and educated in the Nanticoke State, receiving such advantages in learning as the common schools could give. When twenty-two years of age he determined to come West, and upon arriving here rented a small store and commenced merchandising. He had but little money, but adopting the rule of small profits and quick sales, he was soon enabled to conduct a larger business on his small investment. Endowed with the faculties of practical science, he gradually increased his business year by year, and soon became one of the foremost wholesale grocers in the Northwest. He worked hard and unremittingly, and the business, which, in 1856, was insignificant, had been brought up to such immense proportions, as in 1870, that the store was doing $1,000,000 per annum. In the great fire the house of J. W. Daane & Company sustained immense losses, but their credit was of the best, and with the assistance of Eastern friends they were soon established again. During the fire Mr. Daane was so constantly and fully engaged in the business that he could not take the time to pay visits to those whom he had considered as friends. When the fire occurred he was among the first to arrive on the scene, and could not be induced to leave, but worked day and night, and was thus far characterized the career of the senior member, the firm set about to retrieve their losses, and in a short time the house was again in the same commercially prosperous condition. In 1872, Mr. Daane disposed of a large interest in his business to Messrs. Towle and Roper, and then engaged in a new enterprise, he being the first merchant that ever attempted importing teas, coffees, rausins, etc., directly from China. This concern is located at 831-833 North Avenue and Randolph Street, and to the business Mr. Daane devotes a portion of his time. Since his election to the presidency of the Merchants' Loan and Trust Company, Mr. Daane has been conspicuous in the management of that institution, and his opinions on finance and monetary matters are quoted by many, from the fact that he is seldom wrong and is a close observer and student of the starting questions that daily come before him. Mr. Daane has achieved a notable success in life, through an unflinching course of right and a strict devotion to his business. Through his able management, industry and economy he has succeeded in accumulating a very large fortune, and is now one of the greatest banking houses in the country. Mr. Daane was married to Miss Julia A. Moulton, daughter of Josias Moulton, of Laconia, N. H., on November 10, 1857. Mr. Daane has been a member of the Calumet Club since 1858, when he was elected president, Vice General Anson Stager, deceased.

McNeill, McNeill & Libby.—The trade in packed canned meats is undoubtedly one of the most important of the industries and commerce of Chicago. The leading house in the trade is that of Libby, McNeill & Libby, the largest packers of canned meats in the entire world. This firm first embarked in the business of packing beef product in April, 1868. The style of the firm was then A. A. Libby & Co., on the partners being Arthur A. Libby, Archibald McNeill and Charles P. Libby. For several years their operations were confined to packing beef in barrels, in barrels and in tins. The first year they sold in their employment not to exceed five men, and their total sales of products did not reach $50,000, the number of cattle packed being exactly one thousand and two hundred head. The business of packing beef in this manner exhibited a healthy annual increase in the city went into effect. In the year preceding the compressed meats in cans was begun, and to William J. Wilson is due the honor of inventing the process which has caused a complete revolution in packing beef. In 1868, a Frenchman, M. Appert, discovered a process of canning which was to be by manufacturers up to the time of the Wilson invention. His method was to cut the beef the same dimensions as the tin can would hold, and then to pack the beef into the can, which was then sealed. This mode caused beef to contract, thereby losing its bulk, and the juice of the meat became a gravy which was not always desirable. On March 31, 1854, Mr. Wilson commenced packing beef in cans, and in a short time such gigantic proportions. In July, 1875, the firm of Libby, McNeill & Libby became part owners of the invention and they commenced using the same process. The first year of their business in that line they used 45,420 cattle, and the sales of the canned product amounted to $187,637. Since then their business has more than quadrupled. In a single year this firm has packed over 200,000 head of cattle, and the sales of the canned product for one year reached the enormous aggregate of $3,138,386.00. From July 17, 1875, to February 1, 1884, they packed a total of 929,149 cattle, which is about 57 per cent of all the cattle which have ever been packed. It is only necessary to reflect that, allowing eighteen head to the car, fifty,000 freight cars must be required in the transportation of these cattle from their native hills and prairies to Chicago, that in so limited a space of time and from so small a beginning, a business of such vast proportions should result, simply establishes the fact of the unquestionable excellence of these goods. To the firm of Libby, McNeill & Libby belongs the distinction of having packed more cattle than any other firm in the world. Of the vast quantity of their product, Great Britain takes fifty per cent., Germany twenty per cent., and the United States and Canada the remaining thirty per cent. Deposits for the sales of the beef product of this firm have been established in the principal towns throughout the United Kingdom, and they ship canned goods to every civilized country on the globe. The popularity of their goods in this country is known to all, and Awards over competitors in various Expositions have been made to them. In the Paris Exposition of 1878, they received the gold medal; at Luz, 1877, gold medal; at Leipzig, 1877, first prize and gold medal; at Paris, 1878, Centennial Exposition, 1879, highest award and medal; and at American Institute Fair, 1876, first prize and gold medal. Their principal works are located at the northwest corner of Seventeenth Street and first west street, and its extensive buildings and yards are covered one entire block. In the block south of Sixteenth Street, they also occupy several large, commodious buildings, in which their offices and retail markets are situated. The packing house is located at the corner of Sixteenth and California, the roofing and canning machines into the process of canning and packing the elevators, and working the presses used in the manufacture of the goods. To do all this work requires one thousand five hundred and thirty-nine employes, which shows the great increase in their business in the short space of eighteen years. During the eleven years since they began their operations, the receipts of canned beef, Libby, McNeill & Libby have slaughtered nearly 1,500,000 cattle and have packed more than 42,000,000 cans. It is impossible to estimate how much of fame such a firm as this gives to us to rival the great civilization of the organization, which have raised Chicago to the exalted position it holds among the great trade centers of the world.

The Mutual Trust Society of Chicago, was organized under a special and perpetual charter granted by the State of Illinois by an Act approved March 6, 1867. The principal objects of this Society are somewhat unusual, but nevertheless of immense value and importance to the people of this city. The society makes homes, or Chicago, investments for those who do not have the opportunity, ability or disposition to investigate the best methods available for this purpose. Estates are to be freed from incumbrances, or be distributed by assignments or otherwise among creditors. Some estates are to be finally administered upon and distributed among heirs or special beneficiaries, or to be held in trust for certain specified purposes. Others have incomes to be collected and safely kept. It is this duty of the Trustee expended in the course of this activity by the Fund, and who should be the proper persons in which they can not be dissipated: for the benefit of children for the interests of the care of their estates; and for others still who desire to create charities. To the members of the organization are a few of the needs of the public which this Society aims to meet by devoting its entire attention to business of a speculative nature. It has a capital of $300,000; and the management, and presidency of the Society is selected by the stockholders for their integrity, experience, and contributions, including many of the best known financiers and business men of Chicago. The officers are Thomas B. Ryan, president; John D. McNeill, vice-president, who has since been elected treasurer. The advantages of a corporation like the Mutual Trust Society over an individual as trustee are manifold and important. The corporation has a perpetual existence and can manage any
trust, however long its terms. It is a financial corporation in whose care every trust of whatsoever nature will be safely and
prudently administered.

John D. Jennings is one of the few men who have been con-
spicuously identified with the growth and development of Chicago
from its incorporation as a city (1832) to the present time. Mr.
Jennings was born on April 10, 1816, at Benson, Rutland Co., Vt.
His ancestors were of English descent, and lived for more than two
hundred years in the State of New York. His father, Samuel Jen-
nings, who was born in 1779, at Bethlehem, N. Y., moved to Lock-
port, N. Y., in 1820, and built the first frame house in that place,
which was known as the Lockport Hotel, and which he kept until
1832. In 1834, John D. Jennings went to Buffalo, N. Y., and en-
gaged in the real-estate business. Two years afterward, he removed
to New York City, and continued in the same business until January
1, 1837, when, owing to the financial depression of the previous
year, he found his occupation gone. Mr. Jennings then resolved
to move West and engage in the mercantile business. He pur-
chased a stock of goods, which he brought to Chicago on July 1,
1837; but the hard times having reached here, Mr. Jennings de-
cided to take his goods to Cass County, Mich., where he continued
his general store until 1832. Chicago was, however, his headquar-
ters from 1837, the business in Cass County being carried on by a
brother. Since 1837, Mr. Jennings has been a constant landholder
in this city, and he is undoubtedly one of the oldest tax-payers in
Chicago. In the spring of 1845, he removed his family to this city,
and during the summer of that year he built the first store erected
on Lake Street, east of State Street. At that period the finest res-
idence portion of the city was between the lake and State Street,
and when Mr. Jennings "deserted" the east end of Lake Street
by building a business house, it brought down upon his head the
indignant anathemas of the citizens residing thereabouts. The site
of that store is the spot now known as No. 56 Lake Street. Again,
when he erected a business block on Washington Avenue near Elfin
grove Court, some years later, the opposition of the residents in that
quarter was such that, to use a modern phrase, they resolved to
boycott the establishment, but their efforts proved futile, for it was
not long before lower Washington Avenue was one of the principal
business streets in the town. Mr. Jennings continued in the mer-
cantile trade up to 1850, when he sold out and thereafter confined
himself to private real-estate occupations. As a judge of the values
of central Chicago real-estate, Mr. Jennings is an acknowledged
authority, and his experience and sound judgment are fre-
cently called upon. In many ways Mr. Jennings has served his
adopted city as a public benefactor. In 1864, ten per-
cent. scrip was issued in Chicago to the amount of two and
a half millions of dollars, to pay the bounty of volunteer sol-
diers. A large amount was counterfeited, one-third of which
was sold to Mr. Jennings out immediately he discovered it
and reported the counterfeit, thus preventing a serious and far-
reaching fraud. Mr. Jennings and N. Newhall sent to Bos-
ton at their own expense, for Mr. Brown to come here and
raise the building at the corner of Dearborn and Randolph
streets, which was the first raised in the city. Mr. Jen-
nings was one of the prime agitators in the movement which subse-
cuently led to the inauguration of the South Park boulevard
system. He was also largely interested in the development of the
South Side street railways, being particularly instru-
mental in securing the building of the Wabash Avenue line in
1874-75. He has been identified with the Mutual Trust Society of this city since its organization, having held the office of vice-president of that corporation during its exis-
tence. Mr. Jennings was married, on November 28, 1838, to Miss Hannia W. Briere, of Lockport, N. Y. They
have two children living,—George Frank and Edwin B. Mr.
Jennings is a member of the Calumet Club.

Ralph N. Isham was born at Manheim, N. Y., on
March 16, 1814, the son of Dr. Nelson and Delia (Stell) Isham. He acquired his rudimentary education at his native
place, and also received a valuable fundamental training in materia medica from his father. He afterward took a full
course in the medical department of the New York Uni-
versity, and graduated as a Doctor of Medicine in 1843. In
November, 1845, he came to Chicago, and engaged in the
practice of his profession and in that he has achieved distin-
tution, such as has been the lot of few either to merit or
attain. He was one of the inaugurators of the Chicago
Medical College, and has occupied the chair of principles
and practice of surgery in that eminent institution; he was
identified with the Michael Reese (Jewish) hospital from
1862 to 1866; during President Lincoln's administration he
was appointed surgeon of the U. S. Marine hospital, and from 1865 to 1876 had the gov-
ernance of the new hospital; during the War
he had charge of the U. S. military hospitals in
this city, and during the same period was one of the most zealous and efficient pro-

ducts of the U. S. Sanitary Commission. He has made several trips to Europe, and
spent one season in Russia, and there ener-
gically pursued the study of medicine and
surgery. In November, 1886, he married
Catherine Snow, of this city; they have four
children,—George, Ralph, Catherine and
Harriet.

Alexander White was born at Elgin, Morayshire, Scotland,
on March 30, 1844. His father, David White, was a soldier in the
British Army, and fell in the battle of Waterloo. Alexander re-
ceived a good common school education in his native town, and
while being educated manifested a decided talent for drawing and
painting. In 1856, he sailed for New York City, and soon after his
arrival there, through the advice of a friend, went south to Mobile,
New Orleans, and St. Louis, where finding little encouragement he
started northward on a steamer for the Illinois River. On nearing
Naples, Ill., the steamer collided with another, and several pas-

cengers were drowned. Mr. White and the other survivors drifted
down the river on the wreck to Naples, where they were rescued
and brought to shore. Among those he met at Naples, doing nothing
but whittling sticks, was Stephen A. Douglas. Mr. White's
intention was to proceed to Jacksonville, Ill., but he changed his
destination from Jacksonville to Chicago. At Ottawa he took a
stage for the balance of the route, reaching, the then small and un-
noticeable City of Chicago in the spring of 1860, just a little
before the election of the first mayor, William B. Ogden. He stopped at the
Tremont House, which was then a small affair. The first man
he spoke to was Ira Couch, the proprietor of the house. He was
not long in determining that Chicago was the place for him. He
started out on his own account, leasing a lot on North Water Street, then the North-West Depot, and built thereon a two-story frame store, which he opened with a stock of paints and oils. He remained for two years, and then removed to LaSalle Street, between Lake and South Water streets, moving his frame store there. This was the first house-warming performance in Chicago, and was achieved despite the dissuasions of everyone who was cognizant of Mr. White's intention. The river being crossed on the ice, cracked while the structure was being moved over it. Two years later, he sold the lot known as Ogden Street, and remained there for sixteen years, Lake Street having become a great business thoroughfare. In the meantime, he had added to his business the sale of glass, dye stuffs, etc., and also had become the agent of Eastern houses for specialties connected with his business. He also placed on sale a selected lot of engravings, which were the first ever offered for sale in Chicago. Surmounting at considerable difficulty in disposing of them, the first purchaser was a Catholic priest. Those years were to him of hard struggle, but ended in success. Old residents can still recall the characteristic sign in front of the old Lake Street store—a globe representing the world, through which a man's head squeezed its way with apparent difficulty, and with the inscription, "A tight squeeze to get through the world." The business thrived, and soon extended to a great wholesale trade on South Water Street, besides two retail houses, one on the West and one on the South Side. In 1844, in order to pay a visit to his aged mother, as well as enjoy a rest from his arduous business cares, he decided on a trip to old Scotland, but before his departure he was entertained at a banquet, given in his honor by some of his old friends and fellow-citizens, among them Stephen A. Douglas, R. K. Swift, George Steel and others. It was at this table he erected for his devoted mother, in his birthplace at Elgin, Scotland, a home she enjoyed, surrounded with every comfort, during the remaining years of her long life. Soon after his return from Scotland in 1844, he bought from William H. Ogden, for $400 a lot, 60 feet in frontage, on the east side of Wells Street, between Randolph and Washington streets. Here, for many years, and down to the time of the great fire, stood the familiar homestead, which will be remembered by many old residents as one of the most attractive sights of those old days, with its pretty front garden always blooming and fragrant with flowers, and distinguished amid all its surroundings by the artistic taste displayed in its arrangements. On the site of that old home, now a center of business, his family has erected a worthy memorial, in the shape of a massive stone front building. After years of prosperous trading, Mr. White, in 1857, disposed of the business in which he had won a most enviable reputation for thoroughness and merit, to Messrs. Lewis & Page—the firm, by its successors, is still in existence—and turned his attention to real estate investments. Mr. White's first venture in this line was as early as 1839, when he became the owner of a lot on West Van Buren Street, which he accepted from Mrs. J. H. Kinzie in payment of a bill for painting the St. James Episcopal Church, which was $285. This was proved to be a prosperous investment, and was the beginning of a succession of others equally fortunate. Among the more notable of these may be mentioned the purchase, from the first owner of a lot 100 feet on the southeast corner of a lot on Wabash Avenue, opposite the old Court House Square, for $4,000. It is worth recalling in this connection, that it was Mr. White who inaugurated "the big auction sales" of real-estate which have since played so important a part in that branch of activity in Chicago. The real-estate activity of 1867 to 1870 was ushered in by the auction sale of October 17, 1867, of various properties belonging to Mr. White. It was deemed a hazardous experiment at the time. Previous to making the sale, Mr. White expressed himself as fearful of the results, as nearly all of the real-estate men had discouraged him, but he determined to make the sale at all hazards; and the verdict was more than fulfilled Mr. White's expectations. He had calculated on a result of $775,000 at the outside, and would have been satisfied with that amount—the sale realized $845,000. The sale opened at 11 o'clock a.m., at the old Metropolitan Hall, and closed at about 2 o'clock p.m. It was another evidence of his business sagacity and his reliance on his own judgment in that as in all matters. Previous to this sale the real-estate market had been quite dull, but this vendue gave it an impetus, it being the largest in extent of property and in the aggregate amount of value that had ever taken place in Chicago. It was at this sale he presented his city residence, at 900 Wabash Avenue and Hubbard Court, to Mrs. Ira Couch, the wife of the first man he spoke to on his arrival in Chicago, as before noted. Soon after the disposal of his mercantile business in 1857, he removed to his father's home in Freeport, Illinois, in central Illinois, returning the following year to Chicago, to give his entire attention to real-estate investments. He soon purchased the southwest corner of Wabash Avenue and Hubbard Court, and built thereon the handsome residence above referred to in his real-estate auction sale. In connection with it, he opened the first private art gallery in Chicago, exhibiting a choice collection of oil paintings, which he selected while abroad, many of which were painted to order. It contained a number of the best works of modern genius. Some of the more noted pictures in this connection were entitled, "Washington Crossing the Delaware," by Leutze, which is now of National reputation. Another, a well known and highly valued portrait of George Washington by Gilbert Stuart. The following are a number of the artists represented in this collection: Boughton, Bevoort, Beard, Brown J. G., Bellows, Church, Coleman, Durand, Fairman, Gilford, Hays, Hart, Johnson (David & Eastman) Parton, Richards, Shattuck, Sonntag, Thomas Sully, Gilbert Stuart, Andreas Achenbach, Boillanger, Brillouin Compé-Cafix, Camphsiten, Diefenbach, Fichet, Edward Freer, Gue, Guillaumin, Hilderman, Hübner, Jordan, Koec-koeck, Antoinet, Joseph Lies, Meyer Von Bremen, Meyerheim, Noterman, Nelling, Preyer, Rossi, Rolfe, Seignac, Troyon, Toutmõesche, Verboeckhoven, Von Schendel, Willem and Weber. It was a matter of general regret in the community when, in 1866, Mr. White decided to dispose of his collection, but...
family, in 1858, to Chicago. Virtually retiring from active business, he purchased the Mather mansion, at the corner of the city of Lake Forest, and called it "Rosedale." This was considered the most tasteful and elaborately laid out rural residence west of New York. On May 14, 1870, Mr. White invited a number of his old Chicago friends, together with many of the artists of the city, to his new home at Lake Forest, to witness the opening of his art gallery. It contained one hundred and sixty works of art, by the leading artists of the modern schools, both native and foreign. Among the foreign artists who exhibited was the namesake of the Art Institute, De Haas, Guy, the two Harts, Hays, Huntington, Inness, Johnson (Eastman and David), Nehig, Richards, Dr. Ruggles, Shattuck, and many others. Among the American artists were among others, Albert Bierstadt, Nagle, Leighton, Brillouin, Bouguereau, Rosa Bonheur, Boulanger, Camphausen, Col. Chaplin, Diaz, De Keyser, Baron Dyckmann, Ed. Prome, Gerome, Jalabert, Koek-Koek, Meissonier, Meurer, Pregerson, White, Willemin, Willemin, Bremen, Nickol, Percuill, Preyer, Roybet, Stevens, Tooven, Tschnguy, Van Schendel, Verboeckhoven, Vibert, Willems, Zamacols and Ziem. Many of the works were ordered directly from the artists, Mr. White retaining a personal acquaintance with many of the continental painters. Some of the paintings made their authors illustrious. A number were chefs d'oeuvres, and are well known from their engravings. Beyond all doubt the catalog was the finest list of city improvements and public institutions. In the early fall of 1870, Mr. White visited Europe for the third time for pleasure, but principally with a view to the purchase of further galleries. He was the owner of a new and special pride on his return with his purchases. He had scarcely arranged his new collection, making his third and last collection, and was arranging for a second opening, when the great fire of October, 1871, took place. Mr. White was a great sufferer in the conflagration with many of the wealthy bankers and merchants in the city. The consequence of the great fire in 1871, his losses in that fire suggest the cause of his parting with his art treasures. His entire collection was brought to New York to be disposed of by auction on the evenings of December 12 and 13, 1871, at the Clinton Hall Sale Rooms, corner Astor Place and Sixth Street. This collection was on exhibition, for some time before its sale, at the Leavitt Art Rooms, New York, under the direction of Mr. Brown. The New York Evening Journal for 1872 had the following: "The collection of paintings belonging to Mr. Alexander White of Chicago excited general interest, and quite eclipsed the National Academy of Design, which opened about the same time. It was submitted to the public without much ceremony because the National Academy looked upon it as a primary school in comparison. The critics and connoisseurs did not hesitate to pronounce Mr. White's collection the finest collection in America. The proceeds of the admission fee were given to the Chicago relief fund, the privilege of the admission being rendered penniless by the great fire. Most of those who came to Chicago contemporary with him have passed away, and yet there are few of the late comers who have not heard of him, so closely was he identified with city improvements and public institutions. There was scarcely an important event in the art history of Chicago, which is not in some manner associated with the name of Alexander White. He was active part in the great exhibition of pictures, which was made at Holzer's Gallery, on Lake Street, about 1871. He was also instrumental in organizing a subsequent large exhibition in Parlor's Block, and the two exhibitions which were given for the benefit of the Art Institute. Mr. White became largely the warm friend of the Opera House Art Academy and Gallery of Design. He was an earnest friend of artists, especially of young artists, "of the boys," as he was wont to call them. His reputation as a connoisseur was not simply local. His cultivated taste and good judgment in all matters pertaining to the fine arts were recognized by artists and art lovers, not only here but in New York, and the art centers of Europe. In New York, great weight was attached to his opinion on fine art matters, and the mere mention of his name in connection with any art scheme was always a sufficient guarantee of its excellence. As an instance of this and of his reputation abroad, it will be recorded that when Meissonier, the great French painter, set on foot a plan to relieve the Chicago artists school burdened by the great fire, he invited Mr. White to co-operate with him and with Messrs. Goupil, of Paris, and Messrs. Schaus & Nauedler of New York, as a tentative and preliminary study. In the course of time, he went to St. Louis, and worked there as a joiner, studying civil engineering at evening schools at the same time. He afterward went to the Far West, and in 1859 to Pike's Peak, camping at Denver, then a wild plain, but now a beautiful city. He next went to Mexico, and in 1857, the Mexican army, which was representing the Government in the construction of Fort Union, and who, recognizing his ability, recommended his appointment to the corps of civil engineers. Having received his appointment, he was engaged in civil engineering on the south side of Mexico, until he resigned. In 1857, he returned to the East, read law, was admitted to the bar at Huntington, Ind., and engaged in general practice until the panic of 1857. In the meantime he had also engaged in agricultural enterprises, from which he was very profitable. In 1857, he came to Chicago for the purpose of doing a loan busi-
ness, in which he made large gains. He is at the present time, a wealthy and influential citizen. He owns large property on the North Side, and some five hundred or more lots in the South District. Mr. Nix owns the Palace hotel in various places, to wit: The Mayer House, Fort Wayne, Ind.; St. Charles Hotel, St. Joseph, Mich.; Piscataqua Hotel, Lake Geneva, Wis.; and the Albany House in New York, Colo., which are under his own management. Mr. Nix was married, in 1865, to Miss Elizabeth Satterthwaite, the daughter of a prominent Quaker of Indiana.

SUNDRY INDUSTRIES.

The Famous Du Pont Gunpowder is the product of the works of the firm of J. E. Du Pont de Nemours & Company, at Wilmington, Del. The Chicago branch, now in charge of E. S. Rice at No. 71 Washington Avenue, was established nineteen years ago, the founder of this business was Eletherie Irene Du Pont, who was born in Paris, France, on June 24, 1771. In his early youth he was the pupil of the eminent chemist Lavoisier, who was his intimate friend of his father, Du Pont, de Nemours. Lavoisier at the same time was superintendent of the royal manufactories and depots of powder and saltpetre, and at the mills at Essonne, Irene Du Pont acquired a thorough knowledge of the manufacture of gunpowder. The events of the French Revolution involved himself and family in political troubles, and they all came to this country, arriving at Newport, R. I., on January 1, 1800. Some months later an accident occurred that delayed Du Pont's settlement in the Valley to the bad opinion the gunpowder made here at that time, and suggested to him the idea of establishing works of his own. Having decided to do this, he went back to France in 1801, re-visited Essonne to acquaint himself with the various improvements in powder-making which had been made since he left the place. In August of that year he returned to this country well supplied with plans and models, and bringing with him some of the machinery for his future mills. In the following year (1822) the deep banks of the Brandywine Creek, four miles from Wilmington, Del. After many disappointments and losses, his energy and courage surmounted every obstacle, and at the time of his death by cholera, on October 31, 1834, his powder mills were the most extensive in the United States. Since then the business has been managed by his sons and grandsons, who retain the firm name. The present head of the house, Henry Du Pont, is a graduate of the United States Military Academy at West Point, as is also his distinguished son, Colonel Henry A. Du Pont, whose brilliant career as the commanding officer of a light battery of the Fifth United States Artillery is a part of the history of the Army of the United States, 1881-1885. Du Pont, after resigning from the Army, in order to take active interest in the affairs of the powder company of which he is an important factor.

H. L. Lloyd Smith Rice is the general agent of the firm of J. E. Du Pont de Nemours & Company. He has charge of all the business of the company in the West and Northwest, comprising some fourteen States and Territories, with one hundred agents reporting. Merchandise was born in Philadelphia on August 29, 1851. He received his education in public and private schools in Richmond, Crawford Co., Penn. (a town founded by his family), and at a commercial college in Buffalo, N. Y. Leaving that business in 1883, he kept books for a wholesale grocery house in Titusville, Penn. Thence he went to Erie, Penn., where, from July, 1886, until March, 1878, he kept the books of another wholesale grocery concern. He then associated with himself, as his partner, Charles A. Currie, and they opened and conducted a similar business, also in Erie. About this time Mr. Rice became a sub-agent for Erie for the Du Pont powder, and, on January 1, 1885, he sold his interest in the grocery business and came to Chicago to assume his present charge. The Chicago agency was established many years before the War. During that struggle, the demand for gunpowder was so enormous that the Du Pont men were not only able to supply the demand, but were able to double the quantity that was required; and, perhaps due to the great loss of energy, and concentrate their force on the production of the material of war. When the emergency passed, the Western business was at once resumed and the Western headquarters re-established in the nature of Chicago, in the month of September, 1874, to Miss Annie Johnston, of Erie, Penn.; they have two children,—Frederick and Margaret. Mr. Rice is a member of Keystone Lodge, No. 455, A. F. & A. M., of Erie, Penn.

Joseph R. Collins, general manager of the Western business of the Davis Sewing Machine Company, was born on his father's farm at Smyrna, Chenango Co., N. Y., on December 24, 1841, the son of J. W. and Frances M. (Then) Collins. Mr. Collins was educated at Sodus Academy, Sodus, N. Y., from which he graduated when he was eighteen years old. After two years experience as a school-teacher, he came West, in 1862, and located at Belvidere, III., where he kept a boot and shoe-repairing business, and became a member of the firm of L. Pratt & Co., wholesale coffee and spice dealers. The firm sold out in 1867, and four years later Mr. Collins entered the employ of the Davis Sewing Machine Company, as travelling salesman for the Chicago office, and in 1873 was appointed manager of the St. Louis office, which position he held until May, 1875, when the St. Louis and Chicago offices were consolidated, and he was appointed manager of both, with headquarters in this city.

John E. Landell is a self-made man. Commencing his business life in a humble way, he has passed through all the gradations from poverty to wealth, and stands an example to all who enter the mercantile indus-try, strict economy and honesty can accomplish. He is the son of poor but honorable parents, and was born in Sweden, on April 9, 1853. When he was two years of age, his parents emigrated to Chicago. His father and mother died not long after their arrival in this country, and he was sent to Bristol, Kendall Co., Ill., where he lived on a farm for ten years with Andrew Kundson, working during the summer and attending schools in the winter time. Returning to Chicago he began peddling shoe-blacking to the retail grocery stores. He also worked for Fred Dow, continuing in his employment four years. At the expiration of that time his employer assisted him in establishing a retail grocery store at No. 161 West Erie Street, where he continued for two and a half years; then, selling out, he went to work as a teamster for the Star Chemical Works, owned by S. P. Richards, and continued with them until four years later, when he bought the large and prosperous business in the manufacture of Landell's Purity Baking Powder and all kinds of extracts, such as Jamaica ginger, etc. His business annually amounts to more than $100,000.

CEMETERIES.

Marcus A. Farwell, president of the Oakwoods Cemetery Association, and for thirty years actively identified with the mercantile interests of the wholesale grocery business of the city of Chicago, died at his home in Coshочton, Ohio, on July 8, 1882. His family were Western pioneers. The educational facilities of his native place were not the best, but nevertheless he obtained, during his boyhood, a very good education in the common English branches. At the age of nineteen he concluded to try his fortunes alone, and went to Michigan, where he secured a position as clerk in a country store. He continued there for four years; but not making the advancement in life that he anticipated, he started for Iowa. He remained there for only a brief time, when he decided to come to Chi- cago. He arrived in 1851, and at once went to work for a wholesale grocery house. Chicago had in that year commenced to make rapid strides as a commercial center, and the business during the following two or three years, Mr. Farwell, by his careful economy and strict devotion to business, succeeded in accumulating a sufficient sum of money to enable him to build, and to secure the interest in the Star Chemical Works, controlled by Mr. Landell Co. On January 1, 1856, he was admitted a partner in the business, and he continued a member of the firm and its successors—Gilman & Farwell, Grannis & Farwell, Miller & Co., and E. Grannis & Co. From 1856, Mr. Farwell drew from active mercantile life to manage the affairs of the Oakwoods Cemetery Association. In 1864, Mr. Farwell was the owner of one hundred and sixty acres of land where Oakwoods Cemetery is now situated. The Oakwoods Cemetery Association was then incorporated; and from 1864 to the present time Mr. Farwell has been most actively engaged in managing the cemetery, and has annually held an official position, being at first secretary and treasurer, for a long term of years, and in 1876 he was selected president, vice Jonathan Young Macnam, resigned. The cemetery is one of the most beautiful of those that surround Chicago, and to Mr. Farwell is due the main credit for its extensive and costly improvement. In political affairs Mr. Farwell has always been more or less interested, but he is not in any sense a politician in the modern meaning of that word. In 1850-51, he served in the capacity of Village or Town Collector, and was married to an idea of a Democratic woman, which he is held by Chicago business men, it is only necessary to state that the required bond of six million dollars was tendered him by the prominent merchants and capitalists without any solicitation on the part whatever. They have four children,—Cora E., Frederick, Luther C. and Ralph Farwell.
JOSEPH PAJEAU, designer and wholesale dealer in granite monuments in Keeseville, Essex Co., N. Y., on June 23, 1846, and is of French extraction, his parents being Mark and Adelaide (Beron) Pajeau. He attended school at the academy in Keeseville until about eighteen years old; then was employed as bookkeeper by Wilder, Farnham and Company in Canton, N. Y. He subsequently was cashier and bookkeeper for Sheldon & Slosson, wholesale marble dealers, where he studied and practiced the art of designing and fabrication of monuments. In 1860 he came to Chicago, still in the employ of Sheldon & Slosson, whom he represented here for three years. Among his designs may be mentioned those for the monuments of the estates of Thomas Hoyne, Judge Dent, Mrs. Bondman, Irving Gordon, Elisha S. Burt, and many others. He has also executed numerous designs for patrons in the Eastern States as well as in the whole Northwest. Mr. Pajeau was married, on September 9, 1875, to Miss Alice E. Montgomery, his son being Sidney B. Pajeau, Jr., a business man.

A. B. RUSSELL, undertaker, carrying on business at No. 163 Washington St., in the furnishing trade, who is of the families of Ellen and Martha (Langley) Russell. He was born at Hartford, Ct., March 1, 1829. After attending the schools near his residence, he acquired a knowledge of the trade of wagon and carriage making at Woodstock and many entries of importance as vital statistics. Mr. R. is a member of the General Leiz Humphrey, contractor for the construction of that portion of the Great Western Railway, lying between Niagara Falls and Hamilton, Canada. Returning to Montpelier he married Miss Jane Murphy, granddaughter of General Humphrey. Two sons, two daughters, and another sister, a member of General Humphrey. Mrs. R. was born at Quincy, Ill., on July 12, 1828. Mr. and Mrs. R. have had four children: Fred Andrew, Charles Lewis, and Edward Owen. After his marriage, Mr. R. went to Lowell and entered the employ of the Lowell Locomotive Works, in whose shops he worked for over two years. Going from Lowell to Cambridge, he was employed for several years as bookkeeper for the Boston & Lowell Railroad Company. In 1863, he enlisted in Co. "A," 47th Massachusetts Volunteers. He was engaged in the attack on Vicksburg, where he received promotion for gallant conduct. At New Orleans he was assigned to duty on the staff of General T. W. Sherman. Here he was breveted to the rank of colonel and placed in command of Fort Banks. After receiving his discharge at the close of the war, he again entered the employ of the Boston & Lowell Railroad Company. After spending three years in the old regions of Pennsylvania, and having lost $9000 in the business at Oil City, he came to Chicago, reaching this city in July, 1865. His first business venture in this city was in the furnishing trade. He then moved to the employ of the Boston & Lowell Railroad Company, and in March, 1863, embarked in the undertaker business, in which he has since conducted with marked success. Since 1879, he has kept a record of funerals which he has undertaken, including in such record many of the most prominent families in the business. He has and has received the "32. He is also a member of many other secret societies and has repeatedly been a delegate from these bodies to general conventions, grand lodges, etc.

JOHN SMITH, undertaker, was born at Buffalo, N. Y., on May 17, 1846, and is the son of Henry and Catharine (Faber) Smith. His parents came to Chicago in 1849, where his father engaged in the undertaking business in 1854, his son assisting him from the time he was fourteen years of age till 1877, when the latter succeeded to the business and organized the present firm. Mr. Smith was married, on June 5, 1873, to Miss Mary Kruse, of Chicago; they have five children,—Henry, George, John, Mary, living, and Ellen, deceased.

John CARROLL was born in the County of Cork, Ireland, in 1837, and the son of John Carroll and Ellen (Murphy) Carroll. He came to America in 1853, and went to Chicago, in 1879, and then to Chicago, where he has since resided. He was employed as coachman three years by John F. Barrand, then operated a livery stable for Judge Beckworth, and afterward was employed by Walter L. Newberry as coachman about seven years. In 1872, he commenced business on his own account as a livery man, which he followed until 1877, when he formed a partnership with Nicholas Birren, in the undertaking business, in which they are still engaged. Mr. Carroll was married, on February 16, 1873, to Miss Bridget McAvoy, of Chicago; they have five children,—Mary E., Dennis, Kate, Nettie and John S., and the son of Nicholas Birren, on February 22, 1873, to Miss Catherine Paterson, of Chicago; they have five children, as above mentioned.
and in 1840, he came to America and located in Chicago, going to work for John Gavin. He remained with him until he began business for himself as an undertaker, which business he continued until his death on November 24, 1881. In 1861, he married Mary Ramsey Farrell, daughter of James and Mary (Ramsey) Farrell, natives of Ireland and Scotland respectively. Mrs. McLaughlin was born in Clonmel, County Tipperary, Ireland, on February 15, 1852. She came to the United States when twelve years of age, obtained a good education, was married in her twenty-first year, and assisted her husband through the trying scenes of panics and fires, they being burned out in 1871, losing all their property. She is the mother of nine children, five of whom are living—John, born June 29, 1864; Annie, born May 1, 1871; Nellie, born September 10, 1873; Frances, born November 22, 1875; and Elizabeth, born October 6, 1877. Being possessed of good health and much energy, at her husband's death she resolved to continue the business he had left. She has been very successful, and has proved that a woman can do business. Mrs. McLaughlin and her family are members of the Catholic Church.

Mueller & Hardekopp are undertakers and livemyn, the firm having been organized, in 1853, by Peter Mueller and Otto N. Hardekopp.

Peter Mueller is the son of Michael and Susanna (Casper) Mueller and was born on May 21, 1842, in Kisselbach, Germany. He came to Chicago in 1847, with his parents, and learned the carpenter's trade from his father, who was a carpenter and builder. He worked for him until 1872, when he commenced business on his own account as a carpenter and builder. This he followed for six years, and in 1878 formed a partnership with Herman Sigmund, under the firm name of Sigmund & Mueller, undertakers. They carried on the business together until 1883, when the firm was dissolved. He then engaged in the same business with Mr. Hardekopp, his present partner. Mr. Mueller was married, on May 29, 1869, to Miss Johannah Elswalter, of Chicago; they have five children,—Mary, George, Annie, Hermann and Henry.

RELIGIOUS HISTORY.

THE CATHOLIC CHURCH.

No interests suffered more deplorably from the great conflagration of October, 1871, than those of the Roman Catholic Church; and in part of the reconstruction has been shown more courage and energy than that displayed by the Catholics, whose fine academies, colleges, schools, magnificent church-edifices, and other institu-

John's Church, St. Louis, Mo. About this time a terrible cholera epidemic raged in the city, which called forth all the self-sacrifice of the devoted young priest. Days and nights were spent in administering consolation to the poor sufferers, sometimes even preparing them for burial where friends and kindred deserted them. He was appointed president of the Ecclesiastical Seminary in July, 1854, and filled this office with great distinction until July, 1858, when he was appointed pastor of St. Michael's Church, St. Louis. A year later he was promoted to the pastorate of the Church of the Immaculate Conception, St. Louis, where he continued until No-
November 1, 1865, when he was consecrated Bishop of Nashville, Tenn. He was accompanied to his new home by Rev. Fathers Riordan and Walsh of St. Louis, who died of yellow fever in 1878. The first years were ones of great labor by his untiring efforts and constant attention to duty he brought the people to the sacraments, he instructed and prepared the children for First Communion and Confirmation, and by his great business talent won the confidence of public men. He was most assiduous in preaching and instructing the people, and many new Catholics were received into the Church, some of whom were among the old settlers and wealthy citizens. When Dr. Feehan went to the diocese of Nashville he found a few Dominican Fathers and a convent of Sisters in Memphis, an academy and an orphan asylum conducted by Sisters of the same order near Nashville. The academy was so heavily in debt that it was sold at auction soon after Bishop Feehan’s arrival. He bought it in for the Sisters, thus securing their lasting gratitude and preventing great loss to the Catholic community. In August, 1866, the cholera made its appearance in Nashville. During its continuance Bishop Feehan labored unceasingly to console the sick and dying. At the close of the epidemic he purchased a home on one of the finest sites of the city, and established a community of the Sisters of Mercy from Providence, R. I. The yellow fever again visited Memphis in 1877 and 1878, when twenty-three priests fell martyrs. The diocese was soon again enjoying health and prosperity, when the news came from Rome that Dr. Feehan had been appointed first Archbishop of Chicago. The death of Right Rev. Thomas Foley, D.D., administrator of Chicago, caused a vacancy in the hierarchy difficult to fill. Bishop Feehan was chosen to fill the vacancy on September 10, 1880. The arrival of Archbishop Feehan in Chicago was the occasion of a grand demonstration. He found that his new charge comprised eighteen counties in the northern part of the State of Illinois. The wants of the Catholics were zealously attended to by one hundred and eighty priests, who had charge of one hundred and sixty churches.

He found that although his predecessors had done much to meet the wants of the times, still the great fire had destroyed nearly all the Catholic structures of any importance in the City of Chicago, and new churches had to be built to meet the demand of the increased population. Under the administration of Archbishop Feehan, forty churches have been erected in the archdiocese during the past five years, new parochial schools have been built and old ones enlarged, so that out of thirty thousands of Catholic children are educated in these structures. The great financial interests of the archdiocese have been carefully attended to, and the archdiocese of Chicago is one of the richest and most solvent in the United States. Homes for the aged, hospitals for the sick, Houses of Providence for young women, orphan asylums, foundling asylums, all attest the far-seen care of Dr. Feehan to meet the many needs of the population, while his encouragement of a school for deaf mute children, his wise direction of the establishment of the Chicago Industrial School for girls, and his munificent donations to St. Mary’s Training School for boys at Feehanville, deserve lasting gratitude.

There is no section of the city or of the archdiocese of Chicago that has not felt his zeal for religious charity and Christian education, while St. Patrick’s Academy, the pastoral residence of the Holy Name Cathedral and his own arcipiscopal residence will always stand as monuments of his munificence and desire to have the ardent faith of his devoted and liberal people appear even in material structures. He stand not only superior to any ecclesiastical residences in Chicago but have few, if any, equals on the continent. Archbishop Feehan is a giant in works as well as in stature. As a legislator, Archbishop Feehan has been great and observant. He participated in the proceedings of the Second Plenary Council of Baltimore in 1866; he took an active part in the General Council of the Vatican; he was one of those summoned to Rome to formulate the Plan of the First Plenary Council of Baltimore, and deserves great credit for the part taken in the wise deliberations of that body. As Metropolitan he has the whole State of Illinois under him, with a Catholic population of about eight hundred thousand.

Rev. Patrick David Gill, chancellor of the Diocese of Chicago, was born at Clonmel, County Tipperary, Ireland, on February 22, 1836. His father was James Gill, president of the Clonmel National Bank and Governor of the system of National Banks in Ireland. He was born in 1816, near Tralee, and died on November 18, 1872. James Gill was married to Miss Mary Hallinan, of a landed-estate family near Tralee, County Kerry, Ireland. She died in 1866. Father Gill for three years attended a private school in Clonmel, afterward going with two brothers to a boarding-school at Meclíra, Belgium, for four years. In 1871, he entered the College of the Jesuit Fathers in Alost, the institution in which was educated the famous missionary, Rev. P. J. DeSmet. In the summer of 1875, he returned to Ireland, becoming a student in Cardinal College, Dublin, and his philosophical and theological education, graduating in 1879. On June 7, 1879, he was ordained priest, and almost immediately afterward came to America, going to Nashville, Tenn., where he was assigned to duty as Bishop Feehan’s assistant of a church in Nashville. In the fall of 1880, the bishop, having been nominated Archbishop of Chicago, sent him to Rome as bearer of his report, and to be at the same time his procurator in receiving the Pallium. He returned to Chicago bearing the Pallium in the early part of April, 1881, and was assigned to the assistant pastorale of St. Columbkille’s Church. In the spring of 1882, he was transferred to the Cathedral as assistant pastor; and on January 1, 1883, was appointed chancellor, and secretary to the Archbishop, offices which he still retains.

Cathedral of the Holy Name.—The foundation-stone of this church, on the corner of State and Superior streets, was laid on Sunday, July 19, 1874, Rev. Father Damen preaching the sermon. The edifice was completed in 1875, and was opened with great pompa on Sunday, September 1, by Rt. Rev. Bishop Ryan, of St. Louis. The cathedral is cruciform in shape, built in the Gothic style of architecture, of solid stone masonry, the exterior being rock-faced, and cost, including the grounds, $250,000. The main entrances, of which there are three, are on State Street, the central one having a vestibule twelve feet in width. There are also two side entrances, at the transepts, and three broad entrances in the rear of the church. The spire, supported upon a massive
tower, is the highest in the city, being two hundred and ten feet to the summit of the cross. Two rows of columns extending the entire length of the church, support a Gothic groined roof. The roof is paneled and tinted with a soft gray, relieved by heavy bands of gold; each of the panels is outlined with gold, and all terminate at their angles with bas-relief medallions. The chancel and transept arches are richly ornamented in the same general style. The chancel is lighted by five stained-glass windows, of which the central bears the figure of Christ. Two oriel windows and seven small Gothic windows light the transept, and a magnificent oriel window is cut from the western extremity. At this end also stands the organ. The striking feature of the interior is the grand altar. This is constructed of various descriptions of rare marble; the body of Italian, the pillars of Tennessee, the white finish of altar-panels of Vermont, and the cross of the center-panel of Irish green-and-black and African yellow marbles. The tabernacle is of pure white marble, inclosed and mounted with solid gold, and the entire pier is crowned by richly-carved pinnacles, in the center of which is a niche containing a massive crucifix. On the north side of the chancel is the Archbishop's throne, which is of the most elaborate and costly description. There are two other altars, on the north and south sides of the transept, respectively, one to St. Joseph and the other to the B. V. Mary, both of which are of exquisite beauty.

The Cathedral of the Holy Name was constructed under the supervision of Rt. Rev. Thomas Foley, administrator of the Diocese of Chicago. Adjacent to the cathedral is the clergy-house, built in a style uniform with that of the church, at a cost of $75,000. It was completed in 1851, and is the home of the vicar and his assistants, of whom there are six at the present time. Since the first the cathedral clergy have been Rev. John McMullen, D.D., from 1871 to 1881 (afterward bishop of Davenport), and Rev. Patrick J. Conway, the present incumbent and vicar-general of the Diocese.

Very Rev. Patrick Joseph Conway, V.G., son of Miles and Catherine (Kelly) Conway, was born in Fermor, County Wexford, Ireland, on November 29, 1835. His family came to the United States in 1832, and settled in Chicago. Soon after the death of his parents, in 1854, he determined to study for the priesthood. With the exception of one scholastic year in the University of Notre Dame, Ind., and one in St. Mary's Seminary, Barrens, Mo., he pursued his studies in the University of St. Mary's of the Lake, which occupied the present cathedral block. He graduated with honors in 1862; and, continuing his theological studies in this institution, was ordained priest by Rt. Rev. James Duggan, D.D., on July 9, 1865. He was for a few months a professor in his Alma Mater. In the fall of 1866, he was appointed pastor of St. Louis's Church. In December, 1866, he was transferred to the pastorate of St. James's parish. The church, which was too small for the increasing congregation, was enlarged, and he established parochial schools, and erected a pastoral residence. In June, 1871, he was promoted to the pastoral charge of St. Patrick's parish. The streets in the vicinity of his new charge having been filled in, making the church entrance several feet below grade, the edifice was raised eight feet, affording a spacious basement; and suitable furni-
ture was provided for the church, the interior of which was beautifully decorated. In 1874, he erected a large brick school-building on the remaining lot, which, under the management of the Brothers of the Christian School, has become one of the best commercial schools of the city. In 1876, he built a twelve-room brick school on Adams Street, which is in charge of the Daughters of St. Vincent de Paul. In 1880, he erected a fine parochial residence adjoining the church, on Adams Street, at an expense of $25,000. Besides these improvements, which cost over $125,000, Father Conway paid off $15,000 of the debt which he found on taking charge of the parish.

In November, 1881, Archbishop Farley, appointed him to the position of vicar-general and rector of the Cathedral of the Holy Name. On entering his new field of labor, the work of finishing the rectory, at the corner of Superior and Cass streets, begun by Bishop McMullen, fell to his charge. The Sacred Heart Convent and female parish school adjoining, in charge of the Ladies of the Sacred Heart, afforded ample accommodations for the girls of the parish, but there was no parish school for boys. The vicar-general at once purchased lots on Sedgwick Street, near Chicago Avenue, and there erected, in 1882, a brick school-house having a seating capacity for one thousand children.

CATHEDRAL OF THE HOLY NAME.

The building and grounds cost $60,000. Vicar-General Conway won, by his untiring zeal, the confidence and esteem of his people. This was evidenced in the flattering words and substantial testimonials given him, as he had all to the congregation to which he had ministered. Vicar-General Conway is everywhere highly esteemed for his amiable manners, fine scholarship, rare executive ability and exceptional pulpit oratory.

Rev. John Joseph Carroll, first assistant pastor at the Cathedral of Holy Name, was born at Ballina, Sligo Co., Ireland, on June 21, 1856. His father was Francis Carroll, and his mother Mary (Howley) Carroll. They came to America in 1867, and settled at Rochester, N. Y., where they still reside. In Ireland, he attended the National school at Ballina about two years; and subsequently attended the public schools in Rochester. Afterward he was a student at St. Michael's College, a classical school connected with the Queen's University, at Clover Hill, Toronto, Canada, from the fall of 1871, to June, 1876. In 1876, he entered St. Joseph's Theological Seminary, at Troy, N. Y., remaining there four and a half years. In 1879, he was ordained with the diocese of Chicago. Upon graduating from St. Joseph's Seminary, he was ordained there by Bishop McNerney; and upon arriving in Chicago was appointed, on Christmas day, 1886, assistant pastor of the parish of the Cathedral of the Holy Name, a position in which he is still retained.
REV. D. M. J. DOWLING was born in Ireland. He received his classical education in his native country, and, in 1864, came to Chicago. His theological education was received in Baltimore, Md., at St. Mary's Seminary. He came to Chicago in 1875, as a priest, and from that time to 1884, was assistant pastor of the Church of the Holy Name. He was chancellor of the diocese about two years, and, on January 1, 1883, became pastor of St. Bridget's Church, his present position.

ST. COLUMBKIILL'S CHURCH originated in 1858, in a movement among the Catholics of Hubbard Street and vicinity, who desired a church near their homes. The first meeting with this end in view was held on November 21, 1858, in the basement of St. Patrick's Church. Very Rev. Dennis Dunne presiding. A committee was appointed to collect money to build a church edifice at the corner of Owen (now Indiana) and Paulina streets. The church-building, erected under the superintendency of Mr. Kelly, was a frame structure and cost about $1,200. It was dedicated on Sunday November 20, 1859, by Rt. Rev. Bishop Duggan, assisted by Rev. Fathers Ward, Damen and Higginbotham. Rev. Mr. Ward succeeded in 1860, by the present pastor, Rev. Thomas C. Burke, who enjoys the distinction of being one of the oldest pastors in Chicago. Some of his assistants have been as follows:

In August, 1871, the present large and elegant stone church edifice on the corner of Indiana and Paulina streets was commenced. The corner-stone was laid on Sunday, September 3, of that year. Dr. McMullen delivered the address on this occasion. The style of architecture is the Romanesque and the cost of the entire structure was $150,000.

REV. THOMAS BUTLER has been connected with St. Columbkille's Church since May, 1885, and was identified with important and progressive ecclesiastical interests in an English diocese for several years anterior to that date. His own record, and that of his brother, form an interesting portion of the church history of Chicago, the family having grown to this city three of its most notable priests, who have become known throughout the country as zealous exponents of the principles of the Catholic religion, and for their oratorical power and linguistic and literary ability. Father Thomas Butler is the youngest son of John and Mary Butler. His father was a respectable merchant of Limerick, Ireland, where he was engaged in the timber trade for many years, and there this son was born, in 1850. The ambition of the parents involved the award to each of their children of first-class educational advantages, and the results were signal of satisfactory—out of seven sons, six entering the learned professions, the remaining son following a business career. The father died in 1866, but the widow and mother and four sons, one of whom is quite an eminent member of the medical profession, now reside in England. Mrs. Butler, who still resides in Limerick, is eighty years old, and yet is hale and hearty. At an early age Father Butler began the attainment of the rudiments of a thorough education, and attended the Catholic University in Dublin. Later he went to the Catholic University in Louvain, where he graduated in 1876, with the honorable title of Graduate in Canon Law and with the degree of Bachelor of the same, a dignity which is claimed by very few even of the learned scholars of America. He was ordained a priest when only twenty-two years of age, by the Bishop of Manchester, in England, and, for half a decade subsequent to 1875, filled the position of teacher in the bishop's house, and being charge of the inspection of the schools in the diocese of Salford. In 1885, Father Butler came to America, direct to Chicago, and thence, in February, 1881, went to assist his brother, Rev. T. J. Butler, of Rockford, Ill., where Dr. Butler was dean and had the supervision of some forty parishes. There, Father Butler remained over four years, in May, 1885, assuming his present post of duty. Father Butler is a thorough and conscientious priest, and his personal attributes of character and mental attainments are of a superior order. He is a brilliant and effective orator, whose eloquence being augmented by a thorough knowledge of French, and the possession of rare linguistic ability. He writes and speaks with great facility both French and German. The phenomenal proficiency of his brother, Dr. Butler, in vocal music, which has given him the reputation of being the finest singer of the mass in America, is shared by Father Butler, who is the possessor of a voice of rare scope and beauty, and is also an accomplished musician. On the threshold of a career which gives the promise of great usefulness, Father Butler has already won honorable distinction, and is beloved and esteemed by his associates and parishioners, who recognize his value as a member of the Order and as a pastor and a friend. One of his brothers, the ex-dean of Rockford, Dr. T. J. Butler, is now in Europe, and another brother, Father Patrick T. Butler, is pastor of the Church of the Immaculate Conception, in the North Division of the city. The latter has been in charge of that church for many years, was a graduate of the Propaganda at Rome, and from 1864 to 1866, was secretary to Bishop Duggan, of Chicago.

REV. JAMES MONROE HAGAN was born at Horn Creek, Monroe Co., Mo., on November 12, 1853. His father, Joseph B. Hagan, a farmer and lawyer, was elected judge of the county court of Monroe County. He died in 1876. His mother, Mary (Beall) Hagan, died in 1870. Father Hagan was educated at Vicksburg High School by his brother Frank, city attorney of Louisville. He left this school in 1868, going to St. Joseph's College, Bardstown, Ky., one year; taught two years at St. Viator's College, Bourbonnais Grove, Ill.; going thence to the Jesuit College at Georgetown, D. C. While there, he was the first winner of the Congressional debating medal, founded by Hon. Richard T. Merrick. From 1876 to 1881, he attended the University of Lundsberg, in Tyrol, founded in 1672, and the only one on the continent now
controlled by the Jesuits. He was ordained on July 4, 1860, by Bishop Leins of Brixen. He finished his studies in Rome, and returned to the United States in 1881, reaching New York on July 4. His first appointment was as assistant pastor of the Church of the Nativity, Chicago, to which he was assigned by Archbishop Feehan. On June 15, 1882, he was transferred to St. Columbkille's Church, where he remained as assistant to Father Burke until May 15, 1884, when he became assistant pastor of St. Stephen's Church. Father Hagan has won a National reputation as a temperance worker and orator. He was elected president of the Chicago Catholic Total Abstinence Union, in 1883, and has held that position ever since. He speaks German and French fluently, being often taken to Germany to help to push the temperance work among the Germans as well as among the Irish Catholics, his mastery of the German language making such a work comparatively easy. Those who know him and are most familiar with his work say that the three points in his character which stand out in the boldest relief, are, his popularity with the people, especially with the non-Catholic portion of them; his power as an orator; and his success as an organizer.

St. James's Church.—Under the pastorate of Rev. P. W. Riordan, the new church-edifice, which is not only an adornment of the South Division, but an enduring monument of his own enterprise and energy, was erected. The church-edifice is so nearly in conformity with that of the Cathedral of the Holy Name as to require no detailed description. The building was erected at a cost of $100,000, and was dedicated on Sunday, May 24, 1883. In October, 1883, Father Riordan was succeeded as pastor by Rev. Hugh McGuire, the latter clergyman with his assistants, other parochial institutions have been established, such as the parochial schools, the present membership of which is seven hundred. The school-buildings were erected at a cost of $25,000. During 1883, improvements were made in the church at an outlay of $10,000, consisting of three magnificent altar-pieces. The number of communicants in the parish is seven hundred and fifty.

Father Hugh McGuire was born on March 12, 1846, and was ordained a priest on July 9, 1871, receiving his first appointment on August 15, 1871, as assistant pastor at St. John's Church, where he remained until February 25, 1874. He was appointed on that date, pastor of St. Pius's Church, where he remained until his appointment to the pastorate he now holds, that of St. James's Church, on September 23, 1883.

St. Patrick's Church.—The basement of this church, which was in course of erection at the time of the fire, was occupied for the first time in August, 1872. Rev. P. J. Conway remained pastor until November, 1883. His various addresses were—

In 1873, Rev. P. J. Conway had a gallery built in the church-building, the interior handsomely frescoed, a fine organ put in and also three new altars, and made other improvements, at a total cost of $20,000. In 1875, he erected a new brick school-building, for male scholars, at a cost of $24,000. The school has always been under the charge of the Brothers of the Christian School, and has an attendance of about six hundred. The Female Academy, which until 1876, occupied a frame structure immediately west of the church, was in that year supplied with a large brick building, costing about $24,000. This school, until 1881, was in charge of the Sisters of Mercy; then was conducted by the Sisters of Loretto, and in 1871, they were succeeded by the Sisters of Charity. The number of pupils is about five hundred. The priests' residence was completed in 1881.

Rev. T. F. Galligan, pastor of St. Patrick's Church, the son of P. J. and Catharine (McCready) Galligan, was born in New York City, on July 17, 1851. His father came to America in early manhood, and died in 1860; his mother is still living in Chicago. After a classical education in a private school, he entered the University of St. Mary, where he remained six years, graduating in 1873. From 1873 to 1877, he was in attendance at St. Vitus's College, at Bourbonnais Grove, Ill., coming thence to Chicago, where he was ordained on May 8, 1877. He was appointed assistant pastor at St. Patrick's Church, in which position he remained until 1881, when he was transferred as associate pastor to the Cathedral of the Holy Name, as assistant to Bishop Burke; he was then removed to the southern part of the city, to organize the new parish of St. Rose of Lima. Of this parish he was pastor something over a year, when he was transferred to St. Pius's Church, on Ashland Avenue, where he remained until March 26, 1884, when he was transferred to the pastorate of St. Patrick's Church, in which position he still remains.

Patrick's Commercial Academy.—In 1861, a large L-shaped building occupied the lot upon which now stands the structure known as St. Patrick's Commercial Academy. The Christian Brothers, then as now, were in charge of the establishment, and in 1874 the academy and parochial school were united in the old premises. Children, unable because of the lack of means to partake of the advantages of a higher course offered by the Academy, received the elements of a simple education in the parochial school. The course of study in the academy embraced grammar, history, English composition, rhetoric, higher arithmetic, algebra, geometry, trigonometry, men- suration, architectural drawing, French, German, Greek and Latin. About 1874, in order to offer such equal advantages, the academy and the school were united into one. Previous to that time the Academy had produced many men of respect and nota bility, who did then and who now grace hallowed professional life. In 1883, a commercial department was opened, and to-day St. Patrick's Commercial Academy is one of the best known institutions of education in the country. Now to-day the Academy is the fiber of a boy successfully assuming the responsibility of a business life. In 1883, a commercial department was opened, and to-day St. Patrick's Commercial Academy is one of the best known institutions of education in the country. absolutely indispensable. Phonography is another important art, and opens to the pupils a new field, which is likely to prove more frequent and lucrative than some others, and one that every one of them should learn. The correspondence can save time and labor by employing a phonographer to write their letters. In this age of electricity it is coming more and more into use every day. It is of general utility to the pupils, and is especially advantageous for the Benedicts as rapidity and accuracy are required. He can use it in bookkeeping, composition and even in arithmetic, and once acquired it becomes a means of obtaining a livelihood where other means would fail. This art, joined with the typewriter, will assist the pupils to learn, and in the use of the type-writer, there are several Remington machines in the class-room. Even telegraphy is also taught; and although it may have useful auxiliary use to the pupils, it is not yet established as a profession or skill, and with proper instruction and the use of need, prove of great financial assistance. It will well repay any one to visit the classes of this excellent institution, to note the means adapted for facilitating the studies, the progress that the scholars have made, and get an idea of the future prospects of the pupils who are educated in it for the various spheres of life.

ST. PETER’S CHURCH.—Previous to the fire this church was very large. In 1879, there was a congregation of about twelve hundred families. As one result of the fire, many German families were obliged to move further south, and Father Fischer was ordered by Bishop Foley to build a new church-edifice at the corner of Hanover and McGregor streets, which was named St. Peter’s Catholic Church. The new church was completed, and the bells continued, until at the present time only about one hundred and twenty families remain.

Father Fischer, upon taking charge of the Church of St. Anthony of Padua, was succeeded by Rev. Edward Froelich, on May 25, 1873. He remained until August 15, 1875, when the Franciscan Fathers were placed in charge. They came, at the invitation of Bishop Foley, from the Franciscan monastery at Teutopolis, Effingham Co., Ill. The three Franciscan Fathers who came were Rev. Liborius Schaefermeyer, who had been, previous to becoming a Franciscan, vicar-general of the Diocese of Milwaukee, and who remained until 1879, when he removed to St. Louis to take charge of St. Anthony’s Convent. The second of the three was Rev. Matthias Mullin, who remained until 1878, when he was sent to Wisconsin. The third was Rev. Francis Menchel, who, after remaining in Chicago a few months, was sent to Minnesota. Rev. Father Schaefermeyer was succeeded by Rev. Augustinus Hensler, who remained until July 15, 1885, when he was followed by the present pastor, Rev. Kilian Schlosser. Rev. Father Mullin was succeeded in 1878, by Rev. Nemesius Rohde, who also remained until July 15, 1885, and was succeeded, for five months, by Rev. Anselm Fuets, and then by Rev. Faustine Neinhoffer, O.S.F., who still remains with Rev. Augustus Metz; G.O.F., and Rev. Symphorian Forstrom, O.S.F., assistant priests.

In the preceding volume the last teacher in the school mentioned was Frederick Pryor. After him, in 1866, Sisters of Notre Dame came from Milwaukee to take charge of the school, and have had charge ever since. There are about two hundred and fifty scholars in attendance.

REV. FATHER KILIANS, custos of the Franciscan Province of the Sacred Heart of Jesus in America, and superior of the Franciscan order in Chicago, and pastor of St. Peter’s Church, is one of the oldest members of that order in Chicago, and is noted throughout the West for the practical work he has done for the church during over a quarter of a century of active service. His record in this regard belongs to the community at large as much as to the adherents of the Catholic faith, for he has founded and built educational and ecclesiastical edifices, the influences of which have conduced to the social and business growth of many places. Father Kilians is a native of the Rhine land, Germany, and was born in Cologne, on May 9, 1826. His family name is Schlosser. At that city he received his early education and entered the order of St. Francis, in 1847, at Warendorf, Westphalia. He then studied philosophy and theology at Tuderborn, and was there ordained a priest in 1856, remaining in Westphalia in an ecclesiastical capacity, being stationed in the fields of West and Westphalia. From the last place he came, on August 7, 1860, to America, and went to Teutopolis, Effingham Co., III., where a year later he was made superior of the house. There he built, in the time of nine years, a college, several churches, and many other structures in the surrounding neighborhood, besides a Franciscan convent. In 1890, he went to Memphis, and during the year built St. Mary’s Church in that city. In 1891, he was sent to Cleveland, where he began a career of progress and duty which has given vast ecclesiastical and educational benefits to that place. In the next fourteen years he built St. Joseph’s Church, a Gothic edifice almost unsurpassed in its architectural beauty in the West, and costing $100,000, a convent and a hospital. He left Cleveland after a pastorate that endeared him to its people, with the debt of the church reduced to one-third of its original cost. Father Kilians is esteemed and beloved by all those who have served as religious by him, since coming to Chicago in July, 1858, has become known at his new post as a most progressive and able adherent of the religion to which he has devoted his life.

Rev. Peter Fischer, the pastor of St. Anthony of Padua Church, was born at NeuKirchen, Lower Bavaria, on September 18, 1804, the son of Wolfgang and Anna (Holzer) Fischer. His father was a farmer. Father Fischer’s education was received at Strasburg Gymnasium, which he entered in 1846, remaining there five years. He graduated in Passau in 1856. In 1857, he came to America and attended St. Thomas’s College in Kentucky, one year. He then went to St. Mary’s in the Mount Seminary, in Cincinnati, and afterward to St. Vincent’s Theological Seminary at Cape Girardeau, Mo. In 1860, he was ordained priest by Archbishop Kenrick, of St. Louis, and was sent to Freeport, Ill., as assistant priest. He was next sent to Galena, Ill., where he remained eighteen months; and then to Naperville, Ill., where he remained until 1864; then becoming pastor of St. Peter’s Church, Chicago, continuing in that relation until 1873. In this year he organized the Church of St. Anthony of Padua, of which he is still the pastor. He has erected, on Hanover Street, a large brick church-edifice of the Roman style of architecture, at a cost of $75,000, exclusive of the cost of $15,000 for the land purchased, $5,000; a priest house adjoining, at a cost of $5,000, and a school-house at a cost of about $4,000. At this time he has a membership of about six hundred families, and there have been three colonies from it, which are now established as independent churches,—St. Augustine’s Church, established in 1882; the Church of the Immaculate Conception, in 1883; and St. George’s Church, in 1884.

ST. MARY’S CHURCH.—In the spring of 1873, Rev. Bishop Foley purchased the Plymouth-church property, at the corner of Wabash Avenue and Eldridge Court. The first Catholic services held therein was on October 6, 1873, being the nearest Sunday to the anniversary of the great fire. On account of the destruction of the Cathedral of the Holy Name, St. Mary’s was used as the Pro-cathedral from the time of its purchase until the removal of the Bishop to the North Side, in 1876. The pastors of this church since the fire have been

Rev. Patrick M. Noonan, from 1872 to 1877, and Rev. Joseph P. Roles, from September, 1877, to the present time. The assistants have been Rev. W. J. Maddon, 1872; Rev. Edward J. Hayes, 1872-75; Rev. Maurice F. Burke, 1875-78; Rev. Dennis Hayes, 1878-86; Rev. Ambrose Goulé, 1886-93; Rev. James Sullivan, September, 1893, to July, 1894; Rev. Arthur P. Lonergan, from January, 1893; and Rev. J. C. Gillan, from July, 1894, to the present time.

In 1881, there was organized a colored Catholic society, St. Augustine’s, which has since worshipped in the basement of St. Mary’s Church. This society is in charge of Rev. Arthur P. Lonergan. Immediately after the fire, the congregation of St. Mary’s was very large, and contained some of the most distinguished residents of Chicago. Owing to the encroachments of the business district, it has steadily decreased in numbers, until now the resident population of the parish is quite small. The attendance upon religious exercises is very large, notwithstanding, being composed in the main of visitors and of a few of the numerous hotels in the central portion of the city.

Rev. Arthur P. Lonergan, assistant pastor at St. Mary’s Church, was born at Yarmouth, Nova Scotia, on June 17, 1854, the son of Edmund and Anna Lonergan. His classical education was received at St. Francis Seminary, near Milwaukee, and his theological education at St. Mary’s College, in Baltimore, where he was ordained deacon at the Cathedral in Baltimore, on December 23, 1885, and was promoted to the priesthood by Archbishop Feehan, on December 20, 1892. He has been appointed assistant pastor to Rev. Joseph P. Roles, at St. Mary’s Church, in his present position. Besides his duties as assistant pastor he takes charge of the colored Catholic Society, known as St. Augustine’s Society, the first colored Catholic society organized in Chicago. It consists of
about sixty-five families, who have commenced the accumulation of a building fund. Rev. Mr. Lonergan became their pastor in March, 1859, and was thus the first priest to minister to the spiritual necessities of colored Catholics in Chicago.

**ST. JOHN'S CHURCH.**—The corner-stone of this church, located on the corner of Clark and Eighteenth streets, was laid on Sunday, October 7, 1877, by Rt. Rev. John L. Spalding, Bishop of Peoria, who also preached the sermon. Over ten thousand people assembled, and fifty-six societies participated in the exercises. The new church-building was dedicated on October 30th, 1881. It is rough-cut free-stone, and built in the style of the thirteenth-century period of architecture. Around the church, which is hexagonal in shape, are richly colored windows of stained glass. The bell was placed in position in 1876, the ceremony of bless ing it being performed by Bishop Foley, assisted by Revs. J. S. Verdin, P. W. Riordan, J. H. Grogan and others. It weighs six thousand pounds, and was rung for the first time on St. Patrick's day that year.

**ST. PAUL'S CHURCH.**—This church was organized in 1876, by Rev. E. Weber, and was so called to perpetuate a church of that name established shortly before the great fire and destroyed by it. The families, of which there were forty, had belonged to the Church of St. Francis d' Assisitum, as in the case of the first organization, though they were not the same. On account of financial stress, it was difficult to raise money for a church-building; they purchased and remodeled a modest frame structure, near the corner of Ambrose Street and Hoyne Avenue. The school, which was established contemporaneously with the church, was conducted for about three years by lay teachers, and afterwards taken charge of by School Sisters, under whose direction it has since remained. There are now four teachers and three hundred and fifty scholars. A brick basement was constructed under the frame church-building, which has since been used for church purposes, while the upper portion of the building was used partly for school and in part for priests' residence. A pastor's residence was erected in 1885, on the northeast corner of Ambrose Street and Hoyne Avenue. The entire property of this church is worth about $25,000. The societies connected with this church are the Ladies' Society, the Young Ladies' Society, and the Mary's Benevolent Society. The parish is now composed of three hundred families, and feels greatly the necessity of a new church edifice.

Rev. E. Weber, pastor of St. Paul's Church, was born on August 25, 1852, in Treves, Prussia. He commenced his studies at the Gymnasium in his native town, and afterward, for two years, was a student at the University of Munster, in Westphalia. He then studied at the American College in the same city. His ordination to the priesthood occurred on May 41, 1874, and he immediately afterward came to America. He served some time as assistant pastor in Rockford, Ill., and in 1876 was appointed, by Bishop Foley, to establish the Parish of St. Paul, which he has brought to its present degree of prosperity.

**CHURCH OF THE IMMACULATE CONCEPTION.**—The basement walls of this building, being of rubble-stone, were not destroyed by the great fire. The pastor, Rev. P. T. Butler, had the space roofed in, and the room thus obtained was used for a place of worship until the present structure was nearly completed, in 1874. This new edifice was made a little larger than the old one, and built around it, the old church serving on Sundays for religious worship until work on the new structure had progressed sufficiently to render necessary the removal of the former. The building, of brick with cut-stone foundations, was completed in the fall, and dedicated by Bishop Foley, assisted by the pastor and by most of the Catholic societies in the city. The address was delivered by Dr. McMullen. The cost of the church was about $30,000. The priests' residence was built in 1878, at a cost of about $7,000, and a new three-story brick school-house in 1885, at a cost of about $11,000. The latter adjoins the church on the north, and the former on the south. The various assistants of Rev. P. T. Butler have been—Rev. P. Guilfoyle, Rev. P. Daly, Rev. Ignatius Baluff, Rev. Achilles Bergeron, Rev. Thomas Carroll, Rev. J. Delaney, and Rev. Patrick O'Brien, the present assistant.

The societies belonging to the church are the Sodalities of the Immaculate Conception, organized in 1865; the National Temperance Society, organized in 1868; the Altar and Rosary Society, and the Young Ladies' Sodality. The number of families in the parish is about five hundred.

Rev. Patrick T. Butler, pastor of the Church of the Immaculate Conception, was born in Ireland in 1839, the son of John and Mary (Griffin) Butler. His education was principally in his native country, at the college of the Propaganda Fide. He left Ireland in 1860, coming directly to Chicago, where he has been since located. He was secretary and chancellor of the Diocese of Chicago for one year. For two years, he was pastor in Hyde Park and South Chicago, and during 1867-68 was in charge of the Catholic church in Englewood. In 1869 he came to the Church of the Immaculate Conception, Chicago, and his church in this city has been remarkably successful. Since the fire he has built a brick church edifice of the parish, at a cost of $25,000; a priest's residence, in 1878, at a cost of about $5,000; and a school-house in 1882, at a cost of about $10,000. His church is harmonious and prosperous in a high degree.

**ST. MICHAEL'S CHURCH.**—Immediately after the great fire of 1871, in which St. Michael's was destroyed, the parish erected a temporary frame building on the south corner of the church lot. Here, services were held until 1873, while, in the meantime, the work of reconstructing the church edifice was rapidly pushed forward. The latter being ready for occupancy in the fall of 1873, the temporary building was appropriated for school purposes and society meetings until 1882, when it was sold and removed from the lot. A temporary school-building was also constructed at once after the fire, which is now used for the residence of the Brothers of Mary, while a more commodious school-house has been erected. This latter, on the corner of North and Hudson avenues was opened early in 1881. The cost of the edifice complete was about $35,000. The school now contains one thousand five hundred pupils and eighteen teachers, nine of whom are Brothers of Mary and nine Sisters of Notre Dame. The clergy-house was partly restored in 1872, and completed in 1876. The church-building itself was repaired very soon after the fire, at a cost of $40,000. Interior retouching and decorations were added, at an expense of $1,000, in 1883. The interior presents a scene of magnificence rarely equaled and not excelled by any auditorium in this city. The total value of St. Michael's property is estimated at $250,000.

The societies connected with St. Michael's are St. Michael's Society (organized in 1862), St. Matthias Society, St. Vincent de Paul Society, St. Alphonsus Society, the Knights of St. George, the Casino, St. Mary's Sane Society, and the Confraternity of the Holy Family; the latter consisting of four divisions—for married, young men, married women, and young women respectively. The parish numbers about two thousand families. The clergy of the parish have been, during this period, as follows:

At the time of the great fire and until the spring of 1873, Rev. Peter Zimmer, C.S.S.R.; Rev. John DeDecker, C.S.S.R., followed until July, 1877; Rev. Michael Miller, C.S.S.R., until March, 1879; when the present incumbent, Rev. Joseph Essing, C.S.S.R., took charge. Assistant priests have been engaged from time to time, of

Rev. Joseph Essing, pastor of St. Michael's Church, was born on November 26, 1837. He was educated in Prussia; joined the Order of Redemptorists in 1864; and was ordained in 1867; and came to America when his order was driven from Germany in 1874. Soon after his arrival in America he came to Chicago, and in 1850 became rector of St. Michael's Church, his present position.

Rev. Paternus Luette, first assistant pastor of St. Michael's Church, was born in Baden, on February 17, 1823. He obtained his education in Bavaria; joined the Order of Redemptorists in 1843; and was ordained on March 20, 1847, in Bavaria. In 1848, he came to America, and, after serving as rector of churches in various parts of the country, came to Chicago in 1870. He soon became assistant pastor of St. Michael's, and later first assistant.

St. Joseph's Church.—After the fire, a small frame edifice was erected on the old site of this church, at a cost of $6,000, which was used until the present brick structure, on the northeast corner of Market and Hill streets, was ready for occupancy. The corner-stone was laid in October, 1876, and the church- edifice was dedicated on October 6, 1878. The building cost about $60,000. In 1874, a large four-story brick school-house was erected. The basement of this building is occupied by a chapel for Sunday service, in winter, and, on week days throughout the year; the second and third floors are used for school-rooms, and the upper story is a large hall for concerts and entertainments, being also the headquarters for the Knights of St. George. A priests' house was erected in 1882. It is a three-story brick, and cost about $9,000. The immediate successor of Rev. Leander Schimm was Rev. Meinrad Jeggle, from 1873 to March 1, 1874. He was succeeded by Rev. M. Corbhan, who remained until March 14, 1875. Rev. Gilbert Joseph was then prior until June 6, 1875, being followed by Rev. Suibert Demarteau, who, on August 20, 1884, was succeeded by Rev. Bernardine Dolweck, the present prior, who has been connected with the church since 1882.

The societies connected with St. Joseph's Church are St. Joseph's Society, organized in 1851; St. Benedict's Benevolent Society, established in 1852; Knights of St. George, established in 1853; St. Benedict's Order of Catholic Foresters, established in 1855; St. John's Young Men's Society, established in 1856; St. John's Confraternity of Altar Boys; St. Rosary's Society, for married women; and two sodalities of the Sacred Heart and of the Holy Name, for women. There are about five hundred and fifty families connected with this church, among whom are numerous old German citizens of Chicago.

Rev. Father Bernardine, O.S.B., prior of St. Joseph's Catholic Church, was born in Lohringen, now a portion of the German Empire, in 1825. His family name was Dolweck. He studied in the college at Birche, Moselle Department, until 1850, when, in company with his parents, he came to America. He then studied in the Catholic Seminary at Cleveland, Ohio, where he was ordained priest by Bishop Ropp, on December 11, 1855. From this time until 1865, he was priest in the diocese of Cleveland, serving as pastor for different churches. He then united with the Order of St. Benedict, and was chaplain of St. Vincent's Monastery in Westmoreland County, Penn. He was a novice in St. Vincent's one year, when he went to St. Mary's Priory, Newark, N. J., where he remained until September, 1873, acting as pastor and prior of various churches in those states. He was stationed at Ohio, Penn., one year; was then assistant in St. Joseph's Priory, Covington, Ky., until February, 1877; going thence to Richmond, Va.; and the following year, being transferred to Covington, Ia., near New Orleans, as pastor of St. Tamman's parish. In June, 1876, he was sent to Chicago as assistant in St. Joseph's Priory, which position he held until August 20, 1884, when he was appointed by Abbot Wimmer, as the successor to Rev. Suibert Demarteau, O.S.B.

Rev. Father Constantine, O.S.B. (Francis Leber), assistant pastor of St. Joseph's Church, was born on October 4, 1838, at Thüngen, Germany, the son of John Baptist and Agatha (Ehnen) Leber, neither of whom are now living. Father Leber came to America on October 4, 1860. He had studied at Constance, Baden, and at the Monastic Beneficent College at Einsiedeln, Switzerland, leaving this institution in August, 1871. On October 14, 1871, he arrived in Chicago, and was appointed pastor of the Church of Sts. Stanislaus, Pittsburgh, Pa. In August following he was transferred to Chicago as assistant pastor of St. Joseph's Church; and in August, 1814, became rector of the Church of Sts. Stanislaus, Pittsburgh, Pa. In August following he was transferred to Chicago as second assistant pastor of St. Joseph's Church; and in August, 1884, became rector of St. Joseph's Church. This church was organized in 1874. Rev. Francis Coosemans being the first pastor. Father Coosemans was a member of the Society of Jesus, the church being founded and conducted by that order for about a year, when they surrendered the parish and conveyed the property to the bishop. In 1875, Bishop Foley appointed Rev. Hugh McGuire pastor of this church, and he remained until 1884. Until 1881, he was without assistants. In that year, Rev. P. J. Timan was ordained, and assigned to that duty; and shortly afterward Rev. R. Lyons became pastor, and Father McGuire's services followed by Rev. J. F. Gal- ligan, who, in September, 1884, was succeeded by the present pastor, Rev. Francis S. Henneberry. Rev. G. A. Kinsella and Rev. Edward O'Reilly are now the assistant pastors of the church.

The church-building, a frame structure on the corner of Van Horn and Paulina streets, which seated about three hundred people, was enlarged, in 1877, so as to seat six hundred and fifty people. Originally, there were about one hundred and fifty families in the parish, while at the present time there are about five hundred. Plans were adopted in 1885 for the erection of a new church- edifice at the corner of Ashland Avenue and Nineteenth Street, immediately north of the priests' residence, which is a three-story brick structure, erected in 1884, at a cost of $5,000.

Rev. Francis S. Henneberry, pastor of St. Pius's Church, was born in Chicago, on March 27, 1854, the son of John and Mary (Henneberry), who is still living. He is one of the first members of St. Mary's Church in Chicago, which was organized by St. Cyril in 1833. Father Henneberry was educated at St. Patrick's Academy and St. Ignatius College, Chicago, attending the theological studies at the Seminary of Our Lady of Angels, at Niagara Falls. He was ordained on June 7, 1879, by Bishop Ryan, of Buffalo, and came directly to St. James's Church, on Washington Avenue, as assistant to Rev. P. W. Riordan. In October, 1853, he was sent to the Cathedral of the Holy Name, where he remained until September, 1854, being then appointed to his present position.

Church of the Holy Family.—This church, of which a history appears in Vol. II., down to the time of the great fire, still remains in its imposing beauty one of the chief architectural adornments of the West Division.

Since 1871, various buildings have been erected by the parish, of which the most important is the Sodality building, immediately in the rear of the church- edifice, erected in 1879, at a cost of $40,000. It is a spacious structure containing numerous rooms and various halls for the use of the different societies connected with the church; among others a reading-room, and two libraries aggregating three thousand volumes. St. Joseph's Home, an industrial school and temporary refuge for homeless girls, on the corner of May and Eleventh streets, was commenced in 1876, and enlarged and finally completed in 1885, costing $16,000. Besides these institutions are St. Ignatius College and St. Joseph's
RELIGIOUS HISTORY.

771

School, on the corner of West Thirteenth and Loomis streets. The total number of pupils enrolled is four thousand.

The total number of souls in the parish is eighteen thousand. The pastors during the period covered by this volume have been as follows:

At the time of the great fire, and until 1873, Rev. Arnold Damen, S.J.; 1873-75, Rev. John C. Coghlan, S.J.; 1875-79, Rev. C. Kookmans, S.J.; 1879-84, Rev. Henry C. Bronsgeest, S.J.; 1884-85, Rev. Francis Ryan, S.J.; 1885, I. G. Zeoland, S.J. Each of these rectors has been assisted by other clergy, the number of assistants now being eight.

Rev. Francis Ryan, S.J., pastor of the Church of the Holy Family, was born in Newfoundland, on March 25, 1844. His parents, James and Ellen (Quinlan) Ryan, were from County Tipperary, near Clonmel, Ireland, where the Ryan and Quinlan families have been known for several hundred years, and where the descend- ants of the old stock still possess the old homesteads of Ballinaclut and Ballalyre. Having received a good early education in Newfound- land, from a first-class teacher, and M.A. of Trinity College, Dublin, Mr. Ryan went to Ireland, in 1858, and entered All Hal- lows Seminary, Stillorgan, near Dublin, finishing his classical studies. He had for his professor of rhetoric the eminent and dis- tinguished Dr. Conroy, who was afterward appointed apostolic delegate to Canada. From All Hallow's Seminary, Mr. Ryan passed on to All Hallow's College, where he studied philosophy two years. The candidat Dr. Conroy, after- ward apostolic delegate to Canada, was his professor in theology here, as he had been of rhetoric in the Seminary. In 1865, Mr. Ryan left college and entered the Society of Jesus. Having gone through the preliminary studies of the Jesuits, at their houses in Dublin and their famous French College of St. Acheul, at Amiens, the young Jesuit, not yet a priest, was appointed to the responsible office of first prefect in the Irish Jesuit College of Clongowes Wood, which office he filled four years. In 1872, Mr. Ryan went to St. Beuno's College, North Wales, where the Irish and English Jesuits complete their theological studies and are ordained priests, spending four years in the study of theology, taking his degrees in philosophy and theology, and being ordained a priest of the Society of Jesus. In 1876 he came to New York, spending two years at Fordham College as first prefect and professor of philosophy. He was then invited by the apostolic delegate to Canada, Fr. Conroy, to accompany him, as assistant and secretary, to Newfoundland, and, joining the delegate in Chicago, in June, 1878, was with him until his death. Father Ryan then went to Montreal, and was the first Sunday-evening lecturer at the Jesuit Church in that city, where he remained for three years. During these years, besides his lectures, he gave many missions to the people and retreats to the clergy of Canada, and was so highly esteemed that, when the diocese of Ham- ilton, Ont., became vacant, his name was sent to Rome for the miter. But preferring the labors and duties of a Jesuit priest to those of a bishop, his superiors at Rome, at his request, sent him to Chicago, where he has since been pastor and Sunday-evening lecturer for the Holy Family parish. Father Ryan is a very learned priest. He is a large man, of fine presence, interesting in conversation, and most affable in manner. As a preacher, his style is rather that of the professor than of the pupil orator, his mind being analytical and logical rather than synthetic and imaginative. He takes a philosophical view of his subjects, and presents his thoughts in pure and precise language that can not be misunderstood, and he is especially powerful in presenting arguments prior to the audience of scholars and divines. He is thus eminently qualified to perform all the duties of a bishop, but prefers the more humble position of Jesuit priest and preacher.

St. Ignatius' College.—This building was erected for the education of the Catholic youth of Chicago, in 1869, through the efforts of the Society of Jesus. It was chartered by the Legisla- ture of Illinois on June 30, 1870, with power to confer the usual degrees. The college stands on Twelfth Street, just east of the Church of the Holy Family. It is of brick; with stone trimmings, and consists of a main building flanked by two wings. There are thirty class-rooms, all well lighted and ventilated. It has a hall seating fifteen hundred, with a gallery which will accommodate four hundred. The entire cost was $200,000.

Originally there were two distinct courses of study, the classical and commercial. The former, a six years' course, embraced the English, Latin and Greek languages, mental and moral philosophy, pure and mixed mathematics, and physical science. The latter, a four years' course, was limited to the branches of an English education. French and German were optional. In 1879, a scientific course was added to the curriculum, which was designed to qualify young men for civil and mechanical engineering, mining, assaying, etc.

The societies in connection with this institution are three,—the Loyola Debating Society, the German Academic Society, and the St. Cecilia Society. The first was organized on November 16, 1875, and was known, until 1881, as the Chrysostomian Society. Its object is to promote the cultivation of eloquence, the acquisition of some knowledge, and a talent for literary discussions. The latter, a literary and scientific society, was organized in 1878, for the study of the German language. The St. Cecilia Society was organized on October 23, 1879, for the study of vocal music.

The museum, established in 1871, contains a rare and costly collection. Among the mineral specimens are quartzi, lead, copper, silver and gold ores; in the animal are numerous specimens of ornithology, ichthyology, entomology and conchology, including a beautiful collection of radiata, polypi and corals, a rare species of medusa's head, several varieties of gorgonia flabellum, and a botanical collection of cryptogamous and phanerogamous plants, chiefly from the Rocky Mountain region and Nebraska. The collection of amethysts, for which the museum is chiefly indebted to Rev. F. X. Shulak, S.J., is said to be the most complete and perfect in the world. The museum also contains a valuable series of curiosities, and a full set of philosophical and chemical apparatuses.

The library, established in 1876, for the benefit of the faculty and students, is maintained by the college authorities. It numbers about twelve thousand volumes, embracing standard works of history, poetry and general literature, as well as a magnificent collection of ancient and modern works in various languages pertaining to art, science and belles-lettres. During 1884, an effort was made to perfect the reference department of sacred science. About two hundred rare and valuable volumes have been added to the library this year.

Rev. Joseph G. Zeoland, S.J., president of St. Ignatius College, was born on December 25, 1831, at Geldorp, Province of North Brabant, in the Netherlands. His ancestry was Dutch, his father being Francis Van Zeeland and his mother Elizabeth Ver- boven. On coming to America, Father Zeoland was educated at De Paul College, where he was graduated in 1858, with the title of his name, adopting its English form. He pursued his

SODALITY BUILDING, CHURCH OF THE HOLY FAMILY.
studies in his native land, taking a classical course at the Gymnasium of the Petit Séminaire of Bois-le-Duc, and finally preparing for philosophy at the Grand Séminaire in the same city. In December, 1853, in company with the celebrated Father DeSmet and seven young Levites, he sailed from Havre for New York, on the steamer "Adriatic," and was arrived in a fog on the coast of Newfoundland. He had a narrow escape, having been accidentally detained, with one companion, on the stranded vessel for several hours. This vessel had been wrecked. Previous to embarking he had joined the order of Jesuits. After two years spent at their novitiate in Florissant, Mo., he taught classics for three years at the college of Rardstown, Ky., and for another year at Milwaukee. During the next four years he continued his theological studies at the St. Louis University and at Boston College in Massachusetts. Having taken priestly orders in 1863, and taught the classics for another year at St. Xavier College, Cincinnati, he was called to St. Louis University to assume the position of prefect of studies. He was superintendent of classes during the next seven years, and in 1871 became president of the University. In 1874, he was the companion of Father Damen in his missions, and during five years his services were of invaluable aid in the Church in the interior. In the interest of the members of his order, he did not neglect the performance of his priory duties. He rendered service to missions, being in charge of one in Missouri from 1866 to 1873, and of the Sacred Heart in Cincinnati, Ohio, from 1873 to 1876. In the latter year he was engaged in a course of teaching in the University of New Orleans, and thence returned to St. Louis University. He was the third priest to be elected President of the University by the faculty and students. He was finally called to the University of St. Louis, and attended the session of the same institute at St. Louis, Missouri, in the year 1876. The Jesuits of that University, having been called to attend the session of the Society of Jesus at Florissant, decided to establish a college at that place. The new college was named the Sacred Heart College, and the Jesuits thereupon set out on a preaching tour, during which they called at St. Louis, Missouri, and were received with much attention by the Superior of the college, who was pleased to assist them with the means necessary for the establishment of the college. In 1876, the Jesuits purchased the property of the college, which had been abandoned, and immediately commenced teaching there. In 1878, they were authorized to establish a college at St. Louis, Missouri, and in 1879, they commenced teaching at the age of seventeen, three years before graduating; received the degree of Bachelor of Arts upon graduation in 1834, and that of Master of Arts in the following year. With reference to his ability as a theologian, it is impossible for any one who is more close to the line. He follows the syntax as closely as the plowman follows the plow in the nicely opened furrow. It is seldom that we find text books so learned as these two tractates (General Metaphysics) and Sacred Philosophy). These, besides the Index totale, to the leading versions of which they are continually marginal references, etc.

**Parochial Schools.**—The schools of the Holy Family parish now number five. The first was opened in the old frame church on Eleventh Street, and have since grown into a very large and perfect system of educational machinery. The Holy Family School is situated on Morgan Street, south of Twelfth Street, the building of brick, four stories high. This school is devoted to boys, the average attendance being about one thousand six hundred and fifty. The cost of the building was about $6,000. Rev. Andrew O'Neill is director, and is assisted by twenty-five teachers.

The Convent School for girls is on West Taylor Street. It averages about one thousand pupils, and is under the direction of the Ladies of the Sacred Heart, the building cost about $9,000. St. Alphonsus School, on Maxwell Street, is for the education of the Sisters of the Blessed Virgin Mary, with thirteen teachers. The average attendance is about one thousand. The cost of the building was $4,000.

In each of the other two schools there are four teachers—Sister of Charity of the Blessed Virgin Mary. The cost of instruction in all these schools is very low, averaging for each scholar about five dollars a year, only those who are able to be required to pay.

The Convent of St. Alphonsus was built in 1867, Rev. Father Arnold Damen, S.J., invited the Sisters of Charity, whose mother house is at St. Joseph's Convent, near Dubuque, Iowa, to send members of their order to this city to establish a parochial school. Sister Mary Agatha Hurley was deputed to go to the province of St. Alphonsus to take charge of the new mission, and arrived in this city on August 6, 1867. On the 19th of that month their first school was opened, in a rented building on Maxwell Street, between Clinton and Jefferson streets. These sisters made their classrooms and dormitories in the houses that they had occupied, and on October 18, 1867, they were joined by two more. Father Damen erected a school-building at No. 210 Maxwell Street, which was enlarged in 1882. The structure, as it now stands, is three stories and tenement in height, and has no teaching rooms, but a chapel and dormitories occupying half of the second floor. The mission of the Sisters of Charity is entirely educational. Over one thousand day pupils are annually enrolled at St. Alphonsus, and there is an average daily attendance of seven hundred and fifty scholars. These sisters also have charge of and instruct the parochial schools of the Church of the Sacred Heart, St. Pius's, St. Bridget's and St. Vincent's, and also a branch school at St. Pius's and Father Gill's new school; and there are two primary branch schools belonging to St. Alphonsus. In the latter establishment there are twenty-two Sisters engaged in the work. The usual intermediate and higher classes have graduated in the first-class and second-class in the class of 1883 which were six graduates. Mary Agatha Hurley, the first Mother Superior, still remains in charge of St. Alphonsus' School, which has long since been recognized as a leading institution of learning in this city.

**Church of Notre Dame de Chicago.**—This church, which has a French-speaking congregation, was, up to 1885, located on the northwest corner of the streets of Cochrane and Congress streets, with the school in the basement. In 1885, the parish purchased ground at the corner of Vernon Park Place and Sibley Street, for the sum of $15,000, and in the spring of the same year, commenced erecting a convent building on the west side of the land, which was completed in July, 1885. This build-
ing, in the form of a Maltese cross, is built of brick and is three stories high. The property at Halsted and Congress streets was sold, and the church and school transferred to the new building on its completion. The interior of the new house is handsomely finished in hardwoods.

The first floor is divided into recitation, music and dining rooms; the second floor contains reception room, parlor, music hall and private apartments; the third floor is at present used by the Sisters of the first floor, with the exception of two small apartments at either side, used by the priest and assistants.

In 1886, the parish will erect, on the corner of Vernon Park Place and Sibley Street, a $10,000 church-edifice, and the present building will be devoted entirely to educational purposes. When the parish has finished the erection of the church-edifice and pastor's residence, their property will represent a value considerably in excess of $100,000.

REV. A. L. BERGERON, pastor of the Church of Notre Dame de Chicago, was born on September 4, 1856, at Kankakee, Ill. His father, Anthony Bergeron, a farmer, though born in St. Louis, was of French descent. His mother, Lucy (Ilosset) Bergeron, was born in Quebec, and was also of French descent. Both are still living. Father Bergeron first attended the high school at Milledgeville, Ill.; going thence, in 1865, to the College of St. Viateur, at Bourbonsais Grove, Ill., where he remained for four years, the first ten in the classical department, and the last four years in the theological department. Upon graduating from the theological department, in 1876, he received the degree of Bachelor of Arts. He was ordained, on July 5, 1876, by Bishop Foley, and was assigned to St. Stephen's Church as assistant pastor, remaining there until May, 1880. He was then transferred to the Church of the Immaculate Conception as pastor; and from February, 1882, until March, 1884, he was pastor of St. Joseph's Church, at Manteno, Ill., when he was transferred to his present position, succeeding Rev. James Cote.

CONVENT OF THE CONGREGATION DE NOTRE-DAME.—This order was founded in Canada about two hundred years ago by the Venerable Mother Margaret Bourgeois. In 1852, Sister Emelie van Abbe, Superior, and three other nuns, were sent to this city from the mother-house in Montreal, to instruct the French children in the Parish of Notre Dame. The convent at present only receives day scholars; those now attending number two hundred and seventy-three. The instructors and a majority of pupils in this school are of French origin, and ordinary conversation in the school-room is carried on in the French language. The course of study comprises all the branches of instruction necessary for a perfect French or English education.

ST. PROCOPIUS' CHURCH.—This church was founded in 1877, by Rev. William Coka, who purchased a church-building on Halsted Street, near Nineteenth Street, and moved it to the site of the present church, Eighteenth and Allport streets. The congregation rapidly increasing, the erection of a new building of brick, costing $15,000, was begun in 1882. The old edifice was converted into a school-house. The first teacher, John Petro, is still the principal, being assisted by two male teachers and by seven Sisters of St. Francis. The school numbers about eight hundred pupils. The church, the third Bohemian congregation organized in the city, is now the largest, containing about eight hundred families.

CHURCH OF ST. ELIZABETH.—The parish of St. Elizabeth, which lies between Thirty-fifth and Forty-seventh streets and between Clark Street and Irving Avenue, was organized in 1881, Rev. D. J. Riordan, was in charge. At the time of organization there were one hundred and sixty-five families in the parish, while now there are four hundred. Father Riordan purchased the frame church-edifice which had been used by St. Ann's congregation, and removed it to Dearborn Street, it being occupied by his parish until the new brick building on Forty-first and State streets was completed. This was dedicated on November 2, 1884, by his brother, Most Rev. P. W. Riordan, then coadjutor-archbishop, and now archbishop of San Francisco. The cost of the new church-edifice and school-building has been nearly $25,000.

REV. D. J. RIORDAN, pastor of St. Elizabeth's Church, was born in August, 1846, at Kinsale, County Cork, Ireland, the son of Matthew and Mary (Dunne) Riordan. His father, by trade a shipper, came to Chicago in 1854, and was employed by Mr. Miller, and for other firms. He died in October, 1873. D. J. Riordan received his education in the parochial schools of St. Patrick's Parish and in the University of St. Mary's of the Lake, which he entered in 1859, and where he remained until 1863, with the exception of one year spent at the Seminary of Our Lady of Angels at Niagara Falls, N. Y. In 1863, he went to Belgium, and studying two years in the preparatory seminary at Noailles. From 1865 to 1869, he attended the American College at Louvain, studying philosophy and theology. He was ordained at Malines, on May 22, 1869, and after spent one year in travel and study through Germany and Italy. In October, 1870, he returned to Chicago, and was appointed pastor of St. Rose Church, Wilmington, Ill., succeeding Rev. Dr. McMillen. In 1872, he was appointed chaplain of Mercy Hospital, Chicago, a position which he retained until October, 1873, when he became chancellor, and secretary to Bishop Fely, holding that position until 1881. He was then appointed to organize the new parishes of St. Elizabeth, in which he has been engaged.

ST. MALACHY'S CHURCH.—This parish was formed in 1882, by Archbishop Feehan, out of St. Jarlath's and St. Columbkill's parishes. Rev. Thomas P. Hodnett was assigned to the work of organizing the new parish. It embraces the territory lying between Chicago Avenue and Adams Street, and between Rockwell and Robey streets to Kinzie, where the eastern boundary runs back to Hoynie, and thence extends to Chicago Avenue. Having obtained permission from the building committee of the Council to erect a frame chapel on the lots already purchased at the corner of Western Avenue and Walnut Street, preparations were in progress for its erection when officers of the Fire Department forbade the work to proceed. But Father Hodnett, not being legally enjoined, collected two hundred men and fifty boys, and in seven hours, on July 3, 1882, had erected and enclosed a frame building, upon which he set a flag-staff and hoisted the stars and stripes. Having thus triumphed, he named the little chapel "The Ark," fitted it up for worship, carrying in chairs for seats, and then proceeded with the greater work of building a church-edifice on the corner of Western Avenue and Walnut Street. The corner-stone of this building was laid on Sunday, September 10, 1882, with imposing ceremonies.

The edifice was dedicated on Sunday, December 21, 1884, the opening sermon being delivered by Rt. Rev. Bishop John Hennessy, of Dubuque, Iowa. The building is of stone, in the modern Gothic style of architecture. The interior of the church is very elegant, a prominent feature being a memorial window, the gift of Rev. T. P. Hodnett, in memory of his father, Thomas Pope Hodnett.

Originally there were about three hundred families connected with the parish; now there are about five hundred, with a total membership of twenty-five hundred. A stone school-house has been erected just south of the church, at a cost of about $20,000. The school is in charge of the Sisters of Mercy of the Western Reserve, who also conduct St. Patrick's Academy in this parish. The societies connected with this church are St. Malachy's Young Men's Literary Association, the Catholic Order of Foresters, a branch of St. Vincent de Paul's Society, and St. Malachy's Total Abstinence and Benevolent Society. Father Hodnett is assisted by Revs. M. C. Mackin and D. A. McGrath, the latter coming to this church in May, 1884.
He is the son of Thomas Pope and Elizabeth Griffin (Hallinan) Hodnett. His father died in 1848; his mother is still living, at the cottage Knock, County Clare, Ireland, at the age of sixty-three. When thirteen years old he entered a private academy, and the following year St. Munchin's Jesuit College, at Limerick, where he remained four years, completing with honor the whole "course of humanity." He then entered the affiliated college of the Catholic University of Ireland, St. Flannan, at Ennis, where he passed the eleven months. Upon the formation of the Diocese of Peoria, he was transferred to St. Patrick's Church, Dixon, Ill., with the affiliated missions of Harmon and Ashton, Lee Co., Ill. On June 10, 1852, he was summoned by Bishop Feehan to go to St. Louis, the parish of St. Malachy, Chicago, out of portions of the two parishes of St. Jarlath's and St. Columbkille's. Father Hodnett built a church and a large school on Western Avenue, and superintends an academy at the corner of Oakley and Park avenues. The rest of his active and zealous labors in this new field are shown in the history of St. Malachy's Church. Thus far Father Hodnett has either built, or paid for, five churches, or three parochial residences and schools, and has been instrumental, to a great extent, in the founding of the University of Our Lady of the Sacred Heart, at Watertown, Wis. He has been also connected with the temperance movement in this State and in Wisconsin. He is widely known and his influence as a follower of Father Mathew is greatly felt.

**St. Joseph's Home.**—In 1875, a small band of Sisters of the Order of the Holy Heart of Mary, were sent from the mother-house at Buffalo, N. Y., to this city, to found a home for females out of employment and for those who were employed but had no homes of their own. They purchased ground on South May Street, near the corner of Eleventh, and erected a substantial brick building, four stories high. In 1884, the order commenced another building on the north side of the old structure, which adjoins it, and of the same height, the two forming one building. The new structure was dedicated on September 26, 1885, by Archbishop Feehan. The chapel is situated on the north side of the new building. In the rear of the main structure is a three-story building, in which are located the dress-making rooms and laundry. The cost of the grounds and buildings was about $25,000. There are seven Sisters of the Order of the Holy Heart of Mary in charge of the Home, and the average number of inmates is from seventy to ninety. The institution is self-sustaining.

**Academy of the Sacred Heart.**—The Academy of the Sacred Heart was founded in 1858, by Madame Gallway, who, accompanied by ten ladies of the community, came in August of that year, by invitation of Bishop Duggan. A small house was rented on the South Side, but a great increase of pupils rendering extensive accommodations necessary, a large house on the North Side was procured, to which a frame addition was built. The difficulty of procuring spiritual assistance made the community desirous of a closer proximity to the Jesuit Fathers, and in 1860 Madame Gallway purchased twelve acres of land on the West Side, near the Church of the Holy Family. In May the erection of the new convent was commenced, which was occupied on August 20, 1860. The frame house on the North Side, which was moved to this location, became their first parochial school, and was immediately put into operation with three hundred and fifty pupils. In 1854, an addition to the Academy was built, for the accommodation of boarders and novices. In 1866, the old parochial building was replaced by a large brick edifice, capable of accommodating one thousand children. In 1869, a second addition was built. The novitiate, which had been temporarily removed for want of accommodation, was brought back to Chicago; but in 1872, it was definitively located at the new Convent of Maryville, near St. Louis. In 1879, a new chapel was built adjoining the academy; and in 1885, a large bell was erected close to the parochial school, to be used for divine service, and also for school exhibitions. The Academy comprises numerous class-rooms, with an extensive library and a fine museum. The grounds attached to the institution, comprising about ten acres, are kept with much skill. Madame Gallway remained Mother Superior until 1886, when she was succeeded by Mother Gauntreux, who died in the institution in 1872. She was replaced by the present Superior, Mother Niederkorn, who has been away three times, being relieved by Mother Bourke Freret and Mother Gauci.

**St. Patrick's Academy.**—St. Patrick's Academy is one of the most recently established of the Catholic Female schools in Chicago, and is one of the best known and most flourishing. It is situated on the southwest corner of Oakley and Park avenues, and is under the care of the Sisters of Mercy, a religious order favorably known to residents of Chicago through the parochial schools under its charge. St. Patrick's Academy was founded in 1853, when six Sisters came to Chicago. It is in the parish of St. Malachy. It was at the request of Rev. Father Hodnett, pastor, and of Rev. Father Feehan, chancellor of the diocese, that the building was erected. On the approbation of His Grace, the Archbishop, that these sisters came from Nashville, Tenn. The number now at the Academy (which has been made a mother-house of the diocese) is twenty-three, not all of whom, however, have yet completed their novitiate.
The academy-building is a substantial brick edifice. The cornerstone was laid on June 5, 1881, and on September 15th, the lower portion of the building was so far completed as to admit the reception of pupils. The Sisters lived in a rented house on Park Avenue, until Christmas, when the upper stories were finished, and the school opened to the Academy.

The school opened with forty-eight pupils, and the roll for the past year showed an attendance of two hundred. It has three departments, primary, intermediate, and senior; the two last of these are coeducational, and the latter covering a course of three years. The studies are those taught at the Chicago grammar and high schools, with the addition of a course of religious instruction, including catechism, scripture history, and Christian doctrine. The chief aim of the Sisters is to attain thoroughness, promotions from one grade to another being made only after the test of a stringent examination. Pupils may, however, take an elective course of study, and, if such a direction is given, they are instructed in instrumental music, painting, modern and ancient languages, and plain and ornamental needle-work. No class has yet graduated, nor is it expected that any will before 1887. The Sisters act as officers of the community at present—Mother Assistant, Sr. M. Basilia; Mistress of Novices, Sr. M. Xavier.

Mother Mary Catherine, now at the head of the motherhouse of the Sisters of Mercy in the Archdiocese of Chicago, and of the Academy of St. Patrick, entered upon her religious career in June, 1867. She is a sister of Most Rev. P. A. Fenoch, Archbishop of Chicago. Before assuming the vows that bound her to her present life of devoted self-abnegation, she lived in St. Louis, Mo. For years before connecting herself with any religious community, she had determined to renounce the world; but her mother being in failing health in consequence of a paralytic stroke, she believed it her first duty of an only daughter to remain in order to support her mother’s declining years. Until her mother’s death, therefore, she remained at home, her two brothers, one a physician, and the other a merchant, also living under the same roof. After her mother’s death, Mother Catherine, determined to set her feet into execution her long cherished plan. Having been up to that time undecided as to the order whose vows she should assume, and learning that Sisters were needed by the community of the Sisters of Mercy in Kentucky, she determined at once. It is possible that her choice may have been, in some measure, affected by the consideration that her remaining brother (the present Archbishop) was a bishop of Tennessee. Her novitiate lasted from November 25, 1867, to November 25, 1869, when she took the final vows and became a professed Sister. The constitutions of the order of the Sisters of Mercy provide for offices in each community, to be filled by election. Immediately upon the completion of her novitiate, Mother Catherine was chosen to fill the dual office of mother bursar and mistress of novices, both of which positions she retained until 1883, when she was elected Mother Superior, shortly before being sent to this city. The wisdom of this selection and appointment is clearly indicated in the rank of the religious order, and in the services she was called upon to render to the community. The work of the Order in America is largely due to the wisdom of the choice which the community made in appointing her. The esteem in which she is held by the religious community is shown by the rapid growth and constantly increasing prosperity of the institution under their care, which are to be attributed, in no small degree, to their executive ability as well as to the wisdom and executive ability as well as to the wisdom and energy of those who have directed and administered the institution.

Sister Mary Basilia (Callaghan), mother assistant of St. Patrick’s Academy, and of the mother-house of the Sisters of Mercy in the diocese of Nashville, Tenn., first entered the Order of a religious in August, 1864. Her novitiate ended in March, 1867, and her profession, the first to take place in Nashville, was solemnized with appropriate ceremonies. Since taking the final vows, Sister Mary Basilia has held responsible and important positions. With the exception of a short time, she has held the office of assistant mother of St. Patrick’s Academy, and during a part of the time has also been director of the Young Ladies’ Society of that institution. She is a lady of superior education, being possessed of the highest accomplishments in language and music; is a thorough scholar in French, Italian, German and Latin; and is an excellent performer upon the piano, organ, harp and guitar. She understands the language of the church, and has the rare grace of soul in all her movements. She has won the love and reverence of all with whom she has come in contact. Sister Mary Basilia, assisted by five others of her order, has immediate charge of the musical department of the Academy.

St. Adalbert’s (Polish) Church.—This church was started as early as 1872, in which year Jacob Lilja and Francis Szymanski purchased some lots at the corner of West Seventeenth and Paulina streets. In 1874, the ground was paid for, and Rev. John Mullitzer appointed pastor. He remained long enough to organize the parish, becoming succeeded by Rev. Dominie Mayer, who built the basement of the present structure, which was used for a number of years by the congregation. He was succeeded in 1878, by Rev. Adolphus Snigurski, during whose pastorate the church-building was completed, being dedicated in June, 1884. It is a Gothic structure of brick, and cost about $45,000. In July, 1885, the present pastor, Rev. John Kadziezinski, took charge. The number of families connected with this church is about one thousand. The parish schools were established in 1878, by Rev. Dominic Mayer. The first teacher was Mr. Wendziniski, the second August Wrobiewski, the third, Miss Weisslaar, and the present incumbents, Mrs. Doyle and Francis Zabka. The school is held in the basement of the church and has three hundred and seventy-five scholars. In September, 1885, it was taken in charge by the Sisters of Nazareth, from Rev. John Kadziezinski, of Italy.

The following societies are connected with the church: St. Adalbert’s Benevolent Society, organized in 1873; Society of the Sacred Heart of Mary, organized in 1878; Knights of St. Casimir, organized in 1881; Society of the Holy Name of Jesus, organized in 1883; Society of St. Dominic, organized in 1885; Society of St. Stanislaus Kostka, organized in 1885; Society of St. Valentine, organized in 1885; Rosary Society, organized in 1873; Young Ladies’ Society, organized in 1885. Church societies of the church, St. Adalbert’s was organized in 1885, at Bridgeport, and named the Church of St. Mary of the Perpetual Help, by Rev. John Kadziezinski, who purchased an entire block of land, containing fifty lots, sixteen of which are reserved for the use of the church. A frame church-building was purchased and moved on the ground, as were also a school-house and a priests’ residence; the church being dedicated on August 16, 1885. There are two societies connected with this church, that of St. John Kanty, and St. Stephen’s. The school containing two hundred pupils, is taught by three Sisters.

Rev. John Kadziezinski, pastor of St. Adalbert’s Church, was born in Karcz, Czarnkow County, Province of Posen, Poland, on October 18, 1844. His father was Peter and his mother Mrs. Mathilda (Kura) Kadziezinski. He was educated in the Pedagogium at Ostrowo, near Wilna, and at the Polish seminary in Rome, where he completed his studies in 1869. On May 22, 1869, he was ordained, and served as pastor four years in Posen. Afterward he served six years as assistant priest in Paris, France. He came to America in 1881, and soon after landing went to Chicago. He was appointed assistant priest at St. Stanislaus Kostka Church, in which capacity he served two years, and became pastor of the Church of the Immaculate Conception, at South Chicago, in 1882. In 1885, he built a frame church on Halstead street there; and in 1884 was appointed to his present pastoral charge.

Rev. Leo E. Mozyjewski was born on May 4, 1859, in San Antonio, Texas, the son of Anton and Philomena (Wenz) Mozyjewski. He received his education for the priesthood at St. Francis’ Seminary, near Milwaukee, Wis., and was ordained on June 24, 1884. Shortly thereafter he was appointed assistant priest at St. Adalbert’s Church, where he remained until the latter part of 1885; when he was sent to take charge of the Polish parish in Lemont, Cook Co., Ill., which position he has since occupied.

Rev. Father Edward J. Dunne has been connected with the chief pastorates of All Saints’ Church, corner of Wallace Street and Twenty-fifth Place, for over ten years. In fact, his Irish duties commenced before there was any church at the present site. To his energy, eloquence and faithfulness a large debt of gratitude is due, not only by his parishioners; but by the communities at large, through his individual exertions the parish of All Saints has become most important and progressive, and his ecclesiastical ministries have resulted in vast improvement in the religious and domestic welfare of his parishioners. Rev. Dunne is a native of Ireland, and was born in Tipperary, the son of Richard and Julia (Cook) Dunne, on April 25, 1845. When he was a year old his parents came to America, and located in Chicago, where the son and future priest attended the Brothers’ school. In 1867, he entered the Chicago Catholic institution of learning in St. Mary’s of the Lake. From this school he went to study at the Seminary of St. Francis, Chicago, and completed a thorough theoretical and philosophical education at St. Mary’s Seminary, Baltimore, Md. There he was ordained priest, on June 29, 1871, and returning to Chicago became assistant pastor of St. James’ Church, and later filled the

RELIGIOUS HISTORY.

775
same post of duty at St. Mary's Church. In 1857, Father Dunne was given charge of the parish of All Saints. At that time there was no church building, and for a time Mass was celebrated in a small frame house, the home of a Unitarian minister. In 1864, Bishop Blanchard commissioned him to act as vicar-general for the Diocese of Chicago. He was later appointed as assistant to the bishop and became vicar-general. In 1872, he was appointed as coadjutor of the diocese and later as bishop of the diocese of Chicago.

During his tenure, Father Dunne worked tirelessly to expand the diocese and its outreach to the community. He was known for his pastoral care and his dedication to the education of the clergy and laity. He was a strong proponent of higher education and supported the establishment of several schools and universities in the diocese. He was also a strong advocate for the construction of new churches and church buildings.

In addition to his pastoral duties, Father Dunne was also known for his commitment to social justice issues. He was a strong proponent of Irish Catholicism and worked to establish Irish Catholic churches throughout the diocese. He was also a strong supporter of Irish immigration and worked to ensure that they were welcomed into the community and had a place to worship.

Father Dunne was a man of great faith and dedication, and his legacy lives on in the work of the diocese and the churches he established. He was a true leader in the Catholic Church and his contributions to the diocese and the community are remembered with great respect and gratitude.

DANIEL M. CARLTON. In 1854, Father Dunne was appointed pastor of the parish of All Saints in Chicago. He was succeeded by Father Deane, who served as pastor until 1857. During his tenure, Father Dunne worked hard to establish a strong parish and to build a new church. He was also a strong advocate for higher education and supported the establishment of several schools and universities in the diocese.

Joseph A. Krajicek

HISTORY OF CHICAGO.
in this country, in 1870. The life of this eminent divine is so closely allied to the progress and development of the community of the Servite Fathers, which is only twenty-four years younger than the order Franciscans, that its growth and advancement become a part of his own individual experience. He began his ministrations to entering upon ecclesiastical duties directly in its service, however, his early training was of a character most deserving of mention in the sketch of a man remarkable for ability, perseverance and patience in pursuance of a cherished and unselfish object. He was born at Florence, Italy, on March 4, 1826, being the son of Paul and Anna Morini, and passed the first twenty-seven years of his life there. There he received, at an early age, the rudiments of the thorough education which, later, marked him as a student of great promise and high scholastic attainments. Having acquired a classical and theological education, and especial proficiency in rhetoric and rhetoric, he entered the order of Servite Fathers on January 5, 1844, when only eighteen years of age. In May, 1850, he was ordained priest, and three years later he received his first degrees and took charge of the students in humanities and rhetoric at the monastery. In 1856 he received the degree of D. D. This position he filled for eleven years, and in 1864 was sent to London, England, to endeavor to implant the order in Great Britain. After six years earnest effort in this direction, the London foundation being in a promising condition, he was sent, with two other fathers, Rev. Andrew Venturi and Rev. Bonifegio Balth, and a lay brother, to establish a flourishing mission in America. They landed at New York with his associates in July, 1870, and a month later they were formally given charge of the Irish congregation at Doty's Island, Menasha, Wis., by the Bishop of Green Bay. Here a community was soon formed, and in January, 1874, he gave a solemn promise of the Irish congregation at the cathedral of Chicago. An effort was made to form an Italian congregation in this city, but the obstacles in the way were so numerous that the task was accomplished by Bishop Foley to locate in Chicago. With the assistance of Father Venturi, he set about the formation of a congregation of Irish people, with other Catholics of different nationalities, sparsely resident on the prairie in the western portion of the city, not far from Central Park. In August, 1874, Father Morini began to build a brick church and residence on Jackson and Albany Avenue, which are now permanently located. The Fathers attending the congregation, which is English speaking, as assistants to Father Morini, are Fathers A. Venturi, parish priest, and J. J. Toussaint. The other priests of the congregation are Fathers M. McCann, M. Leplae and H. Crevler. In ten years the parish has become an important one, and the efforts of the Fathers have been a blessing to their parishioners and to the community at large. Father Morini directs the important functions of his high and holy office with a dignity and sincerity which has entitled him to the confidence and esteem of his associates, and he is universally respected and beloved by the members of the congregation. Father Morini has been as a pastor to the young, who in the Church of Our Lady of Sorrows, a structure which has no equal in Chicago for the elegance and chaste character of the frescoes, and the accompanying buildings are monuments to the practical devotion of Father Morini to the interests of the Church, to which he has given a life replete with sanctity and usefulness.

REV. THOMAS FRANCIS CASHMAN, pastor of St. Jarlath's Church, was born on December 3, 1842, at Clannere, County Cork, Ireland. His parents were Michael and Ellen (Kiely) Cashman; his father being a farmer. He was educated at St. Vincent's Seminary in Cork, where he remained four years, and at the College Seminary of Mount Mercy, County Waterford, from where he graduated in 1858. He went into business with his father until 1863, when he came to America. In 1864, he came to Chicago, entering the Seminary of St. John's, and in 1868, he was ordained by Bishop Lourdes, of Fort Wayne, for the diocese of Chicago. He was appointed assistant to Rev. P. J. Conway, the pastor of St. John's Church, then being the pastor of St. Joseph's Church, at Pekin, Ill., where he remained until 1872. While there he organized missions at Manito, Havana, and Mason City, Mason Co., and at Delavan and Troumont, Tazewell Co., building a church in each place. In 1872, he was transferred to St. Jarlath's Church, Chicago, which had been organized in 1869, where he has since remained. Father Cashman has been more than ordinarily successful as a pastor. Since coming to this church he has collected a debt of $20,000 then existing; has built a parochial residence at No. 638 West Jackson Street, at a cost of $8,000; has erected a parochial school at a cost of $3,000; has built a convent for the Sisters of St. Dominic at a cost of $4,500; and is now engaged in the erection of a new stone church edifice, which will cost not less than $75,000. When he commenced his pastorate there were but seventy-five families in the church; now there are thirteen hundred, and the churches of St. Malachi and of the Seven Dolors have been taken from the original St. Jarlath's parish. Father Cashman is thoroughly educated, and takes a deep interest in history, religion and philosophy.

REV. SOSTESNUS MORETTI, pastor of the only Catholic Church for the Italian speaking community of Chicago, has been identified with the progressive ecclesiastical interests of Chicago for over ten years, and to his patience, perseverance and ability is due the final establishment of a church devoted to the spiritual needs of that nationality. Father Moretti was born at Castellazzo, Bormida, in Piedmont, Italy, on October 5, 1841, being the son of Joseph Anthony and Leonna Moretti. When seventeen years of age, he completed the rudiments of his early education, and entered the order of Servite Fathers, at Bologna, on August 10, 1857. There he pursued his theological studies, and was transferred to the seminary of Monte Berico, Vicenza, in May, 1861. He was ordained as a priest on August 7, 1864, and ten years later came to America, landing in New York on October 19, 1874. He came at once to Chicago, and in November, 1880, having secured three lots on Illinois Street, began the building of the present church structure. This is regarded as a remarkable result of six years' labor, as all previous efforts in this direction in Chicago had failed of accomplishment. The place of worship was ready for occupancy on Easter Sunday, 1881, from which time Italian services were held regularly in that structure. The work of building the church proper has been carried on with great energy, and the beautiful building, in pure Italian style of architecture, has been brought very near completion. Its frescoing is a work of the finest art. The frescoing, which is very fine, will be done by Mr. Gregory, the distinguished Italian painter. Father Moretti is an eloquent and persuasive orator, and possesses high scholastic attainments. His long and useful service in the Church has won the confidence and esteem of his associates, and he is revered and beloved by his many parishioners.

ACADEMY OF ST. FRANCIS XAVIER.

REV. VINCENT BARZYNSKI, pastor of St. Stanislaus' Church was born in Poland, on September 20, 1838. His father was Joseph Barzyński, and his mother's maiden name was Mary Nowicka. He received his education in Poland, and was ordained on October 25, 1861, in the diocese of Lublin. For the first three years after his ordination, he was assistant priest in different churches in his native country; and, in 1865, went to Rome
and joined the congregation of Our Lord of Resurrection. Remaining in Rome eighteen months, he was then sent to Texas, as a missionary, being so engaged eight years in San Antonio and vicinity. On September 6, 1874, he came to Chicago to become pastor of St. Stanislaus' Church, and has occupied that position ever since. He has built up a large congregation, a large church-building, a fine school-house, and a house for the Sisters. In 1872, he established a convent at the corner of Belden and Southport avenues, and erected a provisory school-building, of three stories, which is intended for a school, Orphan Asylum and Sisters' house. A church-edifice is afterward to be erected.

FATHER’S ACADEMY FOR FEMALES.—By the great fire the Sisters lost their buildings and all they contained, suffering a loss of about $100,000. They rented a frame house on Cottage Grove Avenue, opposite the Chicago University, remaining there until August 25, 1873, when they took possession of their present building, on the corner of Wabash Avenue and Twenty-ninth Street. This is a large structure of brick, with stone trimmings, and contains a basement and four stories. The north half of the building is occupied as the convent and the south half as the Academy. There are at present one hundred and thirty-six sisters, of whom seventy-six are in the main building, thirty-four engaged in hospital duty, and twenty in branch houses. Nineteen of those at the convent are teachers in the Academy, where there are one hundred boarders and one hundred and fifty day-scholars. About forty instructors in the parochial schools in the following places: Town of Lake and Brighton Park, All Saints' parish, St. John's, and St. James'.

The Mother Superior, Mary Scholastica Drum, elected in May, 1867, has since been succeeded by Sister Mary Genevieve Cunningham, the present incumbent.

CONVENT OF THE IMMEDIATE CONCEPTION.—In August, 1862, the Dominican Sisters of St. Mary’s convent at Sinsinawa Mound, Wis., sent six sisters to this city to found an educational institution. They purchased ground on Franklin and Wieland streets, just north of where the Church of the Immaculate Conception now stands. The parish erected a wooden building on the property, containing four stories, for the use of the Sisters, which was donated to them. The institution was fairly established, when the great fire of 1871 swept away their entire possessions. Those who had charge of the institution returned to the mother-house at Sinsinawa, disheartened and discouraged. In 1872, Bishop Foley made overtures for their return, promising substantial assistance. Thus encouraged, they came back to Chicago and erected a two-story and a half building; but the promised aid of Bishop Foley was not forthcoming. The Sisters struggled to save the institution; and, though not yet free from indebtedness, they are now successfully conducting the school. The Sisters also teach in the parochial school recently built by Father Butler of the Church of the Immaculate Conception, adjoining the convent. The first Mother Superior was Sister Annrose, who died on June 2, 1871. She was succeeded by Sister Dominica, and the latter by Sister Borromeo. In September, 1852, Sister Mary Clement became Mother Superior, and she now presides over the institution, assisted by eight Sisters of the Order of St. Dominic. The parochial school of the parish of St. Jarlath has been presided over, since January, 1872, by the Dominican Sisters, who came from Sinsinawa Mound. The first Mother Superior was Sister Thomasina. The present Mother Superior is Sister Villana, who was elected on September 1, 1855.

CONVENT OF THE BENEDICTINE SISTERS.—In August, 1860, Sister M. Frances, O.C., and Sisters M. Antonina and M. Gonzalez came to this city, from the mother-house at St. Mary's, Elk Co., Penn., on invitation of Father Fink, then pastor of St. Joseph's Church, and assumed charge of the parochial school. The Sisters of the Holy Cross, who left Chicago in 1860, and had up to this time conducted the school, had their convent on the southwest corner of Chicago Avenue and Cass Street; and the building which the Benedictine Sisters occupied was located diagonally opposite. This was a brick structure, four-stories high, and contained the convent, the parish and the select schools. Sister M. Frances Knapp was the first superior, remaining one year, and was succeeded by Sister M. Nepomucene Ludwig. In 1865, Sister M.

There are three large buildings now located upon their property, all earned and owned by the sistershood. The frame building at the corner of Market and Hill streets was erected immediately after the fire, being finished in 1872. In 1879, a large brick addition was built on the rear. These buildings are used as a home. In 1852, a handsome brick structure, used solely for school purposes, was finished. This fronts on Market Street, is four stories high, and contains fifteen large rooms.

The sole mission of the Benedictine sisterhood is one of instruction and they have done much towards stimulating the minds of our youth to noble endeavor, and fitting them for usefulness in after years. The convent has an extensive garden and play-ground, furnished with every facility for the amusement and physical welfare of the pupils. The course of study includes everything from the primary to the highest branches in English and German, music and the arts. Pupils are charged for board and tuition, but there are usually a number who receive instruction gratuitously.

The institution was incorporated July 1, 1852, as the Convent of Ss. Benedict and Scholastica. The average number now in attendance at the school is one hundred and twenty. The sisters also have charge of the parochial school of St. Joseph's Church, at the corner of Franklin and Hill streets, where an average
of four hundred and twenty-six pupils receive instruction. There are thirty-six Sisters at the convent, and six who are engaged in mission work.

The Servite Sisters’ Industrial Home.—The original mother-house of the Servite Sisters is in Florence, Italy, where the Servite Order was commenced in 1254, and hence it was Rev. to flourish during the centuries that have elapsed. In the fall of 1870, Bishop Melcher, of Wisconsin, invited the order to send representatives to America. On their arrival, the fathers were given charge of the parishes of Menasha and Neenah, Winnebago Co., Wis. The sisters took control of the schools of that parish, and also had a school at Appleton, Wis. The first Rev. Mother in Menasha was Rev. Mother Mary of the Blessed Sacrament. The second mother in Menasha was Rev. Mother Francis of Assisi, who brought the order to Chicago, Ill., and was Right Rev. Bishop Foley. They have been here since December 26, 1877, establishing their convent and home, in the following May, No. 1250 West Van Buren Street. Subsequently they purchased a lot, three hundred feet square, at the corner of West Van Buren Street and Albany Avenue. In 1879, work was commenced upon the present convent, the cornerstone being laid by Vicar-General McMullen. The building is yet in an unfinished condition and consequently has not been dedicated. The convent proper is a five-story structure, with large iron stairways leading to the main entrance, over which stands a marble figure of the Virgin Mary. There are other buildings adjoining the convent, two and three stories in height. All the buildings are of brick and stone, with a substantial masonry. The purpose of the Servite Sisters is the care of homeless and destitute children from nine to eighteen years of age, who may be sent to their institution by parents or the courts, or who come of their own accord. They are cared for in the same manner by which they may be relieved, in the forenoon, while in the afternoon instruction is given in the common English branches. The Sisters own the grounds and buildings which they occupy, the cost of which has already been over $40,000. The institution is supported partially by contributions of money and clothing, and by the sale of manufactured articles made by the inmates; but the chief income is derived from the interest on invested bonds. Each of sixteen Sisters of the convent have $2,000 and upon United States bonds, the income from which is devoted to the use of their convent. The average number of non-paying inmates is about fifty. Four or five hundred children have already passed through the Industrial Home, of whom only three have died. Rev. Mother Francis of Assisi, the founder of the community in Chicago, is now the mother-house of America, is the present superior of the convent.

The House of the Good Shepherd.—In 1858, Rev. Dr. McMullen, then pastor of St. Luke’s Church, on the corner of Polk and Sherman streets, was a frequent visitor to the Bridgeway, which was situated only a short distance from his church. During these visits he became impressed with the fact that the greater portion of the female inmates needed some means other than mere confinement in a jail to effect any permanent improvement in their condition. At this time a number of nuns of the Society of the Sacred Heart of Jesus in Chicago were engaged in the work of the Good Shepherd. In 1869, the foundation of the Good Shepherd came into existence, to establish an institution for the reclamation and protection of unfortunate of its own sex. Dr. McMullen obtained temporary quarters for the Sisters, and the building was bought for $8,000, on which the Sisters took charge and commenced the erection of a small frame building, which, when almost completed, was burned. But the public of Chicago, regardless of church or creed, subscribed liberally toward a new house, which was at once put up. In 1870, a brick edifice was erected. The great fire of 1871 left their home in ruins, the loss being between $175,000 and $200,000. In the year following, another building was erected, which has been added several times. This stands in a large open space on the original site, at the corner of North Market and Hill streets. The total value of the property is about $200,000. The aid received from the Relief and Aid Society, together with the munificent contributions of Dr. McMullen, Bishop Foley, proved of great assistance in the work of the building.

In 1878, the institution made public a statistical report and financial statement which showed the indebtedness at that time to be $16,900. In the summer of 1878, active measures were taken to pay off the debt, as well as to enlarge the buildings. A hara and series of entertainments were held in the Exposition Building. The profits of these entertainments consisted of concerts, organ recitals, military drill and review by the First and Second regiments, Sixth Battalion and Lackey’s Zouaves, displays of the benevolent and civic societies in full regalia, and a fifty-mile walking race. These events were successful and the Sisters were able to pay off the debt, and the building was continued in the Chicago city directory. All the payments, there are in the city and immediate vicinity forty-eight parishes and missions, the more important of which are briefly noticed in the following sketches:

The protestant episcopal church.

The death of Bishop Whitehouse, which occurred on August 10, 1874, cast a deep gloom upon the diocese. In the following September, at the Annual Convention, Rev. G. F. Seymour, D.D., of New York City, was elected his successor; but the General Convention of clerical and lay deputies which met in October, declined to consent to his consecration. In February, 1875, Rev. James DeKoven, D.D., warden of Kasec College, was elected bishop, but a majority of the standing committees of the diocese throughout the country, more or less declaimed against his consecration. The rejection of these clergy was probably their high-church tendencies.

In the following September, Dr. DeKoven having declined to permit his name to be again used, Rev. William E. McLaren, D.D., rector of Trinity Church, Cleveland, Ohio, was chosen bishop. His election being approved by a majority of the standing committees of the dioceses, and by the bishops, his consecration took place on September 8, 1875, at the Cathedral in Chicago.

The diocese having become too extensive for the management of one bishop, in December, 1877, a division was effected, the two dioceses of Quincy and Springfield being organized by Bishop McLaren. Early in 1878, Rev. Alexander Burgess, of Massachusetts, was elected bishop of Quincy, and Rev. G. F. Seymour, of Springfield. During the same year, the three dioceses were confederated under provincial relations. Since that time, so far as Chicago is concerned, the Church has divided into three, and the present time, there are in the city and immediate vicinity forty-eight parishes and missions, the more important of which are briefly noticed in the following sketches:
address to his diocese in 1852, and it was ever after an earnest desire on his part to reach the consummation of his cherished scheme. Negotiating for a convenient site for Cathedral purposes, Grace Church and that of the Holy Communion were offered the Bishop, but no definite action was taken in regard to them. The Church of the Atonement, which had been founded by Rev. Dudley Chase, was seriously endangered by the heavy debt which rested upon it. It was a small structure on the corner of Washington and Peoria streets. This was also offered to the bishop, providing he would assume the indebtedness which encumbered it. Among those who urged the bishop’s acceptance of this offer, were Dr. L. P. Cheney, Hon. L. B. Otis, Henry Keep and George P. Lee. The offer was finally accepted, and the bishop, with money accruing from his negotiations for lots on the South Side, paid the liens, amounting to about $5,000.

On Easter, 1861, the Cathedral of SS. Peter and Paul was first opened for worship, and was termed the Bishop’s Chapel. Very soon it was enlarged and improved, and another lot purchased. The decorations in the Cathedral were according to the bishop’s own designs. Memorial windows were presented by various parishes in the diocese, bearing their names. The organ was the gift of members of the congregation and others. The handsome stone font, also designed by the bishop, was presented by James Carter, as a memorial to his wife, Mrs. Helen Anderson Carter, and bears the inscription, “She hath done what she could.” Other gifts comprise brass standards, by G. S. Norris, of Baltimore, in memory of Hugh Davey Evans; and the brass eagle lectern, by William F. Whitehouse, chancellor of the Cathedral, as a memorial to the deceased members of the bishop’s family. Means to enlarge and improve the Cathedral were raised by subscription, which met large and generous contributions. Still an incumbrance was left on the property, but the work now so thoroughly inaugurated went on prosperously.

The first chaplain was Rev. John Wilkinson, who was followed by Rev. S. B. Duffield. In 1867, four canons were appointed, namely, Revs. Knowles, Dorset, Magill and Street. Services were held morning, afternoon and evening. In due time a chapel was added; two school-rooms, in which an industrial school, a day-school for boys and girls, and a free night-school were established, and continued until a lack of means for a time caused their discontinuance. In August, 1874, Bishop Whitehouse passed away, and shortly after his death the indebtedness of the Cathedral, mainly incurred in improving the building and the purchasing of additional ground, amounted to some $17,000, was paid in full.

It was in this church that the celebrated trial of Bishop Cheney occurred. Here also Bishop McLaren received his consecration, and here invariably meets the Diocesan Convention. The cathedral was consecrated on Wednesday, December 10, 1879, the ceremonies being participated in by many prominent bishops and other clergy of the church, and the sermon preached by Rt. Rev. W. C. Doane, Bishop of Albany, N. Y. In 1883, a handsome and commodious clergy-house was added to the cathedral, costing $20,000.

In 1884, Rev. J. H. Knowles resigned. At that time the parish numbered three hundred families. In his report of that year, Canon Knowles stated that during his connection with the cathedral—

One thousand and seventy-four persons had been baptized, seven hundred and forty-two of them by himself; seven hundred and forty-six persons had been confirmed, of these he had confirmed all except about sixty-four hundred and ninety-three marriages had been solemnized, of which number he personally officiated at four hundred and twelve; the number of funerals held had been four hundred and seventy-nine, of which three hundred and ninety-eight had been conducted by himself.

Rev. J. H. Knowles’ rectorship covered a period of seventeen years. He was followed by Rev. G. T. Griffith, the present incumbent.
Whipple, of Minnesota; Talbot, of Indiana; Clarkson, of Nebraska; Spooner, of Colorado; Gillis, of Western Michigan; and Willis, of Wisconsin. His attending presbyters were Rev. James DeKoven, D. D., and Rev. George Worthington, D. D., now bishop of Nebraska. In 1877, the Diocese of Illinois was divided, and two other sees formed—the Diocese of Quincy and the Diocese of Springfield. Bishop McLaren retained charge of that portion which kept the title of Diocese of Illinois, which includes Chicago and the northern portion of the State. In 1880, the name was changed to the Diocese of Chicago, by consent of the General Convention and by the action of the Diocesan Convention. In 1883, Bishop McLaren was elected president of the Western Theological Seminary of Chicago, an institution incorporated and endowed by Dr. Talmor Wheeler to the extent of $225,000. Bishop McLaren received the degree of S.T.D. from Racine College, Wisconsin, in 1875, and that of D.C.L. from the University of Pennsylvania, Temple, in 1884. Since 1871 Rev. Dr. McLaren became Bishop of Illinois in 1875, he has accomplished three great works which deserve specific mention. The division of the original diocese of Illinois into three dioceses was enumerated above; the establishment of the Provincial System, under which the several dioceses of a State become one Federate Convention or Council; and the establishment of the Western Theological Seminary, also mentioned above. He has likewise contributed materially to the success of the Jubilee charity, St. Luke's Hospital. As an orator, Bishop McLaren is impressive, but makes no effort at display. His writings are distinguished by energy of thought and beauty of diction. They consist of Catholic Dogma, the Abolition of Debt, in 1853; sermons, addresses, numerous papers and poems in periodicals, and miscellaneous writings. He is a hard worker, has done much for his diocese and especially active in building up and starting the Western Theological Seminary on a career of usefulness. Bishop McLaren is married, and has three children.

Trinity Church.—Immediately after the great fire, this parish having lost its church-edifice, and the homes of its people being for the most part laid in ashes, was much scattered. Rev. Dr. Edward Sullivan was at that time the rector. In July, 1873, the corner-stone was laid of a new building on the corner of Michigan Avenue and Twenty-sixth Street. It was opened for worship on November 22, 1874. It is a clerestory Gothic, of stone, having a seating capacity of one thousand, and cost $100,000. At Easter, 1882, free from debt, it was consecrated. Rev. R. A. Holland, S.T.D., had charge of the parish from 1879 to 1883, being succeeded by Rev. L. S. Osborne, the present rector.

In addition to the church-edifice, this parish owns a fine rectory, at the corner of Twenty-sixth Street and Indiana Avenue, and Trinity House, adjacent to the church, in which meet the societies, guilds and Sunday schools. The parish organizations are The Young Men's Guild, founded, in 1882 by Dr. Holland; the Ladies' Aid Society, and the Young Ladies' Missionary Society. At the present time there are five hundred communicants and seven hundred Sunday-school children. For several years the average yearly contributions of the parish have amounted to $30,000.

Rev. Louis Shreve Osborne was born on October 10, 1851, at Salem, Mass. His father, Henry Osborne, was a merchant of Salem, and of English descent. His mother was Mrs. Louisa Shreve, of Salem, Mass. He lived in Salem until he was eighteen years old, attending the common and high schools. At eighteen he entered Harvard College, and remained until 1872, when he matriculated at the Philadelphia Divinity School, and graduated therefrom in 1876. In June, 1876, he took deacon's orders, and immediately went to the Diocese of Southern Ohio as a missionary to Xenia, Yellow Springs and Waynesville. In May, 1877, he was ordained priest at Springfield, Ohio, by Bishop Thomas A. Jaggar, and in January, 1878, became rector of Grace Episcopal Church, Sandusky, Ohio, remaining until January, 1884, when he came to Trinity Episcopal Church, Chicago, as the successor of Rev. R. A. Holland, who had accepted a call to New Orleans. Since the commencement of the rectorship of Rev. Mr. Osborne, there has been a net gain in the membership of about eighty, and the society has purchased the fine parsonage property, in the rear of the church, and fronting on Indiana Avenue, at a cost of about $40,000. Rev. Mr. Osborne was married, on April 25, 1878, to Miss Marie B. Ashburner, daughter of Algernon and Mrs. E. B. Ashburner, both of Philadelphia. They have two children,—Elizabeth C. and Algernon A.

St. James's Church.—The fire of 1871 scattered this congregation far and wide. On the Sunday following, services were held in the open air, in the shadow of the blackened walls of the ruined church. Dr. Hugh Miller Thompson, who went East to appeal for funds with which to re-build, secured $17,000. He shortly after resigned, and in March, 1872, Rev. Arthur Brooks assumed the rectorship. In the following February the old vestible was fitted up for services. In 1872, the working force of the parish was two hundred and fifty souls. They were burdened with a bonded debt of $40,000; but had in hand, from insurance and gifts in the East, about the same amount, and $50,000 was raised from the sale of pews. The work of re-building went vigorously forward, when the financial crisis of 1873 caused its entire suspension. In 1874, the work was resumed. In 1875, Rev. S. S. Harris, D.D., who had succeeded
The new church edifice is almost like that destroyed by the fire. In style it is Gothic, with nave, transepts and recess chancel. It has a seating capacity of one thousand three hundred. The interior is one of the handsomest in the city. A fine organ occupies the entire south transept. It was procured through the energy of Mrs. Perry H. Smith and other ladies of the parish. A prominent feature is the memorial reredos to Bishop Clarkson, which is of carved oak, having five panel-paintings representing the glorified Christ surrounded by angels. Near the main entrance stands a font of pure Italian marble, presented by Mrs. Herbert C. Ayer. The church also contains seven magnificent memorial windows, made in London, England. Their names, and those of the donors, are as follows: That to Mrs. F. H. Winston, by her husband; one in memory of Mr. and Mrs. H. L. DeKoven by John DeKoven; one in memory of Fanny DeKoven Dickey; one to Mr. and Mrs. Joseph E. Ryerson, by their children; one to Mrs. F. B. Hooker, by her husband; one to Edward S. Stickney, by his wife; one to Mrs. George I. Dunlap, by her children; and one to Mrs. J. A. Ellis, by her husband. There are also memorial boxes, bearing the names, respectively, of Bishops Chaise and Whitehouse, Rev. C. V. Kelley, D.D., Rev. John M. Stevens, and Mrs. F. H. Winston. The tablet erected in memory of the soldiers lost in the Rebellion, who went from this parish, was not destroyed by the great fire, and was re-erected in the new edifice. The building has a commodious basement, which is used for Sunday-school purposes, and over the vestibule is a large chapel, which is used for societies and guilds.

Rev. Dr. William H. Vibbert, who has been the rector since 1883, came to this parish from St. Luke's, Germantown, Philadelphia.

The parish organization in December, 1885, was as follows:

There were, in December, 1885, one thousand three hundred and fifty souls in the parish and six hundred and sixty-two communicants.

CAVALRY CHURCH.—This began as a mission Sunday-school in January, 1867. Interest rapidly developed, leading to a parish organization in the same year, with Rev. A. W. Snyder as rector, who remained until 1871. The parish interests were not affected by the great fire. The church edifice, built in 1867, is a frame building, having a seating capacity of three hundred. In 1872, under Rev. J. F. Walker, it was enlarged by the deepening of the chancel and addition of aisles. In the fall of 1874, Rev. Luther Pardee was called. He found a debt on the church of $5,000, which was speedily lifted; and under his administration the church has seen progress and prosperity. Exterior repairs, in 1885, greatly added to the attractiveness of the church. There are one hundred and ninety communicants, and two hundred and fifty members of the Sunday-school.

ST. MARK'S CHURCH.—The fire of 1871 had a beneficial effect upon this parish, as the great influx of residents from the burned district led to a more permanent growth. Rev. D. F. Warren, D.D., was then the rector. He was succeeded, in 1877, by Rev. B. F. Fleetwood, the present pastor. In the fall of 1880, the church edifice was partly destroyed by fire, but was immediately rebuilt. In the summer of 1882, it was enlarged to seat seven hundred people. Since that year, the growth of the church has been commensurate with that of the population. Its present membership ranks fourth among the churches of this denomination in the city.

The parish organization in 1885 was as follows:

Rev. Benjamin Franklin Fleetwood, pastor of St. Mark's Episcopal Church, was born in New York City, on February 20, 1834. His father, Stanley H. Fleetwood, was a resident of Chicago from 1856 to the time of his death in 1872. He was connected with William H. Ogden as a member of the firm of Ogden, Fleetwood & Co., for some time, in those early days, one of the largest real-estate firms in Chicago. Mrs. Fleetwood's maiden name was Margaret Finiser. Young Benjamin came to Chicago with his parents, and graduated from Racine College in 1853. He then attended Nashotah Theological Seminary, graduating there in 1857. His first pastoral services were performed in St. James' Episcopal Church, as assistant to Rev. J. H. Ryland for one year, previous to entering upon which duties he was ordained at the Cathedral of SS. Peter and Paul in the spring of 1857, by Bishop Whitehouse. From 1863 to 1872, he was rector of Christ Church, Adrian, Mich., and from 1873 to 1885, rector of St. Mark's Episcopal Church, at Marquette, Mich. During his pastorate the church erected their present elegant edifice, one of the finest in the West, at an expense of $70,000. In 1877, he was called to the rectorship of St. Mark's Episcopal Church, in which he has since continued. During his rectorship here, the membership of the church has increased from eight families and seventy-five communicants in 1857, to two hundred families and four hundred communicants in 1885. The number of Sunday-school scholars has also increased, from eighty to four hundred and twenty-five. And the annual financial offerings have increased from $3,000 to an average of $10,000.
Mr. Fleetwood was married to Miss Helen L. McDole, of Cleveland, Ohio, in January, 1863. She died on May 4, 1877, leaving three children,— Helen, William Webster and George Worthington. Mr. Fleetwood was subsequently married to Miss Josephine F. Fake, of Chicago, daughter of Henry Fake, who came to Chicago in 1841, and who resided here most of the time until his death in 1883. By his second wife, Rev. Mr. Fleetwood has one child,— Henry Warren.

Grace Church.—After the fire, the chapel connected with this church became literally an asylum for the homeless; the vestibules were made storehouses for provisions; the rector's wife established a clothing bureau at the parsonage; and $6,000 in cash were distributed by the rector and officers of the church. Although the church-edifice was not destroyed by the fire, the society was so crippled that the rector insisted upon a reduction of his salary from $6,000 to $2,500, and the seats were declared free. At Easter, 1873, the pews were again rented and the salary of the rector restored. In 1874, an Easter offering of $15,000 materially lessened the debt. In 1883, the whole indebtedness was canceled, and the church consecrated by Bishop McLaren. Rev. Dr. Clinton Locke, the present rector, has held his position twenty-seven years.

St. Clement's.—The Church of St. Clement, corner of State and Twentieth streets, was opened for worship on St. Clement's day, November 23, 1884. It was erected at the sole expense of George A. Armour. The present building, handsome and complete in all its appointments, is only the precursor of a more substantial structure to be hereafter erected. The seats in this church are free. Its Sunday services are choral and congregational, led by a surpliced choir. There is daily worship at 7 a.m., 9 a.m. and 5 p.m. Rev. John H. Knowles is pastor.

St. Andrew's Church.—This parish was formed by the union of the Churches of St. John and the Atonement. After the fire, St. John's parish undertook to build a new church edifice, but failed to carry out the project. The building, which they left unfinished, now owned by the Third Presbyterian Society, was almost totally destroyed by fire in 1884. St. John's congregation then worshiped temporarily in the Swedenborgian church edifice on Washington Boulevard. On September 11, 1878, it was determined to unite the two parishes of St. John and the Atonement under the new name of St. Andrew's Protestant Episcopal Church, using the church edifice of the latter parish, at the corner of Washington Boulevard and Robey Street. On September 23, Rev. Francis Mansfield was called to the rectorship, which charge he resigned on December 8 of the same year. On February 14, 1879, Rev. W. F. Knowlton was chosen rector, remaining until February 14, 1881. In the following June, Rev. H. B. Ensor was called to the charge, and continued until June 1, 1885. During his ministry the parish was greatly encouraged, and in the summer of 1883 the church edifice was rebuilt. It was a frame building, and stood on piles. It was raised, a stone foundation put under it, and otherwise refitted at a cost of about $8,000. Rev. J. D. Mansfield, of California, has recently taken charge.

Church of the Ascension.—The conflagration of October 9, 1874, consumed this church and the homes of all the parishioners. The altar silver was saved by the heroic devotion of a little girl, Louisa Enderly, daughter of the sexton; and the stone font was rolled into the street, where it was damaged, but not destroyed. The same silver and font, sole relics of the old church furniture, are now used by the congregation. The people were scattered, and many of them financially ruined. The church and furniture were insured for $10,000,—$5,000 in each of two companies, one of which paid in full, the other only $2,000. This sufficed to liquidate the principal of a mortgage of $7,000, and the vestry soon paid a balance of interest and other floating debts amounting to $7,000, leaving the parish free from obligation and its bare lot paid for. The first parish services after the fire were held in February, 1875, in a parlor of the rebuilt Clarendon Hotel; afterward, for a short time, in a society hall on North Clark Street, near the bridge; and finally, until the completion of the main building of the present church, in February, 1874, in a new frame store, No. 310 North Wells Street.

With the view of rebuilding the church, the rector, Rev. C. P. Dorset, and Rev. Canon George C. Street, associate rector, had raised by solicitation, outside the parish, between $2,000 and $5,000; members of the congregation subscribed about $2,000, and the bishop permitted the hypothecation of a part of the lot for $3,000. With these funds was begun the chapel now used as the
parish church. It has been enlarged by the addition along the west side from the wing, and has a seating capacity for four hundred.

Mr. Dorsett introduced the service of acolytes at the altar in the new church, together with other ritualistic ceremonies and emblems, except altar lights and incense, the use of which was reserved for his successor to establish. In addition to the regular Sunday celebrations, he had begun to have daily mass on all week days at 6:30 a.m. But failing health compelled him to abandon this, and finally led to his resignation in the spring of 1872. It was the desire of the congregation to secure a successor to Mr. Dorsett who would have the courage to carry on to greater perfection the ritualism already begun. Accordingly, after much correspondence in various quarters, the vestry elected Rev. Arthur Ritchie, who was one of the assistants of Rev. Fr. Grafton in the Church of the Advent, Boston. He accepted the call in May, 1875, and assumed charge on the first Sunday in August following. Mr. Ritchie maintained all the ritual already adopted, added altar lights and colored vestments, and in due time completed his idea of an appropriate and beautiful ritual, by the addition of incense at communion and other occasions. Soon after coming he established a daily early mass, and daily morning and evening prayer, which have been continued to the present time. He openly taught as a duty, and promoted, the practice of auricular confession, as Mr. Dorsett had less publicly done, and had a confessional erected in the church.

The Ritualistic Difficulty.—At the beginning of Mr. Ritchie's rectorship, the episcopate of the diocese had been vacant for more than a year by the death of Bishop Whitehouse. Near the close of 1874, Bishop Whitehouse was succeeded by Rev. William Edward McLaren, S.T.D. Mr. Ritchie taught, from the first, that non-fasting communion was contrary to the practice of the church in all ages, except the Anglican branch during the last two or three centuries. He had provided the means for as frequent non-fasting receptions as might be desired. The early masses soon began to be better attended, and, after a few months, the practice of going forward to the choral celebration at 11 o'clock on Sunday mornings, called solemn mass, was altogether abandoned. Thereupon those parts of the communion service assuming the attendance of persons for reception, were omitted as being unnecessary and improper. These were the Long and Short Addresses to Communicants, the Confession, Absolution, and Comfortable Words. The Commandments were also usually omitted for the service, having been previously said on the same day at early mass.

Out of the practice of this shortened service, and what the bishop considered a defiant attitude on the part of the rector in some other matters, serious differences arose. The bishop was exceedingly lenient regarding the purely ritual matters, and forbade nothing in that life practiced at the Church of the Ascension; but, while admitting the beauty and the propriety of the shortened service, he pronounced it rubrically unlawful, and urged its discontinuance. With this the rector declined to comply, on the ground that the fact of his knowing that no one would come forward to receive, made the use of the omitted parts illogical and absurd, and that their retention would be a greater breach of the rubrics than their omission; further, that this service had been in use more than four years before any objection was made to it, and that the rubrics were rules for the proper and uniform administration of the church's offices, and binding as a whole upon the consciences of the clergy; but that change of circumstances sometimes rendered them inappropriate and void, and that the present was a case in point. The bishop claimed, on the other hand, that the circumstances in this case were not fortuitous, but of the rector's own making, and could not therefore be pleaded; that he had inhibited the practice in question as soon as he knew of its existence; that the bishop was the lawful arbiter; and that the rector was violating his ordination vow in refusing to obey. The latter maintained that the bishop was not the lawful arbiter, but was amenable to the laws with other clergy; that he had not promised absolute, but only canonical, obedience to his bishop, as expressed in the language of his vow; that only a proper ecclesiastical tribunal could lawfully determine this matter; and therefore he would demand a trial. This the bishop declined to grant. The rector then asked to have the case submitted to a commission of five prelates in the diocese, of the bishop's choosing, and offered to discontinue any practice such commission should condemn as unlawful, if furnished a copy of the grounds for its decision. This the bishop also refused, for the reason that he knew of no canon authorizing such a proceeding.

The rector persisted in the shortened service, and the bishop ceased visiting the parish. The parishioners supported Mr. Ritchie, while the clergy and churchmen of the city were loyal to their bishop. This state of things, circumscribing his usefulness and impairing the resources of the parish, having continued for about two years, Mr. Ritchie resigned the charge and accepted a call to the Church of St. Ignatius, in New York, his resignation taking effect on May 1, 1854, near the close of the ninth year of his pastorate.

When Mr. Ritchie came to the parish of Ascension,
its indebtedness amounted to nearly $9,000, which, mainly through his management, was paid off in two or three years; and during his rectory more than $22,000 over and above current expenses, and a new loan of $3,500, were raised for church-building extension, improvement and furniture. After his departure, the church immediately called Rev. Edward A. Larrabee, rector of St. Paul’s Church, Springfield, in the diocese of that name. Mr. Larrabee accepted the call, and assumed charge on June 1, 1884.

The foundation of a new church-edifice was laid in 1830, and about two years later the walls were built up about twenty feet above the ground. Nothing has since been done upon them except to cover the parts liable to damage by exposure to weather. When completed, it will be a substantial stone structure, with seating room for seven hundred people, and will cost about $52,000.

Rev. Edward A. Larrabee, pastor of the Church of the Ascension, was born in Chicago, on March 31, 1852. He is the son of C. R. Larrabee, of the hardware firm of Larrabee & North, who came to Chicago from Ticonderoga, N. Y., in 1842, and who, for many years, has been senior warden of St. James’s parish. During his youthful years Edward A. Larrabee spent his time in the Chicago public schools, and entered Racine Grammar School in 1865, and Racine College in 1869. From this college he graduated in the classical course in 1872, and immediately went to the General Theological Seminary in New York City. There he studied three years, graduating in June, 1876, with the degree of S.T.B. On July 9, 1876, he was made deacon at St. James’s Church, by Bishop McLaren, and was placed in temporary charge of St. John’s Church, Quincy, Ill. On May 27, 1877, he received priest’s orders, and remained with this church as priest until 1879. He then went to St. Paul’s Church, Springfield, Ill., where he remained until June 1, 1884, when he came to the Church of the Ascension, Chicago, as the successor of Rev. Arthur Ritchie.

Church of the Epiphany.—The history of this church dates from the evening of March 21, 1868, when a meeting was held at the residence of Hon. George Gardner, to prepare a memorial address to Bishop Whitehouse, asking his consent to the organization of the parish. The bishop’s consent having been obtained, the first service was held on April 5, 1868, at the residence of D. W. Page, No. 361 Washington Street, Rev. H. N. Bishop, D.D., of St. John’s Church, officiating. On Easter Day, 1868, services were held by Rev. Charles P. Dorset, in the chapel of Jefferson Park Presbyterian Church. On July 3, 1868, the property on Throop Street was purchased for $7,250, and the first church-edifice was soon after erected. The first rector was Rev. R. F. Sweet, who resigned in November, 1870. Rev. Charles M. Fox, D.D., began his administration in April, 1871. The great fire followed, threatening the interests of the parish at first, but proving subsequently to have a stimulating effect. But the North and South Side people began to return to their re-built homes; in one year the Epiphany pew-rents decreased $1,600, and the future did not look so bright. Rev. Charles H. Stocking, who assumed charge in 1872, received a call to Grace Church, Detroit, which he accepted. Rev. B. A. Rogers, D.D., entered on the va-
and $10,000 by Bishop Whitehouse. It is a pure Gothic, of red brick, and has a seating capacity of seven hundred. The communion service, valued at $1,000, was the gift of Madame Jenny Lind Goldsmith, who had contributed at different times to the parish, both before and after the fire. In 1879, Rev. J. Bredberg being in failing health, Rev. John Hedman, the present rector, was called to act as his assistant; and, in 1880, upon the death of the former, assumed the entire charge of the parish. During his administration many repairs and improvements have been made upon the church property. A clergy-house, valued, with the ground, at $5,000, has been added. At the present time there are the church were but nine hundred dollars, and in 1884 they were over seventeen hundred dollars. Mr. Hedman is the editor and publisher of the first Swedish Episcopal monthly in America, called *Djär Kyrkliga Hemmet*, of which the first number appeared in September, 1884. The rector of St. Andrews resides in the clergy-house of the parish, located next to the church.

**Western Theological Seminary.**—The erection and endowment of this school for the training of the Episcopal Church is due to the generosity of Dr. Tolman Wheeler, who, in 1883, placed at the disposal of Bishop McLaren sufficient means to carry the Seminary to completion. The Seminary stands on the north side of Washington Boulevard, near California Avenue, the grounds having a frontage on the boulevard and running through to Park Avenue. The buildings, two in number, present an imposing appearance as seen from the boulevard. These are the theological hall proper and a dormitory for the students.

The theological hall, which will be known as Wheeler Hall, is of the late Gothic-English collegiate style of architecture, the material being red pressed-brick with brown stone and terra-cotta trimmings. In the center of the front is the main entrance, leading through a Gothic portico into a spacious hall, to the right of which is the dean's office, and on the other side a commodious reciting-room. At the east end of the building, in front, is the Seminary chapel, a richly finished apartment. The east end of the chapel projects sixteen feet beyond the main front line of the building in the form of a five-bayed apsis. Each bay has a chancel window, in the middle one of which is a figure of Christ, and in the others are figures of the four evangelists. On the east side of the chapel is the organ-chamber, containing a handsome organ. Opposite the apsis is an elegant rose-stained glass window. At the extreme west end of the building is the library, having space for twenty thousand volumes. It is lighted in front by a magnificent Gothic, quadruple, stained-glass window. In the upper part of this window are portraits of Bishops Seabury and White, the first two American bishops who received orders from the Scotch bishops, and the Archbishops of Canterbury, respectively. All other American bishops received their orders from these two, and this window is intended as a memorial of this fact. On the top floor of this building is a large hall for elocutionary purposes and general meetings. On the main floor is a commodious apartment devoted to the Wheeler School for Boys, and convenient to this is situated the refectory. All the remaining space of the four floors of the main building is devoted to professors' rooms, a robing-room, and lecture-rooms.

Twenty-five feet distant from Wheeler Hall and chapel is another four-story building, the exterior of which corresponds to the larger building by its side. This is the dormitory-building, and it is admirably fitted and arranged for the accommodation of students. Its building excellent hospital quarters and a gymnasium are provided.

The Seminary was opened on September 29, 1884, the Feast of St. Michael and All Angels, Bishop McLaren delivering the address.

**The Reformed Episcopal Church.**

The Reformed Episcopal Church was organized by Bishop Cummins and other clergy and laity who had withdrawn from the Protestant Episcopal Church, in December, 1873. It is episcopal in its government and service, but recognizes and works in harmony with all other Christian churches. It believes in and holds fast to the evangelical views and practice of its founders.
in America, and many of its members were prominently identified with the early days of the Episcopal Church in Illinois. Gurdon S. Hubbard, the oldest inhabitant and Episcopalian in Chicago, is a communicant of St. Matthew's Church; while Henry L. Chase, a son of Bishop Chase, first Bishop of Illinois, and three grandsons, are communicants of St. John's Church.

Christ Church.—This church was not formally allied with the new organization until February, 1874, when a new vestry was chosen. Hon. William Aldrich was elected senior warden, and Elbridge G. Keith junior warden. These wardens served continuously until the death of the former in December, 1885. According to the canons of the church, one-third of the vestrymen must be changed at the parish meeting on Easter Monday of each year. The present officers are as follows:

Bishop Cheney has been the only rector of Christ Church since 1860. The assistant rectors since 1874 have been in the order given:

Confirmations are held yearly at Christ Church; and on such occasions many additions by letter from other churches are made, over ninety per cent. of which come from the Episcopal and Anglican communions.

The benevolent work of the parish is varied and practical. It maintains two missions—Tyng Mission, corner Archer and Wentworth avenues, having five hundred pupils, in charge of Rev. E. T. Somerville; and Emanuel Chapel, formerly St. George's Chapel, having four hundred pupils, in charge of Rev. A. F. Butler. There is an industrial school and kitchen garden, and the Unity and Folio clubs, which are also maintained by the parish. The directors of the Protestant Orphan Asylum, Michigan Avenue, near Twenty-second Street, are largely from this church, and the children of this institution attend the worship and Sunday-school at Christ Church.

Christ church edifice is situated at the corner of Michigan Boulevard and Twentieth-fourth Street. It is a handsome stone structure, in the simple Gothic style of architecture, with two towers. The seating capacity of the church is one thousand one hundred. The total value of the property, $125,000.

St. Paul's Church.—Early in January, 1875, Rt. Rev. Charles Edward Cheney, bishop of the Northwest and West, and rector of Christ Church, Chicago, with his associate rector, Rev. Dr. W. M. Postlethwaite, now United States Chaplain at West Point, held services in the building formerly used by St. John's Protestant Episcopal Church, corner of Lake Street and St. John's Place. On February 14, 1875, the congregation resolved to effect a permanent organization, and Bishop Cheney appointed a committee to perfect arrangements for the establishment of a parish. John Walker, John W. Bennett, H. P. Merrill, E. St. John and George W. Rainey. On April 5, 1875, the following officers were elected:

A call having been extended to Rev. Samuel Fallows, D.D., president of the Illinois Wesleyan University, to become the rector, he entered upon the duties in the latter part of June, 1875. During the same year the congregation left the contracted quarters of the old St. John's Church, and occupied the American Reformed Church, on Washington Boulevard, near Ann Street.

Dr. Fallows continued in the rectorship until May, 1877, when he was elected missionary bishop and presiding bishop of the Church. Rev. J. W. Hunter, D.D., of Canada, then served as rector until the fall of 1878. Revs. P. B. Morgan, H. M. Collisson and W. H. Cooper, D.D., temporarily served as rectors until 1879, when Dr. Fallows was assigned to the missionary bishopric of the Northwest and West, resuming his position as rector.

In the summer of 1878, St. Paul's Church purchased the building at the corner of Washington Boulevard and Carpenter Street from the Third Presbyterian Society. When Bishop Fallows assumed the rectorship in 1879, he found a debt of over $30,000, which he proceeded at once to provide for by obtaining donations and subscriptions. The congregation of St. Paul's
having steadily removed to the south and west of the city, it was deemed advisable to sell the church property on Washington Boulevard, and erect a new church in the midst of the parish. Accordingly, in July, 1885, this property was disposed of, and a new structure begun on Adams Street and Winchester Avenue, which will be one of the most beautiful and commodious places of worship in Chicago.

St. Paul's Church at the present time numbers about four hundred communicants and three hundred Sunday-school scholars. The parish organization is as follows:

Other Churches.—Other churches of this denomination are as follows: St. John's, Rev. J. D. Wilson, D.D., rector; Jeremiah Leaming, senior warden; H. H. Welding, junior warden; St. Matthew's Church; Grace Church, Rev. George T. Gibson; and Emanuel Church, Rev. James S. Green, D.D.

Rev. Rev. Samuel Fallows, D.D., was born at Pendleton, near Manchester, England, on December 13, 1835. He came to America with his parents in 1838, who settled on a farm near Medina, Dane Co., Wis. He worked on his father's farm in summer and attended school in winter until he was eighteen years of age, when he united with the Methodist Episcopal Church, and in 1853, went to Antlan, to attend the graded school. Continuing his studies he worked in the harvest field in summer and taught school in the winter, the first district school taught by him being at Fountain Prairie, Columbus Co., Wis. He then attended the Seminary at Sun Prairie, afterward Lawrence University, at Appleton, and finally graduated at the State University at Madison. During his student days he became noted for the force and eloquence of his addresses at religious meetings, and received the appellation of the "boy preacher." At the age of twenty-one, he was licensed to preach, and preached in school-houses in the vicinity of Madison. While in the State University, he was assistant pastor of the Methodist Episcopal Church at Madison, Wis., and was tutor to the freshmen class, graduating in 1859, as valedictorian of his class. He was then elected vice-president of Galesville University, and had charge of that institution two years. During this time he was married to Miss L. L. Huntington, daughter of Rev. Dr. W. P. Huntington, and Electra C. D. Huntington, Bishop of the Protestant Episcopal Church of Central New York. In October, 1868, he was appointed pastor of the Methodist Episcopal Church at Madison, and in 1860, he was chaplain of the 302d Wisconsin Infantry, remaining with this regiment until 1863. He then resigned the chaplaincy to accept the pastorate of the Methodist Episcopal Church at Appleton, Wis., and was soon after elected to the chair of Natural Sciences in Lawrence University. In a month after this election he organized the 40th Wisconsin Infantry, composed mainly of teachers and students, and was made the Normal Regiment, of which he became lieutenant-colonel. When this regiment was mustered out he enlisted in the 49th Wisconsin Infantry and was appointed its colonel. In October, 1865, he was brevetted brigadier-general for meritorious services. As colonel he was mustered out and was appointed pastor of the Spring-street Methodist Episcopal Church of the same city, beginning the erection of its beautiful house of worship. While serving in this church he was appointed superintendent of public instruction by Governor Fairchild, to fill the vacancy caused by the death of A. J. Craig. He was twice elected to the same position, and left the impress of his ability in the schools of the State. In 1873 the degree of D.D. was conferred upon him by Lawrence University. In 1874, he was elected president of the Illinois Wesleyan University at Bloomington, in which position he remained two years. While president he successfully inaugurated, for the first time in America it is believed, the fundamental idea of the London University, the granting of collegiate degrees of a higher and lower nature upon candidates, after a thorough examination, without actual college residence. This plan has since been carried forward in the establishment of the "Chautauqua University" and the "Correspondence University," of which he is one of the incorporators. In May, 1878, he accepted the rectorship of St. Paul's Reformed Episcopal Church, Chicago, and came to this field in the following June. He soon came to be recognized as one of the most eloquent pulpit orators in Chicago, and has made St. Paul's Church one of the most influential and prosperous in the city. On July 15, 1876, he was elected bishop of the Reformed Episcopal Church, with the jurisdiction of the West under his charge. He was afterward twice elected presiding bishop, and has now the supervision of the West and Northwest. He was for several years chaplain of the G.A.R., Department of Illinois. His family consists of four children, two sons and two daughters. As a man and as an ecclesiastical bishop, in high among Chicago's divines, for his ability and for his sterling character. He was elected a member of the Victoria Institute, or Philosophical Society of Great Britain, on January 3, 1855.
the captain's wife. Miss Durang's father while an attaché of the Government of Italy, was detected in a conspiracy against the peace and welfare of the Government as it then existed. He was therefore under the necessity of being beyond the jurisdiction and reach of the infuriated authorities. Captain Greene and Miss Durang fell in love at first sight, and were soon afterward married. Miss Durang became the Catholic of the family, but afterward adopted the Bible at her husband's father's house, and after listening to the preaching of Rev. John Newland Maffit, since well-known as a revivalist in the United States, she, together with her husband, became a member of the Wesleyan Methodist Church. She was the mother of eight children, all born in Ireland, of whom three re- mained. In 1834, the entire family came to the United States, and in January, 1835, Captain Greene died, and was followed by his wife. In the same year, James S., Jr., entered the Wesleyan College, where he remained one year, his father bringing him with the rest of the family to the United States, in a month after settling in Rochester, N. Y. James S. Jr., entered the Wesleyan College at Middletown, Conn., taking the degree of Bachelor of Arts in 1836. Two years later he received that of Master of Arts, and in 1837 that of Doctor of Divinity from the same institute. In the fall of 1836, he commenced his career as an itinerant Methodist preacher. In 1840, he was transferred from the Genesee to the New York Conference, and appointed to a church in B. N. then the products of the Reformed Episcopal Church and erected in the city. In 1844, he was, by request, transferred to the Baltimore Conference, and appointed pastor of the church by whose request the transfer had been made. The division of the great denominations had been made, and Mr. Greene and his church cast their lot with the Southern branch. In less than two years his health failed, and he retired from the regular ministry. He employed himself in various capacities thenceforward in the South, preaching as his health permitted, until September, 1852, when, with his wife and daughter, he came to Chicago. In the latter part of 1853, he was employed by Bishop Cheney to preach at Emanuel Church, a mission of Christ Church, in the afternoon of Sundays, and at Tyng Mission in the evening. In March, 1853, he was instructed to give his entire attention to Emanuel Church; but it was not until November 17, 1854, that he became canonically identified as a preacher of the Reformed Episcopal Church and rector of Emanuel Church. Since Mr. Greene took charge, the number of communicants has more than doubled; the church edifice has been thoroughly renovated; the Sunday-school largely increased; and an additional large room finished in the basement of the church. Mr. Greene has for several years been very popular as a lecturer in the winter courses of literary associations in nearly every Southern city; and now, although seventy years of age, with no apparent abatement of his early vigor, he has frequent invitations from lecture bureaus, all of which he declines. Mr. Greene has been twice married; first in 1833, to Miss Rachel Smeltzer, daughter of a weaver of Florence County, N. C. who died in 1841; and in that marriage he had five children, only two of whom survive, a son and a daughter, the son living in Minnesota, married, but childless; and the daughter living in San Francisco, married, and having four children. Mr. Greene was married the second time in 1854 to Miss Frances A. Cullison, daughter of a wealthy Virginia planter who had returned to Baltimore, Md. They have had one child, a daughter born in 1853, and whose musical attainments, both vocal and instrumental, are confessedly of a high order.

METHODIST EPISCOPAL CHURCH.

First Methodist Episcopal Church.—Following the great fire of 1871, the services of this church were held in a frame building, on the corner of Clark and Harrison streets, until the fall of 1872. Rev. Dr. Daniels was the pastor. The society soon re-built their block, but in much more substantial form than that of the old, the entire cost being about $130,000. The present block, corner of Clark and Washington streets, is a four-story building containing ten basements, eight stories, pastor's study, lecture-rooms, parlors, and a large auditorium. The revenue derived from the stores, etc., in the block, is about $15,000 annually, by which the society has met all its expenses and contributed to various benevoleces (mainly to church extensions in the city), since the great fire, to the amount of $257,000.

The successive pastors have been Rev. Dr. Daniels, until 1872; Rev. W. H. Thomas, until 1875; Rev. Dr. Jewett (now deceased), until 1877; Rev. M. M. Chadwell, D.D., until 1879; Rev. John Williamson, until 1882; Rev. R. M. Hatfield, until 1885; Rev. W. A. Spencer, until January, 1886, when he was called to the secretariat of the Church Extension Society, Philadelphia. The present pastor is Rev. Dr. B. H. B. Halley.}

Trinity Methodist Episcopal Church.—At the time of the great fire of 1871, this society, with Rev. Dr. H. B. B. Halley as pastor, worshiped in a frame building, pending the completion of their church edifice on Indiana Avenue near Twenty-fourth Street. After the fire, a consolidation took place between Trinity and Wabash avenue churches, with Rev. S. S. McChesney as pastor. Rev. Dr. Bailiss went to Indianapolis. Trinity Church has the finest of the Methodist Episcopal church edifices in this city, having also the wealthiest congregation of the churches of this denomination in Chicago. The pastors since the fire have been as follows: Rev. S. S. McChesney, until 1874; Rev. O. H. Tiffany, 1874-77; Rev. W. F. Crafts, 1877-79; Rev. R. B. Pope, 1879-82; Rev. F. M. Bristol, 1882-85; and the present pastor, Rev. John A. Alabaster, who was appointed in October, 1885.

Grace Methodist Episcopal Church.—After the fire church edifice of this society was destroyed in October, 1871, a temporary chapel was erected on the old lot, which was dedicated and known as “The First church after the fire.” The lot spoken of was purchased by D. L. Moody, and the present site, on La Salle Avenue and Locust Street, was purchased by the society for $25,000. The work of re-building began about the middle of 1872, and dedication services were held on May 4, 1873. The basement has a seating accommodation for twelve hundred, and contains Sunday-school and class-rooms, study rooms, pastor’s rooms, kitchen, and conveniences. It is furnished throughout in solid black walnut and butternut, and is heated by a steam apparatus. The upper, or main, room has a gallery on each side, and seats fifteen hundred persons. The edifice is in the Gothic style of architecture, and cost, including the lot and organ, $100,000.

The pastors of Grace Church during the period covered by this sketch have been as follows: Rev. M. M. Packard, D.D. (under whom the church was re-built), until 1854; C. C. Felton, D.D., two years; J. Atkinson, D.D., three years; R. D. Sheppard, D.D., three years; William Fawcett, D.D., three years; R. D. Sheppard, D.D., one year; Frank M. Bristol, A.M., succeeded in 1855. Rev. Frank M. Bristol was born in Orleans County, N. Y., on January 4, 1831. His father was Levettus Augustus Bristol, who was born in 1821. He was a merchant of Niagara Falls, N. Y., and later of Kankakee, Ill. He was married, in 1858, to Miss Angeline Butterfield, daughter of Dr. Alexander Butterfield, of Oeloe, N. Y., who was, in 1861, one of the proprietors of the Galena Collider. On both sides of his family, Rev. Mr. (now) is of Scotch and English ancestry, and his ancestry for some generations were Methodists. His father died in 1863, and, having long suffered from ill health, left his family in circumstances that rendered it necessary for his son to work foraer several years; but after his hands could be employed. The year 1884, he spent at Rockford, Ill., in the family of his uncle, Rev. W. R. Sluaghter, D.D., a portion of the time attending the public schools. The next three years he worked for the Farm of Laboratory of Northern Illinois University, at Kankakee, attending school during the winter months. He then spent one year in an attempt to learn the jewelry trade, but, on account
of the low wages, gave it up, and went to work in a planing-mill. From this occupation he entered the drug store of his uncle, W. G. Swamell, with the view of becoming a druggist. After remaining there about two years, and while so engaged, he attended a Methodist revival meeting, and became converted, an event which changed the whole course of his life. He at once determined to become a minister of the Gospel, remaining in the drug store six months after his conversion. The first book he read after this pivotal event was D'Aubigne's History of the Reformation. His uncle, Rev. W. B. Staugher, then living in Omaha, Neb., hearing of his desire to become a Methodist minister, and knowing he had

not the means to pay his expenses while in attendance at college, invited him to Omaha, where he might enjoy the advantages of his own excellent library and personal instruction. After remaining in Omaha for some time, he returned to Kankakee, Ill., and engaged with a surveying company to assist in surveying the railroad from Kankakee to San Pierre, Ind. Soon after the completion of this work, a Mrs. E. M. Ridout, seeing him perform the part of Christian in a representation of the Pilgrim's Progress, and learning of his desire to fit himself for the ministry, volunteered to assist him financially, and paid his expenses during his first two years at the Northwestern University, from 1870 to 1872. He remained there until 1877, paying his own expenses by preaching at Blue Island two years, and at Joliet one year, as assistant pastor to Rev. J. M. Caldwell. He graduated with the degree of Bachelor of Philosophy, and from 1877 to 1879, was pastor of the Englewood Methodist Episcopal Church. From 1879 to 1882, he was stationed at Wabash Avenue Methodist Episcopal Church; in 1882 was appointed to Trinity Methodist Episcopal Church; and in 1885 became pastor of Grace Church. Rev. Mr. Bristol was married on May 9, 1878, to Miss Nellie Frisbie of Morgan Park. They have three children,—Leverett Dale, Raymond Wolcott, and Cora. The Northwestern University conferred on Rev. Mr. Bristol, during 1882, the degree of Master of Arts.

REV. ROBERT D. SHEPPARD was born on July 23, 1846, in Chicago. His father was Robert Sheppard, of the lumber firm, Sheppard, Sheriffs & Smith. His mother was Samantha (Dickinson) Sheppard, one of the early school-teachers of Chicago, and daughter of Zenas Dickinson, who came from Massachusetts to this city in 1855. Robert D. Sheppard attended the Foster School, and afterward the Chicago High School, two years. He then attended the Northwestern University at Evanston, during the preparatory course and the freshman year, and the Chicago University, graduating from this latter institution in 1869. During the pursuit of his theological studies, it was necessary for him to attend Garrett Biblical Institute only one year, from which he graduated in 1870.

He immediately joined the Rock River Conference, and was stationed at Michigan Avenue Methodist Episcopal Church, where he remained three years, until 1873. During the years 1873-74 he was pastor of the Third Street Methodist Episcopal Church at Rockford, III. During the next three years, he was stationed at the Western-avenue Methodist Episcopal Church, Chicago. From 1877 to the fall of 1878, he was abroad, making a tour of observation and study through Germany (in which country he spent after his return, Egypt, Palestine, Asia Minor, Greece and Italy. Returning to Chicago in the fall of 1878, he was pastor of Grace Methodist Episcopal Church, remaining three years; after which he was pastor of the First Methodist Episcopal Church, Chicago, III., three years. In the fall of 1884, he was re-appointed pastor of Grace Methodist Episcopal Church, in this city. The degree of Master of Arts in curar was conferred upon him by the Chicago University in 1872, and that degree in honor in 1875. Since 1875 he has been one of the trustees of the Northwestern University at Evanston, and since 1881 one of the Trustees of Garrett Biblical Institute. Rev. Mr. Sheppard was married on June 13, 1872, to Miss Virginia Loring, daughter of Nahum Loring, who came to this city at an early day and established himself as a merchant at Naperville, when it was thought that city was the future metropolis of the West. Mr. Loring was the father of Mrs. George F. Foster and of Mrs. James A. Whittaker. Mr. and Mrs. Sheppard have three children,—Robert Loring, Margaretta and Virginia.

CENTENNIAL METHODIST EPISCOPAL CHURCH.—This was at first the Canal-street society, organized in 1842, with sixteen members who had been formerly connected with the Clark-street Church. In 1853, a removal was made to the corner of Michigan and Dearborn Streets. In 1866, the present site was secured, on Monroe Street, near Morgan. This being the centennial year of American Methodism, the church took the name of Centennial Church. The lecture-room was opened on February 17, 1867, and the whole structure was finished and dedicated on March 15, 1868. The cost of the building, including all interior fittings, was $80,000. The following pastors have been assigned:

Rev. Charles H. Fowler, 1866; Rev. R. M. Hatfield, 1868; Rev. Charles H. Fowler, 1873; Rev. H. O. Peck, 1875; Rev. S. H. Adams, 1875; Rev. H. W. Thomas, 1877; Rev. A. C. George, 1880; Rev. F. H. Swift, 1883; Rev. G. Jackson, 1889.

GRANT-PHASE METHODIST EPISCOPAL CHURCH.—This church was founded about twenty-five years ago. At the present time February, 1886, they are erecting new buildings on Halsted Street, near the Presbyterian
RELIGIOUS HISTORY.

Theological Seminary. The church and parsonage will cost about $45,000, including lots. The pastors have been assigned as follows, since the fire: Rev. T. C. Cledening, 1871-74; Rev. T. P. Marsh, 1874-77; Rev. F. B. Cleveland, 1877-80; Rev. Isaac Seiberger, 1880-81; Rev. L. E. Curtis, 1881-83; and Rev. M. M. Parkhurst, the present pastor.

PARK-AVENUE METHODIST EPISCOPAL CHURCH.—This church, one of the wealthiest in Chicago before the fire of 1871, suffered great personal losses in that memorable disaster. Although the church property was not in the track of the flames, the places of business of most of its members were, and these being destroyed left them completely stripped. Since the fire, the history of this church has been marked by struggles, still, at the present time it may be said to be in a condition of fair prosperity. During the period covered by this sketch $14,000 have been paid, leaving the property entirely free from debt. In 1874, an organ was built in the church at an expense of $2,000.

WABASH-AVENUE METHODIST EPISCOPAL CHURCH.—Immediately after the great fire, the Wabash-avenue church- edifice was rented to the Government for $250,000 per annum, for post-office purposes. The congregation consolidated with Trinity Methodist Episcopal Church for one year, each society preserving its own identity. The pastor of the Wabash-avenue society took charge of the united churches. The Wabash-avenue society, upon renting their house of worship, donated their pew, organ and furniture to the Michigan-avenue Methodist Episcopal Church. This building continued as a post-office until July, 1874, when it was destroyed by fire. In the fall of 1872, the society purchased the Olivet Presbyterian Church property for about $45,000. The property comprised church-edifice and two parsonages. Here services were at once resumed, Rev. J. L. G. McKeown, D.D., being assigned the charge. Rev. Mr. McKeown remained two years. Rev. John W. Wik was also pastor, until October, 1876. From 1876 until 1879, Rev. A. W. Patton was pastor; from 1879 until 1882, Rev. Frank M. Bristol; from 1882 until 1885, Rev. T. P. Marsh; the present pastor, Rev. W. B. Laland, was appointed in October, 1885. The church received $75,000 as rent from the Government while the building was occupied as a post-office, and $30,000 insurance after its destruction by fire in 1874; and after buying its present property had a fund which was placed at interest and is a source of revenue to the society. The church is in a flourishing condition, having property valued to-day at about $75,000, a membership of nearly three hundred, and a Sunday-school of four hundred.

Rev. T. P. Marsh was born on July 30, 1834, at Orland, Ind. His father, Dr. Madison Marsh, moved from New York to Indiana, in 1841. Soon afterward he was elected to the State Senate by a majority of one vote, the popular vote. Jesse D. Bright was then elected to the United States Senate by a majority of one vote in the Indiana Legislature, that one vote being claimed by Dr. Marsh; and the United States Senate voted in favor of declaring war with Mexico by a majority of one vote, that one vote being claimed by Jesse D. Bright, voting in favor of the war. Dr. Madison Marsh was a most eminent and successful physician and surgeon. He married Miss Hannah P. Hudson, daughter of Samuel E. Hudson, the first citizen of Newark, N. Y., and afterward of Bloomington, Ill. Rev. T. P. Marsh was their second son. He lived at Orland, Ind., until he was fifteen years old, graduating from the Northwestern Indiana Institute in 1855, intending to enter the Michigan University. In 1859, he came to Chicago, which has since been his home. In 1860, he attended Bryant & Stratton's Commercial College, acquiring a knowledge of the business of his profession which has been of inestimable value to him throughout his entire career. In 1861, he entered the Army as clerk for Captain S. L. Brown, who commanded his military service as assistant quartermaster, and was provided to be assistant quartermaster-general, with the rank of brigadier-general. He commenced on a salary of $25 a month, and had it raised until, before the close of the War, it was $175 a month, when General Brown had the purchasing of forage for the Eastern Army. In April, 1866, he resigned his position as president of the Wesleyan Academy at Wilbraham, Mass., having become impressed that his mission was in the ministry. In July following, he graduated from the Chicago Theological Seminary, the University of Middlesex, Conn, graduating therefrom in 1869. He then came to Chicago and became cashier for Haver & Bros., the largest furniture dealers in the city. He remained with them until 1870, in acquiring time establishing Stakes New Mission. He was offered him an interest in their business, which would probably have given an annual income of about $3,000, but again he sacrificed his financial interests, this time to enter upon the work of the ministry. His first charge was the Dixon Street Methodist Episcopal Church, in this city, where he remained until the fall of 1872, when he was appointed to the Oak Park and Austin Methodist Episcopal Church. The Austin church-edifice was built and the foundation of the Oak Park Church was laid during his pastorate, and the parish divided, Rev. Mr. Marsh remaining with the Austin Church two years, making three years in all to the two places. In 1875, he was appointed to his present Place Church, his pastorate there was very successful. In 1879, he was appointed to St. Paul's Methodist Episcopal Church, where he remained one year. In 1879, he was called to the Court-street Methodist Episcopal Church in Rockford, Ill., where he labored with entire success until 1882, when he was appointed to the Wabash-avenue Methodist Episcopal Church. During his pastorate of three years the church underwent thorough repairs, having been re-painted, re-roofed, refurnished and re-furnished. A new parsonage was also purchased and next to the church, and is now one of the finest in the Conference. Rev. Mr. Marsh received the degree of Master of Arts in 1872 from Wesleyan University. During the past year he has been secretary of the Methodist Board of Missions, the income of which body is largely due to his business education. He was married at East Saggus, a suburb of Boston, on September 6, 1870, to Miss Harriet L. Newhall, daughter of Mr. and Mrs. Newhall, who have five children, four of whom are living.—Hattie Paulina, Winifred, Van Newhall, and Marion.

ORRINGTON LUNT was born at Skowhegan, Maine, on December 8, 1815, his parent being William and Mary Lunt. Until fourteen years of age, he lived with his parents in his native town, where he attended school and assisted in the store of his father, who was a merchant of the place. When he became of age, his father gave him a business in grain and flour, and the latter retired, leaving the entire concern in his hands. After that, in 1842, he came to Chicago, which has since been his home. In the summer of 1844, he began to learn the business of land buying and selling, until, encouraged by his success in these operations, he leased a lot having one hundred feet front on the river, just east of Lake-street bridge. This he took for ten years at $125 a year. These years were marked by prosperity and continual increase of business. Soon after leasing the property referred to, he purchased it, owing to the fact that other parties had entered adverse claims against it. In 1855, Mr. Lunt was elected to the office of water commissioner for the South Division for three years, and at the end of his term of office was re-elected for three years more. During the last three years, the City Departments having been consolidated in the Board of Public Works, he held the position of president of the Board. He was auditor of the board of directors of the Galena & Chicago Union Railroad and also its vice-president for two years. For upward of thirty years, Mr. Lunt has been the second and treasurer of the First National and Chicago Bank, and its principal shareholder, and also one of the charter members of the Northwestern Bank at Evanston, Ill. During his residence in Chicago he has taken great interest in educational matters and especially in the Methodist Church, collecting and paying out large sums in behalf of the church schools and missions, and other organized benevolent institutions. In 1865, owing to his heavy expenses over Europe, Mr. Lunt determined to spend several years in foreign travel, and made the tour of Europe, Egypt and the Holy Land. Shortly after his return the great fire occurred, in which Mr. Lunt, with many others, suffered much loss, but with the determination to work to build better than they had done before. He erected the
fine banking offices, No. 102 Washington Street, now occupied by
Presbyterian Church. Few lives are marked by greater activities than
that of Mr. Lunt. Coming early to this marvellously busy
Western metropolis, he has, for many years, been identified with its
important concerns and has been a keen observer of its growth and
development. He made a Methodist Church his home, and few are more highly esteemed; nevertheless, he is a man of
modest men and gentle manners, who has endeared himself to a
large number of personal friends through his long and useful
career. Mr. Lunt was married, on January 16, 1842, to Cornelia A.
Gray, of Howdahlin, Maine, and has had four children, one of
whom infamy,—Nina C.; Horace G., a lawyer in this
city; William A., a merchant; and Dr. Charles H., a
physician.

MICHIGAN AVENUE METHODIST EPISCOPAL CHURCH.

This church was formerly known as the Indiana-
Avenue Methodist Episcopal Church, and its history
under that name is given in the second volume
of this work. In December, 1871, the society took pos-
session of the basement of the new church-edifice
on Michigan Avenue. A portion of the new building
was completed, and formally dedicated by Rev. C. H.
Fowler, on February 5, 1872, with sufficient funds pledged
to pay the debt. During the period of
Rev. J. W. Phelps, the church-building was fully
completed and again dedicated, by Rev. Dr. Fowler.

The ministers have been as follows:

Rev. R. D. Sheppard, 1870-73; Rev. J. W. Phelps, 1873-74;
Rev. M. M. Parkhurst, 1874-76; Rev. John Williamson, three
years; Rev. G. A. Van Horn, two years; and Rev. M. E. Cady, three
years. The present pastor, Rev. John Williamson, was
appointed in October, 1885.

The value of the church property is $260,000.

WESTERN AVENUE METHODIST EPISCOPAL CHURCH.

In the fall of 1871, Rev. Alexander Youker was sent
here and continued three years of prosperity and revival to the
church. During 1873, Jackson-street Mission was organized under the auspices of H. W. Matthews, Samuel Claude and others.
The church-building was enlarged by the addition of wings, making the seating capacity about five hundred.

In October, 1874, Rev. R. D. Sheppard was stationed at
Western Avenue, and remained there until the end of
1875, when Rev. S. H. Adams followed in October, 1877. The next pastor was Rev. J. M. Caldwell,
who remained three years. He was succeeded, in 1881, by
Rev. J. H. More, who resigned the spring of 1882, on account of ill-health. For a time the pulpit was supplied by Rev. W. X.
Ninde. The present pastor, Rev. W. H. Burns, was appointed
October, 1883.

The corner-stone of the new church-edifice was laid on July 22, 1884. The services in connection with the
dedication lasted from May 10 to May 17, 1885. Ser-
mons were preached by Bishop H. W. Warrem, Dr.
Newman, of New York, Rev. F. M. Bristol, Bishop
Merrill, Bishop Foss, Rev. Dr. Kennard, of the Fourth
Baptist Church. The dedication proper was conducted
by President Cummings, of the Northwestern Uni-
versity, and Rev. Luke Hitchcock, then the presiding
elder of the district. The total cost of the church-
building was about $39,000. The present membership is
about four hundred and forty-eight, with a Sunday-
school of one hundred and twenty-five.

Rev. Luke Hitchcock, D.D., was born at Lebanon, Madis-
on Co., N. Y., on April 13, 1783. Luke Hitchcock was raised at
Lebanon, N. Y., enjoying such advantages for education as the
common schools of those times afforded, attending school in the
winter, and working on the farms, during the summer. At the age of eighteen he attended a select school a few weeks, and afterward engaged in teaching three successive winters, spending summers on the
farm. In 1814, he spent a few months at Casenova Seminary,

LANSING AVENUE METHODIST EPISCOPAL CHURCH.

Immediately after the great fire, Rev. C. G. Trustell,
the pastor, was elected superintendent of the Chicago
Relief and Aid Society, but still acted as pastor of the
church. The church membership is now about four
hundred, with a Sunday-school of four hundred. The
church property is valued at $260,000.

The pastors, during the period covered by this vol-
ume, have been as follows:

Rev. C. G. Trustell, 1871-73; Rev. Louis Meredith, 1873-75;
Rev. W. C. Willing, 1875-77; Rev. T. C. Cundenning, 1877-80;
Rev. H. W. Hatfield, 1880; Rev. J. R. Hill, 1881; Rev. A. C. George, October, 1883, until April, 1885; Rev. G. W.
Bennett, April, 1885, until October, 1885; Rev. J. M. Caldwell,
was appointed in October, 1885.

FULTON STREET METHODIST EPISCOPAL CHURCH.

This church had its origin in a division of the mem-
bers of Western-avenue Church, in 1871, with reference to the removal of their church-building from its location on Seymour Street, to the corner of Western Avenue and Monroe Street. Those not in favor of the removal, however, held a meeting on the corner of Fulton Street and Artesian Avenue, and soon engaged a student from Garrett Biblical Institute to supply their pulpit. In the fall of 1872, Rev. G. L. S. Stuff was appointed to the charge. On October 31, the members having a short time previously moved into Good Templar's Hall, on Lake Street, near Seymour, organized the Lake-street Methodist Episcopal Church, with thirty-six members.

In June, 1873, they raised a subscription of $2,225 for a chapel. The lot on the corner of Fulton Street and Artesian Avenue was leased for five years, and the name of the church was changed to the Fulton-street Methodist Episcopal Church. The building was begun on August 9, 1873; completed in October, at a cost of $4,000; and dedicated on November 2, 1873.

Rev. Mr. Stuff remained with the church two years. In October, 1874, Rev. R. S. Cantine was appointed pastor, and remained two years. In October, 1876, Rev. S. M. Davis became pastor, and reigned one year. Rev. William H. Holmes succeeded him as pastor in October, 1877, and was succeeded, in 1879, by Rev. George Chase. In 1851 Rev. J. H. Allen was appointed, and in 1885 Rev. J. P. Brushingham became pastor.

Rev. John F. Brushingham was born at Cuba, Allegany Co., N. Y., in 1830, 1836. He was educated in the common schools, and later at Harvard University. In 1855, he graduated from the Philadelphia Theological Seminary, and was ordained a minister of the Methodist Church. He was twice married, first to Miss Martha A. Briggs, of New York, and second to Miss Julia R. Clay, of Boston.

In 1861 he entered the ministry of the Methodist Episcopal Church, and was excommunicated from the Roman Catholic Church. While in the employ of a physician at Olean, N. Y., he conceived the idea of obtaining a college education and of entering the Christian ministry. He spent two years in Western Michigan College, and the Penn., and during his first vacation began preaching in the villages surrounding his home, although persecuted by Catholics, especially by his relatives, and the next year became a teacher in the Olean Normal School. During this year he filled the Methodist Episcopal pulpit at Rochester, N. Y. Having obtained some little means, he started for the Northwestern University at Evanston, Ill., and, after two years in the preparatory department, entered college, and graduated in 1868. He was next called to teach a church school in the Student Union, and in 1867, he was received into the Methodist Episcopal Church. In 1872, he joined the Rock River Conference, and was appointed to the pastorate of Fulton-street Methodist Episcopal Church. During his pastorate the indebtedness of the church has been liquidated, the lot, previously owned by a debt of $25,000, has been purchased, and a new building has been built—all of which is evidence of the ability and popularity of the young pastor.

Lincoln-street Methodist Episcopal Church.

In 1873, this church was an independent mission, holding services at Hayman's Hall, on Wood Street. Meetings were subsequently conducted in the Wissing Building, corner of Paulina and Twenty-second streets, until March, 1875; in a vacant building on Twenty-second Street, east of Paulina, until May, 1875, when that was destroyed by a gale; and next, in the German Methodist house of worship, corner of Laffin and Nineteenth streets, until the society built a small chapel on the northeast corner of Lincoln and Ambrose streets, at a cost of $1,200. Services were continued here until December, 1881, when the present church-edifice was dedicated. The church stands on the southeast corner of Lincoln and Ambrose streets, the chapel on the other corner being now used by the Swedish Evangelical Lutheran Church. The new building cost $8,120.

The pastors of the society have been

Rev. Mr. Switzer, from October 5, 1873, until January 15, 1874; Rev. W. E. King, from January 15, 1874, to June 27, 1877; Rev. Mr. Alexander, until April 6, 1878; Rev. G. T. Newcomb, until the fall of 1878; Rev. W. F. Towner, 1878-79; Rev. Frederick Porter, 1879-81; Rev. H. H. Kiester, 1882-83; Rev. Frederick Porter, 1883-84; and Rev. William B. Leach, the present pastor.

Other Methodists.

Located in the center of the city were the various branches of the Methodist Episcopal Church: the Emanuel Church, Rev. J. A. Mattock, pastor; the Resurrection Church, Rev. R. S. Finley, pastor; the Indiana Street Church, Rev. A. Vouker, pastor; the Jackson Street Church, Rev. W. J. Richards, pastor; the North Church, Rev. J. A. Logan, pastor; the Fifth Avenue Church, Rev. W. A. Evans, pastor; the State Street Church, Rev. D. J. Holmes, pastor; the Winter Street Church, Rev. W. H. Burns, pastor; the Halsted Street, Rev. Joseph Ogles, pastor; the Paris Street, Rev. R. S. Cantine; and the Washington Street, Rev. D. B. Havens.

Rev. David Harris, pastor of the Welsh Calvinistic Methodist Church, was born in Llangendein, Carmarthenshire, South Wales, on December 1, 1824. His father was Henry Harris, a deacon in the Calvinistic Church, as a leader of the church for many years. His mother's maiden name was Elizabeth Jones, a sister of Rev. John Jones, of Llangendein. While David Harris was yet a boy, he attended a school kept by John Lloyd, who was a fine scholar and a faithful teacher. It was in obedience to him that he changed the spelling of his name from Harris to Hare.

From the fact of his having Christian parents and a pious teacher, it resulted that he has been a member of the Church from his childhood. But notwithstanding this early leaning toward a pious frame of mind, he was converted by listening to a sermon preached by Rev. William Evans, of Tonypandy, from Romans x. 1-10. Rev. William Evans was the oldest of the ministers who had been in the ministry over seventy years. Upon being converted, Mr. Harris decided to devote himself to the work of the ministry. His early education was received at the parish school at Llangangein, and then at the Llantrithlon College, where he remained three years, leaving it in 1843. He was then elected an elder by the church, the office of elder in the Calvinistic Methodist Church combining the duties of both deacon and elder of the Calvinistic Church. He was elected to the deaconship in 1846, and in the mean time preached occasionally. In 1853, he commenced to preach in Pittsburg, for the Calvinistic Methodist Church, having completed at that time in the theological course and having served as an elder over seven years as deacon. His call to this church was unanimous, and he continued there as preacher until 1854. At this time, he moved to Ironton, Ohio, where a church had been recently organized on the outskirts of that city, and where he had spent the greater part of his life. He received a large number of members, and afterward a larger one, and dedicated it free from debt. After preaching five years, as is required by the Calvinistic Methodist Church, he was ordained to the ministry by the "Gymnasia," or Synod, which was held in Palmyra, Ohio. In 1868, he took a short vacation and went to West Virginia on a visit, and, after returning, renewed his interest in the Church and the people of the church. In 1873, he was elected to the Presbytery of Ohio and was ordained to the ministry by the "Gymnasia," or Synod, and was elected to the Synod of the German Calvinistic Methodist Church, a position which he held for many years.

In 1876, he was elected to the Presbytery of Ohio and was ordained to the ministry by the "Gymnasia," or Synod, and was elected to the Synod of the German Methodist Church, and was consecrated to the ministry by the "Gymnasia," or Synod, and was elected to the Synod of the German Calvinistic Methodist Church, a position which he held for many years.

In 1878, he was elected to the Presbytery of Ohio and was ordained to the ministry by the "Gymnasia," or Synod, and was elected to the Synod of the German Calvinistic Methodist Church, a position which he held for many years.

In 1880, he was elected to the Presbytery of Ohio and was ordained to the ministry by the "Gymnasia," or Synod, and was elected to the Synod of the German Calvinistic Methodist Church, a position which he held for many years.

In 1882, he was elected to the Presbytery of Ohio and was ordained to the ministry by the "Gymnasia," or Synod, and was elected to the Synod of the German Calvinistic Methodist Church, a position which he held for many years.

In 1884, he was elected to the Presbytery of Ohio and was ordained to the ministry by the "Gymnasia," or Synod, and was elected to the Synod of the German Calvinistic Methodist Church, a position which he held for many years.

In 1886, he was elected to the Presbytery of Ohio and was ordained to the ministry by the "Gymnasia," or Synod, and was elected to the Synod of the German Calvinistic Methodist Church, a position which he held for many years.

In 1888, he was elected to the Presbytery of Ohio and was ordained to the ministry by the "Gymnasia," or Synod, and was elected to the Synod of the German Calvinistic Methodist Church, a position which he held for many years.

In 1890, he was elected to the Presbytery of Ohio and was ordained to the ministry by the "Gymnasia," or Synod, and was elected to the Synod of the German Calvinistic Methodist Church, a position which he held for many years.

In 1892, he was elected to the Presbytery of Ohio and was ordained to the ministry by the "Gymnasia," or Synod, and was elected to the Synod of the German Calvinistic Methodist Church, a position which he held for many years.

In 1894, he was elected to the Presbytery of Ohio and was ordained to the ministry by the "Gymnasia," or Synod, and was elected to the Synod of the German Calvinistic Methodist Church, a position which he held for many years.

In 1896, he was elected to the Presbytery of Ohio and was ordained to the ministry by the "Gymnasia," or Synod, and was elected to the Synod of the German Calvinistic Methodist Church, a position which he held for many years.

In 1898, he was elected to the Presbytery of Ohio and was ordained to the ministry by the "Gymnasia," or Synod, and was elected to the Synod of the German Calvinistic Methodist Church, a position which he held for many years.
succeeded, and Rev. H. A. Wagner followed from 1879 until 1882. During this period the debt of $775, incurred in erecting the parsonage during the pastorate of Rev. Jacob Bleitsch, was paid. In 1882, Rev. Friedrich Gottschalk became pastor. In 1883, the society built a two-story brick church office on the south east corner of Twenty-eighth Street and Portland Avenue, at a cost of $17,000. The entire property is valued at $25,000. It is clear of indebtedness and the membership of the church has increased during Rev. Mr. Gottschalk's pastorate to two hundred and four.

Rev. F. Gottschalk was born on July 17, 1843, in North Prussia. His father, John Gottschalk, is still living at the age of eighty-five. His mother was Mrs. V. Zehn, the family, with the exception of one son, who had emigrated to America some years before, came to this country in 1856. They remained in Buffalo, N. Y., about six months, and then went to Milwaukee, Wis. After some years spent in this city, the subject of this sketch went to Ohio, and there attended Wallace College and Baldwin University at Berea, two years. He then entered the ministry in 1864, at Fond du Lac, Wis., where he remained until 1868. He was then at Beloit Dam, with two other appointments, until 1867; at Columbus, Wis., from 1867 to 1869; at Oshkosh, Wis., from 1869 to 1872; and at Madison, Wis., from 1872 to 1874. In 1874, he married Miss I. L. Blatt, for himself and his family. He entered Garrett Biblical Institute, at Evanston, Ill., graduating in 1876. He then returned to Watertown, Wis., where he remained from 1876 to 1879. In 1879, he was appointed pastor of the Methodist Episcopal Church, Chicago, and remained there until 1882, when he became pastor of Portland-avenue German Methodist Episcopal Church, where he still remains. Rev. Mr. Gottschalk married Miss L. Moline, daughter of George and Elizabeth Adam, of Clyman, Wis. They have had nine children.—Franklin B. Albert Wesley, Emma Louisa, Lydia (deceased), Arthur Friedrich (deceased), Benjamin Theophilus, Lillie Ellen, Clara Grace, and Horace Edward.

Other German Methodist Episcopal Churches.—Ashland-avenue Church, Rev. C. Weinreich, pastor; Centralia Church, Rev. W. D. Miller, pastor; Center-avenue Church, Rev. E. Echeber, pastor; Chicago-avenue Church, Rev. J. G. Solinger, pastor; Elmwood-avenue Church, Rev. C. Weinreich, pastor; Imperial Church, Rev. J. Blants, pastor; Kenilworth Church, Rev. W. G. Smith, pastor; Lombard-avenue Church, Rev. F. Gottschalk, pastor; South Fullerton-avenue Church, Rev. W. Voelker, pastor.

Rev. Charles G. Van Dorn, pastor of the North Ashland-avenue German Methodist Episcopal Church, was born in Saxony, on December 2, 1839. His father was Charles Weinreich, a baker by trade. His mother was Dora (Von Dorn) Weinreich. The subject of this sketch emigrated to America in 1843, and settled at Waukegan, Ill., Wis., where he attended the public schools and engaged in teaming. Upon the breaking out of the Rebellion, he enlisted as a private soldier in the 26th Wisconsin Volunteer Infantry, and continuing the war to its termination, was promoted to the rank of sergant. After leaving the army he went to Ohio to assist Wallace College and Baldwin University at Berea, remaining in those institutions three years, graduating from them in 1865. He then went to Oshkosh, Wis., as assistant pastor of the German Methodist Episcopal Church, and became the regular pastor in the fall of the latter year. In 1869, he was sent to Clinton, Ill., where he remained until 1877. He was then pastor at New Beemen, Ill., until 1877; at Blue Island, Ill., until 1876; at Valparaiso, Ind., until 1876; at La Porte, Ind., until 1875; at Blue Island, Ill., until 1883, in which year he became pastor of the North Ashland-avenue Church. Rev. Mr. Van Dorn married on August 13, 1866, to Miss Gertrude Blaser. They have eight children, as follows: Emma, Lydia, George, Clara, Franklin, Amanda, Walter, and Clarence.

Swedish Methodist Episcopal Churches.—Market-street Church, Rev. A. Anderson, pastor; May-street Church, Rev. K. H. Eklund, pastor; Fifth-avenue Church, Rev. E. F. Linstrom, pastor; Atlantic-street Church, Rev. E. A. Davidson, pastor.

Rev. Henry Werner Eklund, pastor of the First Swedish Methodist Episcopal Church, was born on January 17, 1848, in Jönköping, Sweden. His father, Nels M. Eklund, was a manufacturer, and in a factory wherein small arms were made for the Swedish Government. His mother was Helena Jacobson previous to her marriage with Mr. Eklund. From the age of five to that of fifteen Henry W. Eklund attended the common schools, and was employed in different occupations. He was a poor boy, he was obliged to assist in supporting the family, and as soon as sufficient strength worked in the factory with his father, re-
RELIGIOUS HISTORY.

The charges and specifications were then amended as follows:

**Specification 1.**—Teaching doctrines contrary to the articles of religion of the Methodist Episcopal Church. **Specification 2.**—Teaching doctrines which are contrary to the established standard of doctrines of said Church. **Specification 3.**—With teaching doctrines which are contrary to the doctrines and belief of said Church.

The charges and specifications having been carefully and at great length elaborated and defined, the defendant pleaded not guilty.

Testimony was taken, in the order named, from Aaron Gurney, D.D.; George B. Armstrong, city editor of the Inter Ocean; Revs. J. M. Caldwell and M. M. Parkhurst, D.D.; Sophia A. Phelps, Francis W. Benjamin and Mrs. Marilla E. Garrett. These were followed by the reading of extracts from Dr. Thomas's sermons. Following the testimony, Dr. Sheppard addressed the jury in behalf of the defendant, after which came the lengthy argument of

contrary to the articles of religion and established standards of doctrine of the Church, do find as follows:

First specification sustained by six votes for and three against. Second specification sustained by five votes for and four against. Third specification sustained by eight votes for and one against. First charge sustained by six votes on the first and second specifications and by one vote on the second and third specifications, and not sustained by three votes.

All the charges and specifications are sustained.

The presiding elder then made the following announcement:

By paragraphs 209 and 213 of the discipline, I find that it is settled that Dr. Thomas is suspended from the ministry and church privileges of the Methodist Episcopal Church until the ensuing Annual Conference.

Thus ended the trial at Centenary Church.

At the Conference held in Sycamore, III., on October 5, 1882, the case was again taken into consideration, when the charges and specifications being heard, testimony read and the merits of the case being discussed, the Conference jury of fifteen rendered the following decision:

**Specification 1.**—(Denying the inspiration of the Scriptures) not sustained; second and third specifications sustained. First and second charges are sustained, and Dr. Thomas is expelled from the ministry and his membership in the Church.

Dr. Thomas was greatly surprised at this verdict and appealed to the judicial Conference, but his appeal was not entertained.

The trial was followed by much controversy and criticism on both sides in the secular and religious papers, the former of which seeming intent upon making the matter as sensational as possible. It is perhaps proper to add that the sentiment of the Methodists in general was voiced, not so much in the action of the Conference or the leaders in this celebrated prosecution, as in an editorial which appeared in the Northwestern Christian Advocate, the organ of the Church for the Northwest, of December 7, 1881, the closing words of which are here quoted:

"Now that the struggle is past, we say cordially that Dr. Thomas is in a position (we wish it had been voluntary on his part) where every Methodist can, without embarrassment, give him all kindness and brotherly love. He can think, say, write, and urge all that is nearest his heart, without a word of Methodist criticism as to himself personally. He is now in the ranks of, or near to, those from whom Methodists can receive criticism and antagonism without flinching. We congratulate the non-Methodist public in having a preacher who is far more evangelical than the average of independent teachers. He has brains and reading and attractiveness, we sincerely hope and pray he may have thousands of disciples and converts, and that he may live many years and do a hundred times more good than even he hoped to do. The world needs earnest teaching, and we shall be glad to know that the People's Church is gathering heavy sheaves."

THE PRESBYTERIAN CHURCH.

REV. DR. AXTELL. The concluding speech of the defense was made by Rev. Dr. Miller, of Iowa, which made a deep impression on the court, jury, and audience. The argument was concluded by Rev. M. M. Parkhurst, D.D., on behalf of the Church. The verdict was rendered at twenty minutes past twelve o'clock on Saturday, September 10, as follows:

We, the committee appointed in the case of Rev. H. W. Thomas, D.D., in which he is charged with disseminating doctrines

First Presbyterian Church.—At the close of the third year of Rev. Dr. Mitchell's ministry, came the great fire of 1877, sweeping away the church edifice, together with the chapel and mission-buildings owned by the congregation. But as the present pastor said in a historical discourse, preached in 1883, "Out of disaster came renewed strength." The fire caused the removal of the society further south, led to a union of Calvary Church, and to the erection of the present large and beautiful church edifice. The union of these two churches
brought into the First Church some of its best and most generous helpers. The great expense of the new building entailed a debt of $70,000, which was lifted in 1878. Dr. Mitchell's ministry was marked by great achievements. The Forty-first-street Presbyterian Church of Chicago was organized on February 14, the city is seen in the institution of the Sunday evening services in Central Music Hall. These were commenced on February 18, 1885, and continued each Sunday until June. The final service was conducted by William L. Tomlines, with Clarence Eddy as organist, and the additional aid of the choir of the First Church. The following members of the congregation acted as a committee responsible for the support and management of this enterprise: 

The church-edifice at the corner of Indiana Avenue and Twenty-first Street was erected in 1871, has a seating capacity for eleven hundred, and, cost, including the lot, $165,000. The present membership of the church is about nine hundred.

Rev. John Henry Barrows, D.D., pastor of the First Presbyterian Church, was born on July 11, 1847, at Medina, Mich. His parents were Rev. John M. Barrows, more recently professor of natural science in Olivet College, Michigan, and Catharine Paine (Moore) Barrows, both persons of strong and conspicuous character. He united with the church in Olivet, Mich., in 1863, and graduated from Olivet College in June, 1867, being a member of the same class with his brother, Rev. Walter M. Barrows, D.D., the eminently public-spirited member of the American Home Missionary Society. He studied theology at Yale, Union and Andover Theological Seminaries. In 1869, he went to Kansas, and spent there two and a half years in missionary and educational work, and his experience in these fields may have given him his willingness to use a new method as a step toward minister. In 1874, he was called to the pastorate of the Congregational Church at Springfield. His intellectual and moral resources were enlarged and enriched by a year of travel in Europe, during which time he supplied the American Chapel at Paris. After the termination of this tour, he was pastor for six years of the Eliot Church, at Lawrence, Mass., during which time the church-edifice had to be enlarged, and while this enlargement was being made he preached to great audiences in the City Hall, disclosing his ability to hold and sway large assemblies with a strictly gospel theme. After leaving Lawrence, he was pastor of the Maverick Church in East Boston, Mass., and there he developed his tact in church administration in paying off what seemed to be an overwhelming debt. He came to Chicago, as pastor of the First Presbyterian Church, on November 6, 1881, and since that time he has made his power felt in every field of labor he has entered. Rev. Mr. Barrows was married May 8th, 1871, to Martha Eleanor Mole, daughter of Thomas Mole, of Williamstown, Mass. They have four children, two daughters and two sons.

Second Presbyterian Church—In the spring of 1871, the congregation of this church became convinced that its interests required the removal of their place of worship to a location more convenient to a majority of the members. Accordingly a sale of their old property was effected, and a lot purchased on the corner of Wabash Avenue and Twentieth Street. On the first Sunday in October, 1871, the last public service was held in the old building. One week later, the church property was destroyed; a few months after this event, the property of the Olivet Church, which had been united with the Second Church, was sold by the trustees of that society, and the Second Presbyterian congregation exchanged their lot on the corner of Wabash Avenue and Twentieth Street for that on the northwest corner of Michigan Avenue and Twentieth Street, where the present edifice stands.

Rev. Dr. Patterson preached his farewell discourse on January 19, 1872, and was succeeded by Rev. J. M. Gibson, who preached his initial sermon on February
16, 1874. Mr. Gibson, remained with the church until 1880, after which, for two years, they were without a regular pastor. During Mr. Gibson's administration, the beautiful new house of worship was completed, the dedication taking place on June 24, 1874. The pastor was present during the sermon. Mr. Gibson was succeeded by Rev. S. J. McPherson, the present pastor, in November, 1882. The membership is about eight hundred, with three hundred in the Sunday-school. There are also in the Moseley Mission school about four hundred scholars.

A permanent fund of $10,000 was provided by a bequest of Flavel Moseley, a member of this church, for the benefit of mission schools. The interest on this fund is applied annually, according to the will of the donor, by the trustees of the church. The Moseley Mission, on Calumet Avenue, is thus named in memory of Mr. Moseley, and has a fine building, free from debt, and held by the trustees of the church for the use and benefit of the Mission.

The Second Presbyterian Church-édifice is one of the finest in Chicago. It is a clerestory Gothic of the Renaissance style, with nave and side-aisles. It is built of bituminous limestone, with cladding of weatherings and arches of lighter sandstone. A massive tower stands on the southeast corner of the structure. The church contains one of the largest organs in the city, it having been built at the cost of $60,000. In the rear of the auditorium there are Sunday-school, lecture, class and library rooms and pastor's study.

The following are the officers of the church at the present time (1886):

REV. SIMON JOHN MCPHERSON was born on January 19, 1850, at Munnford, Monroe Co., N. Y. His grandfather, Finlay McPherson, was a pioneer in Western New York. He came from the Highlands of Scotland, and was a member of the Clan McPherson. His son, John Finlay McPherson, the father of the subject of the present sketch, now lives on the land obtained by him from the government of the United States, in the last decade of the eighteenth century. Rev. S. J. McPherson's mother was, previous to her marriage, Miss Jeanette Fraser, whose ancestry belonged to the Clan Macgregor. His father was a highly educated man, connected with the law in Scotland, was a Hebrew and Latin, and, though educated as a physician, followed the occupation of a farmer. He was a man of prominence and influence in his home in Livingston County, N. Y. The boyhood of Rev. S. J. McPherson was spent on the farm, and in the country schools a part of each year, both summer and winter, until he was fifteen years of age. His preparation for college was made at LeRoy, Genesee County, and at Fulton, Oswego Co., N. Y. He was in attendance two years at each place. He entered Princeton College in 1869, and graduated from that institution in 1874, having lost one year through ill health. He received the first honors in a class of one hundred members, delivering the English oration. The next year he was tutor of Mathematics in the College. In the fall of 1875, he entered Princeton Theological Seminary, and graduated therefrom in 1879, having in the meantime spent fifteen months in travel and study through Europe, Egypt, and Palestine, and spending one winter at Athens, Greece. In 1877, he delivered the master's oration in Princeton College, and received the degree of Master of Arts from the College. In April, 1879, he was called to preach by the Presbytery of Rochester, N. Y., and, after declining a call to the Fourth Presbyterian Church of Indianapolis, accepted a call to the First Presbyterian Church of East Orange, N. J., being installed pastor in September, 1879. He remained there until 1882, and during the three years of his pastorate the membership increased by one hundred and fifty, and the average attendance more than doubled. He was called to the Second Presbyterian Church, Chicago, in August, 1882, and entered upon his pastorate on November 1 following. During his pastorate the membership has grown by about one hundred and fifty, and the income of the society is now larger than ever before. A debt of $37,500 has been paid, and during the last two years $140,000 have been raised for congregational and benevolent purposes. Rev. Mr. McPherson received the degree of Doctor of Divinity from Knox College in 1883. He was married on May 15, 1879, to Miss Lucy Bell Harmon, of Danville, Ill. Mr. and Mrs. McPherson have three children, as follows: Jeanette, Oscar Harmon, and Elizabeth.

THIRD PRESBYTERIAN CHURCH. — In the autumn of 1877, the property on the corner of Washington and Carpenter streets was sold to the congregation of St. Paul's Reformed Episcopal Church, and in May, 1878, the new edifice on Ashland Avenue was occupied. This building had a seating capacity for one thousand nine hundred persons. On October 16, 1884, it was destroyed by fire. On the following Sunday, the pastor preached in the Madison-street Skating Rink, where the congregation worshiped until May 24, 1885, when their church-édifice was again ready for occupancy. This was rebuilt materially on the old plan. The auditorium is one of the finest in the city. There are also lecture, Sunday-school, library and other rooms connected with the church. The total cost of the reconstruction was $60,000.

During the pastorate of Rev. Dr. Kittredge, this church has enjoyed a remarkably successful career. Three churches have been organized from the membership of the Third Church: The Reunion, Westminster and Campbell Park churches. Three Sabbath-schools also have been organized, with a total enrolled membership of two thousand six hundred and forty scholars. These schools are the Home, Foster and Noble-street Missions. Among other institutions of this church may be mentioned the Woman's Foreign Missionary Society, organized in 1879, with a present membership of two hundred, and which supports two foreign missionaries; the Young Ladies' Benevolent Society; and the Young People's Library Association, organized in 1880, as an outgrowth of the young peoples' Monday prayer-meeting, which has an exceptionally fine library, comprising

SECOND PRESBYTERIAN CHURCH: BEFORE COMPLETION OF STEEPLE.
over thirteen hundred volumes; and the Mission Band of Seed-sowers, organized on March 11, 1882, consisting of forty members under twelve years of age, who save their money for missionary purposes.

The weekly prayer meeting has reached the phenomenal attendance of one thousand persons. The total church membership at the present time is about three thousand. The total benevolences of the church for the year of 1884-85 amounted to nearly $34,000.

The organization of the church is as follows:

FOURTH PRESBYTERIAN CHURCH.—Just before the great fire, the Westminster and North Presbyterian churches were consolidated under the name of the Fourth Presbyterian Church. Rev. D. C. Marquis, pastor of the North Church, having received a call to the Central Church, of Baltimore, at the time of the consolidation, Professor Swing, who was pastor of the Westminster Church, was called to minister to the new organization. The society then consisted of four hundred members, which number rapidly increased until the great fire came and swept away their property.

Nothing daunted by this disaster, the services were continued in Standard Hall, until that place proved too small to accommodate the congregation, when they removed to McVicker's Theater for fourteen months.

The new church edifice, on the corner of Rush and Superior streets, was opened on January 4, 1874. It is built of Athens stone, rock-faced, the ground plan being in the form of a Latin cross. The entire cost of the church was about $80,000. The seating capacity is one thousand two hundred.

When Professor Swing withdrew from the Presbyterian Church, in December, 1875, a number of members of the Fourth Church in sympathy with him left the church upon his retirement. The society was reduced fully one-third. The church secured Rev. John A. French, of Morristown, N. J., who commenced his labors in March, 1877, and continued until January 1, 1880, when he was compelled to resign in consequence of ill-health. He was succeeded, on April 7, 1883, by Rev. Herrick Johnson, D.D., of Auburn, N. Y., who remained until July 1, 1883, when he retired to take the position of professor in the Presbyterian Seminary of this city. The church was then without a regular pastor for about two years, but was supplied by Revs. Marquis and Johnson. The present pastor, Rev. M. Wolsey Stryker, of Holyoke, Mass., began his labors in April, 1885, being installed on May 12, following. The church is now in a prosperous condition, having a membership of four hundred and seventy-five, with three hundred in the Sunday-school. The Howe-street Mission, founded and supported by this church, has a membership of seven hundred. The elders of the church are Mark Skinner, H. F. Waite, H. W. King, R. B. Mason, H. A. Hurlbut, H. J. Willing and C. H. Mulliken.

JEFFERSON-PARK PRESBYTERIAN CHURCH.—On January 1, 1867, several persons who had been members of the Reformed Presbyterian Church, on Fulton Street, deemed it necessary to sever their connection with that denomination and unite with the old-school branch of the Presbyterian Church. They accordingly petitioned the Presbytery of Chicago to organize them into a church to be called the Jefferson-park Presbyterian Church, the petitioners embracing a majority of the Fulton-street Church, with the pastor and most of the elders. The Presbytery appointed Rev. Willis Lord, D.D., Rev. Robert W. Patterson, D.D., and Hon. Lincoln Clarke to organize the new church. This committee met the petitioners in the lecture-room of the Free-Will Baptist Church, corner of Peoria and West Jackson streets, on January 21, 1867. The following comprises a list of the petitioners:

W. J. Hanna,* Jane Hanna, Sarah Hanna, W. G. Holmes, Isabella Crighton, Elin J. Hair, Annie E. P. Hair, A. B. Clark, Mrs. A. B. Clark, Joseph P. Ross, Mrs. J. F. Ross, George Hallet, Peter Sinclair, Mrs. P. Sinclair, James Fraser, Susan Fraser, John McLaren, William Meglade, Eliza Meglade, James Duguid, John Rankin, Annie Rankin, W. C. McCallum, Ellen McCallum, Somerville Thomson, Hugh Templeton, James McMillan, M. McKay, Mary McKay, A. Mitchell, Thomas Gilles, Jane Patterson, Isabella Patterson, Sarah Patterson, Alexander Patterson.

After suitable exercises, one hundred and twenty persons were enrolled as members of the new church, the compilers are indebted to Mr. Hanna for the particulars of this sketch.
RELIGIOUS HISTORY.

and John Crighton and William G. Holmes were chosen as ruling elders and duly installed. On March 20, following the congregation extended a unanimous call to Rev. Dr. Patterson, former of the Fulton-street Church, who was installed on April 21. A lot was secured on the northeast corner of West Adams and Throop streets, and a temporary frame building erected.

Dr. Patterson increased the membership until the great fire of 1871, when the church-edifice was for many weeks used as a home for refugees from the burned district, and he personally devoted himself to caring for the distressed. During the winter of 1871-72, over the whole of this kind induced ill-health, and Dr. Patterson was compelled to retire from service. The congregation sent him to the Holy Land, from which he returned in 1872 much improved; but on resuming his labors, his health again failed and he was compelled to seek another climate. Failing to find a successor agreeable to the majority, in October of the same year the congregation worshiped along with the American Reformed Church on Washington Street. On November 15, 1874, services were resumed in their own place of worship, after it had been completely refitted and improved. Professor Francis L. Patton became stated supply, and the church rapidly increased. The construction of a large and handsome brick church edifice was commenced in the summer of 1876, and dedicated on January 6, 1877. Its cost was upwards of $45,000. It is of the amphitheater style, seating 800 persons.

On July 16, 1879, Professor Patton accepted the call to become the pastor, was soon installed, and remained with the church until April, 1881, when he resigned to go to Princeton Theological Seminary. Dr. Patton was followed by Rev. J. E. Wright, of Madison, Wis., who was duly installed on May 14, 1882, but resigned in the following January. Rev. W. G. Craig, D.D., succeeded as stated supply, until January 30, 1884, when Rev. Thomas Parry, of Terre Haute, Ind., became the pastor.

Mr. Parry's pastorate has been a successful one, marked by a large increase of membership.

Rev. Thomas Parry, pastor of the Jefferson Park Presbyterian Church, was born on October 10, 1835, in Dembighshire, North Wales. His father was John Parry, a farmer, and his mother (Hughes) Parry. John Parry was a member of the Episcopal Church in Wales, but after coming to this country did not unite with any church until he joined the Calvinistic Methodist Church a short time before death, which occurred in 1853. Mrs. Parry, while in Wales, was a member of the Calvinistic Methodist Church, but after coming to this country was outside of the church for fifteen years. She then joined the Calvinistic Methodist Church. She died in 1875. Thomas Parry prepared for college at Wayland University, Beaver Dam, Wis., entering that institution in 1862, and remaining until 1866, when he graduated and immediately went to Princeton College, in which institution he remained until 1876, graduating with the degree of Bachelor of Arts. The next three years he spent in Princeton Theological Seminary, graduating in 1873, and in the same year received the degree of Master of Arts from Princeton. He then went to Constantinople, Mich., as pastor of the First Presbyterian Church, where he remained nearly four years. While there his church pulled down, re-built, and renovated their church edifice, greatly improving it. In May, 1878, he went to Ottawa, Ill., as stated supply to the Presbyterian Church, remaining eight months. From Ottawa he went, in February, 1879, to Providence, R. I., as pastor of the First Presbyterian Church. He remained there two years, and then went to Terre Haute, Ind., to the Central Presbyterian Church. This church was formed by the union of two churches—the Baldwin and the First Presbyterian—the two uniting in extending the call, previous to their union. During Rev. Mr. Parry's pastorate in Terre Haute, his church bought a Methodist church-building for $2,000, in which they started a mission, over which a separate pastor was appointed. Mr. Parry preached in three different places, and increased the membership of the Central Church from four hundred and fourteen to five hundred and eighty-four during his pastorate, which commenced in May, 1881, and terminated in January, 1884. In this month he was called to his present charge, as the successor of Rev. Mr. Wright. The membership of his church here increased in numbers one hundred and twenty-four during 1884. Mr. Parry was married on June 4, 1874 to Miss Cecilia Crawford Camp, daughter of E. R. and Fanny Camp, of Grant, Indiana, Co., Penn. They have had six children, four of whom are living, as follows: Fanny, Florence, James McCosh and Elizabeth Mabel.

The Sixth Presbyterian Church.—This church was the result of a union of the Ninth and Grace Presbyterian churches. The former was organized on July 10, 1866, at the residence of Edward Silvey, with a membership of twenty persons. It was located on Ellis Avenue, within the limits of the district now known as Fairview and Oakland. Rev. Alfred Eddy, of Chicago, accepted the call of the church on August 30, and almost immediately began his labors. In 1872, thirty-five members met to form a new organization. Their petition to the Presbytery was answered by the appointment of Rev. William M. Blackburn, D.D., and Edwin R. Davis to act in the premises. This committee also met at Edward Silvey's residence, on May 8, 1872, and organized Grace Presbyterian Church with a membership of forty-one persons. A call was extended to Rev. Ben. Ezra S. Ely, of Stockton, Cal., which he accepted, and was installed in November, 1873. He remained College of Arts until July, 1875. In the meantime a lot was purchased on Vincennes Avenue, and a building erected, which was dedicated on July 27, 1873. The two churches worked separately until the close of 1874, and early in 1875 they were united on an equal
standing. To avoid difficulty with regard to the transfer of real-estate to the new organization, the committee of conference, acting on the advice of the Presbyterian Church, agreed that the name of Grace Presbyterian Church should be abandoned, that the pastor and officers should resign, that the members of the Ninth Church should present letters of dismissal, that the church should be dissolved by the Presbytery, and that the new organization should receive the name of the Sixth Presbyterian Church. This plan was successfully consummated. Rev. Henry T. Miller, of Rockport, N. Y., became his chaplain on October 15, 1875, and was installed, on October 17; on June 16, 1882, he resigned, preaching a farewell sermon on October 15, 1882. During Mr. Miller's pastorate, such was the growth of the congregation that a larger edifice became necessary. The corner-stone of the present building was laid on July 8, 1879. It is of stone, with slate roof, has a seating capacity of eight hundred and fifty, and cost $18,531. After Mr. Miller's retirement, a call was extended to Rev. John H. Worcester, Jr., of South Orange, N. J., which he accepted; Rev. John R. Worcester, Jr., being installed on the Tuesday following.

Rev. John Hopkins Worcester, Jr., pastor of the Sixth Presbyterian Church, was born at St. Johnsbury, Vt., on April 2, 1845. His father was Rev. J. H. Worcester, D.D., who preached in St. Johnsbury and Burlington, Vt., where he still resides. His grandfather was a minister, a missionary, and a Presbyterian nationaliser. The mother of Rev. J. H. Worcester, Jr., was Mrs. Martha P. (Clark) Worcester, of St. Johnsbury, Vt. His education was obtained at the University of Vermont, where he graduated with the degree of Bachelor of Arts in 1869. After this he taught for two years in a young ladies' school of which his father was principal, and from 1867 to 1869 attended the Union Theological Seminary. From the fall of 1869 to the fall of 1870, he studied in Berlin and Leipzig, and then for a year studied again in the Union Theological Seminary, graduating in 1871, and during three months in the fall of that year was engaged as tutor in the University of Vermont. On January 10, 1872, he was installed pastor of the First Presbyterian Church at South Orange, N. J., remaining there as pastor until the first Sunday of January, 1883, when he came to Chicago to assume the duties of the pastor of the Sixth Presbyterian Church. In New Jersey his pastorate was peaceful, harmonious and successful; and in Chicago his ability as a pastor and preacher have been abundantly demonstrated by the harmony and prosperity of his church. Rev. Mr. Worcester was married, on October 29, 1871, to Miss Harriet W. Strong, of Auburndale, Mass. They have had four children, three of whom are living.

Eighth Presbyterian Church.—After the resignation of Rev. Lewis R. Reid, Rev. Samuel W. Duffield succeeded to the pastorate, and was publicly installed on December 22, 1874. The next pastor was Rev. John M. Worrall, D.D., who was called from Covington, Ky., and began his labors in June, 1877. At this time the church was burdened by a debt of $21,000. Under Dr. Worrall's ministry this debt was paid, and more than four hundred members were added to the church. Owing, however, to his ill-health, together with that of members of his family, he was compelled to seek another climate, and his resignation occurred on June 1, 1882.

The late pastor, Rev. Thomas Edward Green, of Sparta, Ill., was installed on January 18, 1883. The church has a large Sunday-school, also a branch school known as the Onward Mission, at the corner of Indiana Street and Hoyne Avenue. During 1883, about $25,000 were expended in additions and repairs upon the church-building, corner of Washington Boulevard and Robey Street. A new gallery increases the seating capacity one-third, making in all accommodations for nine hundred people.

Among those who have served the church long and devotedly, may be mentioned the following:

The present officers of the church are

Rev. Thomas Edward Green, late pastor of the Eighth Presbyterian Church, was born at Harrisville, Penn., on December 23, 1827. He is a descendant of very long-lived ancestors. His grandfather, Thomas Green, who, though of American descent, was of English descent, dying in 1872, at the age of one hundred and four, and leaving eleven children, all of whom are still living. Rev. John M. Green, father of the present subject, and at present pastor of the First Presbyterian Church, Centra, Ill., was a minister of the Methodist Episcopal Church at Harrisville, Penn., and at various other places within the jurisdiction of the Methodist Episcopal Church South. He was stationed at Ravenna, Ohio, from 1865 to 1868. The mother of Rev. Thomas Edward Green was Mrs. Martha E. (Owens) Green, daughter of Thomas G. Owens, of Scotch and Welsh descent. In 1868, Rev. John M. Green started with his family to Denver, Colo., but upon arriving at St. Joseph, Mo., Mrs. Green was taken ill, and in consequence the design of settling in the Far West was abandoned. He then commenced a mission work in Northwestern Missouri, and in 1871 returned to Illinois, settling at Lebanon. At this place Thomas Edward Green served three years as a student and at McKendree College, the oldest Methodist Institution in the West, graduating from that Institution in 1875, and standing very high in his class. He then became superintendent of a public school at Upper Alton, a school which was conducted under a special charter from the Illinois Legislature, and which was more of an academic order than it was of the regular public school system. In June, 1876, he retired from this position, and resting until the fall of 1877, when he went to Princeton Seminary, finishing the theological course in 1879. He commenced his ministry as pastor of St. Paul's Presbyterian Church, Mt. Carmel, Ill., on May 15, 1879, remaining there until October 31, 1880, from which time until May 1, 1884, he supplied the church at Effingham. He then received a unanimous call from the First Presbyterian Church of Sparta, Ill., the call being signed by every man, woman and child member of the parish. This church is the largest in the State, south of Chicago, having a membership of nearly four hundred, and a congregation of eight hundred. Rev. Mr. Green's pastorate terminated in December, 1882, during which the membership increased over one hundred. He then received a unanimous call from the Eighth Presbyterian Church, Presbyterian Church, Chicago, to which church he was called. Mr. Green's acceptance of this call was held on December 24, 1882. During his pastorate, the membership increased over three hundred, and the congregations usually filled the church to overflowing. In February, 1886, Rev. Mr. Green formally withdrew from the Presbyterian denomination, and united with the Episcopal church. Rev. Mr. Green received the degree of Master of Arts from McKendree College in 1878. He was married on April 21, 1880, to Miss Laura E. Johnson, daughter of James Johnson, of Mt. Carmel, Ill. They have two children—Eleanor and Marie Gladys.

First Scotch Presbyterian Church.—After the pastorate of Rev. Mr. Burns, which closed in April, 1870, this church was without a minister until July 11, 1872, when Rev. James Maclaughlan was called. His ministry continued until February, 1882. For some time after the fire of 1874, this house of worship, like many others, was used as a place of refuge, and the church people were among the foremost in the labor of caring for the destitute from the burned district. Mr. Maclaughlan was followed by the present pastor, Rev. Henry Sawers, of Middletown, Iowa, on June 10, 1883, whose administration has been very successful. He has relieved the society of all incumbrance, raised funds for a complete refitting and improvement of the church-building, erected a commodious parsonage, and brought the membership up to three hundred and fifty. In addition to this he has founded, in connection with his church, Hope Mis-
RELIGIOUS HISTORY.

sion on Augusta Street, near Western Avenue, which, with the Sunday-school of the parent church, numbers, at the present time, about four hundred. The clergy of the church are: Alexander Barnett, William J. Jackson, I. C. Hamill, Alexander Eunson and Benjamin Smith.

REV. EDWARD HENRY SAWERS, pastor of the First Scotch Presbyterian Church, was born on April 5, 1847, in Laurieston, Parish of Falkirk, Stirlingshire, Scotland. His father was William Sawers, gardener for the estate of West Quater, which belonged to the Livingston family, a family which had been attainted and degraded from all its titles, except that of Knightihood, in the time of Charles Stuart. His mother was Mrs. Janet (Kennedy) Sawers. Edward was intended for the ministry from his birth. He acquired the rudiments of his education at the parish schools, and then studied at the Grammar School at Sterling, when he was obliged to give up his studies for a time, though he did not abandon his aim of becoming a minister of the Gospel. In 1868, he established the Falkirk Evangelical Association, organized upon the same plan as that of the Young Men's Christian Association of this country. The object of the Association was to reach those people not reached by the ordinary church-work. Mr. Sawers left Scotland in 1870, and came direct to Canada, and went to work to earn money with which to pay his expenses while completing his preparations for the ministry. In 1871, he commenced studying at Knox College, and then attended the University of Toronto, where he remained until 1876. He then came to Chicago and studied Theology under Dr. Francis Patton, in the Seminary of the North Western Conference, during which time he was a member of the First Scotch Church in Chicago. Graduating from the Seminary in 1879, he went to Middletown, Iowa, as pastor of the Presbyterian Church, and remained until June 1, 1883. In Iowa he was very successful in building up the little church. Upon leaving there he came to Chicago and assumed his present charge. During his pastorate in Chicago he has been very much more than ordinarily successful in all departments of his work. The church has been in fact almost entirely reorganized; a debt of $2,000 has been paid; two hundred and fifty-seven members have been added to the roll; the church- edifice has been thoroughly repaired and renovated. For many years, he was established at No. 686 Augustana Street, near Western Avenue, and a good building erected for its use; and, above all, the spiritual condition of the church has been very much improved, as is indicated by the increasing attendance and by the increasing interest in religious work. Rev. Mr. Sawers was married on April 16, 1878, to Lida Hamilton, daughter of Rev. W. L. Hamilton, of Trinity Church, Henry County, Iowa. They have three children, as follows: Edith Duncan, Agnes Wilson, and Charles Henry.

HOLLAND PRESBYTERIAN CHURCH. — Emanuel Van Orden, a licentiate under the care of the Presbytery of Chicago, having preached since the first Sunday of May, 1878, in the school-house of the Evangelical Lutheran church, corner of Chicago Avenue and Noble Street, consent having been given by the Presbytery of Chicago to organize a Holland Presbyterian church, on October 23, an organization was perfected with a membership of sixteen persons. Rev. E. Van Orden was elected pastor, at a salary of $1,000 a year, $800 of which was to come from the Presbyterian Home Missionary Society. On December 4, 1878, the new church edifice, on the corner of Noble and Erie streets, was dedicated, and, in the afternoon of the same day, the pastor-elect was formally installed. The first communion service was held on December 11. The communion set was presented by Mrs. William Blair, of the Second Presbyterian Church. On September 22, 1879, Rev. E. Van Orden preached his farewell sermon.

On January 28, 1873, Rev. Jacob Post, of Milwaukee, was elected pastor, and was installed on November 9, 1873. Services in this church were held first in the Holland language, but later, under Rev. Jacob Post, once each month in English. On September 21, the congregation resolved to have their service in their own language in the morning, and in English in the evening. Up to this time only Dutch had joined the church, but by the new arrangement many English came also. This proved unfortunate, as two factions grew up, between whom there could be but little fellowship. There were really two distinct congregations, under one pastor, and the officers were invariably Dutch. On March 28, 1875, Rev. Mr. Post dissolved his relations with the society, and for a time the pulpit was occupied by missionaries. Rev. Mr. Oggel, of the Westminster Church, supplied the pulpit during a part of 1878 and 1879. In December, 1884, Rev. John Vanderhook, of Kalamazoo, Mich., was elected pastor, under whose efforts the church has greatly improved. The church numbers about one hundred members.

OTHER PRESBYTERIAN CHURCHES.—Belden-avenue Church, Rev. Corbett Snyder, pastor; and Fullerton Avenue Church, H. Walker, pastor; Fifth Church, Rev. W. G. Woodbridge, pastor; Reunion Church, Rev. William R. Scott, pastor; Westminster Church, Rev. Charles S. Hoyt, pastor; Railroad Chapel, Charles M. Morton, pastor; Fullerton-avenue Church.

REV. WILLIAM RICHARDSON SCOTT, pastor of the Reunion Presbyterian Church, was born on April 25, 1857, at Fort Sarnia, Canada. His father, William Scott, was a merchant of Fort Sarnia, who moved to Chicago in 1859, and has resided here since. W. R. was born at Dundee, Scotland, and came to America with about fifteen years of age. He married Miss Emily Richardson, daughter of John Richardson, of Fort Sarnia, Canada. They have two daughters,—Eveline J. and Marion Agnes. Rev. Mr. Scott was educated at the Chicago High School; afterwards graduated from the Central High School in 1876. He then attended Lake Forest University, in which he completed the freshman and sophomore years of his college course. In 1876 he entered the Chicago Theological Seminary, from which he graduated in 1880; when he became a student of the Presbyterian Theological Seminary of the Northwest, and graduated therefrom in 1882. He then entered the Union Theological Seminary at New York. He taught school; has taken the course of study under Dr. Sheed (the most distinguished living theologian of the Presbyterian denomination in this country), Egeystis under Dr. Philip Schaff, and of Church History under Dr. B. H. H. D. Hitchcock. He thus completed his course of education from his eighteenth year to this time, upon his return to Chicago he was called to the pastorate of the Reunion Presbyterian Church, in April, 1884. During his pastorate, besides meeting all its current expenses, the church has paid off about $1,500 of its debt, and has completed its new brick church edifice at the corner of Ashland Avenue and Hastings Street, the property being valued at $60,000. During the year there were twenty additions to the membership of the church, the present membership being one hundred and fifty.

PRESBYTERIAN THEOLOGICAL SEMINARY OF THE NORTHWEST. — The first attempt to establish a Presbyterian theological seminary for the Northwestern States was made by the Synod of Indiana in 1839, in connection with a college at Hanover, Ind., on the Ohio River. Rev. John Matthews, D. D., of Virginia, was selected as professor of divinity and polity theology, and was induced to that place in the spring of that year. There, for the next ten years, he taught classes of theological students, assisted by Rev. George Bishop, M.A., and other instructors. At this place, forty-five young men were thus trained for the ministry. In 1856, the seminary was removed to New Albany, Ind. Its board of directors, acting under the direction of the Synods of Indiana and Cincinnati, then associated in the care of the institution, were induced to make this removal in consideration of a donation of $15,000, offered by Elias Ayers, of New Albany, on condition of this change of locality. For the next several years, the seminary was taught at New Albany by the following faculty: Dr. Matthews (until his death in 1853), Dr. James Wood, Dr. Daniel Stewart, Dr. Erasmus D. McAllister, Dr. Thomas E. Thomas, and Dr. Philip Lindsey. At this point one hundred and forty-seven students were in connection with that institution. In 1857, the seven Northwestern Synods that had now become associated in the control of the seminary, partly induced by the opening of the new seminary at Danville, Ky., and the nearness of the Danville Seminary, and partly by a new recognition of the fact that the most important work of the Synods was in the locality more central to the great Northwestern field, took measures for the transfer of their institution to the General Assembly, leaving the Assembly free to choose the new location. A meeting of May, 1857, met in Indianapolis, then in the command of the Synod of Indiana, and accepted the offer of the Synod, and, after a full discussion, fixed upon Chicago as the proper place. It was known to the Assembly that a large and valuable donation in land, suitable for a site, could be procured by Mr. John H. McCormick, on the south side of the meeting in person, offered $100,000 as a permanent endowment in case the Seminary should be established here. The Assem-
bly accordingly appointed a board of directors and a faculty, and
opened the following year, in the following year. The professors
for the respective departments were elected, as follows: Rev.
Nathan L. Rice, D.D., Rev. Willis Lord, D.D., Rev. Leroy
J. Halsey, D.D., and Rev. W. M. Scott, D.D. These were in-
augurated to offer the opening of the first session in October,
1859. The session opened in September, 1859, with fifteen students.
Since that time the institution has graduated a class every year,
the average of regular graduates being between eight and twelve per
year.

In 1862, a substantial brick and stone building was erected on the
Seminary grounds, at a cost of $16,000, chiefly from funds obtained in
New York. The Seminary grounds, consisting of twenty-five acres on the North Side, situated between Halsted Street and Sheffield Avenue, and between Belden and Fullerton avenues, were donated in two adjacent lots, one of twenty acres, the gift of Hon. W. B. Ogden and his partner, Mr. Sheffiel, of New
Haven, Conn., the other of five acres, donated by William Lill and Mr. Diversey, of Chicago. At the time of this donation the land was valued at $1,000 an acre; at the time of the great fire it was valued at ten times that amount. In 1875, another
building, costing $15,000 was erected, containing chapel, library,
and recreation rooms, the funds being contributed by C. H. Mc-
Cormick and C. B. Nelson, of this city, and Jesse L. Williams,
of Fort Wayne, Ind. Since the inauguration of the first professors,
the chairs of instruction have been filled for varying periods by the
following teachers: Rev. Charles Elliot, D.D., Hebrew Language
and Literature; Rev. J. P. Exegetes; Rev. W. M. Blackham, Biblical
and Ecclesiastical History; Rev. E. D. McMaster, D.D.,
Didactic and Pelonic Theology; and Rev. Robert W. Patterson,
D.D., Christian Ethics and Apologetics.

Mr. McCormick, the donor of the land for the institution, has, at
different times, added other large donations in cash. During 1853,
three elegant brick and stone dwellings for the use of the profes-
sors were erected on the Seminary grounds, costing about $30,000,
most of it the gift of Mr. McCormick. In 1854, $20,000 was
given by Tuthill King, of Chicago, for the endowment fund of the
Seminary, and $75,000, in building, by Cyrus H. McCormick. In
1856, $40,000 was paid by the city, partly for the purpose of meeting deficiencies and
filling the general endowment fund, were received from Mr. McCormick's estate.
The present faculty consists of Rev. J. J. Halsey, D.D.,

The Seminary library consists of about ten thousand volumes,
and forms a choice collection of theological and miscellaneous
books, well adapted to the wants of professors and students;
and receiving constant additions by means of funds provided by its
founder, the late H. K. Cornor, and Major James Hite. There
is also secured to the library, by the will of the late Rev. W. H.
Vander Don, D.D., the valuable addition of some one thousand five hundred
volumes.

Rev. Herrick Johnson, D.D., was born near Fonda, N. Y.,
May 27, 1812. He graduated at Hamilton College, New York,
1837, where he delivered the Clark Price Oration on "The Assimi-
lation of Character to Objects of Thought." In 1850, he graduated from Auburn Seminary and in the same year was ordained assistant
pastor to the First Presbyterian Church at Troy, N. Y., and later
the celebrated Dr. Bennan being at that time pastor. In the fall of
1862, he received a call to the pastorate of the Third Presbyterian
Church at Pittsburgh, where he remained until the fall of 1867, and
during the following winter supplied the church at Marquette,
Mich. In May, 1868, he accepted a call to the pastorate of First
Presbyterian Church at Philadelphia, where he was the immediate successor of Rev. Albert Barnes. Remaining in this parish four years,
he then became professor of Sacred Rhetoric and Pastoral
Theology in Auburn Theological Seminary, where he remained until
1880, when he accepted a call to the Fourth Presbyterian Church
in Chicago and also to a lectureship in the Theological Seminar of
the Northwest. In July, 1853, he resigned his pastorate of the
Fourth Church, and accepted the professorship of Sacred Rhetoric and Pastoral
Theology in the Seminary, which position he still retains. He was a member of the Second General Council of the Presbyterian Alliance, which convened at Philadelphia,
and read before that body a paper on the "Proper Care, Support and Cautions of the Ministry." The volume entitled "Christianity's Challenge" was prepared by Herrick Johnson in the winter of 1850-51. The succeeding winter was made memorable by the theater controversy, which led to the
publication of "The Cult of Worship," by Professor Johnson, a pamphlet about the Theatrical which has passed through several editions. In May, 1852, he
was elected moderator of the General Assembly of the Presbyterian Church at Springfield, Ill. The same year he received the George Washington medal as the premium for the "Glory of Chicago," which was awarded by the proper committee of the American Tract Society to the volume entitled "Christianity's Challenge." In 1853, he was made chairman of the committee to prepare a
Code of Discipline for the organization of Academies, which plan was unanimously adopted, and Dr. Johnson was made president of the Board. He received the degree of Doctor of Divinity from Western Reserve College, Hudson, Ohio, in 1868, and the degree of Doctor of Laws from the Union Thea-
trical Seminary of New York City, remaining three years, and upon
graduating received the Brown fellowship with $500 a year for two years, entitling him to study abroad. Most of these two years
were spent at the University of Berlin. In 1851, he returned to
America, and was invited to the position of instructor in Old Testa-
dament Literature and Exegesis. In April, 1884, he was appointed
associate professor. Rev. Mr. Curtis was married on April 27,
1882, to Miss Laura Elizabeth Ely, daughter of Rev. E. S. Ely,
now of Ottumwa, Iowa, and formerly pastor of Grace Presby-
terian Church, Chicago. They have two children,—Elizabeth Ely and Martha Augusta (Leach) Curtis, daughter of Andrew Leach,
of Pittsford, Vt., a farmer and a prominent citizen in the community
in which he lived. After attending the common schools, Edward
Curtis prepared for college at the Free Academy at Elmiria, N. Y.
In 1860, he entered Beloit College, remaining two
years, when he entered the sophomore class at Yale. In 1874, he
was graduated from this institution with honors, standing fourth in
his class. For twenty-two years he taught school—one year in the high school at Pittsfield, Pike Co., Ill., and one year as classical instructor at Biddle University,
Charlottesville, N. C., an institution devoted exclusively to the
training of ministers of the Methodist Church. In 1883, he
received the degree of Ph.D., and in 1885, the degree of D.D.,
theology, at Columbia University, New York. Curtis was elected
pastor of the First Presbyterian Church in Chicago, in 1886.

The trial of Rev. David Swing, Professor Swing was arraigned before the Presbytery of Chicago on April 13, 1874, the trial proceeding on April 13 and April 20, May 4 to May 8, inclusive, and May 12 to May 16, inclusive, and on May 25, when the final adjourn-
ment was taken. The organization of the Presbytery for the purpose for which they had convened occurred on the first day. Forty-five clergymen, members of the body, were present, together with Ansel D. Eddy, D.D.,
from the Presbytery of Troy, and William Beecher, from the
Congregational Association of Chicago, who were present as a
commission from their body. In addition to these were twenty-six commissioners, from many churches of the city and suburbs. Rev. Arthur Mitchell was elected moderator, and Revs. E. W. Barrett and W. F. Brown temporary clerks. The prosecutor in the case was Rev. Francis L. Patton, D.D., who opened the trial by reading the charges and specifications against Pro-
fessor Swing. These charges and specifications, after being announced, were placed in the hands of the following Judicial Committee: Revs. Robert W. Patterson, D.D., E. S. Ely, and Elder R. E. Barber. The charges and specifications, as reported upon and amended, were as
follows:

"CHARGE I."

"Rev. David Swing, being a minister of the Presbyterian Church of the United States of America, and a member of the
Presbytery of Chicago, has not been zealous in maintaining
the truths of the gospel; and has not been faithful and diligent in the exercise of the public duties of his office as such minister.

"Specifiaition 1.—He is in the habit of using equivocal language in respect to fundamental doctrines, to the manifest injury of his
profession as an orthodox Christian minister, and to the injury of the cause of Christ; that is to say, in such language as tends to
show the necessity of being prepared to receive by faith, and in
sundry other sermons printed in the Alliance news-
RELIGIOUS HISTORY.

803

each, and also in sundry other sermons printed in a volume entitled Truths for To-day, said sermons all purporting to have been preached in the following:—

'that the person of our Lord, regeneration, salvation by Christ, eternal punishment, the personality of the Spirit, the Trinity, and the fall of man—are expressed in vague and ambiguous language; these confessions admit easily of construction that is inconsistent with the doctrine of the Unitarian denomination; that they contain no distinct and unequivocal affirmations of these doctrines as are held by all evangelical churches.

'Specification 2.—That the effect of these vague and ambiguous statements has been to cause grave doubts to be entertained by some of Mr. Swing's ministerial brethren respecting his position in the Presbyterian Church; that the following sermons, preached in Chicago in aid of a Unitarian Chaplain, and that he did lecture in aid of such chapels, and in doing so aided in the propagation of the heresy which denies the Deity of our Blessed Lord; that in an article, entitled 'The Christian,--a passage occurs, which, taken in its plain and obvious sense, teaches that Robert Collyer, a Unitarian minister, and Robert Patterson, Presbyterian minister, preach substantially the same gospel; that the gospel, meaning the Christian religion, is mutable, and may be modified by circumstances of time and place; that the local gospel, meaning the gospel of Christ, is a mixture of virtue and vice; and moreover, that on the Sabbath following the death of John Stuart Mill, a well known Athiest, Mr. Swing preached a sermon in reference to the doctrine of reward and punishment, which was approved, mislead and injure his hearers by producing in them a false charity for fundamental error.

'Specification 4.—In the sermons aforesaid, language is employed which is derogatory to the standards of the Presbyterian Church, or to one or more of the doctrines of said Church, and which is calculated to foster indifference to truth and to produce contempt for the doctrines of our Church; that is to say, that he has at times and in a most disparaging manner used language other than that of the doctrine of the Fall, of Predestination, the Person of Christ, Baptism, the Christian Ministry, and Vicarious Sacrifice. That by insinuation, ridicule, irony and misrepresentation, he has referred to the doctrines of our Church in such a manner as to cast contempt upon them; and that he does not place in juxtaposition true doctrines and false minor points in theology and cardinal doctrines of evangelical religion, he has treated as the most precious doctrines of the Church, which he contemptuously regards as contemptible. The reference is particularly to sermons entitled Soul Culture, St. Paul and the Golden Age, Salvation and Morality, Value of Yesterday, Influence of Democracy on Christian Doctrine, Variation of Moral Motive, A Religion of Words, all published in the Chicago Pulpit; and to Religious Toleration, Christianity and Dogma, Faith, The Great Debate, Christianity as a Civilization, published in Truths for To-day; and in sermons entitled The De-

 illusion of Virtue, Christianity a Lie, A Missionary Religion, pub-

lished in the Alliance newspaper.

'Specification 5.—Being a minister of the Presbyterian Church, and preaching regularly to the Fourth Presbyterian Church of this city, he has omitted to preach in his sermons the doctrines com-
momly known as evangelical; that is to say, in particular, he omits to teach or preach one or more of the doctrines indicated in the following:—Scripture, namely, 'That by faith we maintain our salvation for our sins,' that we have 'redemption through His blood,' that we are 'justified by faith,' that 'there is no other name under Heaven given among men whereby we may be saved,' that Jesus is 'exalted,' that 'God made man,' that 'the Scripture is given by inspiration of God,' and that 'the wicked shall go away into everlasting punishment.'

'Specification 6.—He declares that the value of a doctrine is measured by the benefit of men to verify it in their experience; in illustrating this statement, he has spoken lightly of important doctrines of the Bible, in a sermon entitled 'Christianity and Dogma.'

'Specification 7.—In the sermons entitled respectively 'Old Testament Inspiration' and 'The Value of Yesterday,' published in the Chicago Pulpit, and in the sermons entitled 'Righteousness,' 'Faith,' 'The Great Debate,' and 'Positive Religion,' printed in the volume called Truths for To-day, false and dangerous statements are made respecting our knowledge regarding the Being and Attributes of God.

'Specification 8.—In a sermon entitled 'The Anglican Controversy,' published in the Chicago Pulpit, and in the sermons entitled 'Religious Toleration,' he uses language disparaging the profession of law and medicine, which is the natural outgrowth of circumstances.

'Specification 9.—He has made false and misleading state-
ments respecting the Old Testament sacrifices.

'Specification 10.—In the sermons aforesaid, religion is re-
presented in the form of a mysticism, which undervalues the evi-
den
ciates, and is indifferent to the distinguishing doctrines of Christianity.

'Specification 11.—In his sermons aforesaid he employs the text words used to indicate the doctrines of the Bible in an unscholarly and senseless way; he has also, in his sermons, as well as on the printed page, in sundry other sermons, and by written correspondence, misused and misstated the doctrines of the Bible and the teachings of the Reformed Churches in general, and the Presbyterian Church in particular; that is to say, he so uses such words as regeneration, conversion, repentance, divine, justification, new heart, salva-
tion, etc.

'Specification 12.—He in effect denies the judicial nature of the condemnation of the lost, as taught in the Confession of Faith, Chap. 4, Sec. 4 and Chap. 33; Shorter Catechism, Chap. 19, Art. 34, section 12. He teaches that he does not believe that he does not believe in the Trinity, and that he does not believe in a holy life; that salvation is not peculiar to Christianity; that salvation is a matter of degree; and that the supremacy of faith is not the doctrine that goes farther than other Christian graces towards making men holy.

'Specification 13.—He teaches that men are saved by works.

'Specification 14.—He denies the doctrine of justification by faith as held by the Reformed Churches and taught in the West-
minster Confession of Faith, Chap. 2.

'Specification 15.—In a sermon entitled 'Good Works' he misproach the original views of those who believe in justifica-
tion by faith alone, by using language which is calculated to pro-
duce the impression that those who hold the doctrine aforesaid, divorce faith from morals, and believe that men may be saved by an intellectual assent to a creed without regard to personal char-
acter, and without the influence of the grace of God.

'Specification 27.—He has spoken of the Bible, or portions thereof, in terms which involve a denial of its plenary inspiration as such. He has also, in the previous sermon, concerning the Un-

'Specification 28.—He has spoken of the Bible, or portions thereof, in terms which involve a denial of its infallibility and which tend to shake the confidence of men as taught in Confession of Faith, Chap. 1.

CHARGE II.

Rev. David Swing, being a minister of the Presbyterian Church in the United States of America, and a member of the
Presbytery of Chicago, does not sincerely receive and adopt the Confession of Faith of this Church as containing the system of doctrine taught in the Holy Scripture.

**Section 1.** Since he began to minister to the Fourth Presbyterian Church he has declared to the Rev. Robert Laird Collier, a Unitarian minister in charge of the Church of the Messiah, in Chicago, in the form of protest, that he agreed with Collier, in his theological views, but thought it best to remain as he was for the time, as he could thereby accomplish more good for the cause.

**Section 2.** He does not accept and believe doctrines contained in the Confession of Faith, viz., the doctrines commonly known as Predestination, the Perseverance of the Saints, and Depravity, as appears from the sermons above referred to and the testimony of George A. Shufeldt, Esq.

**Section 3.** He has declared, in a letter to George A. Shufeldt, Esq., since he began his ministry in Chicago, that he had long before that time abandoned three of the five points of Calvinism affirmed by the Synod of Dort, naming the three, meaning three of the doctrines adopted and taught in the Confession of Faith.

**Section 4.** In a sermon delivered in the Fourth Presbyterian Church on April 12, 1874, he made statements which, by fair implication, involve a disbelief in one or more of the leading doctrines of the Confession of Faith, viz.: Election, Perseverance, Original Sin, the Vicarious Sacrifice of Christ, the Trinity and the Deity of Christ.

The specifications contained under Charge 1 are relied on as contained under and in Charge 11, the same as if repeated, excepting the 6th, 10th and 16th.

Respectfully submitted,

(Signed.) **FRANCIS L. PATTON.**

CHICAGO, April 13, 1874.

In the above specifications, Professor Swing's language, books and sermons were freely quoted in support and illustration of the allegations therein contained.

After all the witnesses in the case had been duly cited to appear, the Moderator announced to the Presbytery that they were about to pass to the consideration of the business assigned for trial. He enjoined on them to properly regard the position they now occupied and the seriousness in which they were about to act. The prosecutor was also warned that

"Should be fail to prove the charges he had brought, he himself must be censured as a slanderer of the gospel ministry in proportion to the malignity or rashness that should appear in the prosecution."

At this point Professor Swing appeared, and pleaded "not guilty" to the charges brought against him. He did this, as he said, on the ground that the charges and specifications were too vague and embraced no important offense. He did not desire to raise technical objections. He admitted the extracts from his sermons and writings, but asked the Presbytery to consider the entire essays or whole discourses from which the extracts had been taken. Professor Swing's reply to the charges was somewhat lengthy, setting forth his views on the theological questions that were most concerned, together with the weight of his arguments.

At the conclusion of Professor Swing's reply, Rev. Dr. A. E. Kittredge introduced a resolution to the effect that the proceedings be arrested at this point, in the hope of reaching an understanding between the parties and avoiding the necessity of further trial. This resolution was laid on the table.

In the further proceedings of the trial, testimony was taken of Revs. W. C. Young, C. L. Thompson, Dr. R. W. Patterson, J. H. Trowbridge, Dr. Arthur Swazey, W. C. Goudy, H. G. Miller, George A. Shufeldt, Horace F. Waite, Oliver H. Lee, Henry W. King, and H. A. Hurlbut.

On Tuesday, May 12, Professor Patton entered upon his argument for the prosecution, which occupied the greater part of three days in its delivery.

On Thursday, May 14, Rev. George C. Noyes began his argument for the defense.

On Friday, May 15, the Presbytery assembled to hear the continuation of the argument of Mr. Noyes; but at this point Professor Swing was permitted to speak on his own behalf. At the close of the argument of Mr. Swing, his counsel resumed and concluded his defense, which was immediately followed by the closing argument of the prosecutor.

On Monday, May 18, it was, inter alia,

"Resolved, That the roll be called and the members proceed to express their opinions on the case; it being understood that each member shall be allowed ten minutes in which to state his opinion, while the privilege of speaking as much longer as others not speaking may give him time to consider."

The roll was called, and the opinions were given in the following order:

The opinions of the court being concluded, the following resolution was adopted:

"That the vote be taken on the several charges and specifications at one calling of the roll, each member, as his name is called, voting 'sustained' or 'not sustained.'"

Two other resolutions were adopted:

"That the vote on each specification be upon its moral bearing, as sustaining or not sustaining the guilt alleged in the charge under which it is placed."

"That it is allowable to vote 'sustained in part,' if any member so desires.

Revs. R. W. Patterson, D.D., James McLeod and Elder R. E. Barber were appointed a committee to examine the vote and bring in the finding of the court. The report brought in by the committee, and adopted, was as follows:

The report of the committee was immediately followed by the announcement of Professor Patton that he should appeal from the decision given in the case to the Synod of Illinois, Northeasteren Circuit.

It may be added, that the spirit in which this celebrated case was conducted is well expressed in the language of Rev. William Beecher, who said he had never attended a meeting of this sort where there was less acrimony, less of unkind and ungenerous feeling; that as a general fact, the affairs of the court had been conducted with admirable Christian firmness, intelligence and ability.
Religious History.

United Presbyterian Memorial Church. —
This denomination is quite distinct from "The Presbyterian Church." The United Presbyterian Church is the result of a union of two branches of the Presbyterian "family," consummated on May 26, 1858. In 1736, certain ministers seceded from the Established Church of Scotland, on the ground of "corruption of doctrine and tyranny of administration." They organized a presbytery called the Associate or Secession Presbytery. They increased rapidly, and, in 1753, sent missionaries to Pennsylvania. There were also in this country members of the Reformed Presbyterian, or Covenantant Church. Between these a union was formed, and the united church was called the Associate Reformed Presbyterian Church. They were familiarly called the Union Church. A few of the Secession churches refused to unite, and also some of the Covenantant churches. This left three organizations, — Associate Reformed, Associate and Covenantant churches. The United Presbyterian Church was formed by the union of the two former, and of this order is the church in this city, which is the only one of the kind now here.

It was organized in 1866 as a mission station, and was located on Green Street. There were also missions on the North and South sides, but these were allowed to fail. The members secured a lot at the corner of Paulina and Monroe streets in 1867, where they erected a house of worship in 1869. In 1882, a parsonage was added. The early ministers were Rev. D. G. Bradford; Rev. W. D. Jackson, 1866; Rev. J. M. Baugh, 1869-73; Rev. J. W. Rice, 1874-77. The present pastor, Rev. W. T. Meloy, began his labors in the spring of 1878.

Immediately after the great fire, the house of worship was transformed into a storehouse of supplies that were received from the Chicago Relief & Aid Society and from members of the church, as well as a place of refuge for its friends from the burned district.

The church edifice is a brick structure of the simple Gothic style of architecture, with basement containing Sunday-school rooms, kitchen and pastor's study. The original cost of the edifice was $30,000. Adjoining the church is a parsonage, erected at a cost of $5,000. The property is entirely free from debt.

Rev. William Taggart Meloy, pastor of the First United Presbyterian Church, was born on October 4, 1858, in Washington County, Penn. His father, John Meloy, though of English descent, was born in Lancaster County, Penn. He was somewhat prominent in politics, having been a member of the Pennsylvania Legislature in 1846 and 1855. Mrs. Meloy was born in Ireland, her maiden name being Eliza Young. William T. Meloy graduated at Washington College in 1860, and then studied theology in Alleghany City. He was licensed to preach on April 20, 1861, by the United Presbyterian Presbytery of Charters, Penn. He was ordained by the Presbytery of Wheeling, Va., on June 2, 1865. He was settled as pastor of the United Presbyterian Church of Cadiz, Ohio, in the same month, and remained there until March 20, 1873. His pastorate there was gratefully successful. He resigned to accept the call of the First United Presbyterian Church of Chicago. The church at Cadiz, Ohio, is one of the prominent churches of the denomination, and during the pastorate of Rev. Mr. Meloy it erected an elegant church edifice costing $21,000. The church in Chicago was, at the time of its coming, small, the salary was small, and there had been numerous pastors, each remaining but a short time. The field was uninviting, and the prospects discouraging, but the membership has increased from sixty-one to upward of two hundred, a debt of nearly $2,000 has been cancelled, and the congregation has become entirely self-sustaining. Besides performing his ordinary literary labors, Rev. Mr. Meloy has written a book called "Lucille Vernon, or the

First Congregational Church.

First Congregational Church. — The church edifice of this society was burned on January 16, 1873. While the fire was still in progress, the trustees and building committee met at the residence of H. Z. Culver, and resolved to re-build at once. The committee had in hand $108,000 in cash. The church and its contents were fully insured. An old indebtedness of $15,000 was cleared away, and the remaining funds were put at interest until needed. From the spring of 1873, worship was held in the basement until February 15, 1874, when the new building was completed. In its exterior appointments, the new church edifice is like the old structure, in its main features. The ground plan is cruciform. The mean height of the ceiling is
fifty-seven feet, the entire area of which is unbroken by roof supports. The auditorium declines from every side to a common center, and the gallery extends to the wall at the head of the transept, on either side of the organ space. The pews are of solid black walnut, and will seat eighteen hundred persons. The organ, rising from behind the pulpit, is a magnificent adornment to the auditorium, and cost $11,000. Handsome chandeliers depend from the roof, containing two hundred and twenty-eight electric-burners. There are three large rose-windows, elaborately ornamented in ecclesiastical designs. In the lower story are lecture and Sunday-school rooms, parlors, and kitchen, appropriately furnished and fitted throughout. The building is heated by steam, lighted by electricity, and cost, including the organ, $105,000. Rev. E. P. Goodwin, who succeeded near Jefferson, and The Oriental Mission on the corner of Lake and Seymour streets, are, with the others above mentioned, in a prosperous condition, and promise at no distant future to become independent and self-supporting churches.

The report for 1885 shows the Sunday-school of the First Church to contain two thousand three hundred and eighty members. The collections for benevolent purposes for the year were $26,074.43.

NEW ENGLAND CHURCH.—The fire of October 9, 1871, swept away the church-ediifice of this society. The members were widely scattered. Their homes and places of business, with very few exceptions, were destroyed, and they sought shelter and aid in other cities. Two families, only, built temporary houses on the still smoking ruins of their former abodes, and remained to live and labor among the destitute. Two weeks after the fire, a Sunday-school was gathered in Z. B. Taylor’s hastily constructed warehouse. Preparatory steps were also taken by E. S. Chesbrough and Z. B. Taylor for the immediate erection of a plain wooden structure for church and Sunday-school purposes, on the old chapel grounds in the rear of the church lot. Their action was promptly approved and sustained by the society, who gathered, twenty-five of them, in Mr. Blatchford’s warehouse, corner of Clinton and Fulton streets, and then subscribed $1,500 to defray the expenses of the temporary structure.

In response to a public call by the pastor, a meeting of the society was held on October 29, 1871, in the First Congregational Church, at which time it was resolved to re-build the main edifice as soon as practicable, and that the pastor, Rev. L. T. Chamberlain, be requested to proceed to the East to raise funds for that purpose. But immediately subsequent to the fire, Mr. Chamberlain was appointed to superintend the distribution of aid and relief to the destitute and suffering in the North Division. He was so efficient in this capacity, that for a time his visit to the East was postponed, and it was several months before the visit was entered upon. Going East, he succeeded in raising $30,000 toward the re-building of the church. In the meantime the temporary structure was erected, and was occupied for purposes of worship on December 3, 1871. During Mr. Chamberlain’s absence at the East the pulpit was supplied by Rev. E. H. Smith. Early in the following spring a permanent stone chapel, now used by the Sunday-school and for social gatherings, was commenced and completed. The first services were held in it on September 14, 1873, and it was dedicated on September 25, 1873. In 1874, the rebuilding of the main edifice was commenced. It was completed on January 1, 1876, and dedicated the following day.

On July 28, 1877, Mr. Chamberlain having accepted a call to the Broadway Congregational Church, Norwich, Conn., tendered his resignation of the pulpit of the New England Church, to take effect in the following September. Rev. Mr. Chamberlain’s ministry, continuing some eight years, is said to have been the longest and most eventful thus far in the history of the church. Large accessions to the church were frequent. After
PLUMPTON CHURCH.—On May 15, 1872, an overture was received by the South Congregational Church from Plymouth Congregational Church, setting forth their need of moving south of Twenty-second Street, the majority of the members having already removed to that vicinity and desiring a union of the two churches. After careful consideration, this union was warmly advocated by the pastors of the two bodies, who generously offered to resign their positions. As Rev. Mr. Tyler insisted upon resigning, the sum of $8,000 was presented to him by the united churches. By the sep-

PLUMPTON CONGREGATIONAL CHURCH.
HISTORY OF CHICAGO.

mission and Sunday schools, a kindergarten, and a medical mission. The aggregate number in these is one thousand and two hundred. The first service was held in the new church on July 4, 1875. Rev. Mr. Bartlett was succeeded by Rev. Charles Hall Everet, who was installed on December 4, 1877. His resignation occurring on January 29, 1882, he was followed by Rev. H. M. Scudder, the present pastor, his installation taking place on December 12, 1882. The membership of the church is about seven hundred, of which number there are but three or four of the original organizers.

The church organization during the year 1885 was as follows:

UNION PARK CONGREGATIONAL CHURCH.—The corner-stone of the present elegant and commodious edifice owned by this society was laid on August 7, 1869, and the building was dedicated on November 12, 1871. The total cost of the edifice was about $200,000. Fronting Union Park it has one of the most desirable sites in Chicago, and is no mean ornament to that portion of the city. There is indebtedness on the property of $5,000, which it is said, will be met in April, 1886. Rev. F. F. Banks, who had labored at the time of the great fire, resigned on December 12, 1875. Rev. David N. VanderVeer became pastor in June, 1876, and resigned on August 31, 1878. The present pastor, Rev. Frederick A. Noble, D.D., began his pastoral duties on April 22, 1879. The present membership of the church is nine hundred, with a Sunday-school of eight hundred and ninety-five. Two branch missions have been founded by this society, namely, Oakley Mission in 1875, on Indiana Street near Oakley Avenue, with a present membership of two hundred and eighty-five, and Ashland Avenue Mission, corner of Ashland Avenue and Twelfth Street, in 1883, with a present membership of two hundred and twenty.

The officers of the church for the year 1885, were as follows:

REV. FREDERICK A. NOBLE, pastor of the Union Park Congregational Church, was born on March 17, 1822, at Baldwin, Me. His father was James Noble, a farmer of Maine, of Scotch descent, and his mother was Jane (Cran) Noble of English descent. The subject of this sketch began to teach school at the age of sixteen. He prepared for college at Phillips Academy, Andover, Mass., and at Kinsall Union Academy, Meriden, N. H. He graduated at Yale College in 1843. From the first he took high rank as a debater and speaker. He was first president of “Brothers in Unity.” He studied for the ministry at Andover, Mass., and at Cincinnati, Ohio, remaining two years at the former place and one year at the latter, in Lane Theological Seminary. He began to preach in the fall of 1841, at St. Paul, Minn., for the “House of Hope.” Presbytery granted him the title of pastor. He was shortly afterward called to the same, and was regularly installed on June 17, 1862. He was the first installed pastor of the church. His pastorate in St. Paul continued until January 1, 1869. It thus covered the whole period of the Rebellion. He took a decided stand in pulpits and on the platform in favor of the maintenance of the Union and the destruction of Slavery. Many of his discourses of that period were published in the Free Press in pamphlet form. One of his sermons, entitled “Blood, the Price of Redemption,” caused a great deal of commotion. For three successive winters of this period he was chaplain of the Minnesota Senate. He was also appointed by the Government one of three commissioners to superintend Indian payments. He served on this commission one year. From St. Paul he was called to be president, Third Presbyterian Church, Pittsburgh, Penn., where he labored, not only to build up the church and to reduce the debt it had just incurred in erecting a new and magnificent building, but he also bore active part in many outside interests. This pastorate lasted about eight years. During his connection with the Presbyterian Church, he was four times a member of the General Assembly, was on the special committee to adjust the details of the union of the churches and while he was pastor, that the formal re-union took place between the Old and New School branches of the Church. The American Board also honored his church at Philadelphia in the same year. The degree of Doctor of Divinity was conferred upon him by the Western Reserve College, at Hudson, Ohio. He left Pittsburgh for New Haven, Conn., in the autumn of 1875. Becoming pastor of the First Congregational Church of that city, popular and grateful, in the Center Church, his connection was transferred from the Presbyterian body to the Congregationalists. But as he had been educated in Congregational institutions and under Congregational influences, he was simply returning to familiar associations, methods and names.

At New Haven he was brought into close personal relations with the venerable and now sainted Dr. Leonard Bacon. This association was very delightful and profitable to Dr. Noble in many ways. While in New Haven, Dr. Noble was himself to popularize the gospel and make the churches feel a deeper interest in the needs of the masses. It was under his leadership that a successful movement was undertaken to bring Mr. D. to the place. As the result of this effort, he had the pleasure of welcoming to his church, on one Sunday, forty-six new members, a larger number than had been admitted at any one time before for nearly fifty years. He was a member of the famous "Little Twelve," an urgent call from the Union Park Congregational Church of Chicago took him away from New Haven in the spring of 1879. Since that time he has been the pastor of this church. Under his ministrations the church has been steadily improving. It has built the Oakley Mission building within the last two years, raising and paying over for this purpose about $17,000. It has also improved its home property considerably and reduced the church debt very materially. The membership of the church has largely increased, and it now takes rank among the first churches of the denomination for its works of benevolence. Dr. Noble had a large share in the establishment, in 1882, of the New West Education Commission. From the first he has been a prominent and influential interest in the National Council. He preached the opening sermon of the Council at the last meeting at Concord, N. H., in 1883. Since Dr. Noble has been in Chicago many of his sermons have been published in pamphlet form, as well as numerous discourses and papers on special topics. Among these may be mentioned a discourse on the “Mormon Iniquity,” delivered before the New Ways Education Commission, on November 2, 1884, and a paper on “Law and the Liquor-Traffic,” read before the General Association of Congregational Churches at Ottawa, Ill., on May 30, 1885, in which he took strong ground in favor of prohibition. The Union Park Congregational Church gives the first charge of the society as provisional to adopt the new Congregational creed. Dr. Noble was married on September 15, 1861, to Miss Lucy A. Perry, daughter of the late George Perry, of Manchester, N. H. They have three children, Frederick Perry, who graduated from the Theological Seminary last year; Mary Perry, who also graduates this year from Ongton Seminary; and Philip Schaff, now at school at Farmington, Me.

TABERNACLE CONGREGATIONAL CHURCH.—The sketch of this church in Volume II. closes with the pastorate of Rev. E. F. Williams, who was dismissed by vote of Council on October 16, 1875. During the years 1874-75-76, there was no regular pastor, the pulpit being supplied by Rev. John Kinball, Rev. J. W. Healy, D.D., and Rev. W. W. Patton, D.D. The great fire of 1871 seriously crippled some of the strongest financial supporters of this church, and the stringency of the times made the payment of the church debt an impossibility. The property was in danger of being lost to the society, when D. L. Moody offered to assume the liabilities if the church would become undenominational and non-sectarian. A commission of elected members of the church voted to abandon the name Congregational and become an independent evangelical church. During 1876, Major D. W. Whittle and Rev. W. J. Erdman were acting pastors. On January 13, 1877, Rev. A. Youker became the regular pastor. He was compelled to resign on May 2, 1881, in consequence of his ill-health. The best comment on the pastorate of Mr. Youker was, that...
upwards of three hundred persons united with the church as a result of his labors.

In 1881, the church renewed its connection with the Chicago Theological Seminary. In June, 1881, Rev. C. M. Gilbert was ordained pastor, and remained in this relation until his death on January 29, 1882. Although his pastorate was so short, Mr. Gilbert greatly endeared himself to his congregation.

The present pastor, Rev. F. E. Emrich, was installed on November 28, 1882. His administration has been marked by a steady growth of the church by accessions to its membership.

Rev. Frederick Ernest Emrich, pastor of the Tabernacle Congregational Church, was born in New York City, on August 25, 1848. His father, Philip Emrich, and his mother, Anna (Gans) Emrich, were both natives of Germany, the latter having come to America in 1830 and the former in 1839. He lived in New York City until 1868, during which period he attended the public schools, and a private German school. In 1868 he went to Wilson, Maine, where, on February 26, 1869, he married Miss Olive E. Chandler, daughter of John P. Chandler of that place. In the spring of the same year he was admitted as a probationer to the Maine Annual Conference, and was stationed at North Augusta and Sidney until the spring of 1871. In the fall of 1871, he entered the Bates Theological Seminary, where he remained one year, and then went to Bates College, Lewiston, Maine, taking a classical course and graduating in 1874. He then entered Bates Theological Seminary, graduating in 1877, having, by hard study, entered the students' course in 1872, and was graduated with the Congregational Church, preferring a settled pastorate to Methodist itinerancy. In September, 1875, he was ordained, and preached all the time he was in the college and seminary. From the spring of 1875 to September, 1877, he supplied the pulpit at Barre, Maine, and from this time to April, 1874, supplied the church at Turner, Maine. From April, 1874, to July, 1877, he supplied the Congregational Church at Mechanic's Falls, Maine. At this time he was installed pastor of the church, and remained there until September, 1872, when he was called to the Tabernacle Congregational Church at Chicago. He answered the call immediately, and commenced to preach here during that month. He was installed pastor in the following November, notwithstanding grave doubts in the minds of a portion of the Council as to his orthodoxy. The vote on installment was thirteen to eight. The points upon which Rev. Mr. Emrich seemed to vary from orthodox standards were that he declined to admit that the Bible was a revelation from God, but took his position on the doctrine that it contains a revelation from God. With reference to endless punishment, he could not, and would not, affirm that there might be a possibility of redemption in the future. Regarding the doctrine of the atonement, while he entertained the common evangelical view, he could not but admit that there may be some truth in the moral view, or in the Bushist theological view. However, in recent tendencies toward heterodoxy, inasmuch as he read a great deal and was a very scholarly man, he was considered capable of doing a noble work in the ministry, and was installed by the vote above given. Rev. Mr. Emrich and his wife had borne five children, three of whom are living.—Frederick Ernst, Jr., Richard Stanley Merrill, and Melvin Eveloth.

Other Congregational Churches are as follows: South Congregational Church, Rev. Edward F. Williams, pastor; Bethany Congregational Church, Rev. Charles C. Cragin, pastor; Union Tabernacle Church, Rev. E. F. Kendall, pastor; Clinton-street Congregational Church, Rev. J. C. Armstrong, pastor; California-avenue Congregational Church, Rev. D. D. Davies, pastor.

Chicago Theological Seminary.—The office of the treasurer of the Seminary, with many important records, accounts and documents, were destroyed by fire in the Seminary building early in 1875, the fire, that although the investments of the Seminary's funds were almost wholly in Chicago, only $2,000 were secured on property in the burned district, and that loan was soon paid. The Seminary has since met with few if any reverses, except those imposed by the financial depression of the country. From time to time additions and improvements have been made, among which the Hammond Hall building may be mentioned.

In 1875, Rev. E. M. Williams, of Minneapolis, an alumnus of the Seminary, presented the institution with a set of rare books on Egyptology, which are valued at $1,200. In 1881, Rev. H. D. Kelly, of Moline, gave a contributing fund for the Seminary library having reached something like six thousand volumes, by donations, the need was felt of a building in which to properly care for and protect it. This led to the donation by Hon. Gale E. Goodrich of Gallatin, Ill., known as Dr. Goodrich's Library, which as a fire-proof vault. The first story contains the reference-library and reading-room. The upper story is intended for the general library. It has been prepared for a gallery to extend all around the walls. The capacity of the main library is thirty-two thousand volumes, which, by the addition of the gallery above mentioned, can be increased to forty thousand. The furniture and accessories used in the construction of the building are brick, iron and terra cotta, no wood being used than was absolutely necessary. The iron-work is performed by industrious iron-men, and everything that modern science can suggest has been applied to screen the building and its contents from danger of fire.

The cost of the building was $54,000.

Previously in 1871, there had been a few changes in the faculty. To the chair, resigned by Professor Haven, Rev. George Nye Beardman, D.D., was elected in April, 1871, and inaugurated on September 14 of that year. Rev. Theodore Hopkins, D.D., was elected professor of ecclesiastical history, on April 20, 1874, and inaugurated on April 29, 1875. Rev. Samuel Ives Curtiss, Ph.D., D.D., was elected professor of biblical literature in the place of Dr. Buffington, on May 15, 1875, and inaugurated on April 22, 1879. The professorship of Biblical Literature was vacated on June 10, 1879, Professor Curtiss was retained as the New England professor of Old Testament literature and interpretation, and Professor J. T. Hunter, D.D., was transferred to the professorship of New Testament interpretation. At the same time, Rev. G. Buckingham Willcox, D.D., was placed in charge of the special department and the chair of pastoral theology, entering upon his duties in the autumn of 1878.

The financial status of the Seminary, as reported by the treasurer at the opening of the Hammond Library, in the autumn of 1883, was as follows: In addition to the unproductive assets of the Seminary, the site, buildings, library, etc., of the Bank of Chicago, paid in and pledged, there were credited to seven professorship endowments, $16,000; professorship fund, $50,000; scholarship endowments paid in, $32,000; the Patton binding-endowment fund, $1,000; the E. S. Jones Library fund, $4,000; and the annual subscription fund available, $18,300; total, $337,300. Down to 1879, 184 students had been instructed in the Chicago Seminary,—209 of whom were graduated. The total number of students enrolled in 1873-74 was 29, in 1828-29, 31; in 1881-82, 43; in 1882-83, 44; in 1883-84, 43; in 1884-85, 63.

Prof. Joseph Haven, A.M., D.D., LL.D., was born on January 4, 1815, at Dennis, Barnstable Co., Mass. His ancestors were all of the old Puritan stock, many of them clergymen. His father was the minister of the town, a graduate of Harvard College, and a man of refinement and culture, who carefully educated his son to an intellectual development. In his sixtieth year he found indulging himself by reading a Virgil, which he had found among his father's books. He was prepared to pass his examinations at ten, but he could not be entered at Amherst until fifteen. He graduated with his brother as the youngest men in the class. His Alma Mater to this day regards him as her finest undergraduate writer. Immediately after graduating, in 1835, he went to New York City, where he spoke for the Institute theology and held an appointment for the Dead and Dumb. In 1837, he entered Andover Theological Seminary; he was graduated in 1839; and in November was ordained and installed at Ashland, Mass. In 1840, he married the daughter of Professor Ralph Emerson, of Andover, Mass., relative of Ralph Waldo Emerson. On December 1, 1843, he was installed over the Harvard Congregational Church in Brookline, Mass. During this pastorate he, with others, started The Congregationalist, of which he wrote the first editorial. About this time he wrote his first article, published in the Bibliotheca Sacra, being a review of Paley's Natural Theology, which was characterized by the same clearness of reasoning, and equal praise in such a degree, marked his later works. He followed this with a review of Bushnell on the Trinity, which won the special commendation of Professor Moses Stuart, received a notice of the Institute theological, was a young author at once into prominence. The marked approval with which these works were received by the religious thinkers and writers led to his call, in 1850, to the Chair of Intellectual and Mental Philosophy at Amherst College, which he held for two years. Professor Haven, in 1854, passed most of the time in Europe, residing a while in Heidelberg. His "Mental Philosophy," published in 1857, after much toil in its preparation, was well received, even since then, and is one of the highest institutions of learning throughout the United States, also in colleges in Turkey and Japan. In 1858, Professor Haven came to Chicago and accepted the Chair of Religious Science in the Chicago Theological Seminary, which he held for twelve years. As the result of many further laborious days, both in Amherst and Chicago, he published.
in 1859, his work on "Moral Philosophy," which is perhaps better known on this continent than that of any other writer. These works have attained a sale into the hundreds of thousands. He next published "Studies in Philosophy and Theology," treating these subjects with the same felicity of diction which was his prominent characteristic. In 1870, he again went abroad, taking in his tour Turkey, Egypt, the Holy Land and Greece. He had the pleasure of listening, in Robert College, Constantinople, to recitations in Haven's Mental Philosophy, by the students of the many nationalities collected there; and while in Athens, by invitation from the Government, he heard the seniors in college recite from Haven's Mental Philosophy, translated into Greek. His "History of Philosophy Ancient and Modern" was published in 1876. He also prepared "An Introduction" to a book of Rev. F. H. Burris, on "The Trinity," published in 1874. A text-book, prepared for higher classes, on Systematic Theology, he left in manuscript ready for publication. Several sermons were published in permanent form at different times during his life. He delivered lectures in many cities and colleges; that delivered in 1880, before Kenyon College, "The Ideal and the Actual," and before the Porter Rhetorical Society of Andover Theological Seminary, further advanced his fame. Many will vividly recall the enthusiasm of his Chicago audiences, held in rapt attention by his eloquent and profound disclosure of "The Civilization and the Religion of Ancient Egypt, as attested by her Monuments." These lectures were published in 1875. The degree of D.D. was conferred upon him by Marietta College in 1886, also D.D. by Amherst College in 1872. On the 1st of L.L.D., he accepted from Kenyon College in 1872. There was something worthy of more than admiration in the nobleness of his character, uniting strength, love, simplicity and self-forgetfulness. He was always willing to give his strength and life in aid of any good cause. At the time of his death, in May, 1874, he occupied the Chair of Mental and Moral Philosophy in the Chicago University, also was president of the Chicago Philosophical Society; was conducting the department of English Literature in the Chicago Athenaeum; and had been supplying the pulpit of the Jefferson Presbyterian Church, where he won the love and respect of all; at the same time he was revising his works.

Rev. G. S. F. Savage, D.D., financial secretary of the Chicago Theological Seminary, was born at Upper Middletown (now Cromwell), Conn., on June 19, 1817. His father, Nathaniel Savage, was a soldier in the Revolutionary War; his grandfather, S. F. Savage, was for many years captain of a vessel in the inland waters of New York State. He died at sea in 1820. Captain Savage was married to Sarah Wilcox, whose father was a soldier in the Revolutionary War. He died in 1833. The early education of Rev. G. S. F. Savage was obtained at the academy at Upper Middletown. He entered Yale College in 1840, and graduated in 1844, as a member of the first third of his class, which consisted of one hundred and four graduating members. As members of this class who afterward distinguished themselves, the names are given of Christopher Cushing, John Welsh Dulles, Samuel Augustus Fisk; Henry H. Haight, governor of California from 1857 to 1860; Henry D. Smith, inventor of the process of manufacturing carriage hardware; and William B. Washburn, governor of Massachusetts, and successor to Charles Sumner in the United States Senate. At the age of fourteen he united with the Congregational Church, and when twenty-one resolved to devote himself to the ministry. With this object in view he entered Yale College. After graduating, he spent one year in theological studies at Andover, Mass., and two years at New Haven, graduating in August, 1847. On September 28 of that year he was ordained as home missionary at Upper Middletown, Conn., and left the next day for the West, with a commission from the American Home Missionary Society to any open field of labor in Northern Illinois or Wisconsin. In November he accepted a call to the pastorate of the Congregational Church at St. Charles, Ill., where he remained twelve years, nearly four hundred being added to the church during that time. For four years of this time he was corresponding editor of the Prairie Herald and the Congregational Herald, both published in Chicago. At the close of 1859, he entered the service of the American Tract Society; as secretary for the West, and removed to Chicago on January 1, 1860. He continued in the service of the Society ten years, devoting most of his time, during the four years of the Civil War, to the distribution of literature and religious work in the Army. In 1870, he became Western secretary of the Congregational Publishing Society, continuing in that relation two years. He then accepted his present position, that of financial secretary of the Chicago Theological Seminary, of which institution he became a director in 1834. He has been a trustee of Hebrew College since 1850. For three years he published and was associate editor of the Congregational Review, which, after the great fire of 1857 was merged in the New Englander. An estimate of the value of his services to the Chicago Theological Seminary may be gathered from the fact that in the language of Rev. A. S. Kedzie, in his history of the Seminary: "In July, 1872, Rev. George S. F. Savage, D.D., elected treasurer at the previous meeting of the Board, was re-elected upon the duties of that office, with great advantage to the Seminary and satisfaction to the Board, and with like acceptance serving to this date. Securing funds imperilled by the late financial depression, solely investing them, procuring for the welfare of the students and the safety of the buildings, made his vocation, like that of his predecessor, perplexing and onerous. Yet its duties have been well met. Also by his large acquaintance he has made the Seminary widely known, thereby securing to it an encouraging increase of both general and permanent funds." In 1876, he received the honorary degree of Doctor of Divinity from Iowa College. Dr. Savage was married on September 28, 1847, to Miss Elizabeth Pruuden, a distinguished lawyer of Enfield, Conn., who was a son of Rev. Ephraim Pruuden, pastor for nearly fifty years of the Congregational Church at Enfield.
RELIGIOUS HISTORY.

THE BAPTIST CHURCH.

First Baptist Church.—The great fire left the church property of this society unharmed; but most of the members were impoverished, their residences destroyed, and many of them compelled to seek new abodes remote from the church-building. In 1871-72, the house of worship was made a distributing point for the relief of the suffering. The fire of July, 1874, destroyed the building, and the congregation worshiped temporarily on Wabash Avenue, near Fourteenth Street. The present site, corner of South Park Avenue and Thirty first Street, was purchased and the present edifice erected in 1875. Three years of struggle followed. A new congregation had to be built up in a then thinly-settled part of the city; and the property was heavily incumbered.

During the pastorate of Dr. Everts, the First Church was largely interested in the University of Chicago and in founding the Baptist Theological Seminary. This church directly contributed for the seminary-building and endowment the sum of $35,000. While Dr. Everts was pastor, about one thousand eight hundred members were received into the church, and the Shields, the North Star and the Indiana-avenue missions were established.

After January 1, 1879, Rev. Dr. Galusha Anderson supplied the pulpit for some time, while the finance committee was busy with a basis for funding the church debt, and on the Sundays, February 2 and 9, subscriptions were taken which resulted in reducing the obligation to $30,000. On February 19, the trustees were authorized to mortgage the property for $30,000, which was done. Early in February 1879, the church extended a call to Rev. George C. Lorimer, D.D., pastor of the Tremont Temple, Boston, and on May 4, 1879, he preached his first sermon as pastor. Dr. Lorimer’s pastorate was successful in the highest degree. During January, 1881, the church raised sufficient means to pay $12,000 on the mortgage, leaving a debt of but $18,000, which shortly afterward was fully provided for. Early in 1881, the Michigan-avenue Baptist house of worship was destroyed by fire, and the members, seeing no way of re-building, decided to disband, expressing a willingness to transfer their remaining church property to any new Baptist church which should be organized and located upon the field lately occupied by themselves. The matter was referred to the standing committee representing the Chicago and Lakeside Baptist Association and the Baptist General Association of Illinois, and by them referred to the First Baptist Church, as most deeply interested in the settlement of the question. The First Church recommended the formation of a new Baptist church, to take the title of the property, as proposed by the Michigan-avenue congregation. A resolution was also adopted declaring that the First Church would give letters of dismission to such of its members as should wish to unite with the new organization. A committee of five members of the First Church was next appointed to co-operate with a similar committee of the Michigan-avenue Church, to aid in carrying out the plan proposed. This committee reported that a considerable number of persons were ready to unite with the new church, and that sufficient pledges of money had been secured to re-build, as well as for an organ. These were all on condition that Dr. Lorimer should be the pastor. On May 13, 1881, the clerk read a list of two hundred and one persons who had requested letters to the new church, all active, earnest workers. There was a feeling of dismay, and, as for several weeks the number kept increasing until it reached two hundred and twenty-five, affairs for the First Church did not look very promising. On September 25, Dr. Lorimer delivered his farewell sermon, and, with his people, withdrew to his new field, the First Church having given to the new organization, as a token
of good-will, $1,000. The most pleasant relations have always existed between these two bodies. Rev. Dr. P. S. Henson came from Philadelphia, and assumed the pastoral charge of the First Church in March, 1882. His pastorate has been exceptionally successful. Before the close of his first year, a fine organ was erected at a cost of $7,500, and at once paid for. He organized a movement to raise a jubilee offering of $25,000, which resulted in subscriptions sufficient to cancel the remaining indebtedness, with a surplus for improvements about the building.

**Second Baptist Church.**—On October 10, 1871, Dr. T. W. Goodspeed, of Quincy, Ill., came to preach at the Second Baptist Church, and decide whether or not he would accept the call to act as co-pastor with his brother, Dr. E. J. Goodspeed, whose failing health compelled him to seek an assistant; but to his mind the fire answered the question, and he returned to Quincy. He was, however, soon afterward recalled, and entered upon his duties as assistant pastor in January, 1872. In January, 1875, Dr. T. W. Goodspeed resigned. His resignation was soon followed by that of his brother, and the pulpit was vacant until June, when Rev. Galusha Anderson, D.D., then of Strong Place Baptist Church, Brooklyn, N. Y., was elected to the pastorate. Dr. Anderson remained until 1878, when he resigned to take the presidency of the University of Chicago. In October of the same year, Rev. John Peddie, D.D., then pastor of the Fourth Baptist Church, of Philadelphia, became pastor, and resigned in March, 1880. Dr. Peddie's administration was a successful one, and his resignation was due to the severity of the climate in this region. During the administration of Rev. Drs. T. W. and E. J. Goodspeed, large contributions, amounting to $41,783, were made to the Baptist Theological Seminary, $34,306 to other benevolent objects, and this during the years 1872-74, so marked by financial depression.

In October, 1886, Rev. W. M. Lawrence, D.D., of the Spring Garden Baptist Church, Philadelphia, succeeded to the pastorate. During his administration eight hundred members have been received into the church and a debt of $10,000 on the property paid.

**Rev. William Mangum Lawrence, D.D.,** pastor of the Second Baptist Church, was born on May 11, 1848. He is of distinguished ancestry on both his father's and mother's side; on his father's side the first ancestor of whom there is any knowledge was Sir John Lawrence, who accompanied Richard Coeur de Lion on his famous expedition to Palestine, and from whom he received the honors of Knighthood and a coat of arms, in recognition of his bravery in being the first to plant the banner of the cross on the battlements of the town in the memorable siege of St. Jeannet d'Acre in 1197. Dr. Lawrence was born in a building located on the present site of the Masonic Hall, Washington, D. C., the son of William Spencer Lawrence. When his father went into business, he was taken as a little lad to Brooklyn and sent to school there; at the age of four years; at the age of nine he entered the Brooklyn Collegiate and Polytechnic Institute. He received his first lessons in Greek from Dr. Raymond and his first lesson in Latin from Dr. Bunker, with both of which languages he has been ever since more or less familiar. He became well grounded in the French language, by study under the direction of a French lady who was then teaching a private school. He passed seven or eight years in the Brooklyn Collegiate and Polytechnic Institute, and completed his preparations for college with a private tutor, but on account of sickness of the college was not then prepared. Before he was seventeen years old, he was familiar with Shakespeare, and was firmly grounded in the history of every country. He matriculated in Amherst College, which he was compelled to leave on account of ill health. He then went into business with his father for a time.

He resumed his studies at Madison University, and at Hamilton Seminary, Hamilton, N. Y., graduating in 1871. He received the degree of Bachelor of Philosophy in 1870, and, later, the degree of M.A. Some months afterward he received a call to the First Baptist Church at Amsterdam, N. Y., where his pastorate was very successful. He was ordained on August 5, 1871, at Amsterdam, by Rev. Dr. G. W. Clark. Dr. Lawrence then accepted the pastorate of the Spring Garden Church, Philadelphia, on November 1, 1872, and during his pastorate of eight years added three hundred and sixty-seven members to the church. Dr. Lawrence was a member of the Philadelphia Baptist Convention, and is a member of the Baptist General Association and of the Pennsylvania Baptist Education Society, and was for one term president of the Philadelphia Conference. He was heartily received upon entering his Philadelphia pastorate by the Baptist clergy of the city, and during his stay he was continuously the recipient of every mark of confidence. In 1880, he received a call from the Second Baptist Church of Chicago, and, in October, resigned his Philadelphia charge to take that of Chicago, succeeding Rev. Dr. John Peddie. Until 1886, Dr. Lawrence has received over seven hundred into the church. The degree of Doctor of Divinity was conferred on Rev. Mr. Lawrence in May, 1881, by Morgan Park Theological School, when he was only the third of the three years of age. One of the highest honors conferred upon Dr. Lawrence was his election in 1883, to a membership in the Victoria Institute, the philosophical society of Great Britain, a body composed of the most eminent scholars of the world. In literary matters, he is, by natural taste as well as judgment, inclined to the study of English Literature and Civil History. Dr. Lawrence was married, on September 5, 1871, to Miss Anna Isabella Hamilton, N. Y. They have two children,—Adelaide C. and Frederick Spencer.

**The Fourth Baptist Church.**—This church dates from November 12, 1856. Its inception was the work of Daniel Hurd, of Lowell, Mass. Through his efforts the Union Park Baptist Church was organized, which had earlier been a mission Sunday-school on Lake Street, below Bryan Place. During the pastorate of Rev. E. G. Taylor, from November 1, 1865, to October 1, 1870, there was a noteworthy increase in the membership, amounting to over five hundred. In August, 1873, the Church was organized. Its membership was, for the most part, drawn from the Union Park Church. Its only pastor was Rev. D. B. Cheney, D.D. In July, 1874, these two churches formed a new society, adopting the title, the Fourth Baptist Church. Dr. Cheney became the first pastor, and on his retirement, in 1878, left the church enjoying great unity and harmony. In the fall of 1878, he was succeeded by Rev. E. B. Hubert, whose pastorate of three years was marked by a steady growth in members and by the removal of every financial obligation that rested upon the society. Dr. Hubert resigned in order to take the professorship of ecclesiastical history in the Baptist Seminary at Morgan Park. On January 1, 1882, Rev. J. Spencer Kennard, D.D., of Boston, was invited to the pastorate, and has served the church until the present time. The membership of the church in December, 1885, was four hundred and eighty, and the number enrolled in the Sunday-school was four hundred and fifty.

There is connected with the church an industrial school and kindergarden for poor children, with an attendance of more than one hundred. There are also the usual benevolent societies, and also a Yoke-Fellows' Band, which consists of and is carried on by young men for mission purposes in the vicinity. They publish an illustrated paper called The Day-Spring, of which one thousand copies are distributed gratuitously every month. The church owns desirable property on Washington Boulevard, corner of Paulina Street, on which stands the house of worship, a frame structure erected over twenty years ago. The value of the property is estimated at $25,000, and is without debt.

**Immanuel Baptist Church.**—The pastors of this church from 1871, until its reorganization, were Rev. Jesse B. Thomas, D.D., now of Brooklyn, N. Y., and Rev. Frank M. Ellis, now of Baltimore. The reorganization of the church in May, 1881, when the name was changed from Michigan avenue Baptist Church to Immanuel Baptist Church, is detailed in the sketch of the First Baptist Church. From that time to the pres-
ent, under the administration of Rev. Dr. Lorimer, this church has been remarkably successful as to its congregation and membership. The annual report for 1885, showed a membership of seven hundred and sixty-four, with a congregation varying from fifteen hundred to two thousand.

Connected with the church is its flourishing Sunday-schol, of which B. F. Jacobs is the superintendent; the Industrial School, conducted by Mrs. J. M. Woodworth; and the Training School, which seeks to fit young women for home and foreign missionary work, and is managed by Miss Burdette and Mrs. Ehlers. In addition to these, the Tabernacle Mission has for some time been carried on by members of this church.

Rev. George C. Lorimer, D.D., L.L.D., pastor of the Immanuel Baptist Church, was born near Edinburg, Scotland, on June 4, 1828, and in that city received his early education. When about fourteen years of age, he went to sea, but after one voyage returned to his home and to school. Circumstances compelling him to provide for his own maintenance, he served in the Theatre Royal, Edinburgh, during the evenings, and studied and went to school during the daytime. From the age of fifteen he was connected in this way with the theatrical profession, principally in the business department, although occasionally he appeared on the stage. Determining to devote himself to this profession, he came to America when eighteen years of age, and became a member of a stock company of a theater at Louisville. Being in the habit of attending church, he one evening visited, by invitation, the Walnut-street Baptist Church, of which Rev. W. W. Everts was pastor, where a revival was in progress. He there gave his heart to the Saviour, made a profession of religion, and was subsequently baptized by Dr. Everts. He quietly abandoned the histrionic profession and resumed his studies, going to Georgetown College, Kentucky; also giving instruction in elocution, taking part in religious meetings, and addressing congregations in neighboring towns. He became convinced that it was his duty to enter the ministry, and was licensed by the Baptist Church. The prestige created by his conversion from the stage, of his wonderful oratorical power and the fervor of his addresses, attracted large congregations wherever he went. At this time, and for some years afterward, he only slept about five hours out of the twenty-four, devoting the remainder to the systematization of his work and to his theological and literary studies. After a few months he became stated supply at Harrodsburg, Ky., where he was ordained in 1859. In that year he married Miss Belle C. Burford, daughter of E. H. Burford, of Harrodsburg, whose literary attainments and earnest religious spirit have been of great assistance to Dr. Lorimer in his ministry. In 1863, he removed to Paducah, Ky., but shortly afterward returned to Louisville, and assumed the pastorate of the church in which he had been baptized. He remained there for seven years, and during his pastorate performed a work of eminent Christian usefulness. In 1868, he removed to Albany, N. Y., where he remained until 1875, when he became pastor of the Shawmut-avenue Baptist Church, Boston. This was a church of more than ordinary literary culture, hence it was natural that he was met with discriminating criticism; but his inherent ability, his careful study and his anxious preparation for the pulpit, disarmed his critics and won appreciation in the city and throughout New England. The Shawmut-avenue Church delayed to provide for the increasing congregations which assembled to hear the eloquence of Dr. Lorimer, and this necessitated (virtually) his acceptance of the pastorate of the Tremont Temple, which had been for some time earnestly desiring him to take charge of the pulpit. The ardent character of his pastorate in Boston greatly improved his health, and caused him to consider favorably a proposition from the First Baptist Church in Chicago. The sequel has shown the wisdom of the choice. The church enthusiastically rallied to his support,
property to the University Place Baptist Church. But after deliberation it appeared that the only feasible way to save the Michigan-avenue Church was for the pastor and a part of the members of the First Church to go there and rehabilitate it. The First Church magnanimously encouraged this movement, and for some months continued the support of the pastor, who preached for them and also from the press of S. C. Griggs & Co. (1881). He is also the author of a work on "Society," recently issued, in which he discusses the principal social questions of the times, the problems of "Labor and Capital," "Education," "Amusements," etc. He has also written a history of Baptist struggles for liberty, published by Lee & Shepard, Boston, and has in preparation an exhaustive treatise on the Peasants' War. He is the author of several short stories and has likewise done considerable editorial work on various papers. His old college made him L.L.D. in June, 1885.

CENTENNIAL BAPTIST CHURCH.

This society was formed in 1875, its first meetings being held in a store on Ogden Avenue. It was called Centennial Church because its new building was dedicated on the first Sunday in January, 1876. It is located at the southeast corner of Lincoln and Jackson streets, and is a plain Gothic structure, of brick, erected at a cost of $8,000. The first organization, which numbered forty, began as a mission Sunday-school from the Fourth Baptist Church, and later was turned over to the Second Baptist Society. In 1873, the great influx into its neighborhood led to an organization. The first pastor, Rev. N. E. Wood, D.D., remained two years, and under him the church enjoyed great prosperity. Rev. Dr. C. E. Hewitt, of Peoria, Ill., followed for two years, after which the church was carried on by supplies for eight or nine months. In December, 1879, Rev. A. K. Parker, D.D., came from Poughkeepsie, N. Y., to its pulpit, where he still remains. The church debt, $5,300, was lifted in September, 1885.

Among active and prominent members of this society may be mentioned Dr. John M. Gregory, of the Civil Service Commission, and C. C. Kohlsaat, who has been for ten years the superintendent of its Sunday-school.

WESTERN AVENUE BAPTIST CHURCH.—This church began as a mission Sunday-school. It was founded by the Union Park, now Fourth Baptist, Church. On Thanksgiving Day, 1867, a few members of the Union Park Church, with their pastor, Rev. Dr. E. G. Taylor, laid the corner-stone of the present edifice on a lot donated by Dr. Boone, on the corner of Warren and Western avenues. In the following spring, the building was completed. In January, 1869, Rev. John Gordon, then a student at Chicago University, was elected pastor, under whom the present organization was perfected. In 1875, he was succeeded by Rev. John Irving, a student from Surgeon's College, London, Eng. Three years of struggle followed, owing to the financial stress of the times. Rev. Mr. Irving returned to England, and, in 1877, Rev. C. Perren, Ph. D., of St. Catherine's, Ont., succeeded. There was a debt on the old building of about
$6,000, which, through Mr. Perren's efforts, has been paid; the structure has also been enlarged and improved at an expense of $4,000, by the addition of basement and gallery, increasing the seating capacity to eight hundred. The present indebtedness on the property, amounting to about $6,000, is largely provided for.

LaSalle-Avenue Baptist Church.—This society was formerly known as the North Star Mission. The great fire of 1871 having destroyed their chapel, the society erected three stores with a hall above, in which they worshiped until 1883. Later, three additional stores were built. During this period the pastors were Revs. E. R. Pierce, J. M. Whitehead, R. F. Allison and Joseph Kowley. Owing to the changes in the population, occasioned by the fire, the society met with various disappointments and reverses, and soon announced a willingness to disband, if the Baptists of the neighborhood would unite and complete a new organization, offering at the same time to donate to such new organization their entire property. The offer met with a hearty response. Rev. Travis B. Thomas, of Shelbyville, Ky., became the pastor, and soon perfected the organization, a new chapel was erected between Division and Ashland Avenues, and the North Star Mission became the LaSalle-Avenue Baptist Church. The chapel was opened, free of debt, in January, 1885. It is a brick structure, having a main audience-room capable of seating five hundred persons, and two smaller rooms for Sunday-school and other purposes. The property on the corner of Division and Sedgwick streets was sold in December, 1885, for $70,000, enough to clear the incumbrance upon it and furnish the nucleus of a new building fund.

Central Baptist Church.—The Central Baptist Church was organized on June 23, 1873. Rev. C. H. DeWolfe had preached for this body before that event, in a chapel on the corner of Center and Dayton streets, built and owned by Rev. Mr. Cooper, of the Reformed Episcopal Church, for which this church paid thirty dollars a month rent. The church, upon its organization, was named Immanuel Baptist Church. Rev. C. H. DeWolfe was chosen pastor, and remained with the church eleven months, his resignation taking effect on May 31, 1875. On June 16 following, J. B. Belcher, a past pupil in the Baptist Union Theological Seminary, became pastor, and was ordained on August 7, 1875. Just previous to this the society removed to a store-room near the corner of Halsted Street and Garfield Avenue, where it continued until August, 1876, and then removed to the chapel, No. 290 Orchard Street. On May 6, 1877, Rev. Mr. Burr tendered his resignation, and Rev. E. O. Taylor, of Ionia, Mich., was called on July 19, 1877. In the following September, the church removed to Chicago Avenue, with the view of receiving the remaining members of the North Baptist Church, which had not been re-built after the fire, with such property as might come into its possession. The church re-organized on October 19, 1877, under the statute, and adopted the name of Central Baptist Church, and at the same time received large accessions to its membership. After six months, it became evident that it would be advisable to remove temporarily to the chapel on Orchard Street. There the church soon became self-sustaining, and on November 24, 1881, a new building was dedicated. The North Baptist Church, for $1,500, a lot was purchased on the corner of Halsted Street and Belden Avenue, at a cost of $8,500, which was paid for in cash. In August, 1884, the building on Orchard Street was sold, and temporary refuge was taken in a store-room known as Tempérance Hall, No. 721 Larrabee Street. On October 7, 1884, ground was broken for the new building, on the corner of Halsted Street and Belden Avenue, which was completed and dedicated on December 15, 1885.

Other Churches.—South Baptist Church, Rev. Carlos Swift, pastor; Olivet Baptist Church, Rev. Wm. H. White, pastor; Adoptive Baptist Church (colored), Rev. J. D. Dodd, pastor; North Ashland-avenue Baptist Church; Millard-avenue Baptist Church; New York Street Baptist Church; Humboldt Park Baptist Church, Rev. W. C. H. Hold, pastor; First German Baptist Church, Rev. Jacob Meier, pastor; Second German Baptist Church, Rev. Franz Friedrich, pastor; First Swedish Baptist Church, Rev. E. Oungman, pastor; Second Church, Rev. E. Sandell, pastor; the Scandinavian Baptist Church, organized in 1884.

Rev. Jacob Meier, pastor of the First German Baptist Church, was born in Baden, Germany, on September 6, 1859. His father was Jacob Meier, a farmer, and now living in Iowa. His mother, Susanna (Euderlin) Meier, died in Germany in 1854. Jacob Meier attended the public schools in Germany and also studied with private instructors. He came to America in 1857, his father not coming until 1859. He attended evening schools in New York City for three years, working at his trade as a shoemaker to earn his livelihood. In 1859, he was converted to Christianity, and joined the First German Baptist Church in New York City. He was also connected with the Sunday-school, and held various offices in the church. In 1861, he went to Cincinnati, and at the First church was a member of the Band of Volunteer Infantry, three months' men, in which he served his time as a private soldier. He then returned to Cincinnati and resumed work at his trade. In 1864, he went to Muscatine, Iowa, where he was ordained to preach. He rendered the better part of the work of the ministry, to which he had resolved to devote his life, he attended Rochester Theological Seminary, one year. He commenced to preach at Muscatine, Iowa, where he was ordained in June, 1871. He was pastor of the First German Baptist Church of Muscatine until 1877. The church there increased in membership during his six years' pastorate from sixty-two to one hundred and seventy-six. In 1873, he came to Chicago to perform the duties of pastor of the First German Baptist Church, a position he retains at the present time. The membership of his church has increased from 225 to 280; In 1882, forty-seven members were dismissed therefrom, three to another church at Sedgwick and Ohio. In 1884 his church erected a brick edifice at a cost of $13,000, at the corner of Willow and Farwell streets, which is now occupied by a mission, but which is soon to be organized as the Second German Baptist Church of Chicago. The church was organized on February 22, 1864, to Miss Mary Hollins, daughter of Matthias Hollins, of Muscaciene, Iowa. They have had eight children, seven of whom are living, as follows: Frederick, John, Mary, Emma, George, William, and Emma. 

The University of Chicago.—The institution of this University dates from 1854. About that time Hon. Stephen A. Douglas, of Illinois, asked the late Rev. Dr. E. E. Staley, a Presbyterian minister of the city, a piece of land on which to erect an institution of learning. The Presbyterians, however, did not accept the offer; but Rev. Dr. J. C. Burroughs, representing the Baptists, and at that time pastor of the First Baptist Church of Chicago, procured from the city a piece of land on which to build, and proposed the building of a college that should be conducted by his denomination. The result was, that Mr. Douglas, on April 2, 1856, made a contract with Dr. Burroughs, conveying to him the site on which the University of Chicago now stands, provided that he would procure the organization of a board of trustees under the laws of 1854, and assign his contract to them, and that such board of trustees should erect a University building on the lot, to cost $100,000, $85,000 to be expended prior to May 1, 1857, $25,000 before May 1, 1858, and the remaining $100,000 to be expended prior to or within the year 1860. These conditions being complied with, Senator Douglas agreed to deed the ten acres of land to the board of trustees. Owing, however, to the divided interest of the Baptist denomination among various institutions in this and neighboring States, many influential persons looked upon the agreement with disfavor. The Board, however, succeeded in completing the proposed building according to the conditions imposed. On November 10, 1856, Senator Douglas granted an extension of time, and added the following limitations: If the extension is granted upon the condition, and with the understanding, that the title of said land shall forever remain in said University for the purposes expressed in said agreement, and that the same shall be sold or alienated for any purpose whatever.

During July and August, 1856, $600,000 was subscribed, and subsequently $150,000 more, but on account of the financial depression of 1857-58, many of the subscriptions became valueless. The work went slowly forward. Plans for the University building were submitted by Boyington & Wheelock, and were adopted by the
board in May, 1857. The design presented a main building with two wings, connected by corridors, and a bell-tower one hundred and fifty-six feet in height; the entire structure of Athens marble, rock-faced, with mouldings; containing spacious rooms for recita-
tions, libraries, president, professors, and societies, and two chapels, the larger capable of accommodating eight hundred persons. In the attic there was to be a large gymnasium, and one wing was to contain dormitories and studies for one hundred students.

On July 6, 1856, a public meeting of the citizens of Chicago and vicinity was held, at which time a preliminary organization was effected, and within sixty days $600,000 was subscribed, as stated above. On January 30, 1857, an act was passed by the Legislature of Illinois, incorporating the institution.

The incorporators of the University held their first meeting on May 24, 1857, at which the following Board of Trustees was ap-
ville; Charles Clark, Rockford; Charles R. Roe, Belvidere; Eliph
t Gove, Quincy; H. C. Weston, Peoria; S. G. Miner, Canton; N. W. Miner, Springfield; James R. Dollittle, Racine, Wis.; Thomas Maple, Canton; D. Valcuttie, Aurora; N. G. Collins, La Moilie; J. Bulkeley, Upper Alton; K. S. Thomas, Virginia City, Mason Co.; John Dement, Dixon; J. II. Manton, Quincy; Rev. Dr. Francis Wayland, Providence, R. I. On the next day the Board of Trust-
ees held their first meeting, electing their officers and appointing
the following executive committee: William Jones, president; John C. Burroughs, secretary; Samuel Hoard, Levi D. Boone, Charles Walker, L. H. Woodworth, H. A. Tucker and Robert H. Clarkson. The following additional appointments were also made: Justin A. Smith, corresponding secretary; J. B. Oloff, general agent; J. Young, scammion, librarian; John M. Woodworth, cura-
tor of the museum; William H. Bishnell, steward.

The executive committee immediately adopted the plans, and the corner-stone of the University was laid on July 4, 1857. Hon.
Thomas Drummond was presiding officer of the day, and made a
brief speech. After the opening prayer by Rev. John E. Roy, Rev. John C. Burroughs gave a history of the enterprise, and in-
troduced Hon. Stephen A. Douglas, who, though ill to speak, was present and was enthusiastically received. The chief address of
the occasion was delivered by Hon. Isaac N. Arnold. After several other speeches, the stone was laid with appropriate cere-

HISTORY OF CHICAGO.

Not long after this the institution met its first adversity. The
financial embarrassments of that year rendered it impossible to col-
lect many of the subscriptions that had been made. The trustees
met on August 6, 1857, for the purpose of authorizing the continu-
eion of the building, but concluded to discontinue the work, and
nothing was done for more than a year. By the original con-
tract and the extension, $50,000 should, by this time, have been
expended on the building, not being, however, the board had expended but $7,000. Both original contract and extension had therefore been forfeited, and Senator Douglas had it in his power to reclaim the property; but of using this, how-
ever, on August 31, 1858, he executed an unconditional deed of
the ten acres of land to the board of trustees of the University, his
object being to enable the trustees to mortgage the land and raise
the money necessary to complete the building. The meeting of the trustees, held on September 7, 1858, the following resolution was
passed:

Resolved, by this board, that the University grounds, and the
building to be located thereon, be mortgaged or conveyed by
trust-deed, as herein provided, as security for a loan or loans not
exceeding the sum of $25,000, and for a term not exceeding five
years, to secure the erection of the University buildings.

With the money obtained on this mortgage, the erection of the building proceeded, and by Febru-
ary 10, 1859, the south wing and corridor were
finished. In the meantime the trustees began the work of instruction. A faculty was
selected, consisting of Rev. John C. Burroughs, D.D., president and professor of moral and intel-
lectual philosophy; Albert II. Burt, professor of math-
ester, professor of Greek language and literature;
and Le Roy Satterlee, A.M., professor of English
language and literature. Instruction was com-
menced by the president and these two professors
on September 20, 1858. Six students were enrolled,
and preparatory classes organized the same day in
St. Paul's Universal Church, corner of Walbash
Avenue and Van Buren Street. The University
was divided into three departments—the Academic, or
Higher English and Classical School, a Collegiate
Department, and a Scientific Department, which
excluded ancient languages but retained the modern.

At meeting the executive committee, on April
5, 1859, it was resolved to organize a Department
of Law, and to appoint a professor, which shall
be endowed by the University in connection with the University, Mr. Hoyne sub-
scribed $5,000, and Messrs. Dickey and McCagg were appointed a committee to secure a
suitable person to take charge of the Law Department.

The University chapel was opened on June 26, 1859, the
sermon being preached by Rev. H. K. Green. The first annual convocation exercises were held on Thursday, July 21, 1859, at which
time the institution was dedicated.

The committee selected to secure a suitable person to take
charge of the Law Department reported, July 20, in favor of
opening it on September 2, 1859, and placing it in charge of Professor Henry Booth, recently of the State and National Law School
of Dougkeepsie, N. Y., and recommending as his associates John M.
Wilson and Grant Gookich, judges of the Superior Court of Chi-
cago. According the Law School was opened on that day, in the
rooms of Bryant & Stratton's Commercial College, the address
being delivered by David Dudley Field, of New York. The next
day the work of the school commenced with thirty students.

On September 7, 1859, A. J. Sawyer was elected provost
of the University and curator of the Museum. The second year opened with 175 pupils in attendance. E. C. Johnson, of New York, a thorough and accomplished scholar, was added to the faculty, becoming
professor of Latin. The first senior class, which graduated in July,
1861, was composed of Charles Truitan Scannion and Thomas
Worcester Hyde.

The vacancy in the presidency of the board of trustees, oc-
casioned by the death of Hon. Stephen A. Douglas, on June 3, 1861,
was filled by the election of Hon. William H. Woodworth, in
that office until his death, on August 3, 1877. In the early part of
1864, steps were taken to erect the main building. This portion
of the structure cost $122,000, the money for which, on account of
the inability of the authorities to collect the subscriptions in time (which had been solicited mainly by Professor A. H. Mixter), in part raised by a mortgage upon the ten acres of ground and University building, in favor of the Union Mutual Life Insurance Company. This was for $10,000, and was mortgaged upon the property, the first being for $25,000. Other sums were advanced by this company from time to time, until 1866.

The main building was completed in 1865. In 1867, the indebtedness was of the institution was $300,000, and a special effort was made to clear it off. A meeting was held on May 30, in front of the main edifice, and addressed by Hon. William B. Ogden, Hon. Thomas Hoyne, and others in favor of the project. This effort, however, in view of the proposal of the Union Mutual Life Insurance Company to the effect that in case the sum of $100,000 should be raised, he would himself erect the wing north of the University, the estimated cost of which was $50,000. This wing was to be called Ogden Hall, as the main building was called Hoyne Hall. Dr. Jones had so liberally contributed (Mr. Jones’s donations up to this time amounted to $30,900), and to whom the University was indebted in its earlier struggles, was named Jones Hall.

About this time the chair of Greek was ended, the fund being obtained mainly in New York by Rev. W. W. Everts, pastor of the First Baptist Church; and the endowment of another chair was nearly completed by Rev. John C. Burroughs, assisted by Rev. Drs. N. M. Miler and Charles H. Roe.

During the earlier history of the University, the following named gentlemen were officers of its board:

- Stephen A. Breck, to his death, June 3, 1861; and Hon. William B. Ogden, to August 3, 1877.

First Vice-President: Hon. Charles Walker, until 1868; Hon. J. Young Scammon, until 1879.

Vice-Presidents: Hon. J. H. Woodworth, until 1865; Hon. J. Young Scammon, until 1869; Samuel Hoard, until 1875.

The faculty, during the same period, was as follows: President, and Professor of moral and intellectual philosophy—Rev. John C. Burroughs, D.D., until 1875. Professor of Greek language and literature—Albert II. Mixter, A. M., until 1868; James R. Doolittle, A. M., 1868; Professor of Dynastic language and literature—Edwin C. Johnson, A. M., until his death, July 3, 1865; Joseph C. Breck, one year; vacancy, one year; James W. Sears, A. M., 1865 to 1875. Professor of mathematics—Alonzo J. Sawyer, A. M., until 1865; vacant one year, when Alonzo J. Howe, A. M., principal of the preparatory department, became acting professor of mathematics. Professor of chemistry, geology and mineralogy—J. H. McCloskey, A. M., until 1860. Professor of astronomy—Prof. Archibald Debar, LL.D., until 1871. Professor of divinity—Prof. Joseph Sleeper, A.B., until the fire of 1871. Professor of chemistry and constitutional law—Henry Booth, A. M., until 1874. Hon. John M. Wilson, Hon. Grant Goodrich, Harvey B. Hurst, and Hon. Levi Leet, A. M., for terms varying from one year to four years, were appointed in the Law Department, during this period. Besides there were from time to time various other professors in the respective departments, as Hon. D. D. Bennett, was professor of Greek language and literature; Prof. George M. Flynt, professor of mathematics; Prof. Joseph O. Hoad, professor of Greek, Latin and Hebrew; Prof. Samuel W. Miller, professor of music; Prof. Thomas M. Sturges, professor of civil engineering and natural sciences; Prof. E. B. G. Gilmore, professor of mechanical arts; Prof. Charles B. Smith, professor of chemistry and physics; Prof. John W. Smith, professor of national science and mathematics; William T. Wilder, professor of Greek language and literature; Prof. Earl Helmrich, professor of civil engineering and chemistry; Prof. Henry D. Bennett, professor of mathematics and principles of mechanics; James A. Borden, professor of logic and mathematics; Prof. William H. Dearborn, LL.D., and Hon. John M. Wilson, LL.D., were for a time professors in the preparatory department. Rev. Dr. Galusha Anderson, who had been a teacher of mathematics and philosophy at the Hopkins Grammar School, and who had been elected a member of the American Academy of Arts and Sciences, was appointed professor of mathematics and philosophy in the University, and took his seat in the winter of 1853.

The University was opened for the spring term of 1853, and was filled with students by the time of the commencement. The number of students was large, and a complete corps of instructors was maintained. The course of study included the liberal arts, and the University was opened to the admission of women, who were enrolled in the same classes with the men, and were eligible to the same degrees, as were the men. The course of study included the liberal arts, and the University was opened to the admission of women, who were enrolled in the same classes with the men, and were eligible to the same degrees, as were the men.
Hickey was married on August 8, 1858, to Miss Adelaide E. Hazen, at Rochester, Minn. They have three children,—Mary L., Aura F., and Nellie.

Professor Lewis Stuart, M.A., professor of Latin language and literature in the University of Chicago, was born in Glasgow, on December 12, 1847. His father, Lewis Stuart, was a merchant of Glasgow, and was for twenty years an elder in the Barony Parish Presbyterian Church. His mother's maiden name was Mary Hume. Lewis Stuart was educated at the high school, and afterward at the University of Glasgow, where he attended from 1860 to 1863. He then taught one year in Scotland, and one year at St. James's Collegiate School at St. Helens, on the Isle of Mersey. He then returned to Scotland to settle up the estate of his father who had recently died. In 1869, accompanied by his mother and her other three children, he came to the United States, and settled at Grand Rapids, Mich. From 1871 to 1879, he was engaged in Kalamazoo College as professor of Greek, and in the latter year he was elected professor of the Latin language and literature in the University of Chicago. Professor Stuart was married on July 28, 1877, to Miss Eva Louise Winans, at Coldwater, Mich. She was born at Elgin, N. Y., on April 7, 1856. Professor and Mrs. Stuart have three children,—Augusta Glessner, Edna Olson, and Florence Louise.

THE CHICAGO SOCIETY OF THE NEW JERUSALEM.

The early history of this religious organization is given in Volume I. of this work. After the great fire, this society sold its lot on Adams Street, and purchased property on Eighteenth Street and a lot at the corner of West Washington Street and Ogden Avenue, erecting houses of worship, and, at the same time, securing a parsonage adjoining the Eighteenth-street Hall. In 1871, Rev. Mr. Hibbard went to Europe for the improvement of his health. During his absence, the services were conducted by Rev. Calvin Day Noble, and upon Mr. Hibbard's return there was a division in the society, Mr. Noble and his friends organizing a separate society, which, however, soon became extinct. The interests of the Swedenborgian society suffered much through the panic of 1873, and not being able to support their minister, he became a general missionary of the General Convention.

In March, 1874, some members of the church desiring a younger minister and a more central place of worship, formed a new society called the Union Swedenborgian Society. Rev. L. F. Mercer was called to be their pastor, and worship was instituted in Hershey Music Hall, on Madison Street.

In the spring of 1881, the society sold the lot on the corner of Prairie Avenue and Eighteenth Street, purchased a site on Van Buren Street, between Wabash and Michigan avenues, and began the erection of a church-building. The cornerstone was laid on June 8, and the lecture room was occupied on November 6. During the summer of 1881, the Union Swedenborgian Church, worshiping in Hershey Hall, being invited to unite its membership with the parent society, made an application in the name of eighty of its communicants, who were received into the Chicago Society on November 6, the first Sunday in the Van Buren-street Temple. Rev. L. F. Mercer served the society until in January, 1882, when he was formally installed as pastor of the Chicago Society, which office he still retains. In June, 1882, the auditorium was completed and the church dedicated. The cost of the church, with lot, was about $60,000.

The society owns valuable property in the North and West divisions; a lot on North Clark Street, corner of Menominee, on which is erected a temporary chapel; and a lot on Washington Boulevard, corner of Ogden Avenue, on which stands a commodious house of worship, built in 1872. In the summer of 1885, the society sold the Ogden Avenue front of the Western Division lot to the Zion's (Jewish) Congregation, and with the proceeds of the sale paid all its indebtedness, and re-furnished the interior of the Union Park Chapel. All the property of the society is now free from incumbrance. The Lincoln Park and the Union Park chapels have been occupied for some years by congregations composed in part of members of the society. During the summer of 1885, these congregations were organized into Immanuel Church of the New Jerusalem and connected with the General Church of Pennsylvania, a co-ordinate body with the Illinois Association. Since the organization of an independent society, the Chicago Society has resumed the occupancy of these places of worship, and missionary services are conducted in them by the pastor. The present membership of the Swedenborgian Church in this city, is about two hundred.*

CHRISTIAN CHURCHES.

There are three churches of this denomination in Chicago: First Church, corner of West Jackson Street and Oakley Avenue: Central Church, corner of Indiana Avenue and Twenty-fifth Street, Rev. Henry Schell Lobingier, pastor; and West Side Church, corner of Western Avenue and West Congress Street, Rev. John W. Allen, pastor.

Rev. Henry Schell Lobingier, pastor of the Central Christian Church, was born at Laurelville, Westmoreland Co., Penn., on October 27, 1846. His father, Jacob Lobingier, was of German descent, and his mother, Lilias F. (Stewart) Lobingier, was descended from the Scotch-Irish and French. At the age of seventeen he entered Bethany College, V. Va., which, after spending two sessions in College application, he left on account of failing health. In September, 1869, he re-entered the college, and graduated therefrom in 1873. Immediately upon graduation he was called to the church at Morrisiana, N. Y., where he remained over five years. During this pastorate the membership of the church was doubled, and the church itself lifted upon a plane of larger prosperity and greater usefulness. At the invitation of the First Christian Church in Philadelphia, Penn., he removed to that city in October, 1875, and remained pastor over four years, and while there did much to encourage the missionary spirit among his people, which led eventually to the organization of the Third and Fourth Christian Churches. In the summer of 1879, he was called to the church in Chicago having united to form the Central Church, Rev. Mr. Lobingier was invited to occupy the pulpit. The invitation was accepted and he began to preach in January, 1883. He still remains with this congregation and rejoices in its increased harmony, its present peace, and in its bright prospects for the future. Since he came, about sixty new members have united with the church. Rev. Mr. Lobingier married Miss Annie H. Sinclair, of Morrisiana, N. Y. They have two children, a son and a daughter. The Lobingier family were among the pioneers of Western Pennsylvania, and the old homestead has been in their possession for more than a century. The natural beauty of the scenery in its vicinity exerted a powerful influence upon the mind and heart of the boy who grew up in its midst. His imaginative and reflective faculties were rapidly developed by the companionship of mountains and brooks, as is manifest in his literary work, in which he excels. He is a frequent contributor to the press, especially to denominational periodicals, and is now engaged upon a work designed as an answer to the statement of P. C. Mozoomdar, in his book The Oriental Churches, that it is impossible to correctly apprehend the nature of Christ except through oriental eyes.

EVANGELICAL CHURCHES.

First German Emanuel Church of the Evangelical Association.—This church, escaping the great fire of 1871, fell prey to that of July, 1874, when the congregation removed to their present site, corner of Thirty-fifth and Dearborn streets. Two lots were purchased, and the church-ediifice, transferred from another society, was moved and placed upon them. The church—

* The compiler is indebted, for the data contained in this sketch, to the pamphlet of Dr. Alvan E. Small and to Rev. L. F. Mercer.
building is a small frame structure with basement. It has a seating capacity for six hundred persons, and, with the lots, is estimated to be worth $14,000, in the fall of 1884, when the edifice was purchased for $4,500.

The present membership of the church is about two hundred, with a Sunday-school roll of about the same number.

The names of the pastors, during the period covered by this volume, have been as follows: Rev. W. F. Walker, J. F. Grob, Christian Ott, Theodore Alberding, Christian Ott, and Michael Heyl, the present pastor, who was appointed in 1894.

Rev. Michael Heyl, pastor of the First Church of the Evangelical Association, was born on November 17, 1830, at Klusstadt, Hessen-Darmstadt, Germany. His father was Christian Heyl, and his mother Barbara (Resland) Heyl. They came to America in 1837, and settled at Springfield, Ohio, where they remained until 1852, when they came to Cleveland, Twelvetree Well, Ill., and still later went to Mason County. Michael Heyl obtained his education at the public schools of Springfield, Ohio, and in Illinois. In 1861, he entered the ministry, joined the Conference at Des Plaines, and was sent to the Genesee circuit as an itinerant. In 1862, he was sent to the Yellow Creek circuit, and after five months, this circuit being divided, he was sent to the Rush Creek circuit, and there remained the rest of the two years and the third of which time he was sent back to the Yellow Creek circuit. The year 1866, he was on the Genesee circuit, and was stationed at Kankakee. In 1869, he was sent to the Galena circuit, Chicago, and, in 1873, he was stationed at Joliet. From there he was sent to Chicago, where he remained from 1873 to 1876. Thence he was sent to the Twelfth-street Church, Chicago, and in 1875 to St. John's Church, Chicago. In 1881, he was sent to the Centennial Church, where he remained until 1885, when he was sent to his present charge. Since he commenced his labors with this church, it has considerably increased in number and has bought a parsonage on Dearborn Street, for which $4,500 was paid. Rev. Mr. Heyl was married on June 16, 1875, to Miss Catharine Christina Schrod, and has had eight children, seven of whom, four sons and three daughters, are living.

Second Church of the Evangelical Association.—After the fire, this society re-built its church edifice on the old foundations, at an expense of about $9,000. It is a two-story Gothic structure, with a seating accommodation for four hundred. Rev. Hintze, pastor at the time of the fire, was followed by those named below, in the order given: Revs. A. Goecckley, George Escher, Theodore Alberding, C. Ott, H. Rolland, and Martin Stamm, the present minister. The membership of this church is one hundred and seventy-five.

Rev. Martin Stamm, pastor of the Second Church of the Evangelical Association, was born on July 18, 1855, at Stenau, Canton Schaffhausen, Switzerland. He came to America on January 8, 1852, and lived in New York City until 1858, when he went to Kankakee, Ill. In 1861 he entered the ministry, and joined the Illinois Conference of the Evangelical Association. He commenced his labors by travelling, in connection with Rev. John Schneider, through the Naperville circuit, which had ten congregations. In 1862, he was sent to Lockport, Ill., the center of a large mission. In 1863, he was stationed at Perkins Grove, and, in 1864 to the Mason circuit, at which place he built a church. In 1865 he went to Hampshire circuit, in 1866 to Dunkle's Grove circuit, and in 1867 to Mendota, where he superintended the building of a church. He then returned to Naperville, and thence went to Elgin, where he built a parsonage; from which place he was sent to the Folkston Street Church of the Evangelical Association, in Chicago, to harmonize the difficulties existing therein. From Chicago he was sent to Freeport, where he made arrangements to build a new church; from there to Joliet, in 1873, where also he built a parsonage; from there to Aurora, in 1874, where he also built a church; in 1876, he was sent to Geneva, where he remained four years; and then he was sent to Ottawa mission, where also he erected another church. He remained there two years, and came to Chicago as pastor of his present church in 1884. Rev. Mr. Stamm was married, on April 24, 1856, to Miss Magdalena Rupp, of Hryn COUNTY, Ill. They have had five children, four of whom are living, as follows: Samuel N., John T., Daniel S. and Benjamin J.

Evangelical Lutheran Emanuel Church.—At the time of the great fire the pastor of this church was Rev. Christian Koerner, whose pastorate continued until August, 1872. After the great fire, this church was crowded by an influx from the North Side, and the refugees did not remain long. Rev. Louis Hoelter, then a student, supplied the pulpit from September to December, 1872, when he was followed by Rev. L. Lange. Mr. Lange resigned in November, 1878, to become a professor in Concordia College, St. Louis. During his connection with the parish, a large brick building was erected, at a cost of $12,000, for day-school purposes. Four hundred scholars receive in-
struction at this school. A second school-house was built on the corner of Fourth Street and Ashland Avenue, costing $8,000, and is attended by one hundred and eighty children. Rev. Louis Hoelter was called to the regular pastorate from Quincy, Ill., in December, 1878. He has erected a school-house, corner of Cypress and Ashland streets, at a cost of $7,000, which has now two teachers and one hundred and twenty-five scholars. The number of communicants in this parish is about two thousand one hundred. In September, 1884, Rev. J. Leidel was appointed assistant pastor.

Several churches have sprung from this, as follows: Zion's Church, corner of Nineteenth and Johnson streets, having church-edifice, parsonage, two schools and two thousand communicants, with Rev. A. Wagner as pastor; Trinity Church, corner of Twenty-fifth Place and Hanover Street, having church-edifice, parsonage and one parish school, also a school in Bridgeport, on one Brighton and one in Hammond; and St. Matthew's Church, corner of Nineteenth Street and Houston Street, having a church-edifice, parsonage and two schools.

Rev. Henry Louis Hoelter, pastor of the German Evangelical Lutheran Emanuel Church, was born on March 31, 1848, at Cleveland, Ohio. His father, Henry J. Hoelter, was born in Germany about the year 1820, came to America in 1838, and died in 1855. His mother, Mrs. Mary (Balning) Hoelter, is still living. Up to his eleventh year he was educated at the public and parochial schools of Cleveland, Ohio. He then went to Concordia College, Fort Wayne, Ind., where he remained one and a half years, and then, on account of illness, remained at home until he was sixteen years old. At this time he returned to Concordia College, and remained six years, graduating at the age of twenty-two. From Concordia College he went to Concordia Theological Seminary at St. Louis, Mo., from which he graduated in 1873. In this year he commenced his ministry as assistant pastor of a congregation at Quincy, Ill., and, in 1874, became pastor of the church. In 1875, he came to Chicago as pastor of the German Evangelical Lutheran Emanuel Church, where he has since remained. At that time there were two hundred voting members, while at the present time there are three hundred and thirty, and between six hundred and seven hundred families in the congregation. They have erected a school building, at a cost of $7,000, at the corner of Cypress and Ashland streets, and are accumulating a building fund for the erection of a new church-edifice, which it is expected will take place within three years. Rev. Mr. Hoelter, in 1875, to Miss Emilie Seidel, daughter of Rev. Jacob Seidel, then pastor of St. John's German Evangelical Lutheran Church of Quincy, Ill. They have four children,—Edward, Theodore, Gertrude and Clara.

St. Stephen's German Evangelical Lutheran Church.—This church was organized on May 1, 1879, by the present pastor, Rev. L. C. Koehler, Ph.D. The church property was purchased on September 1, 1879. It had previously been occupied by the Second Reformed Congregation, which disbanded on December 15, 1878. The property consisted of three lots on the northwest corner of Wentworth Avenue and Twenty-fifth Street, upon which stands a frame church-edifice with brick basement, having a seating capacity for one thousand persons. For the property the sum of $10,473 was paid, and it is valued to-day at $18,000. In 1879, the house of worship, having been thoroughly repaired and refitted, was dedicated in the fall by the president of the Warburg district of the General Synod of Illinois, Rev. J. D. Severinghaus, A.M. At the time of the dedication there was a debt on the property of $8,000, about half of which has since been paid. The organ, valued at $1,000, was purchased with the property. Improvements have been made in the church from time to time by the church members and the Lutheran Association of the parish. Connected with the society is the parochial school, where English and German are taught; the school is held in the basement, but the society hopes to erect a school building.

Rev. Leonard Charles Koehler, pastor of St. Stephen's Evangelical Lutheran Church, was born on February 5, 1850, at Wipkingen, a suburb of Zurich, Switzerland. His father was Professor Charles Christopher Koehler, of the Freiburg Gymnasium, in Baden. His mother is Mrs. Regnerts Koehler, née Fehr, from Englis- san, Canton Zurich, Switzerland. Both are still living in Loerrach, Grand Duchy of Baden. The subject of this sketch was educated at the Freiburg Gymnasium from 1859 to 1864, and at the Gymnasium at Basel from 1864 to 1867. He then attended an academy at La Cheaux de Fonds (Warm Springs) in Switzerland for eighteen months; afterward the Basle University eighteen months; then the University of Leipsic, and finally the University of Heidelberg, where he studied eighteen months, leaving the University in 1874, having conferred upon him the degree of Doctor of philosophy. Upon completing his education, he immediately came to the United States, and was engaged ten months in teaching history, Latin and Greek in a German-English Academy in Mil- waukee. In 1875, he went to the northern part of Wisconsin, and preached nearly two years at Sandy Bay, Two Creeks and Carlton. In 1877, he came to Chicago, and began to teach Latin, French and German to private students. While thus engaged, he organized St. Stephen's Church in 1879, beginning to preach in January of that year, and organizing a congregation in May. At that time only five families joined the new church. At the present time there are one hundred and twenty families in connection with it, and six hundred and twenty communicants. The church-building and lots were purchased at a cost of $10,473, and about $2,500 for repairs. Rev. Mr. Koehler is a member of the committee of examination for the German theological students of the Warburg Synod, a district of the General Synod of the Evangelical Lutheran Church in Germany. He is also the editor of the American Kirchenfreund, the official church paper of the General Synod among the Germans, and author of the book called "Die Losung der sozialen Frage in den Vereinigten Staaten.

St. Matthew's German Evangelical Lutheran Church.—This church and school is on the corner of Paulina and Hinman streets, under the auspices of Zion's German Evangelical Lutheran Church. In September, 1871, about thirty families belonging to this church organized St. Matthew's Church. The first officers were—H. Karitz, John Wolf and Christian Gipke, trustees; and F. Koening, W. Fascher, F. Krueger, K. Rentner and Carl Bank, deacons. The trustees of the new organization purchased a block of land lying between Twentieth and Twenty-first streets, and Hoyne and Leavitt streets, and in 1872 erected a two-story brick church-edifice. The basement was occupied by a school and was afterward used as a place of worship. The building was erected as a school, the upper story being frame and used for the church services. To raise the money required for its erection, the trustees have sold lots from time to time as occasion required. In 1875, a two-story brick building was erected west of the church, at a cost of $4,000. In 1882, another school-house was erected on the southwest corner of Twenty-first and Hoyne streets, at a cost of $12,000. In 1884, another school was added, on California Avenue, at $5,000. This school is taught by Rev. Paul Brauns, who is also assistant pastor of the church. In 1883, a parsonage was erected at a cost of $3,500. The entire property is worth about $15,000. Rev. H. Engel- brecht is pastor at the present time.

Rev. John Adam Strecker, pastor of St. Peter's German Evangelical Lutheran Church, was born on December 23, 1855, in Ohio. His father was Rev. John George Strecker, born in Bavaria, Germany, on March 3, 1814; died in Chicago on December 12, 1880. His mother, Mrs. Katharina Margarettha (Blassneck) Strecker, was born on August 17, 1815, at Cadolzburg, Bavaria, and died May 19, 1882, at Davenport, Iowa. John A. Strecker entered Concordia College at Fort Wayne, and remained there six years. At the age of eighteen he entered Concordia Theological Seminary at St. Louis, Mo., and remained three years, graduating in 1875. He was then vicar in Chicago for six months, and in 1880 went to Davenport, Iowa, where he remained until 1883. In January of that year, he came to Chicago, and became pastor of St. Peter's German Evangelical Lutheran Church, where he is still located.
Rev. Mr. Streckfuss was married, on January 4, 1853, to Miss Amalie Maria Katharina Mennecke, daughter of Rev. Christian August Mennecke, of Rock Island. They have one child,—John Martin.

 REV. LOUIS F. J. LOCHNER, pastor of the Evangelical Lutheran Trinity Church, was born in Nuremberg, Bavaria, on April 9, 1818, and his father was Conrad Lochner, a weaver, and his mother was Louisa B. (Gauger) Lochner. They came to America in 1839, settling at St. Louis, where Charles Lochner died almost immediately. Mrs. Lochner died in Milwaukee, in March, 1851. The conclusion of the subject of the sketch was received in Concordia College, St. Louis, Mo., he having entered that institution in 1853 and remaining until 1861. From this time until March, 1864, he was an attendant at the Concordia Lutheran Seminary, from which institution he graduated at that time. He then entered the ministry in connection with the Evangelical Lutheran Missouri Synod, and took charge, as vicar, of St. Stephen's Lutheran Church, at A. M. A. This church is near the present day Chicago, and he remained there ten years. His first regular charge as pastor was at Richton, Cook Co., III., where he remained from November, 1864, to October, 1867. At this time he accepted a call to the Evangelical Lutheran Bethlehemit Church at Richmond, Va., where he remained until he died on February 24, 1880. In 1872 he entered the Lutheran Theological Seminary at Philadelphia, where he graduated in 1876. He first served St. Peter's English Lutheran Church at Rhinebeck, N. Y., and remained there until 1871, when he was called to the Church of the Transfiguration, Posttown, Penn., where he resided until 1881; and in the beginning of the same year he was invited to the pastorate of the Church of the Holy Trinity, at Dearborn, Ill. Here he served for five years, and then came to Chicago the congregation was worshiping on the southwest corner of Dearborn Ave. and Elm St., and in 1876 they began to erect the new church with stone front, in modern Gothic style, costing about $50,000. The church has a membership of three hundred, is rapidly growing in numbers and financial strength, and, with large Lutheran material to draw from, has a bright future before it. Its present flourishing condition is largely due to the wisely directed energy of the pastor.

SWEDISH EVANGELICAL LUTHERAN SALEM CHURCH.

—This church was organized in 1868, by Rev. Erl Carlson, with about two hundred members. Three lots were purchased on Bushnell Street by Emanuel congregation for $1,000, and presented to the Salem congregation upon these, in 1870, a church was erected, at a cost of $5,000. This building was dedicated in 1872. Rev. A. Hult was pastor two years, and was followed by Rev. P. Nyquist, who remained until 1875. After his resignation, the pulpit was left vacant for nearly two years. In 1877, a call was extended to Rev. Carl B. L. Boman, who accepted the charge, and through whose efforts the church was greatly strengthened. When he resigned, in October, 1885, there were seven hundred communicants. The old church-building was now too small for the growing congregation, and preparations were made to build a more spacious house of worship, and in a more convenient location. Accordingly, four lots were purchased on Portland Avenue, between Twenty-eighth and Twenty-nine streets, and on this new site a church was erected, with adjoining school-rooms and parsonage, it is a plain but substantial brick structure, and is valued at $35,000. The church was dedicated on March 1, 1885. The congregation now numbers seven hundred and twenty-five communicants, with a total membership of one thousand and fifty. The present pastor, Rev. L. G. Abrahamsson, late of Altona, Ill., has but recently assumed charge of the parish.

REV. CARL EKERNORD LEONHARD BOMAN, late pastor of the Swedish Evangelical Lutheran Church, was born at Dalarne, Sweden, on November 14, 1849. His father was Antonius Boman, and his mother Mrs. Margareta Elisabeth Boman, both of whom are still living at Dalarne, Sweden. The subject of this sketch received his early education in the mission schools at Snidad, Sweden, where he studied from 1870 to 1873. He then came to America, and attended the Augusta College and Seminary at Paxton, and moved to Rock Island with the institution. In 1880 he graduated, having been in attendance there four years. He was engaged a few months preaching at Clinton, Iowa, and Sterling, Ill., and then came to his late charge. At that time the church was on Dearborn Street, and had about three or four hundred nominal members on the roll, though the actual number was considerably less than that, as the church had been without a pastor for three years. There were about seven hundred communicants, and, including Communicants and Confir- ments, about one thousand members. In 1884, through the exertions of Rev. Mr. Boman, a new brick church- edifice was erected, as stated in the history of the church. Rev. Mr. Boman was married June 6, 1872, to Ida Sophie Schiiltz, daughter of Antonius, and Sophia Rovéll, of Carver County, Minn. They have four children,—Hannah Bernhardina, Ida Leontina, Carl Emanuel, and Lilly Victoria.
HISTORY OF CHICAGO.

Angustaiia Chicago, the Dayton Kansas; In KANSKKN, There had In farmer, 1883, She adding lie He 1876, his 1872, loniphan 1876. May He the BRUN, 'ily and his le 111., working Jemshog, chial 1871, C.erman Sweden. His 1868, his 1862, arrived. He emigrated the Augustana College, then at Paxton, Ill., in 1863, and remained there five years. From there he went to Marshall, Wis., as tutor in Augustana College and Seminary. He was ordained in 1870, having received a call from the Lutheran congregations in Kansas; these congregations were at considerable distance from each other, being in Brown, Doniphan and Greenwood counties. Rev. Mr. Brun was the first regular Norwegian Lutheran minister to perform missionary work or to preach in Kansas. Remaining there three and a half years, he then went to Minnesota, performing in that State a work similar to that performed in Kansas, preaching to several congregations in Meeker and adjoining counties. In 1877, he received a call to the Bethlehem Church in Chicago, where he has been ever since located. He preached his first sermon at Chicago, October, and has added considerable numbers to his church membership, which now consists of upward of one hundred and fifty communicants. Besides his ministerial work, he edits and publishes the leading Norwegian language paper, "Lutherske Børnehald," and other children's and Sunday-school literature. Rev. Mr. Brun was married on December 29, 1876, to Miss Ellen Running; who died in 1880; he was married to Miss Amanda Ryman in 1881. There are four living children,—three by the first wife and one by the second. The Rev. J. H. F. Juel, pastor of Our Savior’s Norwegian Evangelical Church was born at Valders, Norway, on September 10, 1838. His father, J. Juel, was a farmer, and emigrated with his family to Manitowoc County, Wis., in 1848. There he grew up on a farm until 1860, when he went to Concordia College, St. Louis, Mo., and remained there four years, graduating, in 1864, from both the collegiate and theological departments. Having received a call from the regular Norwegian Lutheran church at Dodgeville, Wis., he was ordained, and remained pastor of that church two years. He was called to Our Savior’s Norwegian Lutheran Church in New York City, going there in 1866, and remaining ten years. This was a new religious body in 1866, but under Rev. Mr. Juel became a flourishing congregation. Commencing with but a few families, it had in 1876, at the close of his pastorate, forty families and more than one hundred numbers of young people. With his assistance, the congregation built a new church-chapel, costing about $20,000. His labors in New York City were of a character to attract attention in Chicago and was the cause of his call to his present charge. In Chicago his ministry has been marked by unusual success, his church membership now being somewhat over nine hundred. Rev. Mr. Juel was married in 1866, to Miss Gustave Marks Gruda. They have had seven sons and two daughters, and have six children living, all boys. Mr. Juel looks upon Rev. J. A. Ottesen, of Koshkonong, Wis., as the cause of his adoption of the ministry as his life work. He has always been a close student, having read the Bible through in his fourteen through knowledge of the Latin, English and German languages, and also reads Greek.

German United Evangelical St. Peter’s Church.—Rev. Gottolph Lambrecht, whose biography appears in Volume II. in connection with a sketch to date of this church, is still the pastor. The church has enjoyed a steady growth in members and general prosperity. In the summer of 1883, two costly bells were placed in the church tower. In the church and parsonage, $8,000 were expended in adding a commodious basement to the building, together with auditorium decoration at a further expense of $600. The property is worth over $20,000. The ministry of Mr. Lambrecht has been an exceptionally successful one. In 1886, he established a mission church at Jefferson, whose edifice
he dedicated on September 24 of that year. The church services are all in the German language, although Mr. Lambrecht performs many marriage and baptismal services in English.

**German United Evangelical Zion Church.**—Rev. Dr. William Hansen, pastor of this church at the time of the great fire, died in the fall of 1873, and was succeeded in October of that year by the present minister, Rev. Philip Klein. At the beginning of Mr. Klein’s pastorate a debt of $20,000 rested on the church property, $14,000 of which he has succeeded in liquidating. Many improvements have been made in the meantime upon the buildings. The school-building, as stated in the preceding volume, was removed to the city for educational purposes, but in 1881 the parish again occupied it with their own day-school, which, for nearly five years, has been in a flourishing condition, having an attendance of two hundred scholars. The Sunday-school numbers eight hundred children, and the membership of the church is seven hundred. In the spring of 1884, the parish founded a mission on the corner of Wood and Twenty-second streets. In 1885, a two-story brick church was erected at an outlay of $6,000. The mission has become self-supporting, having its own pastor, Rev. Gottlieb Stanger, and is called Trinity Church.

**Third German United Evangelical Salem Church.**—This church was requested to Rev. Carl Wargowski in 1871, who was followed, in 1876, by Rev. John L. Kling, the present pastor. Under Mr. Kling, in 1884, the church property was exchanged for a brick church-educational on Twenty-fifth Street, between Wentworth and Portland avenues, and previously occupied by a Baptist society. It is the brick structure, with basement and auditorium. A day-school is conducted in the basement of the building.

**Rev. John Louis Kling,** pastor of the Evangelical United Salem Church, was born at Neufen, Wurttemberg, Germany, on August 19, 1845. His father was a brick-maker named Jacob Kling, who died in 1873, and his mother, Mrs. Catharina (Berthe) Kling, who died in 1874. John L. Kling’s education was obtained at the public schools, at a Latin Academy and at the mission schools at Basel, where he was in attendance five years, graduating in 1869. His intention was to become a missionary to Africa, but on account of ill health his plan of life was changed, and he was sent to America immediately upon graduation. At first in this country he was pastor of a church at Gallien, Berrien Co., Mich., where he remained one year, and in 1870 he became pastor of the Evangelical United Church in Monroeville, Ohio. In 1871, he went to Northfield, Ill., where he served as pastor of the Evangelical United Church, he remained until 1876, in which year he came to Chicago to assume his present pastorate, the congregation then worshiping in a church building on the corner of Wentworth Avenue and Bushnell Street. Afterward, this property was exchanged for their present church on Twenty-fifth Street, then occupied as a mission by the First Baptist Church of Chicago, which Rev. Mr. Kling has had repaired and painted, and so remodeled as to furnish excellent school facilities in the basement, at a cost of about $5,000. At the present time there are about one hundred families in regular membership and two hundred others in the congregation. Rev. Mr. Kling was married, May 19, 1871, to Miss Christina Kling, daughter of Jacob and Mary (Stanger) Kling. They have four children—Henry Louis, Louis Richard, Maria Wilhelmina, and Lydia Anna.

**Rev. Joseph Hartman,** pastor of the First German Evangelical Congregation, was born on September 18, 1822, at Bornheim, Germany. His father was a brick-maker named Jacob Hartman. His classical education was received at the gymnasia of Sperel and Zwollesacker, and his theological at the University of Bonn, Rhenish Prussia, and at the University of Utrecht, Holland. In 1849, he started, with his wife, for America, and spent his time in Cincinnati, Ohio, in the fall of that year, he found in session there a Conference of the German Evangelical Synod. He examined for admission to the ministry, and was ordained by Rev. Charles Solomon, of Buffalo, N. Y., Rev. Mr. Allen, of Cleveland, Ohio, and Dr. Von Derlack, of Chicago. On the influence of Rev. G. Vogt, he was assigned to the first place in the church at West Turin, Lewis Co., N. Y. After remaining there two years, he came to Chicago and became pastor of St. Paul’s Evangelical United Church, a position which he has filled ever since, a period of over thirty-three years. Rev. Mr. Hartman has been twice married. His first wife was Miss Eva Margaret Obenauer, of Oberhockstadt, Rheinpfalz. By her he had six children, three sons and three daughters. These children have all died but one daughter, who was married to John Bauer, on January 8, 1884. After the death of his first wife, Mr. Hartman was married to Mrs. Louisa von Boden, who is still living.

**The Chicago-Avenue Church.**—This building, which stands at the corner of Chicago and LaSalle avenues, takes the place of the old Tabernacle which stood on the corner of Illinois Street and LaSalle Avenue, and which was destroyed by the great fire of 1871. Immediately after the fire, steps were taken in the direction of a new edifice, but it was not until 1873 that the present building was begun. Owing, however, to the panic, only the basement could be completed, over which a temporary roof was placed, and here the services were held for two years. In June, 1875, the completed structure was dedicated by Mr. Moody and Mr. Sankey. It is a handsome and commodious edifice, with two stories and basement. The cost of the lot was $22,000, that of the building, complete $68,000, and was dedicated free of debt. During the absence of Messrs. Moody and Sankey abroad, a building committee was appointed, and the enterprise carried on and brought to completion. From time to time it has been found necessary to enlarge the class-rooms to accommodate the ever increasing attendance at the Sunday-schools. In the fall of 1884, $8,500 were expended in painting and frescoing.

This society belongs to no denomination, but is strictly evangelical in its character, claiming to be in full sympathy and fellowship with all Protestant

D. L. Moody.
churches. Its government and articles of faith are similar to those of the Congregationalists.

The successive pastors of the society, since the re-organization in the new church have been—Revs. J. Erdman, C. M. Morton, G. C. Needham, and the present minister, Rev. C. F. Goss.

In the spring of 1884, the society founded a "Medical Mission," with quarters at No. 134 Chicago Avenue, whose object is to provide gratuitous treatment and medicine to the worthy poor.

The trustees of the church are D. L. Moody, Watts De Golyer and A. L. Tucker. The deacons are A. A. Weeks, David McNaughton, Charles Herald, John Morrison, R. F. Atchison, Peter McLean, F. H. Keell and J. M. Hitchcock. The superintendent of the Sunday-school is J. M. Hitchcock, who has held the position since its reorganization after the fire, as well as for a long time previously.

Rev. Charles Frederick Goss, pastor of the Chicago Avenue (Moody's) Church, was born in Meridian, N. Y., on June 14, 1852. His father, Rev. Simon S. Goss, was a Presbyterian clergyman, and preached fifteen years in Meridian; he was of American birth, but of English ancestry. The mother of Rev. C. F. Goss was also born in this country, but of German descent. Her maiden name was Mary C. Weaver, and she was the daughter of Mr. Weaver, a farmer of Pennfield, N. Y. Rev. C. F. Goss graduated at Hamilton College in 1873, with the degree of Bachelor of Arts, and in 1876 he graduated from the Auburn Theological Seminary. His first ministerial services were performed in Waco, Texas, where, for eighteen months, he was in charge of the Home Mission under the Presbyterian Board. He then went into the oil regions of Pennsylvania as pastor of the Kendall Creek Presbyterian Church, where he remained three years, during which time he built a new church-edifice. In 1881, he became pastor of the Bethany Presbyterian Church, at Utica, N. Y., where he remained until 1884. In November of this year, at a conven-

THE UNITARIAN CHURCH.

Church of the Messiah.—After the fire of 1871, the house of worship of this congregation was utilized by the Chicago Relief and Aid Society. The church society was scattered in all directions, and it became expedient to sell the church-building for business purposes. It was purchased by H. M. Wilmarth, in December, 1871, for $80,000. Soon after the society secured a lot on the corner of Michigan Avenue and Twenty-third Street. It was during Rev. Robert Laird Collier's pastorate that the Third and Fourth Unitarian societies were organized. After leaving the old church-building, the congregation held their services in Bryant & Stratton's Business College, corner of Indiana Avenue and Twenty-second Street, and in the winter and spring of 1872-73, in Martine's Hall, in the vicinity.

The foundation-stone of a new church-edifice was laid in the fall of 1872, and its cornerstone-stone on May 13 of the following year. The building was carried on under the direction of H. J. Macfarland, James L. Ward and John T. McAuley. The dedication took place on Sunday, November 16, 1873. The ceremonies being conducted by Rev. Dr. Bellows, of New York. The auditorium has a seating capacity of eight hundred. The entire cost of this edifice was about $90,000.

In the summer of 1874, the Rev. Dr. Collier was compelled, on account of ill-health, to resign his pastorate. The resignation took effect on September 1, and was much regretted by the congregation. A call was then extended to Rev. Brooke Herford, of Manchester, England, to preach for three months, with a view to pastoral settlement. The call was at once responded to, and Mr. Herford preached his first sermon on March 14, 1875. In the following fall he was invited by the church to become its permanent pastor, and commenced his labors on the last Sunday in January, 1876. During the interval, the pulpit had been supplied by Rev. J. F. Dudley. With the accession of Mr. Herford, the church entered upon a new era of prosperity. In 1879, the bonded indebtedness of the society was provided for, and since that time they have been practically out of debt. In the summer of 1880, Mr. Herford was allowed a vacation to visit his old home in England, during which time his pulpit was supplied by Rev. Robert Collyer. Each year was marked by financial gains and increased membership, until April 21, 1882, when the pastor tendered his resignation, to accept a call to the Arlington-street Unitarian Church, of Boston, Mass. Much sorrow was felt by the congrega-
tion in being compelled to sever relations which had been, in all respects, so pleasant and profitable. Mr. Herford's successor is the present pastor, Rev. David N. Utter, of Kansas City, who began his labors on January 21, 1873.

Rev. David Utter, pastor of the Church of the Messiah, was born on March 21, 1844, at North Vernon, Ind. His father, William Utter, was a farmer and civil engineer, and helped to build the first railroad in the West, that running from Madison to Indianapolis. This town in Vermillion County, near the capital, whence, in 1853, he removed to Ohio. From this time to 1863, David Utter spent most of his time working upon the farm, going to school during the winter months each year. But his de-
sires of the heart were so great that he found means to go to the fields, and one summer, during the noon resting times, he mastered
common and decimal fractions. At eighteen he began teaching
school, also became a debater in country lyceums, an experience so
common to American youth. At the age of twenty-one he became
a Disciple preacher, and preached his way through the Northwestern
Christian University, at Indianapolis, Ind., graduating in 1867.
He was then sent to the First Unitarian Church of Boston, and attended for a short time the Heathrow School, and then attended the Harvard-Divinity School, graduating in 1871.
The same year he was ordained as successor to Dr. C. Canbeau Pal-
frey, in the city of Boston, and was sent by the American Unitarian Association to Olympia, Washington Territory, to take charge of a little church and to do missionary work in the towns
upon Puget Sound. There he organized a circuit of two hundred
miles in length, with six or seven preaching places, and started
the publication of the Unitarian Advocate, an eight-page monthly
quarter, that lived from January, 1877, to March, 1880. At Olympia,
he built a little church, helped shape the educational work of
the town, did institute work with the teachers, and assisted the
Portland Church while Thomas Elliot, the pastor, sought rest in
Europe. Finding that Olympia was not a growing town, he re-
turned eastward in 1880, and was the second pastor of the First Unitarian
Church in Kansas City, Mo., where he remained until January 1885. At this time he came to Chicago, in response to a call from the
Church of the Messiah, where he is still pastor. Rev. Mr. Utter has
two children,—Margaret, Robert and Richard.

Unity Church—The great fire of 1871 destroyed the
beautiful house of worship belonging to this society,
which had but recently been completed at a total cost, including the ground on which it stood, of $210,000.
On a Sunday, soon after this catastrophe, a few of the
members gathered upon the ruins with their beloved pastor, and pledged themselves to each other that the
church should be re-built. To the church of the same
order throughout the country it seemed of prime im-
portance that Unity Church should be maintained.
The American Unitarian Association, therefore, took it
upon itself to raise subscriptions, with the aid of
Rev. Robert Collyer, during 1872, with the understand-
ing that half the sum raised should be devoted to Unity
Church. Mr. Collyer's salary was provided, by the
generosity of a friend in Boston, for one year.

The result was a donation of $59,387 from the Unitarians
of New England. At a meeting of the society, held
in the Third Unitarian Church on January 8, 1872, it was voted
to re-build Unity Church on the old site, and the following building committee was appointed: Nathan
Mears, Henry T. Thompson, Thomas S. Wallin, William C.
Dow and Edward I. Tinkham, who at once began the
work of re-construction. While this was proceeding,
was held in a temporary wooden building erected by the New England Church, and kindly offered
by that society for the purpose stated. Services
were resumed in the lecture room during the winter of 1872-
73, and on Sunday, December 7, 1873, the house was dedi-
cated. The dedication sermon, the third in the history of the church, was preached by Dr. Furness, of Philadelphia. The total cost of re-construction, includ-
ing the organ, was about $397,377.

The financial difficulties of 1873 had a depressing
effect upon the debt, and ruin was threatened on account of
the debt which had been incurred the previous year.
On October 27, 1874, a new loan of $50,000, for
five years, was voted to take up the remains of past
indebtedness, and the society struggled vigorously. With
the increasing population on the North Side, and a bet-
ter general condition of affairs, the society became more
hopeful. At the annual meeting of the society, on March 1, 1879, a committee was appointed to arrange for pay-
ing the funded debt. Mr. Felix addressed himself to
the task of getting subscriptions for this purpose.
In May, the society was startled by the sudden resignation of Mr. Collyer, who had accepted a call from the Church of the Messiah, in New York. At that time Mr. Col-
lyer was the oldest settled pastor in Chicago, having completed his twentieth year of service with Unity Church. This resignation was accepted on June 23,
1879.

On November 17, 1879, Unity Church celebrated its freedom from debt,—the $30,000 so long due on the church-building having been raised and paid. From June, 1879, until November, 1885, a committee of six, acting with the trustees, invited various ministers to preach with a view to settlement. In November, Rev. George C. Miln, of Brooklyn, after preaching two Sunday services, took possession of the charge, being formally installed on January 2, 1883. On June 19, 1885, Mr. Miln tendered his resignation, which, not being accepted, was finally withdrawn on January 15, 1882.

Owing to a change in the religious opinions of Mr. Miln, the society held a special meeting on February 13, 1882, and Mr. Miln was notified that his connection with the society would cease on the expiration of three months from that time. On July 1, 1882, the society voted to call Rev. George Batchelor, of Salem, Mass. The call was accepted, and Mr. Batchelor's installation occurred on November 5, 1882. The church, however, was ordered to resign on August 15, 1885, on account of ill health.

The church has called, as the successor of Mr. Batchelor, Rev. Thomas G. Milstead, of Taunton, Mass.

Rev. Jenkin Lloyd Jones, pastor of All Souls (Unitarian)
Church was born at Halesoethal, Cambridgeshire, South Wales, on
November 14, 1843. He is the son of Richard Lloyd and Mary
(Thomas) Jones, both of whom were noted for independence of
thought in religious and political matters. In 1844, they came to
America, and settled in Jefferson County, Wis. There they remained
twenty years, when they removed to Sauk County, where they lived
five years. They then moved to Iowa County, where the father
still resides. The mother having died in 1870. The first Unitarian
Church, then known as Socianich, was established in South Wales
county about 1759, under the direction of Rev. Jenkin Jones, from whom the
subject of the present sketch received his instructions. He was brought
up on the farm in Wisconsin, and when old enough alternated be-
tween farm work in the summer and school in the winter until he
was eighteen years of age. He then spent nearly one year in the
Spring Green Academy, at the end of which time he was well
grounded in the English branches, and was somewhat advanced in
algebra and geometry and in the Latin language. It was his in-
tention to then attend the State University; but, after hesitating
for a time between apparent self-interest and patriotism, he decided
to enlist in the Army of the Union, and became a member of the
6th Wisconsin Battery of Light Artillery, on August 14, 1862. He
served throughout the War in the Western army, seeking neither
fame nor promotion. During the winter of 1864-65, he taught a
public school at the village of Arena, Iowa Co., Wis., and spent
part of the following summer on the farm. In September, 1866,
he attended the Theological School at Meadville, Penn., where he listened to the first Unitarian sermon he ever heard. He devoted the first year of study to Latin, Greek and Philosophy, and in the summer vacation of 1868, preached his first sermon in the school-house near his country home, which was the first Unitarian sermon his parents and family had heard in America. He graduated from Meadville Theological Seminary in 1870, before which event, however, he had received a call to a three congregations—two in the East and two in the West. He accepted the one from Winnetka, Ill., the smallest place, and where the smallest salary was offered. Having remained there one year, he removed to Wisconsin, and for one year was State missionary under the auspices of the State Unitarian Conference, with headquarters at Janesville, Wis. At the end of this year he accepted a call to the pastorate of All Souls Church, Janesville. In May, 1872, he was elected corresponding secretary of the Western Unitarian Conference, then in session in Chicago, with the understanding with his parish at Janesville that he should spend one-fourth of his time in the field. For three years he published a series of Sunday-school lessons, the first ever published in the Unitarian denomination. He was mainly instrumental in the organization of the Western Unitarian Sunday-school Society, and was its secretary for five years, and is one of its active officers up to the present time. In 1870, Mr. Jones resigned his charge in Janesville, and moved to Chicago to give his whole time to the duties of the Western Unitarian Conference and to the editing of Unity, the organ of Western Unitarianism, which periodical he aided in starting in March, 1872, and of which for the last five years he has been editor-in-chief. The summer of 1882 he spent abroad, visiting his birthplace, during which time he preached numerous sermons in his native tongue to the Unitarians in Wales. On his return in November, he began a missionary movement on the South Side of this city, which has developed into the church over which he is nowsettled. He resigned the duties of the secretariat in September, 1881, to give his entire attention and energies to the church. A lot has been purchased on the Oakwood Boulevard and Langley Avenue, and paid for, upon which the society purpose soon to build a church-edinic. Rev. Mr. Jones was married the next day after graduating, to Miss Susan C. Barker, who had been for several years assistant-treasurer for Professor F. Huddle- koper, of the Divinity School, and who had for three years been associated with him in Unitarian Sunday-school work. She is a lady of superior literary attainments and social qualifications and has proved herself an invaluable helpmeet to her husband. They have two children.—Mary Lloyd and Richard Lloyd.

THE UNIVERSALIST CHURCH.

FIRST UNIVERSALIST CHURCH.—The First Universalist Church, or St. Paul's Church, before the fire, stood on the corner of Van Buren Street and Wabash Avenue. After the fire, the society removed to Michigan Avenue, between Sixteenth and Eighteenth streets. Here they began to build in 1872, and completed their present house of worship in the summer of 1873. The new edifice is of the modern Gothic style of architecture, in solid stone; it has an auditorium, Sunday-school and lecture-rooms, parson, and all the modern accessories and conveniences of a church. The spire of the church is not yet completed. The total cost of the church, including lot, organ and furniture, was about $180,000, a somewhat remarkable fact, considering the membership, which at the present time is but five hundred and fifty.

Rev. Dr. W. H. Ryder continued his pastorate until April, 1883, having seen the building enterprise completed and the church dedicated without debt, and the society brought into its present flourishing condition. Dr. Ryder was much regretted by his church. He was followed by Rev. Sumner Ellis, who remained for two years. In September, 1884, Mr. Ellis was succeeded by Rev. J. Coleman Adams, of Lynn, Mass.

Rev. John Coleman Adams, pastor of St. Paul's Universalist Church, was born at Malden, Mass., on October 25, 1859. His father, Rev. John G. Adams, D.D., is one of the leading divines in the Universalist denomination. His mother was Mrs. Mary Hall (Barrett) Adams, daughter of William Barrett, and grand-daughter of Colonel Nathan Barrett, who led the Concord company at the battle of Concord Bridge, on April 19, 1775. The education of J. Coleman Adams was received at the common schools, and then at the high school of Lowell, Mass. In 1866, he entered Tufts College, at College Hill, graduating in 1870. He immediately entered Tufts Divinity School, at the same place, graduating from this institution in 1872, and in 1884 he received, upon examination, the degree of Master of Arts from Tufts College. In 1872, he was settled as pastor over New Universalist Church, at Newtonville, Mass., a newly organized church, where he remained eight years. This was a very pleasant and successful pastorate. The membership had increased to one hundred and twenty families, and was in a prosperous and harmonious condition. A new and elegant stone church-edinic was erected at a cost of $25,000. In 1880, he went to Lynn, Mass., as pastor of the First Universalist Church at that place. This is the largest church in the Universalist denomination in this country. While in this pastorate, Rev. Mr. Adams cleared off a debt of $30,000, which had existed for many years, and declined a call to succeed Rev. Dr. Chapin, at New York City. In January, 1884, he received a call to St. Paul's Universalist Church, Chicago, which he accepted on May 1, and commenced his labors on September 1, 1884, as the successor of Rev. Sumner Ellis, D.D. Rev. Mr. Adams was married on July 18, 1853, to Miss Miriam Priest Hovey, daughter of Charles A. Hovey, who is prominent as a temperance worker in Massachusetts. She is a grand-daughter of Colonel Charles H. Hovey, one of the first abolitionists in that State, and who was the founder of the large dry goods house of Charles F. Hovey & Co., of Boston, Mass., one of the staunchest houses in the country.

SECOND UNIVERSALIST SOCIETY.—This society, known also as the Church of the Redeemer, after the resignation of Rev. G. T. Flanders, D.D., in 1872, without the regular pastor was supplied by Rev. J. S. Dennis. Rev. J. E. Forrester followed, taking charge for one year, when Rev. Sumner Ellis, D.D., now deceased, succeeded, in October, 1874. The next regular pastor was Rev. W. S. Crow, who assumed
the pastoral charge in January, 1881, and remained until May, 1884. After another interval, Rev. Charles Conkling, of Chelsea, Mass., accepted a call, and was publicly installed at the beginning of January, 1885.

A new church-Edifice has been erected and dedicated at the corner of Robey Street and Warren Avenue. The lot on which it stands was donated by Mrs. Mary Talcott, and is valued at $10,000. The cost of the building, together with its furniture and organ, will be about $50,000. The society at the present time numbers four hundred, with a Sunday-school of two hundred.

The auxiliary organizations are the Talcott Society, Young Ladies Aid Society, Ladies Aid Society, Re- form Alliance, Young Men's Association, and the Flower Mission.

THE CENTRAL CHURCH OF CHICAGO

Although Rev. David Swing withdrew from the Presbyterians body during the year 1874, he still continued as pastor of the Fourth Church. This fact awakened much comment, and was the cause of a growing discontent on the part of the Presbyterian churches in the city, excepting, of course, his own congregation. It was urged that Professor Swing, with his peculiar views, ought not to occupy a Presbyterian pulpit. This statement, however, not generally accepted, led to Professor Swing's resignation, on November 28, 1875. During the week of his resignation, measures were taken to organize a new society, with Professor Swing as its pastor. The first step was the execution of the following agreement, which is quoted from the records of the Central Church:

"We, the undersigned, believing it to be desirable that David Swing shall remain in the City of Chicago and continue his public teachings in some central and commodious place, and having been informed that the whole expenses of such an arrangement can be brought within the sum of $15,000, including acceptable salary to Professor Swing, do hereby severally, and not jointly, agree to pay such portion of the deficit, if any there shall be, arising from the conduct of such services, to the amount above named, for the term of two years, as the sums set opposite our names may bear to the whole amount of the fund hereby subscribed; provided, however, that in no event shall the liability of the undersigned exceed the amount set opposite their respective names."

Following the execution of this document, a meeting was held on December 4, 1875, at the Grand Pacific Hotel, when a legal society was organized to be known as The Central Church of Chicago. At the first meeting of the board of trustees of this new society, it was resolved to hold meetings in McVicker's Theatre until otherwise ordered, and seats rented to secure about $125,000 per annum. Dr. Swing being paid $7,000 per year. Services were accordingly conducted in McVicker's Theatre until the opening of Central Music Hall, into which congregation removed, and have continued until the present time. The success of Professor Swing and of this organization is so well known as to require little comment. One service on Sunday is held in Central Music Hall, and Mr. Swing's audience is limited only by the seating capacity of the place. The Sunday-school attendance of the Central Church ranges from four to five thousand. There is also a mission Sunday-school under the superintendence of C. B. Holmes, numbering about three thousand five hundred.

THE PEOPLE'S CHURCH.

Early in the fall of 1880, while Rev. H. W. Thomas was preaching at Centenary Church, it was ascertained by certain of his friends that, at the approaching Conference, action would be taken against him for his alleged heterodox teaching, he having already received censure on this ground at the preceding Conference. It was feared that Dr. Thomas would be without a pulpit until such time as the charges and specifications against him had received the attention and decision of the Conference. Accordingly, on October 28, 1880, a number of gentlemen met at the office of Stephen F. Requa, No. 153 LaSalle Street, for the purpose of effecting a legal church organization which should support Dr. Thomas until the action of the Conference should be taken and its issue known. The organization was completed under the corporate name of The People's Church of Chicago, with the following articles:

This being done, the following letter was addressed to Dr. Thomas:

"CHICAGO, October 28, 1880.

To the Rev. Hiram W. Thomas, D.D.

Dear Brother: Whereas the Rock River Conference of the Methodist Episcopal Church, of which you are a member, at its late session, at Rockford, III., after having passed your character and by a majority vote, without just cause, requested you to withdraw from the Church and the ministry, thereby necessitating you, on your part, to ask for a supereminent relation, therefore, we the trustees, as authorized by the board of directors, extend to you a call from The People's Church of Chicago, to preach the gospel upon such a broad and evangelical platform as to you may seem in accordance with the will of God and best promotive of His cause in the welfare of mankind.

Affectionately,

H. W. Thomas.

Samuel Boyles, S. F. Requa, and others of the board of trustees.

CHICAGO, October 28, 1880.

On November 9, the trustees met, and adopted a code of by-laws for the society. Soon after this, Hooley's Theatre was secured in which to hold divine services. The first service was held in that place on November 14. After the trial of Dr. Thomas, it was decided that The People's Church should now be established on a permanent basis, with Dr. Thomas as pastor, and at a meeting of the trustees, on May 14, 1882, the following creed was adopted:

"As its name implies, it is the aim of The People's Church to provide a place of worship for all; for strangers and those without a religious home, and those of much or little faith, and of different beliefs; and to unite all in the great law and duty of love to God and man, and in earnest efforts to do good in the world.

In form, The People's Church is independent Congregational, and requires no theological tests as conditions of membership. We think and let think. We hold that upon the great questions of the Christian faith and life, the freedom of reason should not be bound
by the opinions of men, but that all should search the Scriptures and believe and do what they think is true and right; and The People's Church welcomes to its fellowship all who are in sympathy with its spirit and work."

From the first service held in Hooley's Theater, Dr. Thomas has been greeted by large audiences, so large indeed that the seating capacity of the place was inadequate to their accommodation. On September 6, 1855, the society removed into the Chicago Opera House, where at the present time it is difficult to obtain even standing-room when Dr. Thomas preaches.

The expenses of The People's Church are met from the sale of seats, which secures annually, for a term of ten months, the other two months of the year being granted to the pastor for vacation and rest. To avoid every possible financial contingency, from the date of the society's organization a board of twenty guarantors have yearly signed a contract, pledging themselves to the amount of $250 each. The trustees, of whom there are nine, are elected by the guarantors from their own number.

Rev. Hiram W. Thomas, D.D., the pastor of The People's Church, was born on April 29, 1832, in Hampshire County, Va. (now W. Va.). His father, Joseph Thomas, was a farmer by occupation, and his mother was Margaret (McDonald) Thomas. The former was of German and Welsh descent, while the latter was of Scotch and English parentage. In 1833, the family moved to Preston County, Va., near the Maryland line, where H. W. Thomas grew to manhood. His time was spent on the farm and in the district schools until he was eighteen years of age, at which time he became interested in the subject of religion, and after being converted he left the paternal roof for the purpose of sitting himself for the ministry. At first he was a pupil of Rev. Dr. McKisson for two years, and then he attended, for some time, Coopersville (Penn.) Academy. After leaving the Academy, he entered Ber-
therefore pursued, with the result of his expulsion from the Methodist ministry and from membership in the Methodist Episcopal Church. But as a general rule its auxiliaries, requiring no such effort, are in each case deemed necessary to pursue the details further. Upon the organization of The People's Church, Dr. Thomas became its pastor, and continues to officiate in that capacity today. The church has been the home of many strong-hearted and zealous workers, animated by its liberality, its eloquence and his fame. But although the intricacies of the trial are not followed here, it is deemed proper to present the views of Rev. Dr. D. B. Mack, the great Bible ideas which lie at the basis of Christian Theology: The atonement, endless punishment and the inspiration of the Scriptures. With reference to the atonement, he holds that it is a measure for securing the moral order of the universe, and for the substitution it be omitted. It implies the idea that the God of all, and will deal in a tender love with all; and as he cannot affirm that any one soul, or the same soul, will remain forever in sin, neither can he affirm endless suffering for any soul. With reference to the Bible, Dr. Mack visited it as the book of old spoke as they were moved by the Holy Spirit; hence it is not the thought nor the language of the Bible that is inspired, but in the Bible we have the thoughts and the words of inspired men. Some have been more, and some less, of the light of God's illumination, and hence all parts of the Scriptures are not equally inspired, nor are the quality and the quantity of inspiration the same in all parts of the religious and the Bible. The Old Testament is largely a history of the Hebrew people, and man's birthright, therefore, is irrelevant and of but little use—much that is uncertain and even legendary; but running through the history can be traced the movement of man from the creation to the present day, and the influences of both, and the guidance inquirers mind. Dr. Thomas was married, on March 19, 1855, to Miss Eveline C. Merrick, a brilliant and accomplished young lady of Pennsylvania. They have had seven children, one of whom, Dr. Homer N. Thomas, is still living. Mrs. Thomas is a lady of cheerful disposition and practical good sense; she has always been a true helpmeet, and has been the patient sharer of his early poverty and trials and the intelligent and genial companion of his more prosperous years.

CHICAGO BIBLE SOCIETY.—An account of the organization of this society, and its work down to the year 1871, appears in the preceding pages.

The tenth canvass of the city in 1875, as shown in the reports of the Society, resulted as follows:

Families visited, 17,541; families destitute, 4,452; families and persons assisted, 21,993. The society refused to return 35,680 Bibles and Testaments, valued at $2,900. Donations of money was received, $2,208.25. The branch societies drew books, during the year 1875-76, to the amount of $370.75, and paid into the treasury $1,576.86. The reports show that during this year no county in the State was, probably, more thoroughly or more frequently canvassed than Cook County. Fifty-seven vessels sailing on the western lakes were supplied with 105 Bibles. Grants to churches and Sunday-schools amounted to 770 Bibles and Testaments, valued at $298.30. Grants to the destitute amounted to $73.94. Grants to the Young Men's Christian Association amounted to $86.93. Grants from the depository amounted to 275 Bibles and Testaments. The total amount distributed during the year was $6,497. The treasurer's statement for the year, as shown by report, was—Receipts, $77,720.77; disbursements, $7,657.01.

The canvass for 1875-77 show that 26,995 families were visited during the year, that 3,783 families were destitute, that 2,581 families were supplied, that 1,210 refused Bibles, that 503 Bibles were sold at a value of $860.73, that 2,012 Bibles were donated at a cost of $1,027, and that 92 Bibles were donated at a cost of $1,966.16. In 200 among these donations, $266.04, and paid into the Society about $884.33.

During 1875, the Society in connection with other societies in the city, and with the aid of the Society of the Propagation of the Gospel, supplied 32,255 Bibles and Testaments on the various railways centering in Chicago, with two or more copies of the Bible, prepared specially for that purpose. Three of the railway lines and forty railway stations in the county were supplied with about 900 copies, amounting to $350.20. The report for 1875-79 shows thirty-three townships and branch societies.
HISTORY OF CHICAGO.

THE JEWISH CONGREGATIONS.

KEHLATH ANSHE MAARAH, or Congregation of the Men of the West.—After the destruction of their place of worship by the great fire of 1871, this congregation purchased a lot on the corner of Twenty-first Avenue and Indiana Avenue, where they are still situated. Rev. L. Adler, called to be the religious teacher of this society in 1861, held this office until 1881, when, in consequence of his advanced age, he was pensioned by his congregation, but continued his official duties until the election, in 1883, of his successor, Rev. Samuel Sale. Various reforms have been inaugurated during the present ministry, among which may be mentioned Sunday worship and the introduction of instrumental music.

REV. SAMUEL SALE, rabbi of the Kehlath Anshe Maarab, was born at Louisville, Ky., on October 20, 1854. His father, Isaac Sale, was born in Bavaria, on April 26, 1822, and was a merchant. He came to America in 1839. His mother was Henrietta (Dinkel- spiel) Sale. His education was obtained in the public schools at Louisville until in 1871, when he graduated from the high school with the highest honors, and was thus, by the rules of the school, entitled to, and received, a scholarship in the Washington College, Lexington, Va. He entered this college, but returned soon afterward to Louisville, and pursued his Hebrew studies there until September, 1873, when he went to Europe, and for five years thereafter attended the University of Berlin and at the same time the Jewish Theological Seminary. In August, he returned to Louisville, and a latter received a call from the Hebrew Congregation at Baltimore, as the immediate successor of Rev. Emil G. Hirsch. He remained there five years, and then, in September, 1883, after presiding at a trial sermon he was called to the Anshe Maarab, Chicago. This congregation is growing somewhat under his ministrations, though perhaps not so rapidly as would be the case were it not so near the powerful Sinai Congregation, and were it not for the fact that it is for the most part composed of conservative members, while Rev. Mr. Sale is in sympathy with the reform movements of the age. He was married to Miss Rachel Goldenberg, on January 12, 1881. They have two children,—Llewellyn and Ashley D.

THE SINAI CONGREGATION.—After the resignation of Rev. Dr. H. Kohler in 1879, and his acceptance of a call to New York City, Rev. Dr. Emil G. Hirsch took charge of the society, beginning his labors in August, 1880. After the destruction of their place of worship on Van Buren street by the fire, the congregation worshiped in various churches and other buildings, such as the present Wabash-avenue Methodist Episcopal Church, the First Presbyterian Church, and Martine's Hall, corner of Illinois Avenue and Twenty-second Street. This latter place was engaged for services on the first Sunday in January, 1873, and was used until the completion of the present capacious and handsome temple. The lot on which the edifice is erected was purchased for $30,000, and is on the southwest corner of Indiana Avenue and Twenty-first Street. The temple was dedicated on August 4, 1876, or about one year from the date of its commencement. It is a substantial stone structure of the early French-Gothic type, at the same time bearing features of a pronounced oriental character. The most noteworthy external characteristic of the building is its massiveness, which is, at the same time, combined with simplicity. The cost of the land, sidewalk, furniture and organ, was $90,000.

Of special interest, as pertaining to this society, are the Sunday services. The first attempt to hold service on Sunday was made during Dr. Chronik's ministry by a small portion of the congregation, but failing to meet general approval was soon discontinued. The reform movement finally was successful, and was unanimously adopted in January, 1873. The movement gained strength under Dr. Kohler, and on his retirement Dr. Hirsch was called with reference to his special fitness for prevailing on this work. During his administration the Sunday services have become practically the most important held in the synagogue, although Sunday has not been adopted officially as the Sabbath and the Saturday services are still continued, although attended by only one hundred and fifty persons, mostly women. These services are conducted according to the reformed ritual of Dr. Einhorn, father-in-law of Dr. Hirsch, the leading reform Jew in the United States. The Sunday services are not so distinctly religious as intellectual. They consist of singing a prayer or of the Kaddish by Dr. Hirsch, a composition by him in place of the Kaddish, or memorial prayer for the dead, and a benediction. These latter services are attended by from five hundred to one thousand five hundred people.

The Sinai congregation is the largest single contributor in the city to the treasury of the United Hebrew Relief Society. The Sabbath-school is superintended by Dr. Hirsch, assisted by Rev. Solomon Kaufmann and Miss D. Simon.

REV. SOLOMON KAUFMANN was born at Wroclau, in the Province of Posen, Prussia, on January 24, 1856, the son of Kaufmann Kaufmann. His education was obtained at the public schools of his native town, where he received special instruction in Hebrew, the Talmud and kindred studies. Later, he went to Samter, remaining there in the high school until he was seven years of age. He then filled the position of religious teacher at Mirrow, Mecklenburg, and there remained teaching and pursuing studies preparatory to entering the Theological Seminary at Berlin until April, 1866, when he entered the seminary as a member of an upper class graduating therefrom in April, 1868. Then he became a professor in the celebrated Jacobson School, at Seesen, Duchy of Brunswick, occupying the chair of Latin, Jewish history and literature and German language and literature. This school was founded by Israel Jacobson, the philanthropist, for the education of poor youth, but it afterward also received scholars who paid in part or in full for their education. Rev. Mr. Kaufmann remained in this position until October, 1869, when he went to Essen, the present location of the Krupp cannon manufactory, to take charge of a Jewish congregation and minister, and where he also had charge of the school of the congregation. There he remained for two and a half years.

In the spring of 1872, he came to America to take charge of the Beth El Synagogue (Temple of Truth) Congregation, at Memphis, Tenn. In the fall of 1873, he left Memphis, and went to Portsmouth, Ohio, where he became minister of the B'nai Abraham Congregation. He remained in this position two and a half years, and in the summer of 1876 accepted the position of professor of the English and German languages and literature and French in the "Philanthropin" College at Frankfort-on-the-Main. This position he held until January 1, 1882, when he returned to this country, and remained one year at Portsmouth, Ohio. On January 1, 1883, he came to Chicago to take charge of the Reform Synagogue, in which position he remained until June of the same year, when he resigned, but still continued to officiate as pastor at holiday services until Easter, 1884. Rev. Mr. Kaufmann was married at Portsmouth, Ohio, to Miss Sarah Fiehler in 1874, by whom he has four children, one son and three daughters.

ZION CONGREGATION.—This society was organized
in 1864, the first religious service being held on Sep-
tember 1. The young congregation then purchased a
Baptist church-building on Desplaines Street, between
Madison and Washington, for which the sum of seven
or eight thousand dollars was paid. This was sold in
1869, to the Arbeiter-Verein, or Workmen's Associa-
tion, the situation being no longer appropriate. The
society next purchased a lot on the corner of Jackson
and Sangamon streets, and erected a frame house of
worship, in which they held their services until Sep-
tember, 1855, when they occupied their new temple on the
corner of Dearborn Boulevard and Ogden Avenue.
This latter structure, one of the most attractive on the
West Side, is of pressed brick, embossed with terra
cotta, and is in the Moorish style of architecture.

REligiOus HISTOry.

The interior is commodious, having a seating capacity for
one thousand five hundred, and is beautifully decorated
and frescoed. A large organ is in process of construc-
tion. The total cost of the temple was about $60,000
and the lot $15,000. One hundred and twenty families
are enrolled in the regular membership. The principal
services are held on Saturday morning; but lectures are
given on Friday evenings and the second Sunday,
are in the German language. This society, with that of
Sinai, is representative of what is modestly called Re-
formed Judaism. Rev. B. Felshenthal has occupied the
rabbi's chair of Zion Congregation since 1864. Since
the fall of 1884, Rabbi Max Heller has been Dr. Fel-
shenthal's assistant. A debt of $20,000, incurred in the
building of the new temple, was readily provided for.

The North Side Hebrew Congregation.—This
society of the Orthodox Jews was first organized in
1867, previous to the great fire, their worship was held
in a rented building on Dearborn Avenue. They sub-
sequently erected a temple on Ohio Street, near Wells
Street, which was destroyed in the great fire. In
1884, they began to re-build, finished the basement and
dedicated it, not having the means to complete the entire
building. The congregation numbers about one hun-
dred, Rev. A. Norden has been the minister since 1871.

Various other congregations of Orthodox Jews of
small membership exist throughout the city; some were
shifts in the small structures which they have built, and
having, in most cases, daily reli-
gious services. Many of these smaller societies are of
very recent date, due largely to the remarkable influx of
Jewish refugees from the Russian persecutions in Pol-
land in 1852.

Rev. AARon norDen, minister of the Congregation of the North
Side, was born at Lissa, Prussia, on June 5, 1824. His father,
Saul Norden, has been a minister forty years. His mother's
maiden name was Eva Spieldelch. Both his parents are living in
Prussia. He received his elementary education at Lissa, and
graduated from the high school there in 1860. He pursued his
rabbinical studies with the celebrated rabbis, Dr. Elias Gutmaier,
and of Graetz, Prussia, remaining under his instruction three
years. One year after completing his studies he remained with his father,
and then came to America, landing at New York City in 1864.
For the next two years he was minister of the Communistic Israe-
lite Francaise, a French Jewish Congregation, and in 1866 he be-
came minister of the Eden-street Synagogue, Baltimore, Md. He
remained with this temple for four years, and in 1870 came to
Chicago, to take charge of the Congregation of the North Side, as
the successor of Rev. A. Ollendorf. The great fire of 1871 de-
stroyed most of the property of the members of this congregation,
and scattering them among themselves to find it practicable to hold services for some time, and, in consequence, Rev.
Mr. Norden went to Natchez, Miss., and remained until his con-
gregation in Chicago was ready for his return. The congregation
was reorganized in 1872, with thirty-five members, and Rev. Mr.
Norden was recalled to continue his ministerial labors. Most of
the time since then they have worshiped in Christian churches, as
in that of the New England Congregational, Grace Methodist Episcopal,
but in 1874 they completed a handsome temple of their own on the corner of Rush Street and Walton

Place, at a cost of $30,000, upon which there is now no debt. Rev.
Mr. Norden was married to Miss Rosalie Gabriel, daughter of
Moise Gabriel, a merchant of New York City, on April 17, 1866.
They have had seven children, all of whom are living—three sons
and four daughters.

The Spiritualists.

It is estimated that at the time of the great fire in
October, 1871, the number of Spiritualists in Chicago
was ten thousand, and at the present time thirty thousand.
There has not existed at any time a permanent organ-
ization of Spiritualists in this city, and hence the lack of
statistics or authentic data. Small societies have been
organized from time to time, but their existence has
been brief. After the great fire, meetings were held in
various parts of the city; but never at any time have
the Spiritualists, as a society, owned any property for
their specific purposes in Chicago. At the present time,
meetings are held in Madison-street Theatre, between
State and Dearborn streets, at which paid speakers
address the audiences.

It may be stated here, that the Religio-Philosophical
Journal, perhaps the chief organ of the Spiritualists in
the United States, is published in Chicago, and has a
circulation in the city and vicinity of about ten thousand
copies.

Mrs. Cora L. V. Richmond, pastor of the First Society of
Spiritualists, was born at Culpe, Allegany County, N. Y., on April
21, 1840. Her father was Dan'l Scott, a farmer, and her mother
was Lodeny (Butterfield) Scott, daughter of Oliver
Butterfield, also a farmer. Her early life was spent at her father's
home in New York, but in 1852, when she was eleven years old, she
remained with her family and moved to Washington,
and thence to the latter, because of the spiritual
influence came to her shortly after this removal. She
was seated in an arm chair in her father's garden, preparing to write a con-
versation for school. While thus engaged she was in
a trance, during which the slate was written over in an unfamiliar
handwriting. Upon awaking, Cora took her slate to her mother,
and said, "Some one has written my slate all over while I was asleep."
The communication was addressed to "My Dear Sister,"
and purported to be a message from a sister of the mother, who
had died several years before. This experience produced a pro-
found sensation in the mother's mind. A few days afterward
she was thrown into a second trance, while sitting by her mother's
side, and the latter, thinking it was a swoon, tried every restorative
at hand; but, seeing the hand move, she remembered the previous
writing, and brought the slate. The following message soon ap-
peared, written on the slate, "We are the spiritual friends; we will not
harm the child; but we have found a method of holding converse with the earth." These were the first instances
known of trance-mediumship. The education of Cora Scott, up to
this time, had been that usually received by country children in
the district school; and since that time she has received no further
instruction in the schools, nor from teachers of any kind, other
than her "Spirit guides." One of these guides, she says, is a son of
Adin Balon, who founded a small community called Hopecliff, Mass.,
and who was then a Universalist, but later a Spiritualist. The son
died when nearly eighteen years old, and was one of the first to"influence" the medium. Her first form of mediumship was that of
writing; and the neighbors hearing of the singular phenomenon
frequently thonght the house to discover, if possible, what this new
thing might be. Her teacher, Miss Mary Felton, afterward Mrs.
Hayes, of Madison, Wis., a woman of profound piety, was so
moved with an earnest desire to know if this extraordinary gift
were from the angels, that in the privacy of her room she prayed
the spirit of the departed father to appear, and to reveal to her
the real purpose of this new power. During the four years this physician
controlled the medium, he frequently prescribed for diseases,
speaking in the French, German and Italian languages, with which
the medium was entirely unacquainted, and yet, so far as physicians
could determine, with singular success. This woman thus early experienced,
and was so effectively influenced, as to be a convinced believer in spiritual
medicine. Numerous instances of the exercise of her healing power are
given, but they can only be referred to in a sketch of this char-
acter. At the thirteenth year of her age she was married to a
native county, in New York, and held frequent meetings, teaching
the assembled audiences the new spiritual gospel and healing the
sick. On her return to Wisconsin, her father prepared a large room in his own house, to which the public were invited one evening in each week to listen to a discourse. When she was fifteen years old, the power of healing was withdrawn, to give place to teaching and speaking, and at sixteen she went to New York, where the phenomena manifested through her were investigated by a company of literary and scientific gentlemen, composed of Drs. Gray and R. T. Hallock, Professor Magie and Judge Edmonds. From that time to the present she has delivered upward of three thousand discourses, upon almost every conceivable topic, and all of which are entirely extemporaneous and impromptu. In 1872, as Mrs. Cora L. V. Tappan, she visited England, and remained there and in the provinces until 1875. During this period she delivered from one to five discourses each week, most of which were

Mrs. Tappan was married to William Richmond, of this city, son of the late W. Thomas Richmond, and grandson of Hon. Thomas Richmond, a pioneer in Chicago, who had lived here forty years. Mr. Richmond shares the faith of his wife and is a most earnest supporter of her public work.

The Religio-Philosophical Journal is a large eight-page weekly, established in 1865, and devoted to modern Spiritualism and general reform. It was originally a monthly, but was converted under a special charter, but in 1866 it was wrested from the hands of the original managers, and Messrs. Jones & Bundy lost control of the concern. In nine months’ time the new managers had wrecked this business. This obliged Mr. Hall, editor and S. S. Jones then revived the paper and general publishing business as a private enterprise, associating Colonel Bundy with him. Mr. Jones being the editor-in-chief of the journal, the business management devolved upon John C. Bundy.

On March 15, 1877, Mr. Jones was murdered in his office, and Mr. Bundy took possession of the paper and became its editor and manager, acting as administrator of the estate, and in 1879 became sole owner by purchase. Like all newspapers, it had a struggle for life, but finally, in 1879, under good business management, became strong in circulation and financially healthy. In 1871, the office was located at Nos. 187–189 South Clark Street, where the fire swept them out of existence. Property worth over $20,000 was lost; the mail-list and books of account alone were saved. Fifteen dollars was the total amount realized from insurance policies aggregating $7,000. In about twenty-four hours after the loss, they had secured a place on the West Side, and had issued a small paper, and mailed it to their subscribers. The enterprise shown by this management was rewarded, for subscriptions poured in from all directions, and delinquents sent in remittances to balance old accounts, until the winter following found them nicely situated and with more money than they needed, their subscription list meanwhile reaching twenty thousand copies. This is the only paper in Chicago devoted to Spiritualism, and is an able exponent of the scientific and educated wing of Spiritualists. The paper is well suited of life and numbers among its friends the brilliant Rev. H. W. Thomas, D.D., Hon. W. K. McAllister, Rev. Robert Collyer and others. It is unsectarian, non-partisan, and thoroughly independent, and lends its active support to any movement adapted to the amelioration of man. It has a national circulation, and nearly a thousand copies are taken in foreign countries, quite a number going to India, Australia, Russia, and a still larger number to England and Germany.

Stevens S. Jones, formerly editor and publisher of the Religio-Philosophical Journal, was born in Harris, Vt., on July 22, 1813. His father was a farmer, and was an intelligent, liberal-minded man. At the age of nineteen he entered, upon the study of law, and was admitted to practice at the November term of court of that year. He entered upon a successful practice in Harrisburg Park soon after he was admitted, and remained there until his removal to St. Charles, Ill., in the spring of 1838. For many years he confined himself to his profession, and ranked high as a lawyer, and was thence elected judge of the Kane County Circuit Court, and sustains his former reputation as an able and impartial jurist. In the early days of the railroads in the Northwest he was actively engaged, always taking a prominent part in matters of enterprise. He was liberal in religious matters, and during his younger years was a supporter of the Universalist denomination. Generally he was presiding officer at Universalist State Conventions and was present at all representative gatherings in the State. He drew the charter of the Religio-Philosophical Publishing Association, and secured its passage through the Legislature. Under this broad charter he organized an association for the publication of books and papers, and established the Religio-Philosophical Journal in May, 1855. The institution flourished and gave excellent promise of success, but in the full of 1866 a change of management threw the control into other hands, and Mr. Jones was retired. Nine months thereafter the Religio-Philosophical Journal appeared in the size and weight of its former, and it continued to thrive, through the failure of the association. In 1871 his office was entirely destroyed; but not in the least deterred, he immediately went to New York City and purchased a new outfit, and in five weeks sent his new paper full size to his subscribers. After he had supplied his subscribers and friends with a small-sized sheet, his success was pronounced, and he flourished as a publisher until March 15, 1877, when he was foully murdered in his office at No. 94 Jackson Street. He was buried at Hinsdale, Ill., and his widow, Lavinia M. Camp, daughter of Philo G. Camp, on May 1, 1838, and there are two children living,—Mary E., wife of Colonel John C. Bundy, and Clara M., wife of Robert B. Parson, of the Hinsdale Baker Company of Chicago.

John C. Bundy was born at St. Charles, Kane Co., Ill., on February 16, 1841. His parents, Asahel and Betsy (Minard)
political history.

from the free soil movement of 1848 to the present time. — the history of the municipal politics of Chicago necessarily bears close relation to the great organized parties, and the process of writing it is like grafting new branches upon old and well-rooted trunks. whatever may have been the causes that divided the early voters of Chicago by distinct party lines, they were never wholly obliterated in local elections by issues involving the interests of the growing city itself until the close of the civil war.

whether originally bound together by the leadership of pioneer spirits; the bond of self-preservation that united all in common cause against the indians; the clearing of the forests, the tilling of the soil; the building up, expansion and improvement of the city—any or all of these influences gave way in time, after serving their brief purposes, to the great issues leading up to and involved in the abolition agitation,—the free soil movement of 1848, the lincoln-douglas debates, the election of lincoln to the presidency, and the crisis of the great war of the rebellion.

the anti-slavery movement.—the majority of local voters from 1830 to 1853 were of the democratic school, except in 1840 and 1848, when the party strength was divided by internal dissensions. the party split in the latter year was on the slavery issue, the anti-slavery wing expressing its sentiment in Chicago by giving to martin van buren, free-soil democrat, 4,543 votes for president. only four years before this the popular refrain of the whig opposition had been—

"oh, oh, oh, the country's risin'.

for henry clay and frelinghuysen." but the country did not rise to the extent anticipated. the whigs were not strong enough to overcome the democrats; and although the brilliant "harry clay" was immensely popular in Chicago, and the city gave him 850 votes to polk's 136, the latter carried cook county by 2,027 votes to clay's 1,117. the news of the election came by stage, and it was two weeks before the news of clinton and polk was heard in new york state had been. the news came as a "special" way-bill, along with the letter sack, to ellis & fergus, publishers of the democratic advocate, and the jubilant democrats celebrated the election of polk and dallas by building bonfires on clark street and by extemporaneous oratory.

some account of the abolition movement, the agitation over the "black laws," the kansas excitement, the alleged mobbing of stephen a. douglas at north market hall, and other stirring incidents leading up to the rebellion were given in a preceding volume, and it is not the intention here to give a resume of national politics, except sufficiently to show the bearing and influence of the great questions of the times upon the people of Chicago, and the men who were active and prominent in leadership.

the few abolitionists here in 1840 gave their votes to james g. birney, of michigan. in 1844, after his second nomination, he received 269 votes in Chicago and a total of 317 in cook county.

when the free soil party was organized, its main principle, as enunciated in its platform, was hostility to the further spread of slavery; but this, alone, did not seem sufficient to commend the party to the suffrages of the disaffected voters of all parties.

while van buren carried Chicago and cook county by a plurality in 1848, four years thereafter the democrats carried the city by 2,853 and the county by 3,767 for franklin pierce. winfield scott, the whig candidate, got 1,765 votes in the city and 2,089 in the county, and john f. hale, the free soil candidate got but 424 votes in the city and 793 in the county,—fewer by far than van buren had polled as the first free soil candidate. it was not until the republican party was formed, and john c. fremont was chosen as a leader, under the bold, broad and stirring declaration that there should be no further extension of slavery, together with other popular principles embodied in the platform, that all unsettled elements united in a distinct, strong and formidable party.

during all of this excitement and agitation, hooper warren and zebina eastman may be said to have been the leading spirits in every movement in behalf of freedom.

in 1842, zebina eastman established in Chicago
the "Western Citizen," in response to the request of such early abolitionists as James H. Collins, Calvin DeWolf, Philo Carpenter, Shubael D. Childs, Dr. C. V. Dyer, H. L. Fulton, Newton Rossiter, Lemuel C. P. Free: J. Johnston, Rev. F. Bascome and other brave spirits, who, moved by their hostility to slavery and incensed by their recollections of the murder of Elijah P. Lovejoy by a pro-slavery mob at Alton in 1837, and the continued threats of pro-slavery men that no abolition paper should be established in Chicago, determined that such a paper should be established, and that the man who had written the obituary of the veteran abolitionist, Benjamin Lundy, and established the Genius of Liberty, as the successor of the Genius of Universal Emancipation, at Lowell, LaSalle County, should be the editor and guiding mind of the new venture. They felt that the abolitionists of the Northwest needed an organ to represent their principles and defend them in their agitation of the anti-slavery movement. The paper was established, and filled this want. In 1853, the name of the pioneer journal of freedom in Chicago was changed to The Free West.

While the stimulating, as it was then called, had but 142 known voters in Illinois in 1837, it had 10,000, and was then strong enough to break down the long continued power of the Democrats, and four years later controlled the State, and had solidified and strengthened into the new political power that made Abraham Lincoln president in 1860. The party was composed of anti-slavery Democrats, anti-slavery Whigs, and anti-slavery Americans, all animated with the hope of checking the aggressive movements of the supporters of the slave power in their efforts to control the National Government.

In April, 1854, a meeting of prominent Chicago and State politicians, including Democrats and Whigs who were opposed to the course of Stephen A. Douglas in the Senate, was held in Room 4, Tremont House. There were present Abraham Lincoln, Lyman Trumbull, Mark Skinner, O. H. Browning, John E. Stewart, David Davis, Norman B. Jud, J. Young Scammon, Francis C. Sherman, and others equally well known. They present pledged themselves to the support of an "Anti-Nebraska" party, and appointed a committee to agitate the subject. This led to that fusion of sentiment that revolutionized the politics of the entire northern part of the State.

The first formal move in the direction of organizing a party, was at a meeting of Anti-Kansas-Nebraska editors, held at Decatur, on February 22, 1856. The most prominent Chicago men present were Dr. C. H. Ray, of the Tribune, George Schneider, founder of the Stas Zeitung, and William B. Ogden. This meeting formulated a call for a State Convention, to be held at Bloomington on May 29. Among Cook County men present were James McKee, who was a vice-president of the Convention; C. L. Wilson, one of the secretaries; Dr. C. H. Ray and Norman B. Jud, who were made members of the State Central Committee; and John Wentworth. On June 17 following the great meeting of Anti-Slavery Democrats and Whigs of the North, was held at Philadelphia, and John C. Fremont was nominated by the National Convention party, the name already adopted by the organization in Illinois. Although in the ensuing election Fremont carried Chicago by 6,370 and Cook County by 9,020 votes against 4,913 and 5,680 in city and county respectively for Buchanan, the latter carried the State by a plurality of 9,156, but the Republicans elected Bissell governor over Richardson, by a majority of 4,697. The Republican party had, in four years, absorbed the Whig and Free Soil parties in Cook County, and weakened the Democrats fatally.

II. GENERAL POLITICS.—Hon. John Wentworth, in his "Reminiscences of Adams, Benton, Calhoun, Clay and Webster," relates that the idea of the formation of the Republican party may be said to have originated in the House of Representatives in December, 1853, at the time of Thomas H. Benton's great speech against the repeal of the Missouri Compromise. Mr. Wentworth says:

He (Benton) was elected as a Democrat of the regular organization who had all his life opposed the principle of slavery, and as one upon whom the mantle of General Andrew Jackson had fallen. But when he manifested opposition to the repeal of the Missouri Compromise, his venerable head had to receive all the blows that once were leveled upon that of Mr. Adams. But the latter was from a free State, whilst Benton was from a slave State. As Missouri was admitted into the Union under the provisions of the Missouri Compromise, and as Colonel Benton was one of its first two Senators after admission, and as he was very decided in his opposition to the repeal, there was a very great desire among its opponents that he should make a speech. Yet, with his style of speaking, slow even for a Senator, how much could he say in one speech? And we feared, with the Speaker, that he could obtain no extension of his time. And then we knew that he had frequently said that he never would print what he did not speak. Frs were, consequently, among men of all political parties opposed to the repeal as the best means of obtaining for him a full hearing. And here may be said to have originated the idea of the Republican party, when such life-long Democrats as William H. Sissel of Illinois, Reuben E. Fontaine of New York, Galusha A. Grow of Pennsylvania, Hannibal Hamlin of Maine, Nathaniel P. Banks of Massachusetts, and myself met with men whom we had ever before opposed, to consult upon a common object. We had an almost impossible task of us dared to speak to Colonel Benton upon the subject, for fear he would stand upon his dignity and refuse to speak at all. Our opponents had deliberated, and had come to the conclusion that they would not hold him the courtesy of hearing before delivering a written speech when he objected to its publication without delivery. At length he obtained the floor, and as he produced his manuscripts, it was evident that a scene must ensue. The Senators came over, and the galleries were soon filled. A Senator, for thirty years, was addressing the House. And, as he progressed, every eye was intent upon the chairman's hammer, to see it denote the close of the hour allotted to him. Fortunately, I had not spoken, and, still more fortunately, I made as good time in rising as the hammer did in falling, and my voice was simultaneous with the hammer's sound. I was recognized, and suggested that the gentlewomen from Missouri ask the sustaining power of their house, of which I was entitled. But loud objections from the friends of the repeal were made all over the House. Then commenced the first of those series of exciting parliamentary struggles which continued until the Rebellion broke out, between the men of opposite politics who were thereafter to be organized into the Republican party and their opponents.

Colonel Benton visited Chicago in the spring of 1857, while Mr. Wentworth was Mayor, to deliver a lecture. He held a reception at the Tremont House, which was largely attended by the best people of the city. Mr. Wentworth, in his Reminiscences, says:

While I was conducting him about the city, his language was prophetic as to the approaching condition of the country. Often did he say: "Somebody must be hung. Hanging alone will arrest the progress of the traitors. Hanging ought to commence now." Said he: "Does your man Douglas expect to be nominated for President the next time? Does he expect that the South, while likening his treason to the North in the repeal of the Missouri Compromise, will not show its distrust of the traitor? What good does he expect a nomination will do him? Does he believe in the settlement of the questions of God? What assurance can he suppose God Almighty sent the Convention down to Charleston, S.C., that hot-bed of treason, for, but to make a Babel of it?"

The lecture was before the Young Men's Association, on Tuesday evening, 12th, May, 1857, in the First Presbyterian Church, southwest corner of Clark and Washington Streets. The

* Mr. Wentworth finally moved an amendment, which opened up the discussion anew. Benton addressed the chair, was recognized; Mr. Wentworth moved, and thus Benton was enabled to finish his speech within the time allotted to Wentworth.
following passages from it are well remembered, although the
lecture was not reported. "There are sages of the past and there
are sages of the future, and I stand here to-night as the connecting
link between those sages of the past and those sages of the future." The cheering was subdued when he uttered the following
sentiment which has ever been the sentiment of every man who
voted against the dissolution, unnecessary, and peace-destroying
repeal: "When I am gathered to my narrow home, I desire that
my friends shall deeply engrave upon my tombstone: 'He voted
against the abrogation of the Missouri Compromise, and gloried in
the deed.'"

In 1852, the combined Whig and Free Soil vote
was 2,189 in the city and 2,882 in the county, as against
2,835 Democratic votes in the city and 3,767 in the
county. During the years these important elec-
tions occurred, the vote on Congressmen in the
district including Cook County followed the same
tendency of sentiment. John Wentworth was elec-
ted in 1842 and served four successive terms as
a Democrat, from the then fourth district. From
1851, to 1853, the district was represented by
Richard S. Molony, Democrat, of Belvidere, who
was elected over C. C. Coffing, Whig, by a majority
of 983 out of 4,743 votes polled. The census of 1850,
increased the State representation in Con-
gress from seven to nine members, and the num-
bers of the districts were changed. In 1852, the
first district extended from Galena to Waukegan,
and although not a Chicago district its politics are
worthy of mention here, for the reason that under
the abolitionists, the voters of the Liberty party
were advised not to throw away their votes; they
then held the balance of power in several districts.
This course elected Elihu B. Washburne, of Galena,
a Whig, over Thompson Campbell, Democrat, or
"Locofoco." Mr. Washburne made no pledges,
but was thought to be an abolitionist at heart,
and afterward proved to be a sincere friend of the
cause. He represented the first district from 1853
to 1855, and the third from 1865 to March 9, 1869,
when he resigned to accept the office of Minis-
ter to France. John Wentworth was again elected
to Congress, as a Democrat, in the second district,
and served from 1853 to 1855, and from the first
district from 1865 to 1867. James H. Woodworth
was elected in the second district as a "Know
Nothing," over Turner, Douglas-Democrat, and
served from 1855 to 1857.

The names of succeeding Congressmen and the
changes in the political complexion of the Chicago
districts are given in a tabular addendum to this
chapter.

The names of Owen Lovejoy, Lincoln, Douglas,
Trumbull, Ficklin, McClernand, Browning, Ingerson,
Yates, Oglesby, Logan and Grant are as familiar to
Chicagoans as are those of their own early representa-
tives, and they were all sufficiently identified with the growth
of political sentiment in Cook County to come within
the purview of an article dealing with the subject.
The triumph and martyrdom of Lincoln: the
mournful pageant accompanying his remains through
Chicago to his former home, that gloomy April day in
1865: the grand achievements and resplendent fame
of Grant,—all belong to the great city which is the center
of our noble State, but their deeds are blazoned on the
records of the Nation, and need no more than passing
mention here. But the interests of a great and ever-in-
creasing municipality, in their relations to politics, is a
theme that must be embellished by many statements of
dry facts, in order to produce connected results.

JOEL CLARKE WALTER, one of the pioneer merchants
of Chicago, was born at Goshen, Litchfield Co., Conn., on October 30,
1810. He resided there through his boyhood, and during his early
manhood went to Alabama, where he carried on merchandising for
about two years. He then returned to the North and determined
to locate in the West. In June, 1837, he arrived in Chicago, and
shortly after the firm of Norton & Co. began doing a general
merchandising business at their store on South Water Street,
between Dearborn and Clark Streets. Mr. Walter was the com-
pany, his partner being a wealthy gentleman from Connecti-
cut. In 1839, Mr. Walter "squatton a piece of government land at
the corner of Dock and River Streets, and when the property came
into market the firm purchased the lot. In 1840, they built a
warehouse for the storage of grain, although the firm had been
handling that commodity for a couple of years prior. H. Norton
& Co. was the first firm to make a grain shipment from Chicago to
Buffalo. They bought the grain from the Hoosiers, and shipped it
in sacks by boat. Their warehouse was soon changed to an
elevator run by horse power. The Daily American, of March 18,
1842, speaking of the new elevators, said: "That run by H.
Norton & Co. is the largest, being one hundred and forty feet in
size. It is on the Reservation; work in the elevator will be per-
formed by horses. The wheat, instead of being shipped from it by
the usual slow and tedious process [transferring the grain by
carts and boxes] will, after being raised to the upper storey by
means of elevators not unlike the revolving buckets of the dredg-
ing machine, glide thence into the hold of the vessel in double quick
time." The firm continued to run the elevator in this way for a
number of years. The wooden elevator was finally burned down,
and in its place a stone structure was erected. In 1842, Edward
K. Rogers became a member of the firm of Horace Norton & Co.,
in the storage and forwarding business. Mr. Walter was also
connected with Mr. Rogers in the coal and iron business for about
fifteen years. Mr. Walter was also connected with Washburns &
Willard in the ice business for a number of years. In the organiza-
tion of the Chicago Board of Trade in the spring of 1848, Mr.
Walter took great interest. He, of course, was one of the original
members, and in after years served on several committees of the
Board. He belonged to the Old Volunteer Fire Company, and was
one of the first members of Engine Company No. 1. In 1861,
when the War spirit was awakening, Mr. Walter signed his name

POLITICAL HISTORY. 835
HISTORY OF CHICAGO.

Mayor, James H. Woodworth; City Attorney, Giles Spring; Marshal, Ambrose Burnham; Collector, A. D. Taylor; Treasurer, W. L. Church; Assessor, South Division, Thomas Church; Street Commissioner, O. Morrison; Assessor, North Division, P. J. Donald; Assessor, Street Commissioner, Andrew Nelson; Aldermen—Seventh Ward, Elisha Granger; Eighth Ward, W. L. Herrick; Ninth Ward, John H. Kinzie.

The election was held on March 7, and resulted as follows:

The Independents also elected their Assessors and Street Commissioners in the North and South Divisions, and the straight Democrats theirs in the West Division, where they had no opposition. The Independents also elected their alderman in the Eighth Ward, and came near getting John H. Kinzie through in the Ninth, but his opponents defeated him by Samuel McKay by only one vote, as the following resolution will show:

It will be seen that three other Independents were elected in the Fourth, Fifth and Sixth Wards who did not have the direct endorsement of the Independent element. The election was an exciting one, and the summary, as given, shows better than any amount of description, even in this early day, that something besides the nomination of a well organized party is necessary to political success.

There had been a feeling prevalent for some time that the city was becoming disorderly and that reform was necessary. On March 4, 1848, the City Council adopted the following:

ORDINANCE. Richard C. Ross, City Marshal, has proved to be an inefficient officer, by countenancing gambling houses, particularly keno tables, and with his full knowledge tolerated violations of the license ordinance; therefore, be it resolved, That R. C. Ross, City Marshal, is clearly censurable for gross neglect of duty.

On March 18, 1848, the City Council passed the following:

AN ORDINANCE TO SUPPRESS KENO. Be it ordained by the Common Council of the City of Chicago, That no person, or persons, who shall keep within the City of Chicago, a keno game, or who shall run or otherwise use the same, or determine any chance or hazard by which any person, or persons, are to receive any money, check or checks, bank notes or bills or other valuable thing, shall for each offense pay a penalty of $25, to be recovered by the City of Chicago before any justice of the peace or any court having jurisdiction thereof.

JAMES H. WOODWORTH, Mayor.

HENRY B. CLARKE, Clerk.
PASSED MARCH 18, 1848.

The above is believed to have been the first anti-gambling ordinance passed by the Chicago City Council.

For two years following the adoption of the new Constitution containing the "Negro" clause, the agitation of the "black laws" in general was kept up. On July 8, 1850, Isaac N. Arnold, J. H. Collins, John M. Wilson, Edwin C. Larned, George Manierre and Grant Goodrich issued a joint challenge, in which they proposed to contend against any orators that the Fugitive Slave Law was unconstitutional and should be repealed. About this time action was taken on the matter in

to the muster-roll of "The Old Guard," one of the military organizations composed of citizens over forty-five years of age. He was first married to Miss Ophelia, a daughter of Dr. Philip Maxwell, an early settler of Chicago. Her death occurred on October 18, 1847, leaving four children; Charles J. now residing at Lake Geneva, Wis., Mrs. Julius Steele, of Chicago, Annie, who died in 1857, and Philip Edward, who died in 1881. Mr. Walter was again married, on December 3, 1866, to Mary E. Mudge, a Boston lady. They have one son; Alfred X., now attending Harvard School.

LOCAL POLITICS—In 1847, the population of Chicago was 16,859. On February 16, the city limits were extended on the south to Twenty-second Street, on the west to Western Avenue, east to the Lake, and north to Sedgwick Street and Fullerton Avenue. Nine wards were created, and subsequently two more were added; the population rapidly increased, and in 1865 it amounted to 66,652 persons. By the revised charter of 1863, the territory of the city was extended to Thirty-ninth Street on the south, Western Avenue on the west, and Fullerton Avenue on the north, while to the eastward the limits included one mile of the bed and waters of the Lake. This area was divided into sixteen wards.

The following facts regarding the vote on the adoption of the new State Constitution of 1848 are taken from the files of the Chicago Daily Democrat for May and June of that year:

The vote in Cook County on the clause prohibiting escaped slaves from coming to Illinois was 400 for and 1,024 against. Comparing this with the city vote on the same, as given in the Democrat March 7, 1848, of 176 for and 1,092 against, shows the vote outside of the city to have been 362 for the clause and only 32 against it. The vote in the whole State (Democrat, April 19) was 49,666 for the clause and 26,884 against. By divisions, the vote was as follows: For the negro clause, North Division, 40; South Division, 45; West Division 47; total, 176. Against the negro clause, North Division 388; South Division 454; West Division 190. Majority against, 818.

The vote on the Constitution direct, by divisions, was as follows:

For the Constitution, North Division 170; South Division 566; West Division 154; total 986. Against the Constitution, North Division 226; South Division 319; West Division 86. Total 666. Majority for, 324.

For the 2-mill tax, North Division 164; South Division 473; West Division 193. Total 770. Against, North Division 299; South Division 145; West Division 38. Majority for, 328.

The Democrat of April 19, 1848, under the head of "Voting as yet Viva Voce," had the following:

Many appear to be under the impression that the voting at the next August election will be by ballot under the new Constitution. This is not true. Section 15 of the schedule of the new Constitution provides that the General Assembly, after their first session after the adoption of the new Constitution shall pass laws regulating the mode of voting by ballot, etc., but that until such laws are passed, the voting at all elections shall be viva voco as at present.

The Democratic City Convention of 1848 was held Monday, February 28, and resulted as follows:

For Mayor, James Curtiss, nominated on the second ballot, receiving 15 votes and L. C. Kercheval 11. For Marshal, R. C. Ross 21 votes; B. Daily 5 votes. For Collector, James Fitzsimmons 201; A. D. Taylor 7; H. Barnes 3. For Treasurer, Andrew Getzler 24; C. Taylor 2; W. Wright 2. For Attorney, P. Ballingall 21 votes; G. Manierre 2. For Surveyor, Asa P. Bradley 22; G. W. Clark 8; James Carney 3. For Auditor, Division, Nathan H. Bolles; Street Commissioner, Charles Baumgarten. Assessor, North Division, George O'Brien; Street Commissioner, Patrick Duffy. Assessor, West Division, B. Gaflly; Street Commissioner, Patrick Denny.

Aldermen—First Ward, Edward Manierre; Second, Henry L. Mack; Third, William Jones; Fourth, C. L. P. Hogan; Fifth, T. Blaney; Sixth, Joseph Berry; Seventh, Peter Turbot; Eighth, John Daley; Ninth, Samuel McKay.

The Independent Democrats and Whigs held a convention, and made nominations as follows:
the Common Council, Alderman Dodge offering the following:

Whereas, the Fugitive Slave Act recently passed by Congress is revolting to our moral sense and an outrage upon our feelings of justice and humanity, because it disregards all the securities which the Constitution and laws have thrown around personal liberty, and its direct tendency is to alienate the people from their love and reverence for the Government and institutions of our country; therefore,

Resolved, That as the Supreme Court of the United States has solemnly adjudged that State officers are under no obligations to fulfill duties imposed upon them as such officers by an Act of Congress, we do not, therefore, consider it our duty, or the duty of the city officers of the City of Chicago, to aid or assist in the arrest of fugitives from oppression; and by withholding such aid or assistance we do not believe that our harbor appropriations will be withheld, our railroads injured, our commerce destroyed, or that treason would be committed against the Government.

There is no record of what the ultimate action on this resolution was, but it was probably adopted; for the reason that a similar resolution, offered by Alderman Throop, that day, 21, 1850, found a majority of nine ayes to two noes. Alderman Throop's resolution was as follows:

Whereas, The Fugitive Slave Bill virtually suspends the Habeas Corpus Act, and the Senators and Representatives in Congress of the free States who sneaked away from their seats and aided and abetted in the passage of this bill richly merit the reproach of all who value freedom and are only to be ranked with the traitor Benedict Arnold, and Judas Iscariot, who betrayed his Lord and Master for thirty pieces of silver; therefore,

Resolved, That the citizens, officers and police of the City of Chicago be, and they are hereby, requested to abstain from any and all interference in the capture and delivering up of the fugitives from unrighteous oppression, of whatever nation, name or color.

Resolved, That the Fugitive Slave Law, recently passed by Congress is a cruel and unjust law, and ought not to be respected by an intelligent community, and that this Council will not require the city police to render any assistance for the arrest of fugitive slaves."

The amendment was accepted, and the resolution adopted as a whole by the vote mentioned.

A meeting of those who favored the law, and some who feared Congress would retaliate upon Chicago for the action of the Council, by cutting off the harbor appropriations and railroad grants, was held at the City Hall on October 23. Senator Douglas addressed the meeting, expounding the Fugitive Slave Law, and advocating it as a wise and necessary measure. Resolutions were adopted, eulogistic of the Congress, and implicitly indorsing the Fugitive Slave Bill, and B. S. Morris thereupon introduced the following resolution, which was also adopted:

Resolved, That our Senators and Representatives in Congress of the United States are entitled to our most profound gratitude for their exertions in procuring the passage of several laws at the late session of Congress, calculated to insure the completion of a railroad through the center of our State, and to restore its credit to that position it is entitled to occupy.

The people of Chicago, repudiate the resolutions passed by the Common Council of Chicago upon the subject of the Fugitive Slave Law, passed by Congress at its last session.

At a meeting of the Common Council, held the following night, October 24, Alderman Dodge moved to reconsider the action on the Fugitive Slave Law. Carried; ayes 12, noes 1. Alderman Hamilton then offered a resolution to expunge the resolutions from the record; which, on his own motion, was laid upon the table until the next meeting.

The following tabular statement shows the presidential and congressional vote by counties in the fourth congressional district in the campaign of 1848:

The Gem of the Prairie, of August 19, 1848, gave as follows the official returns of Cook County in the congressional contest between Jonathan Young Scammon and "Long John" Wentworth, and for other officials.

The preceding congressional convention, held at Ottawa, on June 6, 1848, was divided upon the slavery question, some of the delegates favoring Lewis Cass for president, and some Martin Van Buren. The convention therefore, by a harmonious agreement, adjourned without passing any resolutions. The vote in the district, as will be seen by the totals, was comparatively close. The seventeen counties then organized stood One for Cass and eight for Van Buren, each running slightly ahead of the Whig candidate.

All the votes, but six scattering ones, were cast for John Wentworth, and he was declared the unanimous nominee.

The following resolutions were adopted:

1. That the sympathies of the Democratic party are now, and ever have been, with the cause of the oppressed everywhere, and that it will never neglect any constitutional means to encourage and
HISTORY OF CHICAGO.

protect those struggling to be free who are capable of maintaining their freedom, remembering the important aid extended to this Government by foreign lands when striking for its independence; and that ample evidence of this feeling, on the part of the Democratic party, is furnished by the fact that whilst the Whig party has invariably opposed the Democrats, as invariably supported every proposition to acquire new territory or to admit new States into this confederacy.

2.—That the United States and the territories thereof should be the safe refuge for exiles from all countries, in accordance with the established policy of this Government.

3.—That the Democratic party is neither the friend nor the enemy of the Chrisant or decreed, it favors none. It pro-

4.—That the Democratic party is in favor of a strictly economical government, and of a retrenchment of public expenditures in every possible respect, and views with abhorrence the great increase under the present administration, and more especially it is alarmed at the enormous expenditures for private claims in which the officers of the Government are personally interested. And, whilst the money to meet the expense of the Government is raised from a duty upon imports, they are in favor of so levying such duties as to favor alike all classes, assisting with an equal hand the farmer and the manufacturer, encouraging mechanics and capitalists at home, opening upon the most liberal terms all foreign ports to American bread-stuffs, and uniting in a peaceful and profitable commerce all the nations of the earth.

5.—That the Democratic party is still opposed to a National Bank, and to all banks, on the part of the General Government, with banking institutions or other corporations; and that experience proves that under the present policy of receiving, safe-keeping, and disbursing the public moneys, the people’s treasury was never managed with less expense, greater convenience, or so few losses.

6.—That the delegates of this convention have heard with great pleasure of the passage of the harbor-and-river bill as an act of justice, long delayed, and that that pleasure has been increased by seeing the names of so many distinguished Democrats recorded in its favor; this fact gives a refutation to the charge of the Whigs, that because Democrats are opposed to commencing and carrying out a general system of internal improvements within the States, they are not necessarily opposed to such public works as are National, not State—general, not local.

7.—That the members of this convention have every confidence in the ability, integrity, and Democracy of Hon. John Wentworth, and believe that in his long experience in Congress, and in his proverbial habits of industry and perseverance, the people of this district have an ample guarantee that he will make a faithful and efficient member of Congress.

The area embraced in Congressman John Wentworth’s district under the census of 1850, now embraces nineteen counties.

The candidates against Mr. Wentworth in the ensuing election, held November 2, 1852, were Cyrus Aldrich, Whig, of Lee County, and James H. Collins, Abolition, of Cook County. The result by counties was as follows:

As an interesting reminiscence of Mr. Wentworth’s editorial career, and as a specimen of early newspaper art, the following extract is given; it having been issued as a carrier’s address:

Faciesnil.

The Colonel,
Mounted on his celebrated war horse Davy Crockett, and his INAUGURAL ADDRESS.

PILLOW-CITIZENS: it is hardly necessary for me to premise that I appear before you in a novel and unexpected attitude. But tremble not! For, though clothed in the habiliments of war, my governing motive is “peace on earth, good will to all men.” To be sure the step upon which I ride cannot at times like this be that of the war horse; and in my very trump, inundates the thunder of the cannon, but remember, he is a mere animal, and has caught the warlike fever of the army, without involving the moral passions and restraints of humanity. But, though hardened in his inflexibility, I can assure you he is still held by the hand of discretion. I know my steed much better than you know my master, if the signs of my glittering sword and nothing plume fill your breast with any uncouth emotions, finish, then, the least gnomon of my heart, and consider me, as ever before, your fellow-citizen and your equal whenever I shall have discovered, and, giving notice to glittering epochs, shall have retired once more to the shades of private life. Yes, fellow-citizens, rest assured that nothing would afford me greater enjoyment than more opportunities of talking to you in daily intercourse; but the imprisonment of this republic would not drive me to any other course than that of human liberty, should only be in that of injured
John Martenby
Circa 1
modesty and innocence. (Loud cheers and great waving of handkerchiefs among the ladies.)

"The war for war is my motto. For this alone have my deserts been rewarded with the rank of Colonel, and this alone will explain the glitter of my eye, the intensity of my look, the invincibility of my face; and, if you will see me, like Napoleon at the bristle of Lodii, following my command to advance, you will believe that I am the bravest, the boldest, the wisest, the fittest, being glory enough for me to have served under such a chief. And, if I did not, I might be accused of being before my time. If I might not possess a moulder until a tailor man shall himself be found to bury him and erect a monument to his memory, I would not be killed. It is only the sight of the last request, fellow-citizens, that any purty arms shall be raised for my outmoded arms. America has already accomplished many of my plans, and I have no further wishes to make. But, I have said, I am the bravest, the boldest, the wisest, the fittest, and here I remain, and I believe I can do more than throw myself upon the gratitude of these United States, at the close of General Harman's term, the nearest like him in bravery and persecution. At any rate, however, my resignation is in regard to my home, though I have no further wish to remain in my present term. But for the present, fellow-citizens, one and all, rest assured, you have property, you have means, you have power, and if you have means for anything do not make them trampled under my feet. But I may die with it in my hand, but I do not know to take good care of my horse and don't let Capt. Hunter steal my pistols."

The following, issued prior to the close of his term in 1861, was the first proclamation issued concerning the Rebellion, and the last proclamation of Mayor Wentworth, and evinces how he could write when the honor of the Nation was assailed:

WHEREAS, Rebels and traitors have taken possession of the forts and other public property of the Union, and the Constitution of the United States has been set at defiance, and men who are sure to protect them all, not only fail to discharge their duty in this respect, but have the appearance of encouraging rebellion and treason.

WHEREAS, An honorable exception to this charge is furnished in the conduct of Major Anderson, who took the responsibility, without awaiting for orders from those who would have left him in a weak position, either from a disposition to make him easy prey to rebels and traitors, or from a desire to have the support of official dignity. Behold me, then, as I, lifted above you and render ye homage to the man who doth the service of God in the face of the enemies, the German apostle. "And faith," says an Irishman, "this is the first step in a mule's career." You have heard, fellow-citizens, that republics are ungrateful. But it is certain for the men of the United States who would do the service of the Nation would make the charge, and I, in the calumny hung in his teeth, and

Whoever dare these words repeat

May 'tall oak from little acorn grow!' (Loud cries of "Bravo! Bravo!"

I make a common cause with the people, and whoever shall be the least of them, I am as much of one as the forefathers and my posterity, and Governor Carlin will find me true to the common cause. He who dare not be sure, may dare to have been a traitor to his fathers—many have gone down to the sepulchre before me, and I believe there will be thirty thousand more for all account for this. They died before their time. They had lived long enough to see the chopping of the wood. Look at that case, fellow-citizens! Suppose I had been shot, last winter, when one, fresh troops, I might have met my colleagues and captains, members, thrashed for my blood, I would not have gone down to my duty then. I believe I might have been a good soldier then. And would not man about the principles of philosophers and political economists, if this might have been the governing motive of my opponent? For I will not deliver the Union, a part of the people, and place it above all this. His keen vision, promptly, generated the long vista of time, and produced every man a little citizen has from the time before, should sit, in the Alexander, Napoleon, Washington and Jackson. In the black and white, and the red and blue, and the world, and the handkerchiefs of the ladies are waving in their white hands, the Union, one man, two men, and we will make a sacrifice of that. One man, you well know, fellow-citizens, is a man. The one of our country and nothing. Who would have fought against the cause we have fought it. You have looked around to become satisfied that none but men of wisdom and sobriety can we have a constitution. But a little man could not have ambition run away with his religion. In fact, it has always been considered as the duty of our country to kill more by doing what we will over by pitting men, though they be as high as myself. That he feared this I have no doubts. But perhaps we must kill the future by the cause. He must be as familiar with my early history, my rise and progress. (Loud cries of "What is it?"

"Tell it all, sir," I do so with pleasure."

"The History, it must and shall be preserved.

Therefore, on that day the public offices of this City will be closed, and I recommend that the business of the City generally be suspended; and that the people congregate in such places as may seem to them best, to adopt the necessary measures to declare the arms of the Federal Union to the public, and, in support of their declaration, with a firm reliance upon the protection of Divine Providence, to mutually pledge to each other their lives, their fortunes, and their sacred honor.

I also recommend that the flag of the United States be continued to be the flag of the Union, and that all the powers and companies and other organizations take such steps as they may deem due to the memory of a Jackson and the gallantry of an Anderson. At sunrise, thirty-three guns will be fired in honor of the memory of the United States, and the Union shall be a day of honor of Major Anderson, of fifty-six guns, corresponding with his age.

During the firing of these guns, the bells will be rung throughout the City. At sunset, a salute will be fired in honor of the memory of General Andrew Jackson, to the number of seventy-eight guns. During this salute, the bells will be tolled throughout the City, not so much in consequence of the loss of General Jackson (as all men must die), but because of the absence, in the General Government, of his patriotism and courage, which did not wait for overt acts among nullifiers and dissensions. In the evening, I recommend the meeting of our young men, at such places as may be best selected for them, for the purpose of all the day's work, and in order that they may be able to promptly respond to any calls that may be made upon them to aid in the defense of the Union and the Constitution.

JOHN WENTWORTH, MAYOR.

CHICAGO, 5th January, 1857.

Mayor John Wentworth was the first Mayor elected after the formation of the Republican party. The election was held on March 3, 1857, and was bitterly contested. Great disorder prevailed at the polls; voters were struck, drunkennes was prevalent and the rioting resulted in the killing of one citizen and the wounding of several others. Charles Seifert, a respectable German citizen, was killed at the second
precinct of the old seventh ward, northwest corner of Division and Sedgwick streets, leaving a wife and several children. George Armour, deceased, was one of the number who were severely wounded at the first precinct of the same ward, southeast corner of Kinzie and Wells streets.

Mayor Wentworth, in 1857, introduced the first steam fire engine, the "Long John," and in 1866, during his second administration, he introduced two more, the "Liberty" and the "Economy." It was during his administration, in 1857, that he made his celebrated raid upon "The Sands." The lawless and criminal classes had taken possession of the lake shore beach on the North Side as squatters, and erected shanties, which were the scenes of drunkenness, revels and vice of every description. The police, by order of the Mayor, razed these domiciles to the ground, burning many, and clearing "The Sands" of their lawless occupants.

Mr. Wentworth served twelve years in Congress altogether, and was Mayor of the city two terms. He introduced in Congress the first bill ever drawn in favor of the bonded-warehouse system. He early saw the importance of this question and knew legislation must be devised to control the great interests involved. February 17, 1846, in pursuance of previous notice, he asked and obtained leave to introduce a bill (No. 241) to establish the warehousing system, which bill was read a first and second time and referred to the committee on commerce, of which Mr. Wentworth was a member. The other members of the committee were afraid of the bill, and thought action ill-advised at that time, while all admitted that some day it would be a necessity and have to be adopted. Mr. Wentworth never ceased his agitation of the subject until the bill became a law. The bonded-warehouse system now in vogue, therefore, originated in Chicago. Of course New York and the great eastern cities would not let Chicago have it exactly as she wanted it; but here the system originated, and Mr. Wentworth is entitled to the credit of being its first champion.

National Issues.—The last municipal election prior to 1848, in which issues that disturbed the great National parties cut any figure, was in the spring of 1846, when John P. Chapin, Whig, was elected Mayor over Charles Follansbee. The latter was defeated by the Irish Democrats, who bolted his nomination because he was one of the signers of the "Native American" petition, which favored an enactment requiring twenty-one years' residence in the country of all foreigners before they could become naturalized citizens. The Democrats re-united in 1847 and elected James Curtiss as Mayor, and in 1848, and again in 1849, elected James H. Woodworth to the office. In 1851 and 1852 Walter S. Gurnee was elected Mayor, and in 1853 Charles M. Gray. The Democrats were so greatly in ascendency that no strong and well organized opposition was offered to their candidates, and there was no real party issue. In 1854, Isaac L. Milliken was the successful Mayoralty candidate of his party. There was a genuine surprise in store for the electors in the following year, when Dr. Levi D. Boone, who was a pronounced "Know Nothing" and opposed to foreigners holding office, was elected by a decisive majority, together with a full "Know Nothing" Council. The election was an exciting one, and created differences and engendered ill-feeling between many good and staid citizens that did not subside for years afterward. A newspaper called the "Native American," was published by W. W. Danenbower, father of Lieutenant Danenbower, celebrated for his connection with the Arctic expedition of 1853, in which the names of Philip A. Hoyne and other prominent citizens were published as of foreigners holding office. The paper ceased to exist after being published for one year. W. W. Danenbower and Dr. Levi D. Boone were presidential electors on the Fillmore ticket in 1856. The ticket received 37,531 votes in the State as against 96,278 for John C. Fremont and 105,528 for Buchanan. The Democrats had a majority in both houses of the State Legislature, Samuel Holmes was elected Speaker of the House over Isaac N. Arnold, by a vote of 36 to 28.

An account of the riots which made Mayor Boone's administration memorable is given in Volume II. In 1856, Thomas Dyer, Democrat, defeated Francis C. Sherman, who was placed at the head of his ticket as an anti-Nebraska Democrat, in order to take advantage of a sentiment which at that time was believed to hold sway over a majority of the voters. The ticket was called "Nebraska Nothing" except Mr. Sherman, and his nomination was mainly due to the efforts of John Wentworth, who gave him the unqualified indorsement of the Chicago Daily Democrat. The following year "Long John" was elected Mayor, on the issues involved in the inevitable political struggle. The Republican party in Chicago was just fully formed, and with the new principles for a platform and Mr. Wentworth's personal popularity, the ticket won a decisive victory. John C. Haines, Republican, was elected Mayor, in 1858, and re-elected in 1859; and in 1860 "Long John" was again elected to the office. Sectional issues began to run high about the close of his term, and in March, 1861, Julian S. Rumsey, who had been selected by the Republicans as their candidate, met a vigorous and bitter opposition, but he was successful, and was known as the first "War Mayor." In April following his election, Mayor Rumsey, in company with Stephen Clary, president of the Board of Trade, at the head of a committee of one hundred, started for Washington, to see if it were not possible, by wise counsels, to avoid a conflict with the South. As members of this committee were such well-known citizens as Richard Wilson, of The Evening Journal, George H. Phelps, Joseph Clarkson, Philip A. Hoyne, W. D. Houghteling, Tertius Wadsworth, Dwight Booth, William F. Tucker, W. C. D. Grannis, Norman B. Judell, Isaac N. Arnold, and many others. They were entertained in the Senate restaurant, upon arriving at Washington, by Stephen A. Douglas and John F. Farnsworth, who, on account of the radical difference of their politics, were not on speaking terms. The committee called on William H. Seward, General Winfield Scott, Andrew Johnson and other notables, but received small encouragement that hostilities could be averted. The second day they waited upon President Buchanan, and were received by him in the blue-room of the White House. The committee were assured by Mr. Buchanan that he was doing all in his power to heal up the sectional troubles without recourse to arms; but many of them felt, firmly convinced that the President believed the country had grown so large and the interests so diverse that separation was inevitable. They had joined by Charles M. Larrabee, a bright but somewhat erratic lawyer, and a member of Congress from the La Crosse, Wis., district, and as they were about to leave the President's presence, Congressman Larrabee upbraided him by saying: "If you had not forced the quarrel against Douglas in our own party this trouble would now be upon the country." Buchanan did not lose his temper, but replied with great earnestness, that Democratic party politics had
nothing to do with the attitude of the South, where the chivalrous spirits that led the people believed they were contending for as vital a principle of liberty as the people of the North were. The President closed the interview by saying that it used to be thought that the Democratic party could not survive after Jackson, and now thought it could not live without Douglas. He warmly denied, however, that he had precipitated the quarrel with Douglas.

Every reader interested in the political history of Chicago is informed upon the subject of the Douglas and Lincoln Debates, which occurred in 1858. Mr. Lincoln was a frequent visitor to Chicago, and took an active interest in politics, as will be noted by his presence at the Tremont House Anti-Nebraska Caucus in April, 1854. Mr. Douglas made his first public appearance in Chicago in 1850 taking up his residence here in 1847. In a speech, on October 24, 1856, he defended the Compromise and Fugitive Slave Bills, and denounced the principles which became embodied in the Kansas-Nebraska Bill, in 1854. In 1854 occurred what various chroniclers have termed the "mobbing," or denial of the right of free speech, to Douglas at North Market Hall. Many maintain that Douglas was not insulted or interrupted except by persons in the audience asking him questions which they desired him to answer.

Mr. Douglas was nominated for President by the Democratic National Convention at Baltimore, on June 18, 1860. Mr. Lincoln was nominated by the Republican National Convention, which assembled in the Wigwam Building, southeast corner of Lake and Market streets, on May 16, 1860.

There were four Presidential and four State tickets in the field. The Lincoln and Hamlin electoral ticket was headed by Leonard Swett. It received 171,117 votes in the State, and of the number, 14,785 were given to Mr. Lincoln in Cook County. Among the Douglas and Johnson electors were S. Corning Judd, James L. D. Morrison and Calvin A. Warren. The highest vote the ticket received in the State was 155,257, and in Cook County, 9,516. The Bell and Everett electors received 4,851 votes in the State and 107 in Cook County. This ticket was called by many the "Straight Whig" ticket and by others the "Constitutional Union" ticket, the latter from the convention of twenty States that met in convention at Buffalo, on May 16, 1856, and the Free-Soil ticket, called the Bourbon, or Southern Democratic ticket, received 2,258 votes in the State and 87 of them were cast in Cook County. In this election, Isaac N. Arnold, Republican, defeated Augustus M. Herrington, Douglas, in the House of Representatives, getting 10,971 votes in Cook County, to 9,791 for Herrington, who ran slightly behind Douglas. The total vote for Congressman in the district was 47,856, of which Arnold received 30,534; Herrington 16,950, scattering 2,729.

The Twenty-second General Assembly convened on January 31, 1860. The Chicago delegation numbered William B. Ogden in the Senate; and in the House, J. Young Scammon, William H. Brown, S. M. Wilson and Homer Wills. April 23, Governor Richard Yates convened the General Assembly in extraordinary session, to take action upon President Lincoln's call for 75,000 men to put down the rebellion and preserve the Union. Governor Yates in his message to the Assembly, in referring to the services rendered him in his efforts to raise troops and money, said:

"Our principal city (Chicago) has responded with contributions of men and money worthy of her fame for public spirit and patriotic devotion. Nearly a million of money has been offered to the State, as a loan, by our patriotic capitalists and other private citizens, to pay the expenses connected with the raising of our State troops and temporarily providing for them."

Lyman Trumbull, who had just been elected United States Senator, and John A. McClernand, who had been returned to Congress from the sixth district, ably ad

dressed the Senate and House in January in favor of the prosecution of the War and crushing the rebellion.

The patriotic principles and generosity of disposition of Senator Douglas were exemplified by his visit to President Lincoln shortly after his proclamation calling for 75,000 troops had been issued, and his assurance to his Excellency that he would be successful in raising the requisite 75,000 men as long as his country was in peril. It was then the famous "Douglas dispatch" was formulated and sent to the country through the medium of the Associated Press. It was as follows:

April 18, 1861, Senator Douglas called on the President, and had an interesting conversation on the military situation of the country. When the subject arrived of the maintenance of the Union, Senator Douglas stated he was confident that he could successfully preserve the Union, that he would not yield an inch of territory to the Confederacy. A firm policy and prompt action was necessary. The President was in favor of maintaining the Union, and asked to be sent to the South to see the situation. Mr. Douglas replied: "No, Mr. President. It is a case of necessity, and we have no time for a visit to the South." The President at once requested that Mr. Douglas would send a letter to the Southern States, requesting them to desist from secession and to preserve the Union, and he proposed to have the same published in the newspapers of the North. Mr. Douglas consented, and the following letter was written:

The General Assembly of Illinois having passed a joint resolution requesting Senator Douglas to address them on the great issues of the hour, he arrived at Springfield, and addressed the two houses on April 25. The following are excerpts from the speech:

"For the first time since the adoption of the Federal Constitution, a widespread conspiracy to-establish the best government which can be superadded to the most magnificent form of government that exists in the world has reached the ears of the country. The whole political system of the Union has been violently attacked and now is in danger of being overthrown. An invading army is marching upon Washington. The fugitive slave law is enforced from the very centers of the State of Illinois, that by the first of May the rebel army will be in possession of the National Capitol, and by the first of July the National independence will have been destroyed."

The only question with us is, whether we will surrender to this conspiracy the last vestiges of our sovereignty, or, by a loud and an unqualified expression of views, resist with all our resources and strength the incursions of our enemies. And here I would ask, do you think it will be expected of you, on behalf of this Republic, to act like a minister of a monarch, and to yield the life of the Union as you would a life of your own, the life of your children, the life of your country, the life of your children's children? Such a course is beyond the power of every man to determine. It is not an easy task to decide whether it be better to be conquered, or to sacrifice the best of all worlds, to secure the other. But I do not say, my friends, that it will be easy to sacrifice the Union."

Arrangements were made for an immense mass meeting to be held at the Wigwam Building, in Chicago, and Mr. Douglas was asked to address the assemblage. He went direct to Chicago from Springfield, and addressed the meeting, saying:

"I beg you to believe that I will not do you or myself the injustice to think that this magnificent event, this astonishing demonstration, is merely that it expresses your devotion to the Constitution, the Union and the flag of the Republic. I will not content myself with the vast audience presents—that whenever political differences or party questions may have divided us, you yet had a conviction that, when the country should be in danger, they could be united. That is now the great question. It is the present danger which I am addressing you about."

"Are we to submit to this government or resist? There is a question involved. Are we to submit to the invasion of the Union and the independence of the States that compose it, or are we to resist? The question is, Are we to allow this government to be continued?"

"I was present at the inauguration of President Lincoln, and I was present when the document was read, and I was present when the manifesto was given you. I am here to answer the question, what is the opinion of our country in respect to the present struggle?"
HISTORY OF CHICAGO.

This was the "Little Giant's" last patriotic appeal to his countrymen. At its close he went to his rooms at the Tremont House, was taken ill, and died on June 3, 1856.

The first real break of the Democratic grasp upon the politics of the State, in which prominent Chicago men took an active part, was at the time of the Kansas-Nebraska excitement. In the Senate of the XIXth General Assembly, which convened January 1, 1855, were Norman B. Judd, Burton C. Cook and John M. Palmer, all Anti-Nebraska Democrats. A United States Senator to succeed Senator James Shields was to be elected. Abraham Lincoln was the big candidate and General Shields the Democratic. The balloting began in joint session February 8, and resulted as follows:

1st ballot—Shields, 41; Lincoln, 45; scattering, 13.
2d ballot—Shields, 41; Lincoln, 45; scattering, 15.
3d ballot—Shields, 41; Lincoln, 41; scattering, 16.

On the second ballot General Shields' name was withdrawn and that of Joel A. Matson substituted. The result was, Matson, 44; Lincoln, 38; scattering, 16.

At the third ballot, Lincoln's name was withdrawn, and on this ballot Matson received 47; Lyman Trumbull, 35; scattering, 16.

The result of the tenth ballot was, Trumbull, 51; Matson, 47; scattering, 15; and Trumbull having received a majority of all votes cast, succeeded the senator-elect.

It is related that when Mr. Lincoln found that he could not get the votes of Messrs. Judd, Cook, Palmer and that of Henry S. Iaker, an Anti-Nebraska Whig, who would secure his election, he, while standing in the lobby, reached over and directed a member of the House to withdraw his name, which, being done, Trumbull was elected on the succeeding ballot.

Lyman Trumbull was re-elected United States Senator, on January 10, 1856, by a vote of 46; The Republicans had a majority in both branches of the Legislature, and it was the first time in the history of the State that any party other than the Democratic had a majority in both houses.

On January 15, 1857, Mr. Trumbull was again re-elected United States Senator, this time defeating T. Lyle Dickey by a vote of 76 to 33.

Senator Douglas challenged the manner in which the first election of Trumbull was brought about in his second joint debate with Lincoln, at Florence, on August 27, 1857. These two giants of the stump had debated before this at Chicago. On July 9, at Chicago, Douglas made a deliberate and carefully phrased criticism on Lincoln's speech of June 16, and the following day (July 10), Lincoln made a brief review of Douglas's speech of the 9th. This preliminary crossfire of words led to the challenge of Douglas to a joint debate by Lincoln on July 24. Challenge and reply were written in Chicago, both at the Tremont House, and Lincoln's challenge was handed to Douglas by Norman B. Judd, who then represented Cook County in the State Senate. Douglas fixed upon the places of meeting, and Lincoln accepted the list on July 31. In his address at Freeport, Mr. Douglas said:

In 1854, after the death of Clay and Webster, Mr. Lincoln, on the part of the Whigs, nominated to the anti-Slavery Whig party, to dissolve it, turning the members into the Abolition camp, and making them train under Abolition leaders. Trumbull undertook to dissolve the Democratic party, by taking them into the Abolition ship. Mr. Lincoln was aided in his efforts by many leading Whigs throughout the State; your member of Congress, Mr. Washburne; the next most active, Mr. Foraker of Ohio, and Mr. Lincoln's general, Mr. Sumner of Massachusetts. The Whigs having agreed to put a man named Senator, Mr. Lincoln being elected. The Whig party, as you all know, was an offshoot of the old time Democratic party, had been an old time Whig, in order to cope with the Whigs, and Trumbull seemed to be in a position to do both. Senator, Mr. Lincoln pre-

hands upon. The voice of the people is the voice of God. It is authoritative with God. That voice will be heard. That voice will be obeyed. That voice will be followed. That voice will be true. That voice will be right. That voice will be the voice of the living God. Whatever the fruits of this meeting will be. I hope it will not be an execration for the society and the people of each. I desire to see your companies and train them at home for any emergency which may occur. I want you to see the worthy mer- chant and gentleman of New York, who have been in Washington, and to ask the lawyers, the doctors, the physicians, come down with the names of men of war to aid the men who are fighting. I want you to go, and to show the men at home. I see before me at least a regiment of the 23rd Illinois. What are you doing here? You've all get your property at the post office.

A. B. E. N. O. L. D. S. SPEECH. — From the Nation's capital, all through the South to Illinois and Indiana, the vast uprisings of the people, with a fixed, stern determination, at any cost, to effect the object, to destroy the State's rights and the civic condition of the Northwest, and the city of the Northwest, that the zeal and energy of patriotism is most active and most intense.

Illinois is nipping for itself and her children a glorious record. She has been the first State to arise in the Mexican war, and has from the very beginning provided a plenty of men to work for the public good. Now, there is a sentiment stronger than the last, and that is the last of the people, and every man who is a loyal citizen, wherever he may be, will stand by his native land, and will work for her welfare and prosperity for the future.

The suicide of slavery is being enacted before our eyes. The curbed barbary, the war-like spirit, the feeling of nationhood, the struggle of life, the determination of the people, the fear of the future, the hope of the past, are all given to it the moral wound; yet no timid northern dough-face attempt to stay the hand. But the National government is in the hands of the people. We would do more for the gallant Germans, the countrymen of Silesia and the Frenchmen of the Rhine, than we have ever been permitted to do. And we shall not fail to give them the means to share in the benefits of the protection and the welfare of the Union.

The records in the office of the Adjutant-General of the State show that Cook County furnished 23,456 soldiers for service in the immoral struggle for union and liberty.

It is a notable thing that the three speakers at this meeting were re-elected to Congress from their respective districts in the ensuing November election by increased majorities. Isaac N. Arnold, was elected over Francis C. Sherman, Demo- cratic candidate, to represent the first district of Cook County. F. Farnsworth defeated Neil Donnelly, Democrat, in the second district, receiving 12,612 votes to his opponent's 4,785. Owen Lovejoy was returned from the sixth district over two opponents, the vote being 11,683; Thomas J. Henderson, 11,020; Benjamin Graham, 617.

In the election for delegates to the convention to frame a new State Constitution, which took place in November, 1861, and the Chicago representatives elected were John Wentworth, Melvillie W. Fuller and Elliott Anthony. The Democrats had a majority of fifteen in this convention over Republicans and Fusionists. The Convention, however, undertook a number of extraordinary acts, among others an ordinance appropriating $250,000 for the benefit of the sick and wounded soldiers of Illinois, but Governor Yates held that the duties of the Convention were simply to frame a new Constitution, and he refused to recognize the legality of any other act.

The new Constitution, as submitted to the voters for adoption, provided that no negro or mulatto should migrate to or settle in Illinois, nor should any negro or mulatto have property, or hold, vote or hold office in this State. These articles were voted upon separately and both were carried by large majorities, while the balance of the Constitution was defeated by a majority of 25,515 in the State.

In the summer of 1864, the third year of the War, the peace movement had reached its height. Many eastern papers had been deploring "coercion" measures for months, without cessation. In Illinois the Democratic Legislature had passed a "peace" resolution in the spring of 1864, against which the minority had made a hopeless fight with a counter resolution. Owing to the bitterness of feeling and the danger of having all of the war measures undone in this State, Governor Yates had proroged the General Assembly until January, 1865. The Democrats in a speech to the people had pronounced this action unconstitutional and "would pay any price" Democrats had been re-inforced by the stay-at-home Republicans. Clement L. Vallandigham, the Ohio apostle of peace, was making speeches in the West calling for a cessation of hostilities. He spoke to a large concourse of people in the Court House Square, and was replied to by John Wentworth. The following reference to this meeting, together with Mr. Wentworth's reply, is from the Chicago Tribune of August 28, 1865:

On the retirement of Vallandigham from the stage, the crowd called for "Long John," who, "Wentworth," with two names being synonymous in Chicago during the war, was immediately and applauded police officer, and whereupon the Uprising of the People, with a fixed, stern determination, at any cost, to effect the object, and destroy the State's rights and the political condition of the Northwest, and the city of the Northwest, that the zeal and energy of patriotism is most active and most intense.

M. C. seiisi to-day in the service of the Board of Trade. You would have noted, and your efforts will tell in all the Northwest, and he felt within the loyal States, and I do not doubt the gallant soldier you raise will go to follow the barbarians in arms against our country.

Every great war has underlying it a great idea. What is the great idea which governs and insures victory in this war? It is our nationality. The grand idea of a great continental republic, ocean bounded, and extending from the lake to the sea, commanding the respect of the world, is an idea implanted deep in the American heart, and it is one for which every American patriot will fight, and it is one which the whole Union, and the people of the Northwest, will not see this grand Republic split up into contemptible Mexican prov- inces. It is a great national idea, and it is one which every man in the Union will see, and every man of the Northwest will see, and every man of the people in the Northwest will see, and will be the cause of the Northwest being forced into a state of national and, and every man of the Northwest will see, and every man of the people in the Northwest will see, and will be the cause of the Northwest being forced into a state of national and—becoming every day stronger—is another, that this grand Republic will be one and indivisible.

The suicide of slavery is being enacted before our eyes. The curbed barbary, the war-like spirit, the feeling of nationhood, the struggle of life, the determination of the people, the fear of the future, the hope of the past, are all given to it the moral wound; yet no timid northern dough-face attempt to stay the hand. But the National government is in the hands of the people. We would do more for the gallant Germans, the countrymen of Silesia and the Frenchmen of the Rhine, than we have ever been permitted to do. And we shall not fail to give them the means to share in the benefits of the protection and the welfare of the Union.

HISTORY OF CHICAGO.

at this session the “black laws” were repealed, and appropriations were made for the care of soldiers’ orphans and for the purchase of the tract in which the remains of Stephen A. Douglas were interred.

The following memorial was sent from Chicago:

MEMORIAL OF THE PUBLIC MEETING OF THE CHRISTIAN MEN

To His Excellency, Abraham Lincoln, President of the United States:

Your memorialists, of all Christian denominations to the City of Chicago, being of opinion in solemn convention assembled, do hereby humbly pray, that the President of the United States, being our chief magistrate, may be moved to...
in the slave State less extensive and influential than before. But the memo-
reformists of the country have been more advanced in these dispu-
ties. The present is the period of new and advanced action by the President in behalf of the country such as was required by the circumstances of oppression, and the need for action, to be seen that if success in our military affairs was supposed to render such action unnecessary, it is evident that it will become all the more an idle word and God's voice of remonstrance and warning an unmeaning utterance.

What is presented in the memorandum is one upon which I have thought much for weeks past, and I may even say for months. For a long while I was aware of the fact that by religious men, who are equally certain that they represent the Divine will, there is a higher class is malaria and with increased belief, and perhaps in some respects both. I hope it will not be irreconcileable

In disordered the bond, must People's suppose that $507,703.58. April, yet was a wave

The date 1871, it, A. cry Fondly were wringing to which I was connected with a county, it might suppose it would reveal it to be seen that I was more inclined to and was not inclined to and was more inclined to delude myself than I often am. I am inclined to believe that I am often deluded, but not very far in that matter, and if I can learn what I can do, I will do it. But there are the days of drizzle and the days of rain. The
derain appears to be wised right. The subject is difficult and good men do not agree. The

The council had to a great deal more knowledge, I fear, than our own copies, and expecting God to favor their side.

Would I not open the door to slavery, when I cleft not even the Constitution in the rebel States? And what reason is there to think that it would have any greater effect upon the slaves than the late law of Congress, which offers protection and freedom to the slaves of rebels who come within our limits? And suppose they could be induced by a proclamation of freedom from me, to throw themselves upon us, what should we do with them? Under-

stand, I raise no objections against it, on legal or constitutional grounds; for as Commander-in-Chief of the army and navy, in time of war, I suppose I have a right to any measure which may best subdue the enemy. Nor do I urge that this be done in the interest of possible consequences, instruc-
tion and measure at the North. I view the matter as a practical war

The committee returned, hoping that their mission would not be in vain.

Upon the face of this petition of the Christian men of Chicago, as contrasted with the President's subsequent act, it is not presuming too much to believe that it had great influence in his conclusions and in directing his course.

This petition was more fully answered by President Lincoln in his address and by his utterances later on in the course of the next annual tax seal, of April 4, 1864, to A. G. Hodges, of Franklin, Ky., he said:

DEAR SIR:—You ask me to put in writing the substance of what I verbally stated the other day, in your presence, to Governor Brumfield and Senator Pettus, as follows:

I am a naturally anti-slavery, if slavery is not wrong, nothing is wrong. I can only see what is right and not what is felt; and yet I have come to the belief that the presidency conferred upon me an unrestrictive right to the possession and protection of my ability, a right to the possession and protection of my ability, to preserve and defend the Constitution of the United States, and, therefore, the country's ability to do so, without taking the oath.

But the Constitution does not authorize me, as a citizen, to control my allegiance to the Union, or to declare that the Constitution is not the law of the land. The Constitution is the law of the land, and I am bound to support it, as the law of the land.

It may seem strange that any man should dare to ask a just God's assistance to perform a moral duty, despite whatever others have done. We judge not, that we do not judge. The prayer of both shall not be heard—of neither has been answered. The Almighty will do his own work. But I do not know that God, who is true and righteous altogether.

In April, 1862, Francis C. Sherman was elected Mayor as a Democrat and in 1863-64, when the two years' term began, he was re-elected. In 1865, John B. Fire, a member of the Republican ticket: the assassination of Lincoln blackened any other candidate's hopes might have had; and as public sentiment and sympathy were universal in the one direction, Mr. Rice was elected without opposition. Mr. Rice served the two years' term and was re-elected for two years more in 1867. On March 10, 1869, the General Assembly passed an act dividing the city into twenty wards and changing the name of the city election from April to November. Mayor Rice and his colleagues continued in office until the first Monday in December, 1869. In the November election, Roswell B. Mason was elected Mayor on the "People's ticket." Corruption was rampant, and the press united with the best citizens in forming and supporting a People's Party. At the close of Mayor Mason's term, in the fall of 1871, the remainder of the party which had elected him formed what was called the "Fire-Proof" ticket, at the head of which, for Mayor, was Joseph Medill, editor of the Tribune. It was during the last year of Mayor Mason's administration that the city was almost oblitered and municipal government disrupted for the first time by being the great fire.

The fire of David A. Gage, the City Treasurer, was an additional calamity. While charges of corruption were made without reserve during Mayor Mason's term, and Gage had been elected on the first People's ticket, and again on the Fire-Proof ticket, it was not yet known, in 1871, that he was a defaulter to the enormous amount of $537,703.58. It is believed to be behind him rallied, and forced his renomination on the Fire-Proof ticket, in order to hide the true condition of affairs. Gage was known sufficiently about the city as "A. Gage," and it has been frequently observed that rottenness in city politics began with the election of the first "good fellow." The destruction of the City Hall, public departments and records, the water works, and other improvements, together with the destruction of Gage, involved the city in debts from which the process of recuperation was slow and expensive. Various quantities of city "scrip" were issued by successive administrations, and the principal part of the cash collected from tax levies was required to pay the interest on the bonded debt and to redeem this scrip. The tax levy after the fire was reduced to 10 mills, which left the treasury in a disordered state. The Constitution prohibited the city from borrowing beyond the limit of the next annual tax levy, and to avoid this restriction and yet obtain funds, the Council of 1872-73 issued city scrip in a lavish manner.

During the first part of his term Mayor Medill was opposed to the closing of the saloons on Sunday, but being urged by Citizens' Committee of fifteen, requested the City Council to pass a law prohibiting the sale of intoxicating liquors on Sunday. On February 1871, the City Council passed a law closing the saloons on Sunday, and in January 1872, the City Council closed the saloons for Sunday. In his veto message, Mayor Medill said he did not believe a majority of the people wanted liquor sold on Sunday, and would like to see the question put to a popular vote.

In November 1873, the popular vote was taken, and the result was the election of Harvey D. Colvin, Democrat, over L. S. Bond, Republican, the latter having been nominated by the weakened party represented by the Fire-Proof ticket. Besides a demand for reform and economy, other issues entered the election. The reform element demanded Sunday and midnight closing of the saloons and other restrictions, which a large foreign element deemed an infringement upon their rights. The "personal liberty" cry was raised, and Mr. Colvin announced that he would not run as a Democrat, but as a Liberal candidate. The national campaign of 1868 opened at Chicago in May. General U. S. Grant, of Illinois, and Schuyler Colfax, of Indiana, were nominated here by the Repub-
The American National Convention on May 20, for President and Vice-President. The Democratic National Convention was held at New York on July 4, and Horatio Seymour was nominated for President and Francis P. Blair for Vice-President. Local issues were last sight of in National questions. John M. Palmer was the Republican candidate for Governor, and John R. Eden the Democrat. John A. Logan was the Republican, and William W. O'Brien the Democratic, candidate for Congressman-at-large. Logan's vote was 249,422 in the State and O'Brien's 199,789. In the first Chicago district, Norman B. Judd, Republican, defeated M. R. M. Wallace, Democrat, for Congress by a vote of 27,414 to 19,233, and in the second district, John F. Farinworth, Republican, defeated A. M. Herrington by a vote of 26,725 to 6,397. The Seymour electoral ticket received 199,143 votes in the State, and the Grant electors 250,297.

John C. Gore and Jasper D. Ward were elected to the State Senate of 1869, from the Chicago districts, and Cook County was represented in the House by H. B. (Buffalo) Miller; L. L. Bond, J. S. Reynolds, F. Munson, John C. Knickerbocker, Iver Lawson and E. S. Taylor the latter a resident of Evanston. James P. Root, of Cook, was elected clerk of the House over J. Merrick Bush, of Pike County, by a vote of 56 to 23.

Delegates having been elected to a Constitutional Convention, to amend, alter or revise the State Constitution of 1848, which the State had outgrown, the Convention met at Springfield on December 1, 1869. The delegates from Cook County in this Convention were Joseph Medill, S. S. Hayes, John C. Haines, William F. Coolbaugh, Charles Hitchcock, Elliott Anthony and Daniel Cameron. A Convention was framed which has been pronounced one of the best instruments of the kind ever devised for the government of any commonwealth.

The State campaign of 1870, was spiritless, devoid of issues and interest. The principal contest in Cook County was that between Charles B. Farwell and John Wentworth for Congress, in the first district, which is aliunde to elsewhere. Farwell defeated Wentworth, his vote being 20,342, to the latter's 15,025.

In the second district, John F. Farinworth was re-elected, receiving 8,396 votes to 6,516 for J. C. Stoughton and 2,429 for Richard Bishop.

The new Constitution provided for increased representation, and the XXVIth General Assembly of 1871 was the largest ever convened at the capital, consisting of fifty senators and one hundred and seventy-seven representatives.

On October 13, this Legislature, in accordance with the proclamation of Governor Palmer, issued October 15, met in special session to take action with reference to the great calamity of the Chicago fire. The cry of homeless thousands for help had gone forth, and the needs of the crippled municipality were urgent. The emergency was great, and Governor Palmer notified all members of the Senate and House, by telegraph, of his proclamation, and at the appointed time they were in their seats, ready for action.

A clause in the new Constitution of 1870 forbade all special legislation, and there was great doubt as to the ability of the Legislature to take effective and legal action for the relief of the stricken city. Governor Palmer, however, recognized the fact that something must be done, and he issued a message, in which he pointed out the manner in which relief might be afforded. The Legislature had passed an act, in 1865, providing for the completion of the Illinois and Michigan Canal in pursuance of the plan adopted by the State in 1836, and intrusting the work to the City of Chicago, restricting the expenditure to $2,500,000, which was ultimately to be paid by the State. The city had already expended in this work the full amount limited by the act of 1865, and the Legislature, pursuant to Governor Palmer's advice, promptly made an appropriation of $5,000,000 covering principal and interest of the investment, to re-imburse the city, on the payment of which the Canal was surrendered to the control and management of the State. In his outgoing message Governor Palmer referred to the clash of the State and Federal governments at the time of the Chicago fire, in regard to the respective duties of each at that time. Governor Palmer contended that the State was able to preserve order and protect the property of its citizens, and that the National authority, if exercised at all, was to be subordinate to the State authority.

In the Assembly of 1873, Daniel Shepard, of Cook, was elected clerk of the House over Joshua L. Marsh, of Cook, by a vote of 86 to 61.

John L. Beveridge, who had been elected Lieutenant-Governor in the fall of 1872, became Governor through the election of Governor Oglesby to the United States Senate. Lyman Trumbull was Governor Oglesby's opponent for the Senate, but he was defeated, receiving 62 votes in joint session to 84 for Oglesby.

The State campaign of 1874 did not awaken much interest or enthusiasm in Chicago. The Liberal Republican, or Greeley party, had ceased to be a political factor, such men as Joseph Medill retreating back to the Republican fold, and the few Democrats who had voted for Greeley renewing their older affinities. Out of the scattered remnant of the Liberal movement was formed the Anti-Monopoly party.

The vote for the respective candidates in the Chicago Congressional districts was as follows:

First District, Bernard G.CAulfield, Dem., 10,211; Sidney Smith, Rep., 9,803.
Third District, Charles B. Farwell, Rep., 8,177; John V. LeMayne, Dem., 7,991; Francis A. Hoffman, Jr., 139.

In the ensuing General Assembly of 1875, the Democrats, by a fusion with the Independents, gained a majority of both houses. Jere J. Crowley, of Cook, was elected clerk of the House over Daniel Shepard, by a vote of 81 to 68.

This Legislature passed the act for the reorganization of cities, under which Chicago subsequently became reorganized as a municipality.

The Greenbackers had become sufficiently organized throughout the State, in 1875, to take an active part in the campaign. They favored action on the part of the Government which would make and keep the paper, or "Greenback," money, in our standard National currency, and were opposed to the resumption of specie payments. The party was made up of original flat or paper-money men and the scattered followers of the Liberal and Anti-Monopoly movements. They nominated a State ticket, and the party also had a National ticket in the field, nominated May 17, at Indianapolis, with
POLITICAL HISTORY.

Peter Cooper, of New York, for President, and Samuel F. Cary, of Ohio, for Vice-President.

The Republican State Convention nominated Shelby M. Cullom for Governor, Andrew Shuman, of the Chicago Evening Journal, for Lieutenant-Governor, and James K. Edsall for Attorney-General. There were no Chicago men on the Democratic State ticket.

The Republican National ticket, nominated at Cincinnati on June 14, contained the names of R. B. Hayes, of Ohio, for President, and William A. Wheeler, of New York, for Vice-President; and the Democratic National ticket, nominated at St. Louis on June 17, the names of Samuel J. Tilden, of New York, for President, and Thomas A. Hendricks, of Indiana, for Vice-President.

At the outset, the campaign on the Republican side was spirited and tame, while the Democrats generally were well pleased with their ticket, and entered at once into a vigorous and sustained canvass. The usual Republican majority in the State was greatly reduced.

The vote in the State, on Lieutenant-Governor, was, Andrew Shuman, Rep., 278,167; Archibald A. Glenn, Dem., 255,970; James H. Pickrell, Greenback, 18,553.

On the Hayes ticket, for electors, were the names Peter Schuttler, George Armour and Louis Schaffner, of Chicago; on the Tilden ticket, William F. Coolbaugh, Thomas Hoyne, S. S. Hayes and Arno Voss; on the Cooper ticket, A. J. Grover, A. C. Cameron, John M. Thompson and A. J. Streeter. The highest vote in the State for the Hayes electors was 278,321; for Tilden, 258,601; Cooper, 18,241.

In the Congressional districts the vote was as follows:

First District, William Aldrich, Rep., 16,578; John R. Hoxie, Dem., 14,101; George S. Bowen, Greenback, 486.
Third District, Lorenz Brentano, Rep., 11,722; John V. LeMoyne, Dem., 11,435.

The Republicans and Independents united and organized the XXXth General Assembly of 1877. Lieutenant-Governor Shuman entered upon his duties as presiding officer of the Senate on January 9.

An exciting contest resulted when the two houses met, on January 18, to select a Governor for a United States Senator. John M. Palmer was the Democratic caucus nominee and John A. Logan the Republican.

On the first ballot the vote stood: Logan, 99; Palmer, 88; William B. Anderson, 7 senators; David Davis, 6 representatives.

On the twenty-second ballot Governor Palmer's name was withdrawn, and on the taking of the ballot the result was, Logan, 99; W. B. Anderson, 85; John C. Haines, 7; William C. Goady, 7; scattering, 4.

On the twenty-fourth ballot the name of General Logan was withdrawn, and on the ensuing ballot the result was, David Davis, 97; C. B. Lawrence, 86; John C. Haines, 7; scattering, 8.

On January 25, a total of 200 votes were cast, and on the fourth ballot the result was, David Davis, 101; C. B. Lawrence, 94; John C. Haines, 3; John A. Logan, 1; William H. Parish, 1.

David Davis, having received a majority of all the votes cast, was declared the duly elected Senator.

In the campaign of 1878, the Greenback party again placed a State ticket in the field, and the contest in Chicago and Cook County, as elsewhere, was a triangular one, but devoid of excitement or interest, except in Cook County, where the Socialists ran candidates in most of the districts, thus narrowing the majorities between the parties down to a close margin.

The candidates, and the votes polled by each in the Chicago Congressional districts, were as follows:

Second District, George R. Davis, Rep., 10,347; Miles Ke-
On May 26, 1850, seven days prior to the meeting of the Convention, the convention chamber was turned over to a subcommittee of the National Committee; and upon the assembling of the Convention, General William E. Strong was unanimously elected sergeant-at-arms.

The Convention is worthy of mention at length, for the reason that it was the great Convention of the Republican party and fairly inaugurated the Era of Conventions in Chicago. The efforts of the supporters of James G. Blaine to nominate that great leader and opponent of the movement of the recent men in the "Old Commander;" the gallant stand of the "396;" the "Third Term" cry; the fact that Elihu B. Washburne was made an unwilling candidate in Cook County against Grant; and that the leaders of the Convention were caused by partisanship in Illinois—all contribute to make it of the greatest local importance.

It is even maintained by many politicians that the defeat of Mr. Blaine, and the downfall of the Republican party four years later, can be traced to the differences growing out of this Convention.

During the first day's proceedings of the Convention, General John A. Logan introduced the following resolution:

Hundred, That the committee on the distribution of tickets be invited to furnish the following: 5,000 tickets to the Illinois delegates, and 1,500 to the Convention of the American voters. And,

GENERAL LOGAN then said: "I desire to say one word, sir, in reference to this resolution. The candidates have made a movement in the City of Chicago, and are here, and have expected that at least they would be treated as they have been in other places. In 1846, in the Convention, I was chairman of the Veteran Association, and hurried into the Nation, and I find that 1850 is the same. Therefore, the resolution was made to the National Committee for its admission to this Republican Convention, and I am the first of the truth of the statement—and it was voted down in that committee. If that be true, it is because there are gentlemen who have made every other convention where the application has been made. On looking around at this Convention, I do not see that we will do it. I do not see that we, as a committee, will say that to the veterans, among them, as many of them wearing wooden legs—the men who have fought with the Committee, and who have made this Convention as it is. If this be the truth, why, then, I ask what are we going to do? I ask what are we going to do to this Convention? It is not for that I ask their admission; but it is that these men, who have fought for their country, and who, nine-tenths of whom are Republicans, should not be denied their rights.

In regard to the status of the contest between Illinois delegations and the minority and minor panels of the committee on credentials. The majority report was as follows:

FIFTH, ILLINOIS. — The Committee recommended the admission of the following delegates and alternates within the State of Illinois, for the purpose of sitting members:

The committee find that a State Convention was held at Springfieid, III., on the 10th day of May, to elect delegates to the National Convention. During the Convention the delegates from each of the foregoing Congressional districts assembled and organized, took their seats, and elected committeemen and delegates to two alternate to the Chicago Convention, by a clear majority of the delegates elected to the State Convention. In each of said districts, as determined by the credentials accompanying this report, the State Convention, was made a committee of one from each Congressional District, selected, and afterword assumed to elect, from said delegates, delegates to the National Convention, including the sitting members from said districts, the delegates from each of which filled in the State Convention protests against said elections by the State Convention.

FIFTH. — The committee report against the validity of the con-
test in the second district of Illinois, of the seats of sitting members.

SIXTH. — The committee report against the objections to the seats of the four delegates-at-large from Illinois.

MINORITY REPORT.—With reference to the State of Illinois, the minority respectfully reports the following:

It was understood, when notice was given of this contest in the Convention, that the contest related merely to delegates in the First, Second, Third, Fifth, Sixth, Ninth, Tenth, Tenth, and Seventeenth Congressional districts; but upon the assembling of the committee, a memorial was presented to it, very general in its character, signed by the contesting delegates and their adherents, and claiming to the political convention; and to this general memorial, in which this general charge is embodied, we first address ourselves.

This corrupt and dishonest scheme was proclaimed by the public officers of the City of Chicago on Monday morning, and a full history of the conference which led to it given in the Chicago
Tribune, Horace M. Singer, whose integrity seems to be unquestioned, a steadfast and life-long Republican, is chairman of the Cook County Central Committee, and, as such chairman, he devoted himself to the calling of the convention. With the utmost fairness, he tried to do, after having consulted with various gentlemen, representing all interests, as to the policy he should adopt.

He individually visited, as presiding officer, in effecting a temporary organization, to place in nomination George Struckmann, a well-known citizen and a prominent "Washburne" delegate. Calling the convention to order, he proceeded to nominate Mr. Struckmann. He was at once interrupted; unable to be heard; a scene of confusion ensued.

Some one in the body of the hall proceeded to make another nomination, which was declared carried. Mr. Singer was violently ousted by a crowd, but returned and, by proper order, announced, as he himself and as the Chicago Tribune, in its detailed report of the proceedings of this convention, states, his desire only to submit the name of Mr. Struckmann to the convention for its action; but utterly unable to secure order, and, as Mr. Singer declares, the proceedings being so riotous and tumultuous that no business could be conducted, declared the convention adjourned to meet at the Palmer House club-rooms.

The fact that Mr. Singer declared this convention adjourned is studiously and steadily ignored by the contestants and their representatives, but the fact exists, nevertheless, and upon this point we submit the statement made by Mr. Singer himself. It is also worthy of note that the proceedings thus far have been in the nature of an adjournment; there was no conspiracy whatever, except the conspiracy which the Chicago Tribune promulgated to stifle the voice of three Senatorial districts in that Convention, and to deprive them of their right to have a delegate to the State Convention.

At the close of the description of this conspiracy thus to stifle the voice of three Senatorial districts, the Chicago Tribune, in its article already referred to, says:—

"In the absence of a committee, the business of the morning was ended so far as preliminaries were concerned, and the delegates meted through the platform to Farwell Hall, where the speaking was expected to begin at ten o'clock sharp."

This is all the conspiracy, and the only conspiracy of the existence of any necessity for the selection of new officers and officials of this convention. Upon the adjournment of the convention by Mr. Singer, a large body of delegates required, pursuant to the adjournment, to the club-rooms of the Palmer House, where they were called to order by Mr. Singer, and an organization was effected.

Ninety-two delegates were selected by Senatorial districts, and upon the assembling of the State Convention appeared there, contesting the right of the so-called "Farwell Hall" delegation. The fragment left of the Farwell Hall convention proceeded to its work. threw out the regularly elected delegates from the Twelfth Ward, thus securing a majority of the Second Congressional District; seated the fraudulently elected delegates of the First Ward, thus securing a majority of the Second District. These delegates, under the order of the convention, cast their votes in each of the three districts, of which it is a tradition that, on the fourteenth, elected delegates to the State Convention, thus, a Central Committee, recognizing the contest, gave to both delegations the privilege of seats in the gallery of the convention hall. A committee on credentials was selected, composed of one from each Congressional district, to which committee the whole question was submitted, and three reports were made, one recommending the seating of fifty-six of the "Farwell Hall" delegates and thirty-six of the "Palmer House" delegation, and another recommending the seating of sixty delegates in the "Farwell Hall" delegation. There was no effort to stifle discussion upon this committee on credentials in the State Convention. That committee had the question under consideration for nearly a day and a half before they reported.

Upon the presentation of these reports to the State Convention, time was allowed to each side to present the case in the term of a few minutes. The delegates from both sides were fully and promptly heard. First upon the report recommending the seating of the entire Farwell Hall delegation, which was rejected by a majority of eighty, and which has been erroneously stated to be a majority of sixty, the qualifications of which were submitted, then came the report recommending the admission of fifty-six of the Farwell Hall delegation and thirty-six of the Palmer House delegation, which was adopted by the convention by a majority of eighty, with the vote of the National Committee, and the convention and participated in all the subsequent proceedings.

A permanent organization being effected, a resolution was offered that the delegates to the National Convention be selected by a committee of one from each congressional district, to be appointed by the chair. This motion led to long and animated discussions, consuming many hours, and was finally adopted by a positive majority. The chair named a committee, and that committee, after consulting with the National Committee, re-appointed delegates, selecting two from each congressional district, pursuant to the call of the National Convention, and four delegates from the State-at-large.

On the motion to adopt the report of that committee, dissection was bad, and the report was adopted by a decisive and positive majority. All the delegates thus selected, and whose selection was thus reviewed and endorsed by the action of the National Convention, appeared to be in every respect, considerations that the minority was entitled to only just and fair consideration, and to not rule, and that the committee itself could see in recognizing the claims of the contestants nothing but danger and peril in the future.

The question occurred upon the division of the report, and was debated as to all the States present contesting.

General Green B. Kavan, Eliot Anthony and Emery A. Storrs were heard upon the question of the adoption of the majority report relating to Illinois.

GENERAL RAUB, of Illinois.—Mr. President: I rise on behalf of the sitting delegates, whose seats the minority report, if adopted, would deprive them of. It is asked by the other gentlemen, who have not been present in the proceedings of this Convention, why we have not been present in the State Convention. I must state that my name was placed on the ballot as a candidate for the presidency of the Republican State Convention by the Illinois delegation, and that I was carried by a majority of one hundred and thirty; therefore I am there. Being a member of this Convention, I may say there is not a candidate for any office, as far as my knowledge has reached, who has not been present. A report of the proceedings was made by Mr. President, and to the honorable gentlemen of this Convention, that the Illinois delegation from the State Convention was in no wise in conference with the minority, and that the minority was not consulted in any other form by the statements which have been made before the committee; for it is conceded upon all hands that, whatever other selections of delegates may have been made, such delegates were selected in accordance with the convention for its action, and no report of such selections were ever made, or evidence furnished to the State Convention, save as such may be embodied in the protests filed by the various Congress districts, as the Convention was about closing its deliberations.

Then followed a copy of the call for the State Convention, with comments thereon, and many precedents in the history of the party in the State, then a report concluding, that the minority was entitled to only just and fair consideration, and not to rule, and that the committee itself could see in recognizing the claims of the contestants nothing but danger and peril in the future.

The question occurred upon the division of the report, and was debated as to all the States present contesting.
They took their instructions from the State Convention, and went to the National Convention in the State of Illinois.

And how were those delegates selected? They were not selected otherwise than by the conventions of the several districts of the State of Illinois, under the ordination of the National Convention, in which the delegates were instructed to the State Convention, to report the necessary delegates, and their report was received by the convention.

How was it in 1852? I state these facts, Mr. President, from actual knowledge, and, in strict conformity with the rules of the convention of the Republican party in the State of Illinois, in selecting their delegates to the National Convention.

The convention of the Republican party in the State of Illinois, having been called under the ordination of the National Convention, was held in Chicago in 1852. The report of the necessary delegates was made, and the report was received by the convention.

Why? Mr. President, the fact is that the Republicans of Illinois have always and everywhere selected delegates to the National Convention, so that there is no evidence that they have claimed the right to select delegates that would not be acceptable to the National Convention, and that they would have reported the necessary delegates; that report was received by the convention, and it was ratified, and those delegates were selected.

And in 1852? That committee was raised under the orders of the convention—one office was held by each of the two parties, and the other parties were under the orders of the convention.

In 1852? That was the year when the convention of the Republican party in the State of Illinois was held in Chicago. In obedience to instructions which I should never dare to disregard,
expressing also my own firm convictions. I rise, therefore, to announce,
in the name of the public service and of the party with which the country
and the Republican party can best be served, that he has no right to
expect, under any circumstances, to retain the confidence of the people;
that he, therefore, has no vote.

The name of a candidate who can carry New York—nor, indeed, of any candidate
of the four who have been considered as having a chance—would
be included in a list of names which should be presented to the public.

I am bound to say that to retain the confidence of the Republican party,
and to be included in a list of names which should be presented to the
country, a man must be known to be capable of being trusted;
that he must have the confidence of the people;
that he must be known to be capable of being trusted;
that he must have the confidence of the people;
that he must be known to be capable of being trusted;
that he must have the confidence of the people.

The name of a candidate who can carry New York—nor, indeed, of any candidate
of the four who have been considered as having a chance—would
be included in a list of names which should be presented to the public.
elected, the German Republicans of Cook County, as elsewhere throughout the State, bolted the nomination of Charles T. Stratton, the Republican nominee for superintendent of public instruction, and gave their votes to Henry Raab, the Democratic candidate, for the reason that Stratton, while a member of the assembly, had voted in favor of submitting to the people a powerless prohibition amendment, prohibiting the manufacture and sale of spirituous and malt liquors. The Greenbackers and the Prohibitionists had both petitioned and although the latter were urged to vote for Stratton, they, because the Republican State Convention had voted down a resolution favoring the submission of the Constitutional amendment, voted straight out for their candidate, Mrs. Elizabeth B. Brown. The result was the election of John C. Smith, Republican candidate for State Treasurer, by a small plurality of 6,137, and of Henry Raab, the Democratic candidate for superintendent of public instruction, by the still smaller plurality of 2,869, and it was maintained that the vote of the Germans in Cook County alone brought about Raab's election.

In the second congressional district there was a hotly contested contest between John F. Finerty, editor of "The Citizen," an Irish-Nationalist weekly, who for ten years had been a well known journalist connected with the Chicago Times, and Henry F. Sheridan, also a prominent Irishman, identified with many powerful Irish societies.

The result of the Congressional elections in the city was as follows:

First District —Ransom W. Dunham, Rep., 11,571; John W. Ioane, Dem., 9,498; Free-Soil, 1,844; Independent, 514.

Third District —George R. Miller, Rep., 11,839; William I. Black, Dem., 10,524; Independent, 1,276.

Fourth District —George K. Adams, Rep., 11,686; Lambert Tree, Dem., 9,846; Frank F. Cudmore, Prohibitionist, 965; Christian Meyer, Anti-Monopoly, 915.

In the XXXIIId General Assembly, which convened on January 3, 1883, W. J. Campbell, of Cook, was elected president, pro tempore, of the senate over Thomas M. Shaw, of Marshall, by a vote of 23 to 15; and in the house, Lorin C. Collins, Jr., of Cook, was elected speaker over Austin O. Sexton, of Cook, by a vote of 75 to 73.

On January 16, the two houses voted separately on the question of electing a successor to David Davis in the United States Senate. Shelly M. Cullom, nominee of the Republican caucus, received 107 votes, and Mr. Palmer, nominee of the Democratic caucus, 95 votes. There were no vacating votes, and there was consequently no election. January 17, the two houses met in joint session and balloted, Mr. Cullom receiving 107 votes, and Mr. Palmer 95. Mr. Cullom was declared duly elected senator. February 7, on account of the resignation of Governor Cullom, Lieutenant-Governor John M. Hamilton became Governor, and William J. Campbell acting Lieutenant-Governor.

Early in this session, Representative Harper, of Cook, introduced a bill intended to create a uniform license for the sale of spirituous liquors, known as the "Harper Law." The bill provided almost the united opposition of the retail liquor interests of the state, and Chicago dealers were especially active in their opposition to the proposed measure. The bill was under discussion nearly five months. It passed the House on June 8, by a vote of 79 yeas to 65 nays, and the senate on June 15, by a vote of 30 yeas to 20 nays.

William H. Harper was born in Tippecanoe County, Ind., on May 4, 1845, and when a child moved with his parents to Woodford County, Ill. His boyhood days were passed on a farm during the Civil War. Returning to school in the winter. When he was nineteen years old he enlisted in the 145th Illinois Volunteers, and remained with the command until it was mustered out. He then returned tonormal, and entered the Eastman Business College, and a year later graduated. He returned to Woodford County, and engaged in the stock and grain shipping business until 1867, when he came to Chicago. For four years he was engaged in the commission business, when he was appointed chief grain inspector. Mr. Harper filled this position for two years, and then he was called to the duties allotted to him to the entire satisfaction of all interested in the grain trade. In 1873, Mr. Harper built the Chicago and Pacific Elevator "A," with a capacity of 650,000 bushels. In 1882, he sold a half-interest in the structure to Almer Taylor. In 1883, they erected Elevator "B," which has a capacity of 1,000,000 bushels. In the campaign of 1882, Mr. Harper was elected to the Legislature by a large majority, and was the author of the famous liquor amendment, which was passed by the State, but finally became a law. In 1884, he was re-elected with a very large majority, receiving 16,627 votes, being the largest, with two exceptions, of any one hundred and fifty-three members elected in the State. Mr. Harper is an energetic, active business man, and very affable in demeanor. He is president of the Indiana Club, a member of Apollo Commandery, No. 1, K. T., and the Chicago Law Firm, S.P.R.S., and a member of the Board of Trade, Citizens' Association, Union League, Washington Park Club, Union and the Fifth Presbyterian Church. Mr. Harper was married in 1868, to Miss Mary J. Perry, of Metamora, Woodford Co., Ill., and resided on September 18, 1854, leaving three children, Fannie A., Roy B. and Hazel G.

The "Harper Law," governing the sale of spirituous liquors, was, at the time, to a long line of measures affecting the liquor traffic which have at times been presented to our legislators for action. A committee of ladies, bearing a petition signed by 30,000 voters and 100,000 women, asking the passage of a law allowing women to vote on questions relative to the liquor traffic, waited on the floor of the Representative House, March 6, 1879. Among the Chicago ladies on the committee were Miss Frances E. Williams, president of the Woman's Christian Temperance Union of Illinois; Mrs. T. B. Carse, president of the Chicago W.C.T.U.; Mrs. J. B. Holby, Mrs. Patrici Rimball, Mrs. A. Cummings, Mrs. R. Greenlee, Mrs. L. A. Hagens, Mrs. Willis A. Harms, Mrs. C. H. Case and Mrs. D. J. True.

On motion of Representative Sol. P. Hopkins, of Cook, Miss Williams was invited to address the House. The same committee presented the petition to the Senate, and, by a vote of 24 to 19 against, a recess of thirty minutes was taken, during which time Miss Williams addressed that body. The Senate took no action, but the House considered a bill introduced for an amendment to the Constitution allowing women over twenty-one years to be registered as voters, and that before a saloon could be kept the keeper should be able to show to the municipal authorities that he had secured the consent of a majority of both men and women over twenty-one years of age in the community. The bill was ably championed and as ably opposed. It reached a third reading on May 20, when it was laid over 15 days and 53 years. It is claimed the agitation set on foot throughout the State by the temperance women had much to do in securing the passage of the Harper Law in 1883. In the House, 70 Republicans and 3 Democrats voted for the bill, and 54 Democrats and 6 Republicans against it. In the Senate, 26 Republicans and 1 Democratic voted for it, and 19 Democrats and 1 Republican against it. Thus the Republicans assert, and are clearly entitled to the claim, that the passage of the Harper Law was a Republican measure and passed by substantially a party vote.

Mayors' Administration.—Mayor R. B. Mason's message, delivered before the Common Council on December 5, 1879, and, in so far, to the legislature, that the annual net increase of the city was $1,230,000; that the bonded debt of the city, on December 1, 1879, was $33,352,000, less $820,000, principal and interest provided to be paid out of the revenues from the Water Works, and $3,500,000 expended for deepening the canal, which was to be reimbursed by the State; leaving net city debt, on December 1, 1870, to be paid from taxation, $6,611,000. It was stated that the work on the canal would be completed early in 1871. The message continued:

Besides the advantage of drainage gained by the work, the navigation of nearly one-third of the entire canal will be much improved, and if a comparatively small outlay be made on other portions of the canal to obtain a greater depth of water, the tonnage of traffic will be much increased, and the value of the canal will be much increased.

And in the completion of the fillpools River improvement, so as to give a better communication between Chicago and St. Louis, during the entire season of navigation, the facilities of the present canal, which is a point of great interest to the entire State, is given to a greater or less extent, the rates of eastern bound freight between St. Paul and St. Louis. There is a great deal of farming work within the canal by which it will be possible to connect the river vessels, and in this manner an equalization, the advantages of which would be to provide for three improvements, so as to provide for the improvement of the canal, as well as for the navigation of the Illinois River.

Some idea of the extent of the work is given in the map of the city, which is now being constructed by the State, and is in rapid progress, the canal will be substantially extended to Peoria, and the work of advance, at a very early day, to the mouth of the Illinois River. The City of Chicago is deeply interested in the completion of this work, and the completion of the canal will be of immense commercial value to the city as a means of reinvigorating itself at an early day for expansion and development.

Assuming that the total (of saloon licenses) issued for the year ending June 30, 1871, will be 2,300, and that 2,000 will be for saloons for every 100 inhabitants, including men, women and children. If we calculate from the 2,000 the amount of the increase of saloons, this gives one saloon for every twenty-six men in the city. That this state of things should be remedied laws are now pending in the legislature, and it may be done by limiting the number or increasing the rate of saloon licenses. I earnestly recommend your favorable attention to this subject.

Among Mayor Mason's appointments were J. K. Botsford, appraiser of the school lands; J. E. Chadwick, fire commissioner; Grant Goddrid, C. G. Hammond and Louis Wahl, inspectors of

The last meeting of the Council prior to the fire was held on October 2. A special meeting was called for October 10, when they passed a resolution to permit any temporary city building in the sales of food to sufferers by the fire. The price of a twelve-ounce loaf of bread was fixed at eight cents, and a penalty provided for any violation of the order. On October 30, another special meeting was held, and it was announced that an informal meeting of members of the Council and city officials it had been decided to select the High School and the Ogden primary school, on West Monroe Street, as the places where to organize and contract for and receive the city government and action not being satisfactory to all, a committee of nine was appointed to select a suitable building wherein to locate the city offices. Seven members of this committee presented a report in favor of the Madison-street Police Station for the meetings of the Council, the erection of temporary buildings on the Court-House Square, and that the Board of Public Works cause plans to be prepared for the erection of a permanent building on the City Hall site.

The minority favored the use of the High-school building. Business having gone mainly to the West Side after the fire, many believed that section could be made the business section of the new Chicago. The West Side aldermen voted in favor of the adoption of the minority report, but the majority report was carried by a vote of 15 to 12. At this meeting, a communication was received from Mayor Stearns stating that but nine or ten in the same of the City Government were located by law in the South Division, he had located his office, temporarily, at the corner of Walsh Avenue and Hubbard Court, which he hoped would give general satisfaction. Mayor Stearns again expressed himself in favor of temporary city buildings being located on the City Hall site, business blocks would spring up around them, and capital, knowing there was to be no change in the center of business held at once seek investment in the re-building of the former trade center.

Mayor Mason's administration was upon the whole quite satisfactory to the citizens of Chicago, his opponents being mainly those who were opposed to his views in reference to the licensing and control of the liquor business, which element of opposition during the ensuing administration of Mayor Medill developed and crystallized in the "People's Party" movement.

Ticket: The Fire-Proof, or Republican, Convention, which nominated Mr. Medill for Mayor, met in the High-school building on West Monroe near Halsted Street. Charles F. H. Holden, his opponent, nominated by the Democrats, had been alderman from the Tenth Ward and president of the Common Council under the Mason administration. The election was held on Tuesday, November 7, 1871, and resulted as follows:

The full set of twenty constables was elected but were not sworn in by the Council, and the minutes of the convention being read, as there were doubts as to the legality of their election. A report was made to the Council on November 27, signed by Murray P. Taylor, alderman, J. N. Hoiles, city attorney, and the members of the Committee on Judiciary, in which the opinions were given that there could be no valid election for constables, unless in the Fifteenth and Twentieth wards respectively, where there were vacancies in the above. It was recommended that the committee be given to any of the majority candidates, and that they be left to the legal action of any.

MARCUS CUYLER STEARNs, the oldest surviving member of the Board of Trade of Chicago, was born at Naples, Ontario Co., N. Y., on May 25, 1816. He was reared in his native town, but when only a little more than fifteen years of age, he was obliged to seek his living by his father having died shortly before his birth. On March 1, 1832, he was taken into the family of his grandfather in Ostrander, of Knox, Steuben Co., N. Y., and he was given an insig-
had been a matter of the utmost public concern since the time of the fire, when criminals from every section of the country drifted into the city.

The management of the Police Force and the Fire Department also was in the hands of the Board of Police and Fire Commissioners, which had become reorganized at the time of the election of the Mayor and Fire Department of Milwaukee, and Jacob Rehm, and subsequently, in the spring of 1872, by the appointment of E. F. C. Kloke to the Board, to succeed Jacob Rehm, resigned. To the public the power looked for safety and protection, and property was much apprehended. The local press and Jacob Rehm removed Superintendent of Police Kennedy, and three weeks thereafter made Elmer Washburne superintendent of the force. Mr. Washburne was a man of the military and administrative board, and supported by the Fire-Proof administration maintained that Mayor Meilill's selection of a head for the department at this critical time was unwise, for the reason that Mr. Washburne was unacquainted with the investigations of crime in a great city, and inexperienced in the management of a force of men who had been accustomed to the direction of superiors who had been promoted from the ranks. Besides the agitation conducted by the Committee of Seventy, a committee of twenty-five, representing the three divisions of the city, was appointed at a meeting of citizens held in the Chamber of Commerce on Market Street, on September 12, and presided over by Henry Greenbaum. On October 7, at a meeting of the committee, which sought to put pressure on the Board, were ad\n
Mancel Talcott, chairman of the Board of Police Commissioners, who coincided with their views, and insisted that the epidemic of lawlessness and crime was caused mainly by drunkenness, and advocated the employment of the police force for the purposes of the city. The sub-committee of fifteen was thereupon sent to Mayor Meilill to urge the enforcement of the Sunday-closing ordinance. Mayor Meilill at his committee's suggestion, was impracticable, for the reason that both sellers and purchasers would deem it an arbitrary and inconsistent interference with their prerogatives on one certain day out of the seven in the week; that the law was directed against the keepers alone and not against the drinkers as well, therefore being discriminative; and further, because it would require one policeman for each drinking-place to see that the law was enforced, or say three thousand altogether, whereas the Board had but a force of two hundred and fifty policemen. The Committee published a reply on October 8, claiming that although the liquor interest was active and united and exerted a controlling influence in politics, the facts went to show that whenever an honest effort had been made to enforce the Sunday liquor law, it had been successful, and accused the administration of cowardice. Mayor Meilill claimed this reply to be unfair, but, on October 10, he sent a communication to the Board of Police Commissioners, in which he referred to newspaper reports in reference to a conference between members of the Committee and the Board, in which it was stated that the Board anticipated in enforcing the Sunday liquor law, it had been destined to express in a political movement. Agitators and demagogues were working among the foreign-born element. The Democrats, who were almost solidly opposed to Meilill, helped along the growing movement, and finally the People's Party was born in a series of mass meetings, controlled and addressed in the main by persons whose subsequent records went to prove that personal ambition was the principal incentive to their actions.

The People's Party—The People's Party was, therefore, the outcome of a public feeling against the Meilill administration, and a movement in favor of personal liberty. It was anti-Washburne, anti-Gage, anti-Sunday closing, and anti-police lighters. The first notable meeting was held on May 14, in Thielmann's Theater, on Clybourn Avenue, which was addressed by many prominent Germans, among the number being A. Hild, Jacob A. Medill, Henry Wright, Mrs. Kennedy, [illegible]. At this meeting, H. H. (Buffalo) Miller, denounced the Republican party. Suitable resolutions were adopted and a plan of action agreed upon. A great mass meeting was held, on May 20, at Asylum Turner Hall, on Milwaukee Avenue. Ex-Alderman John Budler, acted as chairman, and the speakers were A. C. Hesing, Francis A. Hoffman, Jr., Emil Dietrich, General Hermann Lieb and others. At a meeting of the Chicago Turgenem, held in the North Side Turner Hall, on May 21, resolutions were adopted denouncing all legislation and official action opposed to personal liberty, and inviting all liberal societies to select five members each for "mutual consultation and united action." On May 24 and 29, the Tribune contained articles showing that the Germans were drifting away from the Republican party, and that the movement was rapidly spreading. Delegates from eight or ten liberal meetings met in Bismarck Hall, in the Tentoon Building, and selected an Agitation Committee, composed of

Carl Niekamp, Richard Michaelis, A. C. Hesing, Carl Beutner, Peter Hall, A. C. Medill, Francis A. Hoffman, Jr., Frank Schwartz, William Florio, G. Tegtmeyer, Dr. Mathes, N. K. Hild, Dr. A. C. Hesing, O. S. Rehm, Pierre A. E. Rehm, Dr. Wehrlig, Philipp Heinl, W. Mathis, W. Schenkel, and Charles Winter. These resolutions were unanimously adopted as the incentive of the new organization, recited that the temperature and Sunday laws were obnoxious to a large and respectable portion of our people; that our civil service of the general State and local governments had become a mere instrument of partisan tyranny and personal
ambition: that the arrest of any person whose offense was only punishable by a fine, instead of procedure by mere process of summons, was an outrage, and that the police power of the State, county or city should not be wielded in the interest of factions of society. 4

That the appointment of inspectors of all beverages sold, to detect impurities, and that an ordinance be passed prohibiting the granting of licenses to persons of bad repute, and disenfranchising principle that a person should be held responsible only for his own wrong-doing, and for this reason not landlords, but saloon-keepers, be held accountable for liquor sold on premises, and not schoon-keepers, responsible in their bond. At this meeting it was agreed, on the suggestion of A.C. Hesing, to hold a mass-meeting.

The movement had gained such headway by this time that a number of liberal leaders thought it wise to favor it. This meeting was held on Sunday afternoon, August 31, 1873, in Greenebaum's bank, at which were present, among others.

The spirit denounced the Medill administration as leaning to despotism and for having sold out to the "Law and Order" men. A committee was selected to confer with the Committee of Argument in reference to holding a mass-meeting. After several modifications to the conference had been held a joint committee was formed and a public meeting held at the magazine on October 22, 1873.

The meeting was a notable one in the political annals of the city. H. B. Miller occupied the chair of this meeting, and the speakers were A. C. Hesing and others.

The following was adopted as the platform of the party:

Resolved, That in the present state of the public finances, it is imperative that our city and county be administered in an economical manner, and that the difficulties be lessened as far as possible. That our proposed municipal tax be reduced by a just and discriminating government, and the expenditure be made for the benefit of any particular class, but for the benefit of the entire community.

We support the education of the youth of our country is one of the most effective agencies for the suppression and prevention of crime; that this object can be achieved by a larger expenditure of public funds than to attempt to enforce morality by legislation.

Resolved, That the people are the sole owners of the government and the protection of any street or sidewalk or right of way of any one or any class of individuals, to do or what is not a public nuisance or day shall be enforced by a fine payable by a fine to the public.

Resolved, That there ought also be appointed by the proper authorities, judges and those found innocent, and those found guilty to be freed, and that the latter be sentenced to the free and enlightened people.

Resolved, That it is a constitutional principle that a person should be held liable for his own wrong-only, and that this principle be enforced in the enactment of the order or landlord of premises which are kept for the purpose of engaged in immoral or other unlawful business, and that such persons be held strictly accountable for their acts committed while being employed in any public service or in any public employment or in any public business, and that all persons engaged in such employment or in any public business be subject to the maritime law of the United States, and that the same be enforced, and that all persons be subject to the maritime law of the United States, and that they be held liable for their acts committed while being employed in any public service or in any public employment or in any public business, and that all persons engaged in such employment or in any public business be subject to the maritime law of the United States, and that they be held liable for their acts committed while being employed in any public service or in any public employment or in any public business.

Resolved, That the frequent arbitrary arrest of our citizens in cases where fines are not imposed for breaches of city ordinances and who violate of constitutional rights, and that should not be tolerated by a free and enlightened people.

Resolved, That we consider it a constitutional principle that a person should be held liable for his own wrong only, and for that reason we are opposed to the statute which makes the order or landlord of premises which are kept for the purpose of engaged in immoral or other unlawful business, and that such persons be held strictly accountable for their acts committed while being employed in any public service or in any public employment or in any public business, and that all persons engaged in such employment or in any public business be subject to the maritime law of the United States, and that the same be enforced, and that all persons be subject to the maritime law of the United States, and that they be held liable for their acts committed while being employed in any public service or in any public employment or in any public business, and that all persons engaged in such employment or in any public business be subject to the maritime law of the United States, and that they be held liable for their acts committed while being employed in any public service or in any public employment or in any public business.

Resolved, That the frequent arbitrary arrest of our citizens in cases where fines are not imposed for breaches of city ordinances and who violate of constitutional rights, and that should not be tolerated by a free and enlightened people.

Joseph K.C. Forrest offered the following as an additional declaration of principles, which was also adopted:

2. That the President be respectfully requested to convene Congress in extraordinary session, with the object of securing the advice of a sufficient amount of legal-tender currency, based upon the deposit of National Security, and that the Treasury be compelled to retain, as shall attract it to the United States, and that Congress be instructed to adopt the payment of post money in banks which do not pay it out on demand. At the same time such currency should be held in the treasury to the extent of 25 per cent of the existing liabilities of the government, and that the government should not be allowed to issue any additional currency, which would simply enable the banks to save themselves at the expense and to the disadvantage of the individual citizen.

The free and commercial mode of calling out currency from its hiding places is to make it the interest of holders to part with it.

The city of Chicago should promptly issue a sufficient amount of notes to keep the mechanics and laborers now engaged in municipal improvement fully paid.

With this declaration of principles, we submit the cause of the People's Party to our fellow citizens.
We claim that every person has a right, so far as human law is concerned, to his own opinions, and that he has a right, and it is his duty, to engage in any lawful traffic, and to all the privileges which the law affords to him.

But upon the question of what kinds and modes of traffic are injurious to the public, as promoters of such traffic, as those who are engaged in a consequent unnecessary taxation, the aggregate will of the people is supreme. 

We are, however, not at liberty to be governed by the caprice of the few. The amount of a certain proportion of such deposits. Mr. Hesing charged that one bank could be specified which held a note of Gage for $42,000, to which he offered $60,000 of city deposits on condition of an extension being granted him on the note; and it was also alleged that Gage would pay all of the expenses of the People's Party, if they should nominate him for city treasurer, and that he would hold the county treasurer job. In a sworn affidavit, Hesing deposed that he had been approached by emissaries, who offered if he would use his influence to secure Gage the nomination of the People's Party for city treasurer, Gage would give him the control for two years of one-fifth of the city deposits.

Then became whispered about in public resorts that there were urgent reasons why Gage wanted to retain the office of treasurer, and the story of the People's Party made as much capital as possible out of the rumors and demanded a count of the money by the authorities until December 1873, when Mayor Colvin had taken his seat, but it had been charged by A. C. Hesing, in the Staats Zringen, that Gage had deposited funds with banks, upon agreement of their officials, that he should extend to him personal credit, but there was no amount of a certain proportion of such deposits.

HISTORY OF CHICAGO.

Charles Kern, one of the most prominent representative German-American citizens of Chicago, is the third son of John and Mary (Stemmler) Kern, and was born at Osterbach, in Rheinland, Bavaria, in 1844. He was brought up to the trade of merchant by his father, and under his guidance was apprenticed to a wholesale dealer in groceries and restaurant, which he conducted until the democrats, in 1862, elected him sheriff of Vigo County. Mr. Kern's success in this contest was gratifying and unexpected. The county had been hitherto republican, and Mr. Kern was the first to contest the election as an independent, and his election as probable. The majority which he received proved both his popularity and the public confidence in his character. His administration of the sheriff's office was characterized by such executive ability and sterling integrity as to win from his political opponents the title of "The best sheriff Vigo County ever had." At the close of his official term (in 1864), he became interested in the management of the Galt House, at Cincinnati, and remained there until October, 1866, when he removed to Chicago, and opened a restaurant which was, from the opening day, a financial success. He was in the full tide of prosperity when the great fire came upon the city. Although he had rented away his interests as a small percentage of his insurance, he was enabled to meet all his obligations in full, and scarcely had the smoke cleared away ere he had completed a temporary structure on the old site and was ready for business. Like his father, Mr. Kern's tastes were such as to characterize him in all the relations of life. To facilitate business he converted his dwelling, No. 458 Wabash Avenue, into a restaurant which he occupied until August, 1872. In the preceding June, the re-building of large business structures was being continued to vacate the ground he had occupied, and he rented a building near the corner of LaSalle and Monroe streets, one of the first substantial edifices erected in the burned district. One year later he removed to his present location, No. 110 LaSalle Street, adding the adjoining number, 108, a few years later. He has since enlarged his accommodations so as to occupy nearly all the basement of the house, in which he has been constantly building. Mr. Kern's political career in Chicago began in 1868, when he was the democratic nominee for sheriff of Cook County. The county was then largely republican, and as a matter of course he failed to secure an election. In 1870, and again in 1872, he was the unanimous choice of his party for the office for which he had been defeated in 1868. The result of the elections proved his popularity, since, although defeated, he ran 4,000 votes ahead of the remainder of the ticket. In 1876, he was again for a fourth time unanimously placed in nomination, and elected by a majority of 6,000, receiving 16,000 more votes than the other candidates on the democratic ticket. He was re-nominated for the fourth time by the convention of the state, and won the election by a vote of 45,000. Of his management of the office, it is enough to say that his political antagonists accorded him the heartiest praise, the republican journals and lawyers with the general public in praising his administration, and his administration has been characterized by the virtues of fidelity and scrupulous economy. In 1878, he was re-nominated, but the story arising from the failure to seat Mr. Tilden had demoralized the democratic party in Cook County, and the ticket was defeated by 15,000 majority. Mr. Kern, however, ran 10,000 ahead of his ticket, and lacking only about 3,000 votes of being elected. Subsequently his name was prominently mentioned in connection with several other important public offices, but he declined to enter the propositions, preferring to devote all his time and energies to his private business. In December, 1885, Mr. Kern was elected president of the Cook County Democratic Club, a position which he merited by reason of his public political services and his standing as a representative citizen. He has also served a term as vice-president of the Iroquois Club, of which he is an active member. Mr. Kern possesses, to a remarkable degree, the qualities of frontier leadership. His control over men is so well known that a kindly suggestion from him carries with it more weight than would a peremptory command from most men. His success as a political leader is mainly due to five causes,—his ability to organize, tireless and untiring; his public spirit and integrity, and personal popularity. When he takes an active part in a campaign, he can, his political opponents say, declare the result for the day before as after election, so systematically and thoroughly has he every previous event to it. Under his influences. His influence as a member of the aristocratic Iroquois Club is no less potent than in the councils of the more moderate. He is a regular working member of the organizations with the old Iroquois Democratic Club. His advocacy of the election of a man, in the adoption of a measure is generally considered equivalent to success. Mr. Kern has all his life been very fond of field sports, and is accounted one of the best shots in the country. His annual vaca-
tions are invariably spent on the prairies, among the lakes, or along the rivers of the far Northwest. Being a true sportsman, he has taken an active part in the framing, amendment, and enforcement of the game laws of the State. He was president of one of the first sportsmen’s organizations in Chicago, the Prairie Shooting Club, which has been presided over by the Addaon Club; and in 1855, was elected president of the Illinois State Sportsman’s Association. While not a turban, in the sense in which the term is often used, he nevertheless takes a lively interest in all prominent events, is a member of the Washington Park Club, and always has several good readers in his stable for his private use. His Kern married, in 1852, Miss Mary A. Whitman, of Lyons, N. Y. They have two children—Josephine and Harry W. He is a member of Ashland Lodge, No. 293, A.F.&A.M.; of Washington Chapter, No. 43, R.A.M.; and of Chicago Commandery, No. 19, K.T.

ELIHU S. HAINES, for many years editor of the Legal Advertiser, and one of the best known political characters in the State, is a native of Oneida County, N. Y. His father died when he was six years of age, and soon afterward he went to live with a farmer in the neighborhood, with whom he remained for some five years. The boy, with the idea of independence which has always marked him as apart from the common crowd, started West with John C. Haines, his brother, and arrived in Chicago in May, 1851. The village had just been opened a few hundred people, the Indian traders being the most important portion of the population outside of the garison. Soon thereafter he moved to Joliet, where he remained till the spring of 1856, when he went to what is now Lake County and worked upon a farm. There were then no schools in the county; in fact, for the age of seven years he obtained his education, regularly, only in the winter. Notwithstanding this drawback, and the fact that for many years he was obliged to provide not for himself but for a widowed mother, he had acquired in early manhood an education in the common branches, and the Latin and German languages, and was quite proficient in the art of surveying. When he first removed to Lake County, he joined an organization of settlers who were banded together to protect themselves in their landed rights. Becoming much interested in the legal aspect of this rude attempt to establish justice in a community which was almost without protection of constituted authority, his mind turned to the study of law, and he commenced reading with the ardor and determination which have continually brought him into public prominence. He was admitted to the bar in 1854, and opened a law office in Chicago, continuing, however, to reside in Waukegan. In 1855, Mr. Haines compiled a compilation of the laws of Illinois relating to township organization, containing notes of decisions and forms for proceedings in various cases. The work so attracted the attention of the Legislature that a large edition was ordered for distribution to the public officers in every township in the State. It also went into popular use and is much prized by the legal fraternity generally. These compilations were prepared by him for the States of Michigan, Missouri, Wisconsin and Minnesota, the last two by order of the Legislature. In 1855, Mr. Haines also published a work on “The Powers and Duties of Justices of the Peace in Illinois,” which to day is standard authority. In all probability there are few people who are as acquainted with the political history of Illinois for the past thirty years, who are not thoroughly conversant with Mr. Haines’ independence, fearlessness and originality in action and thought. Naturally an agitator and a radical, practical thinker, politics seem to have always had a charm for him, and he appears never to have been satisfied with taking a passive part in the political machine. He was originally a democrat, but the slavery question drove him to the republican party, which he assisted to organize. In 1859, 1861 and 1863, he was sent to the State Legislature as a representative of Lake County. He com- procession there were eighty-five members and the republicans had but one majority, so that Mr. Haines held the balance of power, as he did in 1855, during the contest for the speakership and the United States senatorship. Upon both occasions he acted independently, in one case being greatly instrumental in shaping the anti-monopoly element in the State constitution, and in the other being a power in the choice of a senator. Mr. Haines was re-elected to the Legislature in 1870 and in 1874, representing, during the latter year and under the apportionment of the new constitution, the counties of Lake and McHenry. At the session of 1875 came the contest for speaker of the House. The independents again held the balance of power and Mr. Haines was called to the post of honor—the third officer under the State government. He was re-elected in 1882 and 1884, serving again as speaker of the House during the session of 1885.

MAJOR COVIN’S TERM.—In his inaugural address to the Council, on December 1, 1873, Mayor Colvin referred to the issues between the two parties in the preceding canvass, and promised economy and reforms. The following are excerpts from his message:

During the last municipal administration the attention of our community has, to a great extent, been diverted from all questions referring to economic management of the public finances, or to the production of life and property, either as fruitful as they were frugal, or to the expansion of the same. In this point of view, the enjoyment of the people of the State is in the hands of the public school. It is not intended to denounce that practice, but merely to state that, within the past year, it has become distasteful to a large portion of the community. In our late election the issue has been fairly and squarely made whether the existing ordinances shall be retained and enforced, or, upon the other hand, either repealed or so modified as to be in conformity with the present state of public opinion in our community. A majority of our people are convinced that it would be preposterous to designate their decision as a “snap” judgment, or to exalt its meaning less divide the question in favor of the latter alternative. It behooves all good citizens who believe in the principles of our republican form of government to accept that popular decision, and which, following the advice of my predecessor in office, they have appealed. There is no reason to fear that those who consistently believe in the existing ordinances upon the subject to be deterred by a spirit of religious intolerance inconsistent with the spirit of our age, will, on their own part, defy the spirit of mutual toleration. If the Common Council, in its wisdom,
and having undoubtedly full power upon the subject, should determine either to arrest the party without production of any bond, and to try the cause on Sunday, as the law requires, or to fullly secure the parrties exercised a portion of our citizens from any injury, by immediately apprehending and securing such persons in the person of citizens, it will do no more than its duty toward the majority of the people.

Our police system should be conducted upon the principle of the prevention of evil, and it is the especial duty of the legal authority to prevent the city from being profited by means of any of the prevalent forms of vice. When it does, he became the principal instrument of the police to prevent the enforcement of the various ordinances of the city, and to prevent the misuse of the funds raised by the various ordinances of the city, and to prevent the misuse of the funds raised by the various ordinances of the city, it was not until the 350,000, when the amount in the hands of the city was $1,000,000.

1871. Shortly before the fire, however, the water fund was known to be over $1,000,000, whereas, from the records, the amount in the hands of the city was $250,000.

Mr. Tucker confessed that he was short $350,000, and Mr. Sherwood said subsequently he understood from Gage he had confessed to Mr. Bond and Comptroller Barry that he was short $350,000. Mr. Gage related to Mr. Bond that the evidence was such as to establish the intention, in which to straighten matters up. Mr. Sherwood consented, insisting that the books should be fully written up, and entered the interview feeling satisfied Gage would make up the deficiency before he was compelled to make a settlement with his successor. The finance committee made up a report to the Council, which Mr. Sherwood refused to sign, on account of his knowledge of the facts above given. The deficit at the end of Gage's term was $607,705.58. The amount stated in the demand of his successor, Treasurer O'Hara, of which $147,000 remained in the banks, leaving the actual claim against Gage $660,705.58. The re-indictment of Gage for perjury was imposed by Judge McVicker on March 26, 1873, on the ground that in his affidavit Gage omitted the word "unlawfully" before the word "use," and that the affidavit was therefore merely a voluntary offering and not a legal document within the meaning of the law. On remand for further proceedings, Gage moved a change of venue to Lake County, and finally defeated the city in this criminal charge also.

In March, 1873, a judgment was rendered in the Circuit Court of Cook County against David A. Gage, and his bondsmen, William F. Tucker, Albert Croxley, John H. Sherman, James H. McVicker and Nathaniel P. Wilder, for the sum of $250,000. The case was taken to the Appellate Court by error, by the defendants, and that court rendered judgment of affirming the judgment of the Circuit Court, reversing the judgment of the Circuit Court. The city appealed from the judgment of the Appellate Court to the Supreme Court, and in that court, at its September term, 1873, the judgment of the Appellate Court and directed the latter court to enter judgment confirming the judgment of the Circuit Court, which was done accordingly. In December, 1873, David A. Gage and wife executed to George Taylor a deed of trust of several pieces and parcels of land to secure the city on account of Gage's indebtedness, and containing a power of sale, etc. Of this land a certain portion described as being in Township 35, Section 1, was not owned by Gage, but he did own 90 acres in Township 35, Section 1, which he claimed was the land he intended to convey, but that a mistake was made in the description. He subsequently conveyed the tract in Township 35, Section 1 to another party, and the trustee thereupon filed a bill to have the latter conveyance set aside and the description in the trust deed corrected.

While T. J. Dickey was corporation counsel, he filed a bill in the Circuit Court of Cook County, for condemnation of land to be sold to a corporation for the purposes of a farm, and to raise funds for the county, the city to sell a tract of 254 acres, known as the "Gage farm," another party, a non-resident of the State, claiming interest as a creditor of Gage, filed a cross-bill, and upon his petition the cause was removed to the United States Circuit Court, but on motion of the corporation counsel, the United States Court remanded the cause to the Superior Court, holding that it was not removable therefrom under the Act of Congress. From this order the corporation counsel in the cross-bill took an appeal to the United States Supreme Court, which court affirmed the order of the court below, remanding the cause to the Superior Court of Cook County.

Mr. Gage also assigned, in 1873, to George Taylor, as trustee, for the use of the city, certain choses in action, such as bonds, life insurance policies, etc. Up to February 19, 1880, Trustee Taylor had realized for the city from real estate sales and other sources $100,000, which amount was credited on the judgment against the bondsmen.

On January 10, 1881, Corporation Counsel Adams recommended to the Council that authority be conferred upon the Mayor and Corporation Counsel, to make such laws and issue such ordinances for the better government of the city, as might be necessary to prevent the city from losing anything in which it had a legal interest, and the Council accordingly made the title of the city to the 30 acres in township 35. How much the city will realize upon the total deficiency will not be known till all of the lands have been sold.
Council appointed a committee of expert architects, composed of J. M. Van Osdal, chairman; W. W. Boyington, A. Bauer, Edward Buring, J. J. Eagan, and O. L. Wheelock, to examine the foundations of the Custom House, consult with the Government engineers, and report to the City Council. The architects subsequently reported that, in their estimation, the foundations were sufficiently secure to support the contemplated structure. They also put in a claim for pay for their services, and as this contingency had not been provided for, various embarrassment ensued before the claim was ultimately satisfied.

On April 23, 1875, during Mayor Collin's term, an election was held on the question of the proposed organization of the city under the resolution of the charter, and a question of minority representation in the Council. The call at this time was in favor of the new charter and against minority representation; and while the voters did not take much interest in the question, they had not been fully discouraged; the aldermen went out in their wards and succeeded, by reason of a light vote, in carrying the election to suit themselves. The vote as canvassed on May 5 was—For organization of the city under the general law, 11,717; For minority representation in the Council, 1,550; Against, 5,544. On June 25, 1875, the Committee on Police, to whom had been referred the organization relative to the abolishment of the Board of Police and Fire Commissioners, reported an ordinance creating the present Police and Fire Departments and the offices of City Marshal, Superintendent of Police and Fire Marshal, and on June 28, after a careful examination of the ordinance, the Council at large passed it with a vote of 23 to 5. In March, 1876, the ordinance creating the Fire Department was amended so as to put the appointive powers and full control and management in the hands of the fire marshal. The same day the Board of Aldermen was organized. Mayor Collin, on July 30, 1875, appointed George L. Dunlop the first city marshal under the new law.

On February 28, 1876, the Council passed an ordinance redistricting the city into eight wards, thereby reducing the number by two wards.

At a special meeting of the Council, on March 24, 1876, Alderman Woodman moved that the city clerk be instructed to call a "Special election for Mayor, April 15, 1876, to fill the existing vacancy." The motion was lost by a vote of 21 nos to 16 ayes. On March 27, the Council judiciary committee reported an ordinance creating a certain portion in answer to the petition of a large number of citizens for a special election. The ordinance was defeated by vote of 22 nos to 16 ayes. At the Council meeting of April 28, 1876, Alderman White offered a resolution, which was adopted, calling upon the Law Department for an opinion upon the following questions:

1. Is it the duty of the City Council to canvass the votes cast at the recent election for City Clerk?
2. If not, can this Council or its successors declare a vacancy to exist in the office of the City Clerk?

The Law Department, at the meeting held on May 1, 1876, submitted an opinion by Egbert Juniewicz, city attorney, in which both questions were answered in the negative.

The Council proceeded to other business, and began to attack the financial policy of the administration, and there were quite a number of citizens in favor of the repudiation of the payment of their taxes, and they also favored repudiation on the part of the city of the payment of the outstanding city scrip, or the certificates issued subsequently to the adoption of the new charter. On February 21, 1876, Comptroller S. S. Hayes, in an exhaustive communication, rebutted any possible legality in such action on the part of the city.

By the adoption of the new law, the re-districting of the city and other improvements in the system of government noted, the old and cumbersome machinery of many confusing boards and much paper work were displaced, and the administration of the laws and ordinances was simplified and made more direct in the hands of the Mayor and heads of departments.

Moses Jones Wentworth, attorney at law, is a son of Colonel Joseph and Sarah F. Jones Welles, and was born in 1848. He attended the schools of his native town during his youth, and then entered Harvard University, from which he graduated in 1865. He came to Chicago at the age of twenty-three years, 1867, and entered the University, graduating in 1871. In 1874, he was elected a member of the Legislature, re-elected in 1876 and 1878, and was nominated for the fourth term, but declined the honor. During his three terms in the Legislature, he never failed upon a par for Wessex, and was born at Sund-
HISTORY OF CHICAGO.

At the meeting of the Council on June 21, Alderman McCrea presented the following communication:

"HON. M. A. MCREA (Chairman):

Dear Sir: I came into this office one year ago, and I have endeavored, in my public position, to fulfill the trust of the people. I have made every effort to make the city as efficient as possible. In order that the city affairs might not be embarrassed, and that I could do my best for the city, I have been compelled to make some disbursements. It has come to my knowledge that I have been using the money of the city in a way that cannot be justified. It is therefore, therefore, that I present to the Mayor and Aldermen the following resignation of the appointment and confirmation of J. A. Farwell to the position."

A communication from Mr. Colvin, wherein he named Mr. Farwell for comptroller, and the appointment was confirmed by a vote of ayes 26, nays none.

The vote by which the ordinance abolishing the office of comptroller and transfering the duties to the city clerk was passed, was thereupon reconsidered, and on a motion of Alderman Thompson to again pass the same ordinance, thirty votes were cast; the ordinance was then incorporated into a joint building for the new Court House and City Hall, pursuant to resolution, the chair at this meeting appointed Alderman Van Oss, Abich, Kerber, Gilbert and White a special committee, with instructions to arrange for the removal of the old Court House and the new Court House.
correct an erroneous impression of the invalidity of the official acts of Mayor Monroe which seems to exist to some extent, that the communication was notified at.

JOHN H. THOMPSON.

A. W. WALDO.

FRANK LAWLER.

JAMES H. GILBERT.

Committee on Judiciary.

The closing features of the Colvin administration were a report of the special committee appointed to consider the matter in favor of abolishing the Board of Public Works and the Board of Health, and reorganizing in the same; the Board of Public Works under a commissioner at a salary of $3,000 a year, and the Board of Health under a health officer at $1,500 a year, and a report of the Finance Committee adverse to the resolution to disband the Police and Fire Department.

FRANK LAWLER, justly called the workingman's friend, has risen to his present enviable position from the humblest walks of life. Born in Rochester, N. Y., on June 25, 1812, he was early left to rely upon his strength. He came to Chicago in 1834, and began business life in a brick yard at thirteen years of age. He carried newspapers, then advanced to the position of news agent on the railroad, and next apprenticed himself to a shipwright and caulker. As a journeymen he became noted for his skill, but eventually drifted into intellectual employment for the benefit of those hard-pressed classes with whom he was in such close sympathy. As president of the Protective Association connected with his trade, and in which he had long served as a member, Mr. Lawler came into contact with the relations of craft and also with those in laboring on other lines. After he had acted as general agent of the Workingman's Advocate for a time, in furthering the advance of the eight-hour law and other legislation, in the interest of his fellows, he returned cheerfully to labor at his trade. In 1868, he was appointed a letter-carrier by General McArthur, and in 1875 was transferred to a position in the registry department of the Chicago post office. In 1877, he was transferred to the third department in order to take his place in the new City Council as alderman from the Eighth Ward, having been elected in the spring of that year. Into this body he brought the same spirit of helpfulness to the workingman which he has ever exhibited. His campaign against the tax-fighters of 1877, 1873 and 1874, and later against the employment of convict labor in any form, especially on the new City Hall, will go into the political history of Chicago as a very important chapter. As an index of how his efforts were looked upon by the leaders of business the following resolution, which explains itself, is presented:

"INTERNATIONAL TYPOGRAPHICAL UNION.

DIEGO, Mich., June 7, 1876.

"The following resolution was adopted by the International Typographical Union in convention assembled (delegates being present from all the cities in the United States, the territories, and Canada) in the City of Detroit, Mich., on the day and date above mentioned.

"Resolved, That the thanks of the International Typographical Union are hereby tendered to Mr. Frank Lawler, of the Common Council of the City of Chicago for his successful and energetic opposition to the employment of convict labor on the new City Hall of that city.

"J. H. O'DONNELL, Secretary.

D. W. STREET, Treasurer.

The ordinance which passed the Common Council, during his first term of service, requiring the bridges to be closed from 6 to 7 o'clock a.m., and from 5:30 to 6:30 p.m., was also Mr. Lawler's measure, conceived for the benefit of thousands of workingmen, to whom delays at these times of day might lose them their places or be of serious inconvenience to them. Among other measures which have now become a part of the municipal law, and for which the laborers of Chicago must thank their unselfish and consistent friend, may be mentioned the ordinances by which the working classes are released from their toil at four o'clock Saturday afternoon; requiring merchants to furnish seats for their female employes; and forbidding the employment of factors of child labor under two years of age. These are but a few of the actual results of his exertions. It is not out of place to here call attention to the fact that Mr. Lawler, although not an orator and making no pretensions in that line, by his labors in the City Council to establish a municipal system of tenement-house inspection, is entitled to no small share of the honors which attach to those who are at the foundation of the present State law on that subject. He has, of necessity, met with great abuse from those whose spirit which has prompted him throughout his career and who, perhaps, are jealous of the hold which he has obtained upon the confidence and hearts of his constituents, hot faith in the honesty of his intentions and the efficiency of his work, is evident from his triumphant election in November, 1854, to a seat in the National House of Representatives, from the Second Conception District, in the face of the coarseness and one of the other of the democratic nominees were defeated by over 5,000. His term as alderman of the Eighth Ward expired in May, 1856, and he qualified in the popular branch of Congress on March 4, 1857, succeeding John P. Finley. His success is a tribute to honesty and hard work unaccompanied by rhetorical flourishes. In addition to his connection with the various labor organizations of the city, Mr. Lawler is a member of the Ancient Order of Hibernia Division 7 of the Western World; the Oddfellows Lodge; and of the Independent Order of Foresters, Fidelity Court. He was married at Chicago, on December 5, 1876, to Miss McQuaid. They have four children.

CHARLES C. LARSEN. Lieutenant of police at the Chicago Avenue Station, has been a resident of this city for over twenty years and a member of the Police Department since 1873. His name has been familiar to the community for many years, having served as a brave and efficient officer at routine duty, but also as identified with many noted detective exploits, and his recent promotion to a position of importance and responsibility has been the result of marked ability and observance of duty. Lieutenant Larsen was born at Copenhagen, Denmark, on May 14, 1854, and is the son of Christian and Clara Larsen, of that city. There he received his early education, and in 1865 he immigrated to America, and, after a brief sojourn in New York City and on Long Island, came to Chicago, for permanent residence, in the summer of 1866. In August, 1873, he joined the city police force, entering upon duty as a patrolman at the West Chicago-avenue Station, where he was located for nine years, a portion of the time being detailed on detective duty on special service. In 1881, he was promoted to a desk-sergeantcy, and in the fall of the succeeding year entered on a similar position at his present station. He was joined in 1882 by his father, who also served as a police officer. For a time, he was also clerk of the Police Court. On February 13, 1885, he was promoted to the position of patrol sergeant, and transferred to the Harrison-street Station, where he remained until December 25, 1885, when he was returned to the Chicago Avenue Station. On February 19, 1886, he was promoted to a Lieutenancy, to take the place of Lieutenant Shippar, transferred to the Homan-street Station. Lieutenant Larsen is familiar with every branch of police service, routine, patrol, clerical and detective, and his record for efficiency, bravery and ability is not surpassed by any member of the force. In connection with Ex-Chief of Detectives Garfield, he worked the celebrated Dr. Mayer poisoning case, and was also prominent in the Johnson-Hultgen assassination murder. In the line of promotion and duty he enjoys the confidence of his superior officers and the esteem of his associates. Lieutenant Larsen was married in Chicago, in the presence of the Rev. Mr. Peters, pastor of the New Covenant Presbyterian Church, and is the father of two daughters.

Vlademar and Dagmar.

MAYOR HEATH'S ADMINISTRATION.—On July 17, 1876, the Council met in regular session and suspended the voice of the special election of July 12 for Mayor, the result being as follows: Monroe Heath, Republican, 19,298 votes; Mark Kimball, Democrat, 7,509; J. J. McGrath, Independent, 3,797. Monroe Heath was declared the elected Mayor for the term ending March 1, 1877; his official bond, signed by Monroe Heath, William F. Milligan, Peter Schuttler and Christopher Hotz, was approved.

Charles Tarnow was declared elected Alderman of the Seventh Ward, to fill the vacancy caused by the resignation of James H. Hildreth.

The tax collection bill, under which the tax commissioner and city assessor had been operating, having been declared unconstitutional by the Supreme Court, the Council adopted a resolution calling on the Mayor to discharge the assistants and employes of both of these offices and to remove the officials themselves. An order was also passed directing the Board of Education to withhold the construction of proposed school buildings, and the Committee on Schools to report a list of all leases of school property, and the dates of expiration of the same, with the view of selling a portion of the property in order to help the city out of its financial strait. The special committee, appointed to consult with architects and the Committee on the construction of the new Board of Education, was discharged, and their duties transferred to the Committee on Public Buildings, and the Council refused to instruct the city attorney to take steps to join the county from proceeding with its suit against the district. The order of the Board of Health and reorganizing it under a Commissioner of Health was adopted, and the office of city physician was done away with. The first appointment made by Mayor Heath was that of Peter Brockholst McVickar, but he was not confirmed by the Mayor as the Commissioner of Health, who was promptly confirmed by the Council.

Mayor Heath, on the advice of the corporation counsel, on July 26, vetoed the ordinance which permitted the taking off of half of the street lamps from being lighted at night. At the meeting of the Council on July 26, an ordinance was passed reducing the pay-roll of the Fire Department twenty-five per cent.; the pay-roll of the Board of Public Works per cent.; the pay-roll of the Board of Public Works per cent. per dollar.; the salaries of the comptroller and his clerks,
of the gas inspector, and of the police justices and clerks were reduced, and the offices of city tax assessor and city tax commissioner were abolished.

On July 31 the following resolution, offered by Alderman J. L. Thompson, was adopted by the Council on unanimous vote:

Resolved, That the city taxes collected by virtue of the tax levy of 1876 are hereby referred to the Committee on City Affairs, to whom the collections were referred, recommended that they be paid and accounted for on the basis of the ordinances referred to, and ordered the Clerk of the City to accept all such collections as valid, and that the same be paid into the city treasury.

On September 18, the Council formally, by ordinance, abolished the old Board of Public Works and vested their rights and duties and the Commissioner of Public Works with the President of the Council.

During Mayor Heath's first term was carried on what was known as the "sign war." Complaints having been made that the ordinance regarding street obstructions was violated in hundreds of instances, Mayor Heath ordered the signs to be removed, and all such obstructions removed, and the Police and Fire Departments were instructed to carry out the order. The Council finally decided to amend the ordinance, and the Mayor was requested to withhold the removal of the signs, but prior to the action of the Council the signs had been removed by bodies of police, and several street encounters and much excitement was the result.

On May 13, 1877, the Council, on the recommendation of the Board of Finance, passed an ordinance revising the City Treasurer's accounts.

Under the provisions of the Acts of the Legislature changing the name of the City of Chicago, approved March 9, 1877, the Council, on March 13, passed an ordinance re-districting the city into new election precincts.

Under the new city charter, foreign insurance companies were obliged to place a bond with the city treasurer of $5,000 for two per cent. of their collections as security for collection of the city taxes, giving as his reason that the compensation of the town collectors was fixed by statute, and that by virtue of the general revenue law of the State the city taxes were extended on the books of the collector, the same as State and county taxes.

Under the provisions of the Acts of the Legislature changing the name of the City of Chicago, approved March 9, 1877, the Council, on March 13, passed an ordinance re-districting the city into new election precincts.

On March 22, 1877, the Council passed an ordinance ordering a tax levied for the purpose of putting the City Hall and other public buildings into repair, and paid into the city treasury, and, by a fair and equitable apportionment of the city taxes among the various municipalities, the cost of the City Hall and other public buildings shall be limited to $100,000 or more is now justly credited to the building or city hall fund; and it is here recommended that the Council of the city of Chicago, as the next step in the resolutions of the City Council, provision was made for the whole of the city hall fund, together with the amount of the money thus unappropriated, to be added to the general revenue of the city.

The money belonging to the building or City Hall fund has been, to the extent stated, collected from the taxes levied on the property in the city, and is now properly credited to the building or city hall fund.

On July 12, the Council adopted a resolution, of which the following is self-explanatory:

WHEREAS, The revenue from taxes which was anticipated, of those belonging to this city, and was expected to be, and was secured to, and paid into the city treasury, and, by a fair and equitable apportionment of the city taxes among the various municipalities, the amount of the city hall fund may be limited to $100,000 or more is now justly credited to the building or city hall fund; and it is here recommended that the Council of the city of Chicago, as the next step in the resolutions of the City Council, provision was made for the whole of the city hall fund, together with the amount of the money thus unappropriated, to be added to the general revenue of the city.

WHEREAS, The citizens of Chicago believe that the present Council has been wasteful and unwise, and have resolved that

Be it further Resolved, That the Mayor of the city, and the City Council and the Comptroller of the city are hereby, and are hereby, requested to bring all such matters before the Council at their earliest convenience, and to make all such arrangements as shall be necessary, at the cost of the city, for the purpose of enforcing obedience to the laws, returning and suppressing rebellion.

On Tuesday, April 3, 1877, the first election for Mayor under the new law, changing the time of election from fall to spring, was held, and Monroe Heath was re-elected Mayor for the ensuing two years.

The city, having brought suit against George Van Holten, ex-
Under the provisions of this ordinance, E. S. Chesbrough was appointed commissioner of Public Works, on January 12, 1879.

On April 28, 1879, the following was passed by the Council:

Resolved, That the thanks of the City Council be, and are hereby tendered to the Hon. Monroe Holmes, in appreciation of the manner in which he has managed the affairs of the city during his administration.

Mayor Heath said:

This resolution is a very flattering one. If I have been enabled in my administration to do anything for the good of the city, it has been because I have followed the co-operation of the Council. I must acknowledge the thanks of the city for its hearty support of my administration.

I thank you, gentlemen, and will now announce the inauguration of the new members.

Mayor Harrison’s Administration.—The municipal election was held Tuesday, April 1, 1879, and was memorable among the political annals of the city. There was three full city tickets in the field, the Republicans, Democrats and Socialists having candidates for the various offices. Among the Republicans there was some dissatisfaction, one faction demanding the re-nomination of Mayor Heath and another favoring Abner M. Wright. Mayor Heath refused to allow the use of his name and Mr. Wright was nominated and the voters and achieved a splendid majority in the elections as follows:

Democratic Ticket.—Mayor, Abner M. Wright, 5,665; City Treasurer, William C. Selig, 2,276; Attorney, Jonas S. Crittenden, 2,411; City Councilors, Abby M. Martin, John C. Dunne, Frederick A. Farnsworth, Peter E. Mclain.

Republican Ticket.—Mayor, Abner M. Wright, 4,046; City Treasurer, Martin A. Farwell, 2,665; City Clerk, Peter Hunter, 2,574.

Socialist Ticket.—Mayor, Ernst Schwab, 1,829; City Treasurer, Frank A. Stotter, 1,874; City Attorney, Henry Ribetti, 1,856; City Clerk, Henry M. Hildreth.

The total number of votes cast in the election, including three hundred and sixty-one vacancies, was: Mayor, 5,821; Treasurer, 5,951; Attorney, 5,826; Clerk, 5,777.

Eighteen Aldermen were elected, the vote for the various candidates as follows:

First Ward—Arthur Dixon, Rep., 1,657; John Ellis, Dem., 729; N. J. Johansen, Socialist, 1,150. Second Ward—Alfred Baldwin, Rep., 1,500; Samuel J. C. Dunton, Dem., 1,320; John M. Clark, Rep., 1,420; A. C. Seebach, Dem., 760; H. L. Hull, Ind., 1,424. Third Ward—Alvin Grannis, Rep., 1,320; John Hall, Ind., 1,265. Fourth Ward—William Cowan, Dem., 1,305; A. Dier, Rep., 867; J. J. Alpers, Socialist, 1,583. Fifth Ward—Michael McAleny, Dem., 1,458; Andrew King, Rep., 865; E. C. Morgan, Ind., 1,311; James McFarland, Dem., 1,528; William Seward, Ind., 1,580; O. W. Barrett, Rep., 775; Henry Stahl, Socialist, 519. Ninth Ward—James Peayer, Dem., 1,689; Richard Jones, Rep., 816; E. R. Pratt, Socialist, 977. Sixth Ward—Michael McNamara, Dem., 1,078; E. Lawrence, Ind., 437; Robert Rook, 361; E. C. Christenson, 23. Seventh Ward—George B. Swift, Rep., 2,066; W. B. Batehame, Dem., 827; H. Johnson, Ind., 1,116. Eighth Ward—Lowery Everett, Rep., 2,550; O. A. Noehl, Dem., 1,155. Ninth Ward—George A. Armstrong and Thomas Brennan for members of the Board of Education. The names of James, Allen and Reinhart were subsequently withdrawn. The other appointments were all afterward confirmed, with the exception of M. J. Baker and C. H. Schilling for City Auditor; and John F. Holzner, for City Treasurer, whom the appointment of Mr. McKee was referred, reported recommending that he be confirmed. Mr. Hailor was confirmed to the vacancy occasioned by the resignation of Mr. E. G. Webster. The following councilmen were confirmed to the various offices:

Gentlemen of the Council: One year in the history of our city, and which is as the index to the past and the harbinger of the future, is hindered by the limitations of the peculiar character of our office. Whether we have fulfilled the expectations of our constituents in the exercise of our powers and duties, or not, is for the people to decide. Whether our deliberations will ever prove for the best interests of the municipality, our history alone can demonstrate; but we have no doubt each member has done that, which in his best judgment, he thought at the time was for the best interest of the city.

On June 24, Mayor Heath sent to the Council the names of John A. Farrell, for city comptroller, Joseph F. Bonnell, for corporation counsel; A. N. Linscott, for prosecuting attorney; Michael Hickey, for general superintendent of police; George B. Anderson, for deputy superintendent of police; Louis Wall, John C. Haines, and Charles G. Hammond for inspectors of the Hospital of the Menor's Home; W. H. Broom, for Alderman, of the third ward; Louis M. Zulch, for city physician; J. A. Flaming, for city treasurer; Louis M. Fick, for city assessor; James A. Dunne, for city physician; John D. Murphy, for inspector of steam boilers; J. A. Flaming, for inspector of steam engines; Dr. B. A. B. Bennett; Louis M. Zulch, for city assessor; E. J. Dooley, for inspector of steam boilers; L. B. Haines, for city assessor; George B. Armstrong and Thomas Brennan for members of the Board of Education. The names of James, Allen and Reinhart were subsequently withdrawn. The other appointments were all afterward confirmed, with the exception of M. J. Baker and C. H. Schilling for City Auditor; and John F. Holzner, for City Treasurer, whom the appointment of Mr. McKee was referred, reported recommending that he be confirmed. Mr. Hailor was confirmed to the vacancy occasioned by the resignation of Mr. E. G. Webster. The following councilmen were confirmed to the various offices:

Gentlemen of the Council: One year in the history of our city, and which is as the index to the past and the harbinger of the future, is hindered by the limitations of the peculiar character of our office. Whether we have fulfilled the expectations of our constituents in the exercise of our powers and duties, or not, is for the people to decide. Whether our deliberations will ever prove for the best interests of the municipality, our history alone can demonstrate; but we have no doubt each member has done that, which in his best judgment, he thought at the time was for the best interest of the city.
Harry Rubens and D. R. Storey, directors of the Public Library; Luther L. Etherington, auditor; Henry A. D. Waldron, clerk of the circuit court; J. F. South-

From the Daily Chicago Tribune

On May 19, majority and minority reports from the committee on the prevention of closing saloons for the special session were received. The majority report opposed any interference on the part of the Council with the "personal liberties" of citizens, and insinuated the future created by similar attempts under the Municipal Act as an administration of the law. The minority report was signed by Aldermen Ryan, Neisen, Elzing, and Lodding. The minority report, signed by Alderman Collerton, advised the passage of an ordinance to enforce the State law and close all saloons on Sunday.

On December 8, Mayor Harrison sent to the Council a communication setting forth the difficulties encountered by the police in enforcing the 12 o'clock, midnight, saloon-closing ordinance, and requesting, in the interest of the health of the community, that saloons be allowed to employ at night in the business districts, so that saloons be allowed, upon payment of $104, in addition to the regular license fee, to re-
novate the 12 o'clock lawfulness. A communication was also sent by the Mayor, embodying reports of the Police Department and intended to show that there had been no increase in crime and lawlessness.

On December 22, the Council extended the freedom of the city to Charles Stewart Parnell and John Dillon, in the following resolution:

Resolved, That the Mayor be, and he hereby, authorized to extend the banished condition of the law against the representatives and sympathizers of oppressed people of Ireland, Messrs. Parnell and Dillon, now on route to this country.

On February 9, 1880, the Council accepted an invitation from the Irish Land Reform and Relief Association, to attend the public demonstration and reception to Mr. Parnell and his associates, on Monday, February 9. On Thursday, January 29, the Mayor appointed Al-

The new elected members of the Council took their seats on May 10, Alderman Ballard presenting resolutions declaring James H. Byrnes, who was unreelected, and Alderman Plessey, who was elected Alderman, to be duly installed.

The newly elected members of the Council took their seats on May 10, Alderman Ballard presenting resolutions declaring James H. Byrnes, who was unreelected, and Alderman Plessey, who was elected Alderman, to be duly installed.

The newly elected members of the Council took their seats on May 10, Alderman Ballard presenting resolutions declaring James H. Byrnes, who was unreelected, and Alderman Plessey, who was elected Alderman, to be duly installed.
POLITICAL HISTORY.

1881, Mayor Carter H. Harrison was nominated by acclamation for re-election to the mayoralty; Rudolf Brand was nominated for city treasurer, Patrick J. Howard re-nominated for city clerk, and Julius S. Grinnell re-nominated for city attorney.

John M. Clark was the nominee for Mayor by the Republican convention, John Raber for city treasurer and W. D. Underwood for city attorney.

The election occurred on Tuesday, April 5, and resulted as follows:

In this election, Timothy O'Mara ran, as an Independent, for Mayor, receiving 764 votes. The Socialists nominated George Schilling for Mayor and Frank A. Stauber for treasurer, serving no purpose whatever, as there could be no combinations of their movement in politics since the election of two years before. Schilling received 240 votes and Stauber 1,099. There were 1,585 scattering votes on city attorney and 1,536 on city clerk.

The aldermanic vote in the various wards was as follows:

party machinery, and certain aldermen who had the worst elements of the population subject to their commands. A committee of citizens, representing both parties, was organized to consider this subject and take action in reference to placing a "reform ticket in the field. They met in Fairbank Hall, Central Music Hall Building, and became known as the "Fairbank Hall SilK Stockings." The Republicans duly held a convention and a compromise was effected with the Fairbank Hall people, whereby by Eugene Cary was nominated for mayor, Dennis O'Connor for treasurer, B. F. Richolson for city attorney, and Emil Dietzsch for city clerk.

The Democratic convention held, at the Palmer House, re-nominated Carter H. Harrison, by acclamation, and John M. Dunphy for city treasurer; Julius A. Jr., for councilman; John G. Neumeyer for city attorney and John G. Neumeyer nominated for city clerk.

The election occurred on Tuesday, April 3, and was an exciting one. The result was as follows:

In the wards the vote for aldermen was as follows:

The appointments of officials made by Mayor Harrison in 1883-84 were as follows:

T. T. Gurney, comptroller, re-appointed; Oscar C. DeWolfe, health commissioner, re-appointed; D. W. Oettinger, commissioner of Public Works, re-appointed; Anna D. Doyle, superintendent of police, re-appointed; H. A. Johnson, comptroller of the City Department, re-appointed; Eugene Frazier, all inspector, School Inspectors—M. J. Dineen, to succeed M. H. Mass; George D. J. McArthur, to succeed E. G. H. A. Hoe; John M. Clark, to succeed H. M. Jeffries, J. B. 4. Doerner, to succeed ex-officio members of the Board of Education, 1. W. Koster, to succeed himself; Bernard Gallagher, to succeed himself; H. L. Wallace, to succeed H. R. Koster, manager of the Bindery and Press Department; Patrick Tierney, Inspector of steam boilers: W. C. Odin, city collector; F. W. Dering, city attorney; Frederick L. W. Goman, treasurer; Leonard W. W. J. Doake, sergeant-at-arms; Frederick T. Kinsey, police magistrate, East Chicago-avenue Station; Charles Wylie, police magistrate, South Chicago-avenue Station; Daniel J. Smith, police magistrate, South Chicago-avenue Station; Peter Fiske, police magistrate, Harrison- street; have prepared the accompanying resolutions, which I herewith submit for your approval and action.

CARTER H. HARRISON, Mayor.

On motion of Alderman Sanders, the Council adopted the resolutions unanimously, and resolved to attend the funeral in a body. The following are the resolutions:

WITNESSES. There was killed in the late railroad disaster in New York state a citizen of Chicago whose close connection with the interests of the city and faithful services in behalf of the people render his death a public misfortune.

Resolved, That the death of Thomas Hoyne, the City of Chicago has lost one of its most patriotic, public-spirited and honorable citizens—a man whose efforts are in behalf of all that he believed to be for the interest of this community entitled him to the respect and admiration of all good citizens.

Resolved, That all city offices be closed during the hours of the funeral, as a mark of respect to the memory of the deceased.

Resolved, That these resolutions be duly published in the proceedings of this city, and that hereafter be furnished the press for publication and sent to the families of the deceased.

JOHN E. VAN PEIT, member of the Board of Commissioners of Cook County, was born at Burlington, New Jersey, on July 23, 1836. When he was three years of age his parents removed to Jerseyville, Illinois, where he was reared and educated. When quite a young man he engaged in the grain and lumber business, and this he continued with gratifying success. Mr. Van Peit is to-day one of the leading and best known politicians in Chicago, and is one of the most active and persistent workers for the principles of his party in the country. Politics, it may be said, he has always possessed a strong inclination for him, when he and hardly passed his majority he entered the field for which he had a penchant. He was one of the most active politicians of Jerseyville, and in 1862, when only twenty-six years old, he was elected treasurer of Jersey County, and held the office for two terms, or four years. In that position he discharged his duties faithfully and honestly, and retired from the office without ablemish upon his character or a reproach on his ability. He declined further political positions which were proffered him, preferring to attend to his legitimate business, although continuing to work most industriously in the ranks of the Democratic party and for its best interests. In the spring of 1873 he was nominated for Mayor of Jerseyville by the Democrats. The contest was an exciting one, Mr. Van Peit being elected by a good majority, and being the only candidate elected on the Democratic ticket. In 1874, he moved to Chicago, and engaged in the grain commission business on the Board of Trade. In December, 1882, he was elected chairman of the Cook County Democratic Central Committee, and has twice been re-elected to
that position which he has filled so acceptably. In the fall of 1883, Mr. Van Velt was elected County Commissioner, and he has held that important office up to the present time. He has served as chairman of Committee on Public Service for one year, on Public Charities, and on Judiciaries for one year. Mr. Van Velt is recently elected General Manager of the Chicago Commercial and Financial News Company. Personally, Mr. Van Velt is a sociable and agreeable companion, a genial gentleman, and one who is esteemed by all as a true public man. In politics he is a prominent Democrat, a member of the Iroquois Club, and a conspicuous figure in State and County politics.

Mr. Williams, who has been identified with Chicago's most progressive commercial interests for over a quarter of a century, was born in London, England, in 1837, and has been a resident of this city for over thirty years. His business and personal career, varied and active, show the growth of enterprise and ability with which this metropolis owes its growth and prosperity, as for a manufacturer in his especial line, Mr. Simons has been almost a pioneer. As a public man, he has made a noble record of practical benevolence to the public. He was elected to the City Council, on the largest majority ever attained in the Eleventh Ward. Mr. Simons resided in London until 1853. His father dying, he came alone to America, where he was the age of eight, with the elements of the carpenter's trade mastered. His business career in this city, since he commenced in 1855, is detailed on page 490, Volume II. Mr. Simons, in public life has been a familiar figure to the community for some years. A strong representative of the business interest, he first became a candidate for office in 1858, when he was elected alderman of the Eleventh Ward, there being no opposition. In 1885, he was re-elected, having a majority of over 1,700 votes, the largest ever cast in the ward. His political influence has been directed the past several years for public benefit, and he has procured the paving of miles of streets and alleys; has secured the fire-engine house on Curtis Street, the former of which was erected at a cost of $20,000; located several school-houses; caused night flags and grade-crossings to be placed at railroad crossings; and, circulating among the people largely, has secured numerous other material benefits for the ward he represents and the municipality at large. He was foremost in the transfer of Union Park and other parks to the West Park Commissioners, and was instrumental in obtaining legislative enactment on this matter, securing additional levies to pay the expenses of the same. Mr. Simons is interested and interested, in the growth of enterprise and ability to Williams, who was born in Utica, N. Y.; she died in 1880, leaving two children,—Samuel and William. He was married a second time, in 1892, to Mrs. Frances A. Gittings, of Chicago.

A special election for alderman of the Ninth Ward, to fill the vacancy caused by the death of John H. Foley, was held May 13, 1883. W. F. Mahoney received 950 votes and James Murray 54. Alderman Mahoney was duly installed on May 19. On May 24, a special meeting of the Council was called to take action in the death of Alderman Michael Gaynor, of the Ninth Ward. Alderman Gaynor was assassinated by James Hickey, a so-called "erank," who had unprovoked imagined personal grudge against Alderman Gaynor. Appropriate resolutions were submitted brokering remarks were made by Aldermen Lowder, Dixon, Bond and Ryan. On July 15, a special election was held in the Ninth Ward, and John Gaynor, brother of the deceased Alderman, for the unexpired term without opposition, receiving 706 votes.

At the general election, on November 4, 1883, a vote was taken in the city on the proposition to authorize the Council to appropriate $900,000 toward the purchase of land for the purpose of forming the police force. The proposition was carried in a vote of 64,562 out of a total of 100,975 votes. It was charged by the Press generally that the appropriation was illegally carried by means of the many frauds entered into the election.

On April 13, 1885, in view of the fact that certain newspapers charged that certain ballot-boxes, that should have been in the custody of clerks, were not in the custody of the police, Aldermen Noyes, Hull and Dixon were appointed a committee to investigate the matter. The boxes in question had been used in the municipal election of April 3, and it was declared that some of them remained out. The committee made an investigation, and reported to the Council that boxes sufficient in number to correspond with all the precincts were in the city clerk's vault, but that many of them were without numbers, improperly sealed, and generally in a bad condition.

At the same meeting, resolutions were offered by Alderman Cullerton, denouncing the statements of a partisan Press in reference to the last election, and directing the Council to a fair, honest and careful canvass of the returns; and by Alderman Ryan, directing the Mayor and Chief of Police to use every effort within their power to bring to justice persons engaged in any of the other offenses against an honest, free and fair election. Both resolutions were referred to the committee on elections. The committee, at the next meeting of the Council, recommended the passage of the resolutions, together with a resolution calling on the Governor to draw upon the contingent fund, for the purpose of procuring funds to assist an investigation of the facts and of bringing the perpetrators of such frauds to justice.

The balloting culminating the ballots cast in the Third Precinct of the Third Ward was stolen from the office of Howard's livery stable on Twenty-second Street, at night after the judges had finished their count of the returns. The only arrests made by the police were in connection with this affair. "Dutchy" O'Keefe was finally convicted of this bold and treasomorous effort to thwart the voting franchise of the people, and was sentenced to a term of five years in the penitentiary.

The judges of this precinct, Isaac Howland, Dr. Quinan and George Toddi, having preserved an abstract of the returns, forwarded the same to the Council. The Democratic majority in the Common Council returns, and the judges passed an order requesting of the corporation council an opinion as to what constituted legal returns.

On April 23, the Council adopted the following resolutions by a stately party vote, directing the Democrats voting for the resolutions and ten Republicans against:

WHEREAS, The city is at present in a state of alarm and excitement resulting from the result of the recent election, produced by the utterances of certain partisan newspapers and rash millionaires, who have been incapacitated by the Municipal Council of this city from exercising their privilege of expression, public opinion,

WHEREAS, in their wild and wanton utterances, the fair name of the Democratic party has been traduced, and the Democratic system has been spread abroad that Chicago is not only a stockhouse of all the disreputable characters, and that the voters of the city are more given to applauding criminals and ballot-box adulterers and disreputable characters generally,

WHEREAS, A large number of honest intelligence and general information, have come to regard these leaders, through repeated utterances of theirs, as a corrupt representation of the true condition of affairs in Chicago, and

WHEREAS, The tendency of all these representations has been, not only to injure the fair credit and standing of the city, but drive away trade that has its natural market here; therefore be it

Resolved, That the City Council hereby most emphatically denounced such utterances, and characterizes them as malicious and unbounded, pure delusion of disgruntled and disappointed adversaries and partisan tactists, and challenge the proof to show that Chicago is not as orderly, peaceable and law-abiding an any city in the country. We can most confidently and truthfully assure people in all parts of the country, that not only are the lives and propriety of our citizens perfectly safe and secure, but that our city is not and never has been intoned with crime and lawlessness than any city in the United States, in proportion to its population. Our streets are tidy and clean. Lake Street was never less panamura, a less number of the vicious class, and a less amount of crime.

Be it further resolved, That the election which these defamers of the city declare was carried under fraud, was one of the most pure, clean and fair elections the city has ever had, and that when a calm and sober second thought proceeds the passions of daily party passions, the council will be fully satisfied and convinced to the enthainment of which result this council hereby pledges itself by a fair, non-partisan, careful canvass of the entire returns.

Alderman R. B. Forrester.

Resolved, That the election which these defamers of the city declare was carried under fraud, which declaration, on the part of the council, we think will be fully satisfied and convinced, as a result of the contest of this election, and that when a calm and sober second thought proceeds the passions of daily party passions, the council will be fully satisfied and convinced to the enthainment of which result this council hereby pledges itself by a fair, non-partisan, careful canvass of the entire returns.

Alderman Robert B. Forrester.
The legal authorities consulted declared that judges of election were allowed by law to correct errors in their returns; that the returns certified by the judges as the returns must be accepted as such by the returning officers of the several counties.

The vote of the municipal election was finally canvassed by the Council on June 1, 1885, the result declared having been already given to Mayor Stronger, Clerk and Attorney, and being as follows on the Aldermen:

**First Ward—**Arthur Dixon, Rep., 1,692; Patrick White, Dem., 1,907.
**Second Ward—**Benjamin Bennett, Rep., 1,663; John M. Clark, Dem., 1,700. (There were 8 votes for George McManus, Ind.)
**Third Ward—**Charles C. Brown, Rep., 1,694; James L. Young, Dem., 1,777.
**Fourth Ward—**R. H. Wetherell, Rep., 1,650; Robert Abbott, Dem., 1,757.
**Fifth Ward—**H. F. Sheldon, Dem., 4,899; John J. Keane, Rep., 2,842.
**Sixth Ward—**C. E. F. Boyer, Rep., 2,847; Charles A. Mosher, Dem., 2,951.
**Seventh Ward—**Thomas Healy, Dem., 3,538; Fourth Ward—R. H. Wetherell, Rep., 2,532. (George Brann, 57; F. Dunn, 59.)
**Eighth Ward—**P. L. E. Cullom, Dem., 4,937; George Montgomery, Rep., 3,975.

The placing of presidential candidates in nomination began in the evening of the third day’s session. Hon. Shelby M. Collum nominated General John A. Logan; and James G. Blaine, of Maine, was nominated in nomination by Judge William H. West, “the blind orator,” of Ohio; and Chester A. Arthur by Martin I. Townsend, of New York.

The first ballot was taken on the fourth day, Friday, at 12 o’clock, with the following result: Whole number of delegates 1,290; second choice, 411; whole number cast 918; James G. Blaine, 534; Chester A. Arthur, 278; George F. Edmunds, 69; John A. Logan, 62; John Sherman, 36; Joseph H. Hawley, 13; Robert T. Lincoln, 4; W. T. Sherman, 2. Of the 44 Illinois votes John Logan received 40; Arthur 1; Abner Taylor; and Blaine 3. A. L. Woodruff, of Chicago, and George H. Davis, of Illinois, were nominated for Vice-President. When Illinois was reached on the roll of the fourth ballot it was decided for John Logan, 6; for Arthur, 3; John H. Hamilton, Abner Taylor and R. B. Raymond, 1. The nomination of Mr. Blaine having been made unanimous, the Convention adjourned until evening, when candidates for Vice-President were presented. B. Plumb, of Ohio, nominated General John A. Logan, and the nomination was seconded by representatives of various States. Motions were made to make the nomination by acclamation; but the roll being called for, a ballot was taken resulting in the nomination of Logan, 773; W. O.震惊, 533; I. F. Foraker, 1. General Logan’s nomination was made unanimous.

The canvass preceding the election of delegates to this Convention was a close and exciting one throughout the country, and many incidents happened to widen the apparent breach in the Republican ranks. It was charged that the “Stalwart” adherents of General Grant and Adirondack Conkling would defeat Mr. Blaine if he were nominated. A new influence in politics—a strong independent faction—came into existence, that was opposed to Mr. Blaine on the score of his record and the desire for reforms more radical than it was considered he would inaugurate if elected, especially in reference to the civil service. The tariff was the important feature of the campaign, Blaine being anavoed protectionist, while the Democratic party contained a large faction in favor of tariff-reform, or tariff for revenue only, which was widely opposed to the “Stalwart”s, who have been the first step toward ultimate free trade. In every Republican meeting and convention held throughout the country, Chester A. Arthur was endorsed, and his able administration raised by resolutions and speeches and his friends were earnestly desirous of his nomination. In Illinois there was a strong Arthur movement, represented in Chicago by such newspapers as the Daily News and the Inter Ocean, which papers offered decided opposition to John A. Logan as a presidential candidate. General Logan’s friends, however, controlled the State Central Committee, district committees, and the bulk of the party machinery, and the plea that he should have the delegates of his own State, and especially those from Chicago, his own city, finally prevailed. There were charges made of bad faith on the part of the representatives of two of the Chicago Congressional districts, and this had additional effect in decreasing the Republican vote in November. The Inter Ocean rendered a faithful party service, the Daily News, 6; J. C. Gresham; 6; J. B. Foraker, 1. General Logan’s nomination was made unanimous.

The canvass preceding the election of delegates to this Convention was a close and exciting one throughout the country, and many incidents happened to widen the apparent breach in the Republican ranks. It was charged that the “Stalwart” adherents of General Grant and Adirondack Conkling would defeat Mr. Blaine if he were nominated. A new influence in politics—a strong independent faction—came into existence, that was opposed to Mr. Blaine on the score of his record and the desire for reforms more radical than it was considered he would inaugurate if elected, especially in reference to the civil service. The tariff was the important feature of the campaign, Blaine being anavoed protectionist, while the Democratic party contained a large faction in favor of tariff-reform, or tariff for revenue only, which was widely opposed to the “Stalwart”s, who have been the first step toward ultimate free trade. The Inter Ocean rendered a faithful party service, the Daily News, 6; J. C. Gresham; 6; J. B. Foraker, 1. General Logan’s nomination was made unanimous.
Benjamin F. Butler, who had already been nominated for the presidency by a section of the People’s Party in the East, was present as a delegate in the Democratic Convention and a recognized candidate for the presidential nomination. On the evening of July 5, the local labor organization in favor of the establishment of the Knights of Labor, and it was viewed by not less than fifty thousand spectators along the line of march. General Butler attempted to address the multitude from the Palmer House, but the uproar was so great he could not make himself heard, and was forced to retire. It was known that the New York delegation was divided, and that forty-nine delegates were for Cleveland, the remaining twenty-three being for Flower, Bayard and Sloan, and all for Carter. General Butler would make a bluster fight to defeat Cleveland’s nomination. All of this added to the excitement and the intense interest everywhere manifested as to the probable outcome of the convention.

The Illinois delegation organized as follows:

John M. Palmer, chairman; W. H. Barnes, secretary; A. J. O’Connor, resolution; W. A. J. Sparks, permanent organization; William R. Morrison, resolutions; S. Corning Judl, national committeeman; A. E. Stevenson, member; Anthony Norton, vice-president; Harry Rubens, convention secretary.

The Democratic National Convention was convened to have been the most representative gathering ever held by the party. A short time prior to the convention, Hon. Samuel J. Tilden, the popular standard-bearer of 1876, who had a powerful following in the ranks of the Democracy who favored his candidacy, wrote a letter announcing that he would not contest the nomination. A comparatively new man in national politics, Grover Cleveland, governor of New York, developed surprising strength as a Presidential candidate. He was advantageously located in the State containing the greatest number of voters, and both parties were fighting, and had the indorsement of the Independents of the East, who were satisfied with his record as a reform governor.

The convention was called to order at 12 o’clock, July 8, and the first division occurred on the question of enforcing the unit rule as to the New York delegates, in accordance with the instructions of the Saratoga Convention. During the debate, Carter H. Harrison spoke in opposition to the enforcement of the unit rule. The National Committee presented a resolution providing for the government of the convention by the same rules as those that government of the convention by the same rules as those that governed the Republican Convention in 1876, which removed the unit rule. Senator Grady, of New York, offered an amendment providing for the recording of the votes of individual delegates. The amendment was lost, and the unit rule was adopted by a vote of 445 to 390.

The committee on platform met in the rooms of the Iroquois Club, and found themselves in a deadlock on the tariff question, the vote on chairman being eighteen for William R. Morrison, tariff reform, to eighteen for George L. Converse, protection. A compromise was made on the following terms as the majority wishes of the committee. The committee was addressed in behalf of the Irish National League of America, in opposition to absentee landlords in this country, by Alexander Sullivan, of Chicago, president of the League.

William H. Vilas, of Wisconsin, was made president of the convention.

On July 9, another test vote between the two elements in the convention was taken, on a motion to lay on the table a motion to proceed with the nomination of candidates. When New York was called, Chairman Manning announced 72 votes “no,” and was sustained by the chairman of the convention in voting his delegation as a unit, under the instructions of the New York State Convention, and the vote of the convention, as recorded, stood ayes 282, noes 180.

The convention proceeded to the nominations, brilliant speeches being made by many eminent speakers in favor of Senator Bayard, Senator McDonald, Senator Thurman, John G. Breckinridge, Grover Cleveland, Samuel J. Randall and George Hadley.

Mr. Lockwood, of New York, presented Cleveland’s name, and the nomination was seconded by Carter H. Harrison. Senator Bayard, Senator McDonald, Senator Thurman, John G. Breckinridge, Grover Cleveland, Samuel J. Randall and George Hadley.

The first ballot was taken at 12 o’clock midnight, resulting Hadley, 3; Carter H. Harrison, 228; Cleveland, 1; M. J. Flood, 145; Alexander M. Hamilton, 115; Thomas G. Turner, 78; John A. Logan, 50. Cleveland’s vote was cast by the Illinois delegation, 50 votes; for Carter, 2; for Cleveland, 25; for Hadley, 25; for Hamilton, 25. The latter vote being that of Alderman E. F. Cullerton, of Chicago.
On the morning of July 11, it early became apparent that the Indianians and local friends of Hendricks were present in the convention in large numbers. On the second and last ballot the voting had proceeded on the call of States and the Democratic hopefuls were heard as Illinois, and when the chairman of the Illinois delegation began to announce the vote, as Hendricks,—there suddenly broke out a scene of wild and enthusiastic tumult, the cheering drowing every other sound and concourse of voices. It was too late to stifle the convention, however, and the further announcement of 35 votes from Illinois for Cleveland somewhat lessened the enthusiasm. It was seen that Illinois was named.

Illinois first changed to 37 for Cleveland, Hendricks 1, Bayard 3, McDonald 2, and then to 44 votes solid for Cleveland. On the official record Illinois was credited with 39 votes for Hendricks, 11 for McDonald, 4 for Bayard, and 3 for the third man. The representation of the Democratic Convention on the tariff, and bidding for the support of the labor element of the country. The idea became prevail- ing that for the good of Illinois, and to perpetuate the candidacy but was a rate to draw off Democratic votes and thereby bring about the result desired. He received but few votes in the result.

To the representations made of their intentions, the Independents gave their active support to the Democratic ticket. They were called "mugwumps" by the Republican party organs. In Chicago there was a strong local organization, which sent out vast quantities of literature and enrolled thousands of names throughout the State. The executive committee was composed of Franklin MacVeagh, General A. C. McClung, W. T. Barker, Ed- ward G. Mason, George C. Clarke, James F. Choffin, Henry A. Gardner, Mason Thompson, and Edwin Burtin Smith. The State Campaign was also replete with excitement and interest, and close contests were waged between rival candidates for Congress.

In the first Chicago district, the Republicans renominated R. W. Dunning, and the Democrats named as his opponent William M. Tilden, a cousin of Samuel J. Tilden.

In the second district, the Democrats suffered to nominate John F. Finerty, who two years before, as an Independent Democrat, had de- feated Henry F. Sheridan, the regular Democratic nominee, if he would support the National Democratic ticket. Mr. Finerty, however, made no effort to win, and was content to cast his fortunes on the influence of his paper, The Citizen, an Irish National weekly, with Illinois for a protective tariff. The Democrats thereupon nomi- nated Frank Lawler, alderman from the Eighth Ward, who had a strong following among the working elements of the district.

In the third district, the supporters of George J. Davis and William E. Mason were divided by the result of the primaries. A contest ensued as to who should stand as the Republican candidate, which was carried to the National Committee for arbitration. A decision was rendered in favor of Mr. Mason, and Mr. Davis apparently withdrew, but upon his return from the East his supporters placed General James F. Trimaine in the field against Mr. Mason.

The Democrats, in this favorable emergency, nominated James J. Ward as their candidate in the district.

In the fourth Chicago district, the Republicans re-nominated George F. Adams and the Democrats re-nominated E. C. Altgeld.

In their State Conventions, the Republicans renominated Richard J. Ogleby for Governor and the Democrats nominated Carter H. Harrison, Mayor of Chicago, as their candidate. Both candidates made a personal canvass and stumped the State from end to end.

The official vote of Cook County in the general election of No-

A few days after the general election of November, 1884, it became generally known that the two houses of the Assembly in joint session would probably be a tie as between the Democrats and the Republicans, so that a single vote, either in the House or Senate might elect a United States Senator. It has been charged that this situation brount about the famous Brand-Leman imbroglio in the Eighteenth Ward of Chicago.

The Eighteenth Ward Case.—The excitement attending the Democratic National Convention had not died away in Chicago when the discovery was made, and announced to the public through the Press, that a bold and treasonable fraud had been perpetrated in the Second Precinct of the Eighteenth Ward, where the result had been so tampered with as to change the result in the precinct, giving a fraudulent majority for State Senator to Rudolph Brand as against Henry W. Leman. It is but justice to Mr. Brand to say, that neither then nor since has he been in any way cognizant of this fraud. Before even the magnitude of the outrage was known, Mr. Brand announced that he would not accept an election that was in doubt, and demanded a re-count. The excitement and investigation had raged, and a citizens’ committee was formed in the Eighteenth Ward for the purpose of hunting down and bringing to justice the miscreants who had perpetrated the frauds. Many leading citizens co-operated in this movement, among others E. Nelson Blake, A. A. Carpenter, Mc- iville E. Stone, General L. N. Stiles, Edwin Lee Brown, A. M. Day, E. F. Cragin, Eshrine M. Phelps, M. W. Fuller, and many other prominent representatives of both political parties. A. M. Day was chairman of the committee.

Examination of the ballot-box of the Second Precinct of the Eighteenth Ward showed that, after it had been placed in the custody of the county clerk and was in the vault of his office, the original ballots had been abstracted and a number of bogus or forged ballots, printed as fac-similes of the genuine ones, with the exception that they contained Brand’s name instead of Leman’s had been substituted. The fact that the General Assembly elect was to ballot for a United State Senator, and a careful canvass of the State had shown that the Senate and House were apt to be a tie between the two parties.

The whole case was a fraud, and the county clerk and the city clerk were charged with having knowingly in the course of the canvass of the elections, the county ballots had been forged so as to correspond, and

* A complete list of senators and representatives elected in Cook County Districts, since the organization of the General Assembly will be found in the list of those who have been elected at the close of this session.

** The vote as canvassed, without Brand’s apparent plurality being frauds. Governor Hamilton issued the certificate of election to Leman.
HISTORY OF CHICAGO

clever counterfeiters of the signatures of the judges and clerks of election were affixed. The Eighteenth Ward Citizens’ Committee, and the Federal authorities co-operating, arrested the judges and clerks of election. The following Know-Nothing, who desired to be a printing editor of the Daily News discovered where the bogus tickets had been printed, at P. L. Hancsom’s printing office on Madison street, and secured a proof slip of the bogus tickets. W. H. Wright, printer, and junior members of the firm of P. L. Hancsom & Co., stated that Joseph C. Mackin, secretary of the County Court-Central Democratic Club, assistant secretary, and William L. Hancson, secretary, of the County Court Democratic Club, had ordered the tickets printed and they had been delivered to him at his room in the Palmer House. Joseph C. Mackin was indicted by the federal grand jury for this offense on seven counts and the chief being from the returns of an election in which a Congressman was to be elected.

Melville E. Stone, editor of the Daily News, became convinced that the fraud was the result of a conspiracy, and made the newspapers that appeared on the surface. He procured photographs of the tally-sheet, and, after examining over one hundred specimens of handwriting, fixed upon William J. Gallagher, a saloon-keeper on State street, and a close and confidential friend of Mackin’s, as one of the conspirators. Mr. Stone swore out a warrant for Gallagher’s arrest, charging him with having forged the tally-sheet and the names of the election judges and clerks. The indictment against Mackin was dropped, and Mackin, Gallagher and Arthur R. McKee—hitherto a clerk in the County Clerk’s office, who was charged with having connived at the substitution of the fraudulent ballots while the genuine were in his custody—were proceeded against by information in the Federal Court on the relation of United States District Attorney Tuthill.

The trial was a sensational one, and resulted in the conviction of the defendants and the indictment of perjury in their behalf. Charles Emery Glimore and Jeremiah Sullivan. The prosecution was conducted before Judge Henry W. Blodgett, by District Attorney R. S. Tuthill, General J. N. Stiles, and Hon. John B. Hawley, and the defense by Judge Turtle, of Indiana, and Frank Turner for Mackin; Henry Wendell Thompson for Gallagher; Swett & Grosscup and W. S. Young for Gleason. An appeal was taken by the defendants on a petition for a writ of error, which was argued in the Supreme Court. The facts were: Judge W. Q. Gurnsey, by Emery A. Stors; the writ was refused, and the case certified to the United States Supreme Court, the defendants Mackin and Gallagher being held in bonds of $50,000 each, and Gleason in bonds of $10,000. In the meantime a special grand jury had been impanelled in the Criminal Court of Cook County, before which Mackin was summoned. He there denied having procured the spurious tickets, and the trial on perjury at the State Supreme Court continued.

The trial continued without interruption for a year, and in the end the jury found the defendant not guilty on all counts.

POLITICAL HISTORY.

On April 7, 1857, he was elected city treasurer by over one thousand five hundred majority. To the position he never had any aspiration whatever, but, on the refusal of Mr. Healy to accept the office, the friends of Mr. Devine unanimously selected him as his nominee. He was an active member of the Iroquois and Irish-American Clubs, and of the County and City Democratic Central Committees. Mr. Devine was married to Miss Catherine McNamara, of Camden, N. J., on October 1, 1869. They had six children, three sons—James A., William P., and Austin F.—three daughters, Lizzie, Arthur, Mary, Marcus A. and Gracie.

The following is a list of Senators and Representatives elected to represent Chicago and Cook County in the General Assembly since 1857:

The result of this election, and the constant repetition of frauds at the polls, brought about a non-partisan movement in favor of a new election law that would have the effect of repressing and preventing the frauds as easily as possible, and the movement were Marshall Field, A. C. Carpenter, M. E. Stone, I. N. Stiles, S. Corning Judah, A. F. Seeberger, John A. King and others.

A bill known as the "Citizens Election Bill" was intro-
duced, submitted to the Legislature, and passed. There was some doubt about the constitutionality of the measure and the manner in which it should be submitted to the voters for adoption; and in the meantime, it was to have it submitted to the voters at the fall election in November, 1855, for county commissioners and Supreme and Su-
perior Court Judges, pending a decision by the Supreme Court as to its constitutionality, representative citizens and leading members of the Bar, without reference to party connections, united in peti-
ting Judge Prendergast to issue an order directing the county clerk to submit the law at the county and judicial election. The order was issued, the law submitted and it received a majority in every ward in the city. It was also adopted by the voters of the

The following is a list of Senators and Representatives elected to represent Chicago and Cook County in the General Assembly since 1857:

During 1857–1858, the City of Chicago was governed by a Board of Aldermen, a Mayor, and a City Council.

The Board of Aldermen consisted of four members, Presidency at large. The Mayor was elected from the Board of Aldermen, and was to hold office for one year. The Council consisted of ten members, elected by the people at large, and was to hold office for two years. The Mayor and Council had power to appoint all officers of the city, and to fix their compensation.

John Moore Southworth, attorney and counsellor, is the son of Epesus and Phoebe Southworth, and was born at Bradford, York, on May 21, 1819. The Southworth ancestral tree is traceable to the oldest of English families, and their descendants first appear in this country in the records of Massachusetts for 1628. When seventeen years of age he came, with his parents, to Kane County, this State, and in the following year removed to McHenry County, where he began his education. After teaching school two years, he entered in April, 1851, for three months' service in the first regiment organized in this State,—the 7th Illinois Volunteer Infantry. Subsequently he joined the 8th Illinois Cavalry, with the rank of lieutenant. He saw active service with his regiment in the Army of the Potomac, and participated in the historical battles of Williamsburg, Manassasville, Gaines' Mill, the Seven Days' Fight, Chancellorsville, Fredericksburg, Antietam, and others. When honorably discharged in 1865, at the close of the war, he held a commission as major by brevet. Returning to McHenry County, he was elected sheriff, and afterward was made clerk of the Circuit Court. In the mean time he read law, and in 1873 was admitted to practice. He was appointed commissioner of the Julien Penitentiary shortly afterward, and filled that office nearly four years, when he located in this city, and was for two years associated with Colonel J. F. Farnsworth, M. C. Since the latter date, he has been alone in the general practice. Major Southworth's experience and observation of the criminal classes while penitentiary commissioner, induced him to inveigh against the use of cruel punishments of convicts, and, largely through his efforts, they were abolished in this State. His work in this respect was supplemented by his drawing of the Habitual Criminals Act, and subcommittee E to the General Assembly, by which was made a law. The wisdom and efficiency of this stringent procedure has been made apparent, by the effective riddance of the great majority of professional criminals from the State.
